Z	Zimmermann catalogue [Purcell]
zar(s)	zarzuela(s)
zargc	*zarzuela género chico*

Bibliographical Abbreviations

All bibliographical abbreviations used in this dictionary are listed below, following the typography used in the text of the dictionary. Broadly, *italic* type is used for periodicals and for reference works; roman type is used for anthologies, series etc. (titles of individual volumes are italicized).

Full bibliographical information is not normally supplied in the list below if it is available elsewhere in the dictionary. Its availability is indicated as follows: D – in the list of 'Dictionaries and encyclopedias of music'; E – in the list of 'Editions, historical'; and P – in the list of 'Periodicals'; these lists are located in vol.28. For other items, in particular national (non-musical) biographical dictionaries, basic bibliographical information is given here; and in some cases extra information is supplied to clarify the abbreviation used.

Festschriften and congress reports are not generally covered in this list. Although Festschrift titles are sometimes shortened in the dictionary, sufficient information is always given for unambiguous identification (dedicatee; occasion, if the same person is dedicatee of more than one Festschrift; place and date of publication; and name(s) of editor(s) if known). For fuller information on musical Festschriften up to 1967 see W. Gerboth: *An Index to Musical Festschriften and Similar Publications* (New York, 1969). The published titles of congress reports are generally reduced to their essentials, but sufficient information is always given for purposes of identification (society or topic; place and date of occurrence; journal issue if published in a periodical; editor(s) and publication details in unfamiliar cases). A comprehensive list of musical and music-related 'Congress reports' appears in vol.28. Further information can be found in J. Tyrrell and R. Wise: *A Guide to International Congress Reports in Music, 1900–1975* (London, 1979).

Library Sigla

The system of library sigla in this dictionary follows that used by Répertoire International des Sources Musicales, Kassel, as listed in its publication *RISM-Bibliothekssigel* (Kassel, 1999). Below are listed the sigla to be found; a few of them are additional to those published in the RISM list, but have been established in consultation with the RISM organization. Some original RISM sigla that have now been changed are retained here.

More information on individual libraries is available in the libraries list in volume 28.

In the dictionary, sigla are always printed in *italic*. In any listing of sources a national sigillum applies without repetition until it is contradicted.

Within each national list, entries are alphabetized by sigillum, first by capital letters (showing the city or town) and then by lower-case ones (showing the institution or collection).

A: AUSTRIA

Siglum	Library
A	Admont, Benediktinerstift, Archiv und Bibliothek
DO	Dorfbeuren, Pfarramt
Ed	Eisenstadt, Domarchiv, Musikarchiv
Ee	——, Esterházy-Archiv

A Note on the Use of the Dictionary

This note is intended as a short guide to the basic procedures and organization of the dictionary. A fuller account will be found in the Introduction, vol. l, pp.xix–xxix.

Abbreviations in general use in the dictionary are listed on pp.vii–xi; bibliographical ones (periodicals, reference works, editions etc.) are listed on pp.xiii–xviii and discographical abbrevations on pp.xix–xx.

Alphabetization of headings is based on the principle that words are read continuously, ignoring spaces, hyphens, accents, bracketed matter etc., up to the first comma; the same principle applies thereafter. 'Mc' and 'M'' are listed as 'Mac', 'St' as 'Saint'.

Bibliographies are arranged chronologically (within section, where divided), in order of year of first publication, and alphabetically by author within years.

Cross-references are shown in small capitals, with a large capital at the beginning of the first word of the entry referred to. Thus 'The instrument is related to the BASS TUBA' would mean that the entry referred to is not 'Bass tuba' but 'Tuba, bass'.

Signatures where the article was compiled by the editors or in the few cases where an author has wished to remain anonymous are indicated by a square box (□).

Work-lists are normally arranged chronologically (within section, where divided). Italic symbols used in them (like *D-Dl* or *GB-Lbl*) refer to the libraries holding sources, and are explained on pp.xxi–xxxvii; each national sigillum stands until contradicted.

Contents

B

[continued]

Borowski, Felix (*b* Burton-in-Kendal, Cumbria, 10 March 1872; *d* Chicago, 6 Sept 1956). American composer, teacher and critic of British origin. He was educated in London and Cologne and began his career in Aberdeen. In 1897 he joined the Chicago Musical College as teacher of the violin, composition and history. He became president of the college (1916–25) and then moved to Northwestern University, first as special lecturer in history and form, then as professor of musicology (1937–42). His books *The Standard Operas* (Chicago, 1928) and *The Standard Concert Guide* (Chicago, 1932), republished together in 1936, were expansions of works by George P. Upton, whose role as Chicago's leading music critic (for the *Chicago Tribune*) Borowski inherited. He was also responsible for building the music collection of the Newberry Library, beginning soon after his arrival in Chicago and continuing as a part-time staff member (1920–56).

WORKS
(*selective list*)

Stage: Boudour (ballet), 1919; A Century of the Dance (ballet), 1934; Fernando del Nonsensico (op), 1935

Orch: Pf Conc., 1914; Allegro de concert, org, orch, 1915; Elégie symphonique, 1917; 3 peintures, 1918; Le printemps passionné, 1920; Youth, 1922; Ecce homo, 1923; Semiramis, 1924; 3 syms., 1931, 1933, 1938; The Mirror, 1953

Other works: 3 str qts, 1897, 1928, 1944; 3 org sonatas; short vn pieces, incl. Adoration; short vocal and pf pieces

DONALD W. KRUMMEL

Borowsky, Alexander [Aleksandr] (*b* Mitau [now Jelgava, Latvia], 6/18 March 1889; *d* Waban, MA, 27 April 1968). American pianist of Russian birth. He received his first instruction from his mother, an accomplished pianist who had been a pupil of Safonov. Subsequently he pursued studies in law before entering the St Petersburg Conservatory, where he studied with Anna Esipova. In 1912 he was awarded the Rubinstein Prize and began his career as a soloist performing throughout Russia. Between 1915 and 1920 he taught masterclasses at the Moscow Conservatory, after which he toured extensively in Europe appearing as recitalist and soloist with most of the major symphony orchestras and conductors. In 1941 he settled in the USA, becoming professor of piano at Boston University in 1956.

Borowsky's repertory was wide and unusually eclectic, ranging from 18th-century music (Bach remained a special preoccupation) to works by Hindemith, Schoenberg, Szymanowski, Stravinsky, as well as contemporary French composers. Throughout his career he maintained a keen interest in new developments, giving the première of Lopatnikoff's Sonata in E op.29 in 1944 and often featuring works by Messiaen in his programmes. Ironically, his most extended series of recordings features the first 15 Hungarian rhapsodies of Liszt, a composer whose works he played comparatively rarely. The taste and refinement for which he was renowned, however, are evident here, as well as a distinctive tonal warmth and clarity of articulation.

CHARLES HOPKINS

Borrel, Eugène (Marie-Valentin) (*b* Libourne, Gironde, 22 Aug 1876; *d* Paris, 19 Feb 1962). French violinist and musicologist. He began violin lessons with Garcin at the Paris Conservatoire in 1888 but left in 1890 to follow his parents to Turkey. On his return to Paris about 1900 he studied at the Ecole Niedermeyer with Lefèvre (harmony, counterpoint and fugue) and at the Schola Cantorum under Gastoué (plainchant) and d'Indy (composition). In 1909 he founded, with Félix Raugel, the Société Haendel, which by 1914 had brought to the notice of the Parisian public some 150 neglected works mainly by 18th-century composers; over half were first performances. As a violin teacher at the Schola Cantorum (1911–34), he revived the neglected music of the 18th-century French violin school and violin concertos by Vivaldi and Tartini. He founded the Confrérie Liturgique in 1912, became organist at St François-Xavier in Paris in 1920 and from 1935 to 1953 was professor of music history at the newly founded Ecole César Franck. From 1935 to 1948 he was secretary of the Société Française de Musicologie.

Borrel was at the same time an organist, a journalist (between 1911 and 1929 he published many articles of music criticism in the *Tribune de Saint-Gervais*), a teacher and a musicologist. Essentially his scholarly publications fall into two categories. On the one hand, he published a number of articles on Turkish music, of which he gained a good knowledge during his stay in Turkey. The majority of his work, however, is concerned with French music of the Baroque era (the term 'baroque' was not used in France at this time). *L'interprétation de la musique française (de Lully à la Révolution)* (1934) is founded on an extensive knowledge of this repertory, which Borrel compared with contemporaneous writings (for the time an entirely new approach). Borrel also contributed to making this music known to the public, as much by numerous concerts which he organized in Paris between the two world wars as by his writings. Among his shorter writings are articles in Jacques Chailley's *Précis de*

musicologie (Paris, 1958) and Roland-Manuel's *Histoire de la musique* (ii, Paris, 1963) as well as in major encyclopedias (*EMDC*, *ES*, *FasquelleE*, *Grove5*, *MGG1*).

FÉLIX RAUGEL/MALCOLM TURNER/JEAN GRIBENSKI

Borren, Charles van den. *See* VAN DEN BORREN, CHARLES.

Børresen, (Aksel Ejnar) Hakon (*b* Copenhagen, 2 June 1876; *d* Copenhagen, 6 Oct 1954). Danish composer. Early in life he became a pupil of Svendsen, whose orchestral genius permanently influenced him. He then studied in Germany and France (1902), and lived for the rest of his life as a freelance artist, though he contributed significantly to Scandinavian musical life as an administrator; he was, for instance, chairman of the Dansk Tonekunstner Forening (1924–49).

Even in his early orchestral works Børresen showed a confident sense of form and balanced orchestration, talents which were eventually to make him the principal Danish successor of Svendsen. His Second Symphony 'Havet' belongs to the Scandinavian tradition of ocean symphonies; it is outstanding more for its lyrical tone and superior orchestral treatment than for any originality. A lyrical, eclectic approach also marked most of his later orchestral and chamber music as well as his stage works. Partly influenced by the one-act operas of Strauss and of the *verismo* composers, his conversational opera *Den kongelige gaest* has a secure scenic layout, vocally idiomatic declamation and an accompaniment that constantly carries the work forwards – qualities which made the piece an immediate success and have established it as one of the most frequently performed Danish operas of the century. His second opera, *Kaddara*, on a theme from Greenland, did not achieve the same popularity; the rest of his dramatic compositions are less substantial.

WORKS

NIELS MARTIN JENSEN

Borri, Giovanni Battista (*b* Bologna; *fl* 1665–88). Italian composer. His only published collection, *Sinfonie* (Bologna, 1688), consists of 12 sonatas for two violins, cello and organ continuo. Nine sonatas are in the four movements typical of the Corellian *sonata da chiesa* (slow–fast–slow–fast); the others are multi-sectional. Other works by him include the oratorio *La Susanna* (in *I-Fn*), and a mass (Kyrie, Gloria, Credo) for four and five voices, strings and continuo dated 1665 (in *GB-Lcm* and *Ob*). A Kyrie and Gloria for eight voices and strings (in *Lcm*) is also attributed to Borri, as are one or two other sacred pieces (in *F-Pn* and *I-MOe*). (*NewmanSBE*)

SANDRA MANGSEN

Borris, Siegfried (*b* Berlin, 4 Nov 1906; *d* Berlin, 23 Aug 1987). German composer and teacher. He studied economics at the University of Berlin (1925–7) before entering the Berlin Musikhochschule to become one of Hindemith's first composition students. In 1929 he was appointed lecturer in theory and aural training at the Musikhochschule and also began musicological studies under Schering at the University of Berlin (PhD, 1933). Borris then gave up his teaching position and for the next 12 years devoted himself to composition and private teaching. He returned to the Musikhochschule as professor in 1945 and until 1971 lectured on music history and led seminars on the analysis of new music, music education and the psychology of music; from 1967 he also served as director of the Julius Stern Institute. Central to Borris's extensive and diversified compositional output are his 'Spielstücke' and

other educationally orientated works – epigrammatic piano pieces, lively and colourful chamber and orchestral works, lieder and choral works in a traditional vocal style and youth operas to his own texts. His compositions sometimes bear the influence of Hindemith, but Borris often deliberately cultivates a clearer and simpler style in which folk music plays a role.

GEORGE W. LOOMIS

Borro, Johann Jacob. *See* PORRO, GIOVANNI GIACOMO.

Borroff, Edith (*b* New York, 2 Aug 1925). American musicologist and composer. The daughter of pianist Marie Bergersen and (Albert) Ramon Borroff, a tenor who sold carillons by trade, she was raised in a home of extraordinary musical and artistic talent. At the age of 16 she entered the American Conservatory of Music, Chicago (MusB 1946, MusM 1948), where she studied the piano with Louise Robyn and composition with Irwin Fischer. In 1958 she earned a PhD in music history from the University of Michigan. She was a visiting professor at the University of North Carolina, Chapel Hill, in 1972–3 and in 1973 joined the faculty of SUNY-Binghamton, where she taught until her retirement in 1992. Noted for her work in early music, Borroff has also championed American music, women in music and liberal arts in the 20th-century. She is the author of more than 15 books, including the comprehensive *Music in Europe and the United States: a History* (Englewood Cliffs, NJ, 1971/*R*), and more than 100 articles on wide-ranging historical and theoretical topics. Her well-crafted compositions, which span a career of over 70 years, are marked by diverse compositional styles.

JANET REGIER

Borromeo, Carlo (*b* Arona, 2 Oct 1538; *d* Milan, 3 Nov 1584). Italian ecclesiastic. His career as churchman was spectacular. Born into a well-established Milanese family, he took a degree in theology and law at Padua in 1559. When his uncle Giovanni Angelo de' Medici (of the Milanese Medici family, not the Florentine) was elected Pope Pius IV in December 1559, the young Borromeo rose swiftly to high office. In January 1560 he was made papal secretary of state and cardinal; the next month he was appointed Archbishop of Milan. Within two years he proved himself an exceptional statesman, reviving the moribund Council of Trent and guiding it to a successful conclusion in 1563, 18 years after its beginnings. From 1560 to 1565, while at Rome, he was the foremost figure in the papal government after the pope. In 1610 he was canonized.

There is ample evidence of Borromeo's interest in sacred music. In 1561–2 an exchange took pace between Rome and the ducal court of Bavaria, organized by Borromeo, Cardinal Otto Truchsess von Waldburg and Cardinal Vitellozzo Vitelli; music by Lassus was sent to Rome, and masses by François Roussel and Palestrina were sent to Munich. Cardinal Truchsess reported that Lassus's music, particularly the Masses, 'has pleased not only Vitelli in particular, and everyone here, but especially Cardinal Borromeo, who has had them copied and wishes to have them performed in the Papal Chapel'. There is no real evidence, however, that this exchange involved considerations of reform. In 1565 Borromeo and Vitelli were appointed by the pope to a commission to examine the papal choir with the object of correcting abuses. The commission examined individual singers and 13 were eventually expelled, chiefly for the poor quality of their voices. In April 1565 Borromeo and Vitelli called in the papal singers to try out some masses to 'test whether the words could be understood', as the chapel scribe put it. During the earlier part of 1565 Borromeo had written to his vicar in Milan to order the choirmaster of the cathedral, Vincenzo Ruffo, 'to compose a mass which should be as clear as possible and to send it to me here'. He also suggested that a similar mass be written by 'don Nicola della musica Cromatica' – i.e. Nicola Vicentino – so that better comparison could be made of what he calls 'intelligible music'. Whether Palestrina's famous *Missa Papae Marcelli* could also have been written at this time, and perhaps performed at this trial, is unknown, despite assertions of this point since Giuseppe Baini. On the other hand it is virtually certain that such a mass was provided in 1565 by Ruffo, as he later reported in the preface to his *Missae quatuor* (1570).

In 1565 Borromeo returned to Milan with the intention of reforming by example as resident archbishop. It was in the matter of music-making in female convents that his personal interference was most strongly felt. Initially he was motivated more by a desire to enforce strict enclosure than a distrust of music *per se*, but after an outbreak of plague in 1576 his attitude towards all frivolity, including music, hardened (Kendrick). Nevertheless, he was far from unappreciative of sacred music, over which he continued to exercise a strong influence. Ruffo remained as *maestro* at Milan Cathedral until 1572, and Borromeo's continuing influence on the composer is attested by Ruffo's posthumous masses, issued in 1592 under the title *Missae Boromeae*. Borromeo's broad personal tastes, as well as his eminent position, made him the recipient of a number of dedications, among them a volume of *Magnificat* settings by Simon Boyleau (1566) who succeeded Ruffo at the cathedral. Boyleau was in turn succeeded by Pietro Pontio and then Giulio Cesare Gabussi, who was hired for his musical virtues, in spite of Borromeo's desire for a *maestro* who was in holy orders. The cardinal gathered singers from the cathedral in his room on occasion for devotional singing and in 1584 his *familia* as archbishop included G.B. Bovicelli. Borromeo's importance for sacred music lies in the central role he played during the immediate post-Tridentine period, not just in fostering the strict chordal style of Ruffo's masses, but in encouraging reform of the liturgy, of church buildings and furnishings, and of choirs. All of these opened the way for a new vigour in Catholic sacred music from the 1580s onwards.

LEWIS LOCKWOOD/NOEL O'REGAN

Borroni, Antonio. *See* BORONI, ANTONIO.

Borrono, Pietro Paolo [Pierre Paul] (*b* Milan, *c*1490–95; *d* ?Milan, after 1563). Italian composer and lutenist. A 'Pierre Paul dit l'Italien' was listed among the *valets de chambre* of François I between 1531 and 1534; Brenet identified this man with Borrono, but Prunières disputed this on the grounds that 'Pierre Paul' was not a musician but a courtier who among other duties served the king as superintendent of works at the royal châteaux. Brenet's hypothesis becomes more credible in the light of later Italian documents, which show that Borrono was not a professional musician but a gentleman amateur. In 1542–4 he is recorded as a diplomatic agent of Alfonso

d'Avalos, marchese del Vasto, the imperial governor of Milan. In an undated document Avalos granted Borrono safe conduct to return to Milan to answer charges of maladminstration, which had resulted in his banishment. In November 1550 he was enlisted among the soldiers of the Castello Sforzesco in Milan on account of important services to the emperor. Although several letters from Cardinal Alessandro Farnese in March 1551 state that Borrono had come to Rome ostensibly to print lute music but actually to organize an attempt on Farnese's life, and that Borrono had betrayed the plans of his master Ferrante Gonzaga, governor of Milan, he in fact remained a trusted agent of the imperial government at least until the end of February 1552. Borrono and his son Giovanni Battista were associated in lawsuits in 1544 and 1559; in January 1564, 'septuagenarian and infirm', he protested having been arrested without a warrant even though the debt from the 1559 suit had been paid. He may still have been alive on 7 August 1573, when he was not called 'late' (*quondam*) in a deed referring to his son.

Borrono's works first appeared in three collections: Castiglione's *Intabolatura de leuto* (RISM 1536[10]) alongside Francesco da Milano, Alberto da Ripa, Marco dall'Aquila and G.G. Albuzio; Scotto's *Intabulatura di lauto … libro secondo* (RISM 1546[30]) together with Francesco; and a volume issued by both publishers in 1548, which Borrono also shared with Francesco. For Scotto this was *Intavolatura di lauto … libro ottavo*, and only Borrono was named, but Castiglione's *Intavolatura di lauto … libro secondo* named Francesco first; it was dedicated and published by Borrono's son Giovanni Battista, and Scotto's version is probably a reprint. Borrono's works comprise six fantasias and 18 dance-suites, typically consisting of a pavan followed by three saltarellos; some suites have only one or two saltarellos, and five of the suites in the 1536 anthology conclude with a toccata. One pavan and its first saltarello in the 1546 book have an optional part for a second lute. The 1548 collection contains intabulations of five chansons and two motets, ascribed to neither Francesco nor Borrono but almost certainly by the latter.

Borrono's works were reprinted abroad, in the Netherlands by Phalèse as late as 1573, and in Germany by Gerle and Wyssenbach. The preface to the collection of 1546 contains instructions for reading tablature, an interesting description of the finger technique to be used for sustaining one note while the other parts in the composition continue. The preface also introduces two different rhythmic symbols which are both common, but are rarely found in the same publication. Borrono undoubtedly knew Alberto da Ripa, who was at the French court from 1529; he may have met Cabezón, who, while on a visit to Italy and the Netherlands in 1549, attended entertainments given in the house of Ferrante Gonzaga.

Borrowing. Many musical compositions incorporate material from one or more earlier works. The procedures and significance of borrowing vary between repertories and over time. The history of borrowing in Western music has yet to be written, but its general outlines can be traced through the repertories that have been studied.

1. Types of borrowing. 2. Medieval monophony. 3. Polyphony to 1300. 4. 14th century. 5. Renaissance mass cycles. 6. Other Renaissance sacred music. 7. Renaissance secular music. 8. The Baroque era. 9. Reworkings and issues of originality. 10. Late 18th century. 11. 19th century. 12. 20th-century art music to 1950. 13. Art music after 1950. 14. Popular music, jazz and film music. 15. Research on borrowing.

1. TYPES OF BORROWING. A new piece may use or refer to existing music in various ways. It may feature qualities identified with another tradition, as when a modern symphonic work incorporates sounds and gestures from jazz or Baroque music. A piece for one instrument may use figuration typical of another, such as fanfares in a piano sonata. Within a tradition, a piece may use common melodic formulae and formal conventions. Most broadly, all music draws on the repertory of notes, scales, gestures and other elements available in that tradition, so that every piece borrows from earlier pieces in its own tradition. Thus in the widest sense the history of borrowing in music is the history of improvisation, composition and performance.

The study of borrowing in music focusses, not on this broadest level of interrelations, but on the use in a new composition of one or more elements from a specific piece. Musical borrowing has typically been studied as an issue related to a particular repertory or genre, such as the Renaissance mass or the 20th-century avant garde, or to a particular composer, such as Handel or Mahler. Yet the use of existing music as a basis for new music is pervasive in all periods and traditions, parallel to and yet different from the practices of borrowing, reworking and allusion that contribute to the formation of traditions and the creation of meaning in literature, architecture, painting and sculpture.

In order to cultivate a view of the subject that is not bound by individual traditions, periods or genres, it is useful to establish a typology based on a simple series of distinctions. Table 1 (adapted from Burkholder,

TABLE 1: Elements of a typology of musical borrowing

1. What is the relationship of the existing piece to the new piece that borrows from it?
   - *type*
     - of the same genre, medium, style and musical tradition
     - of a different genre, medium, style or musical tradition
   - *texture*
     - a single-line melody used in a new monophonic melody
     - a single-line melody used in a polyphonic work
     - a polyphonic work used in a new polyphonic work
   - *origin*
     - by the composer of the new piece
     - from the same circle of musicians
     - by a contemporary from another place or circle
     - from a distant place
     - from an earlier time
2. What element or elements of the existing piece are incorporated into or referred to by the new piece, in whole or part?
   - the full texture
   - a combination of parts that is less than the full texture
   - a melodic line, gesture or contour
   - a rhythmic figure
   - an aspect of harmony, such as a chord progression, striking sonority or pitch collection
   - the form or a formal device
   - texture
   - instrumental colour
   - other parameters
3. How does the borrowed material relate to the shape of the new piece?
   - provides the structure, virtually unaltered, but other features are changed enough to create a new entity
     - contrafactum (change of text)
     - transcription or arrangement (change of performing forces)
     - intabulation or arrangement (change of medium and figuration)
   - provides the structure and is varied or altered
   - melodic paraphrase
   - variation embellishment or ornamentation
   - forms the basis of the structure or of a melodic line, with new material added or interpolated
     - trope
     - refrain
   - serves as a structural line or complex to which other parts are joined contrapuntally
     - organum (of every kind)
     - medieval motet
     - cantus-firmus composition
     - paraphrase (hymn paraphrase, paraphrase mass)
     - setting
     - arrangement
   - used as a theme, including extension and development
     - for variations
     - for a dance movement
     - for sonata form, rondo, fugue or other form
     - for a march
     - in a fantasia
     - for a cumulative setting
     - for improvisation, as in jazz
   - provides material (motifs, structural ideas, contrapuntal combinations etc.) that is freely reworked
   - used as a motif
   - appears once, marking a significant event in the form
   - appears once, in passing
   - combined linearly with other borrowed (and some new) material
     - linear quodlibet (successive, homophonic)
     - medley
     - patchwork
   - combined contrapuntally with other borrowed (and some new) material
     - polyphonic quodlibet (simultaneous)
   - part of a collage involving borrowings from many works
4. How is the borrowed material altered in the new piece?
   - complete and not altered
   - incomplete but otherwise not altered
   - minimally altered
   - embellished or ornamented
   - melodically paraphrased or restructured
   - substantially reworked
   - appears only in fragments
   - placed in a new context, changing its effect
   - used as a theme, perhaps not greatly altered when presented as a theme but elsewhere developed and fragmented as themes are changed to conform to a new function (e.g. as a cantus firmus in long notes, or a folktune reworked as a theme)
   - disguised
   - only alluded to, with a similar gesture, without itself being incorporated
5. What is the function of the borrowed material within the new piece, in musical terms?
   - *initial*
     - served the composer as a starting initial point for composition (often literally, if the new piece begins like the model)
   - *structural*
     - forms the basic structure of a single line
     - is incorporated as an element in a principal melodic line
     - is the structural basis for a polyphonic work

TABLE 1 continued

serves as one contrapuntal line among several
provides a model for the structure of the new piece
thematic
serves as a theme or part of a theme
serves as a leading melody or part of a leading melody
serves as a motif
other event
marks a major event, such as a culmination or highpoint
is a passing gesture, neither thematic nor structural

6. What is the function or meaning of the borrowed material within the new piece in associative or extra-musical terms, if any?
motivated by a text or programme
represents a performance of the borrowed piece or a piece of its type
appears with its text, which has a particular extra-musical significance
appearance (without text) evokes part or all of the text with which it is normally associated, conveying an extra-musical meaning
symbolizes something or someone associated with it or with pieces of its general type
descriptive
lends a certain character to a passage, through the associations it carries
alludes to the source work or its composer
pays homage to its source (work or composer)
comments on or suggests parallels to its source
exemplifies or indicates competition between the composer of the new piece and the composer of the existing piece
critiques or negates its source
part of a collage
helps to create a stream-of-consciousness effect
varies with the listener
has special significance for certain groups or individuals and different or no associations for others
associations have changed over time

(A1993–4) offers a multidimensional system of categories delineated by the most fundamental questions about any instance of musical borrowing in new compositions or improvisations. Some answers are listed here; others are possible.

The table is framed in terms of relationships between one piece and another; it is the composer or improviser who creates these relationships and the listener who recognizes them. It is possible, even frequent, for composers to borrow material that listeners may not recognize and for listeners to hear similarities composers did not intend. Much of the scholarship on borrowing directly engages these issues of recognition and intent, identifying hitherto unsuspected relationships and presenting evidence to support the claim that borrowing has occurred, beyond subjective impressions.

Any piece that makes use of borrowed material may fit into more than one category, for most categories are not musically exclusive. For example, a distinctive instrumental timbre and texture, a melodic contour and a formal plan may all be borrowed from the same source, as in the slow movement of Ives's First Symphony (*c*1898–1908), whose english horn theme over sustained string chords paraphrases that of Dvořák's *New World* Symphony and whose form adapts that of the Dvořák movement.

Such a system allows the classification of both common and exceptional types, highlights important distinctions and facilitates interpretation of the borrowing's significance and meaning:

(*a*) The process of composition, when using a piece of the same tradition, genre, medium, style and texture as a source for a new piece, as when Monteverdi modelled his madrigal *Non si levava ancor* on Marenzio's *Non vidi mai*, is distinct from the process of using a piece that differs in these ways from the new composition, as in a lute intabulation of a polyphonic chanson or a symphonic movement based on a folktune. The significance of borrowed material depends in part on who or what is borrowed from: that may be the composer himself, as in several Mahler symphonies; other composers of the same circle, as when Clara Schumann and Brahms both wrote variations on a theme by Robert Schumann; music of a distant place, as when Puccini borrowed Chinese melodies for *Turandot*; or music of an earlier time, as in numerous works of Peter Maxwell Davies.

(*b*) Listeners respond differently and attribute different meanings to music that borrows the full texture of another piece, as does Stravinsky's *Pulcinella*; a melodic line, such as the Russian folktunes in his *Petrushka*; a texture, as in the evocation of Debussy's *Nuages* at the opening of Part II of *The Rite of Spring*; or an instrumental colour, such as the english horn in the latter at the 'Ritual Action of the Ancestors', again echoing *Nuages*. Distinctions between widely recognized broad categories of borrowing, such as quotation, allusion and modelling, often depend upon what elements of the source are present in the new piece.

(*c*) The process of composition and the structure of the resulting piece are vastly different if a borrowed tune forms the basis of a new melodic line with interpolated music, as in troped chant; if it creates a structural line to which other parts are joined contrapuntally, as in Notre Dame organum; if it is treated as a theme, as are the Russian tunes in Beethoven's Razumovsky Quartets, the popular tunes used in mid-19th-century American marches, or the hymn tune in Vaughan Williams's Fantasia on a Theme by Thomas Tallis; or if it appears once in passing, like the fragments of *La Marseillaise* in Debussy's *Feux d'artifice* and in the Beatles' *All you need is love*. The use of a standard genre or procedure of borrowing, such as contrafactum, cantus firmus, variations, quodlibet and others listed in Table 1, can clarify the composer's intent and compositional process and make the significance more apparent to the listener.

(*d*) The recognizability, character and effect of the borrowed material vary according to how it is adapted in the new piece, from the minimal alteration of a Bach chorale harmonization to the ornamentation of a chorale prelude, the free paraphrase of an aria based on a chorale or the use of a chorale as a cantus firmus against unrelated material.

(*e*) The relative importance of a borrowed element in musical terms is greater if it plays a structural role, such as a borrowed tune used as a cantus firmus or theme, than

if it is a passing gesture, as are the folksongs briefly quoted in Bach's Goldberg Variations. In some genres, such as the 13th-century motet or the chorale partita, the borrowing is basic to the definition of the genre; in others, such as fugue, symphony or variations, a borrowed or paraphrased theme is possible but not required; in others, such as French *grand opéra*, overt borrowing is unexpected and constitutes a special effect, as in the appearance of 'Ein' feste Burg' in Meyerbeer's *Les Huguenots*.

(*f*) Finally, the extra-musical associations aroused by borrowed material may vary greatly in kind, from suggesting a performance of the borrowed piece, as in Beethoven's *Wellingtons Sieg*, to lending a certain character to a passage, as in his use of folktunes in the 'Pastoral' Symphony; critiquing or negating the music that is borrowed, as Kagel deconstructs various Beethoven works in *Ludwig van*; or creating the effect of a stream of consciousness through a collage of numerous quotations, as in the third movement of Berio's *Sinfonia*. Often several effects are achieved at once; the chorale in *Les Huguenots* simultaneously establishes a historical period, sets a religious context and delineates character. Extra-musical associations will vary with the listener. Americans may hear Beethoven's Variations on *God Save the King* (1802–3) as variations on *America*, which uses the same tune, and the borrowings in Berg's *Lyric Suite* (1925–6) and Violin Concerto (1935) had particular resonance for the composer as part of a private programme. Associations can change over time; Haydn's variations on his own song *Gott erhalte Franz den Kaiser* in his 'Emperor' Quartet op.76 no.3 would have been hard to hear during World War II without thinking of *Deutschland über alles*, the German anthem on the same melody, and the ideology of the Nazi government, lending the work potential meanings that Haydn could not have envisaged. The variety of associations listeners may have opens up music to new interpretations and can stimulate research to discover the meanings that may have been intended by the composer or perceived by the work's first audiences.

These questions also establish a basis for evaluating when borrowing has occurred:

(*a*) The case for borrowing is stronger when it can be proved that the composer knew or had access to the existing piece. This requires biographical evidence that will vary with the relationship of the new piece to the existing one, from establishing chronology within the composer's own works to showing contact with other musicians or knowledge of music the composer studied, performed or heard.

(*b*) What and how much is borrowed is an important factor in proving a relationship between two pieces. The more elements of an existing piece present in a new one, the more unusual or individual the elements that are shared, or the more extensive the similarity within a parameter, the more convincing will be a claim that borrowing has occurred. Non-musical factors such as textual quotations or similarities can provide further evidence.

(*c*) Evidence for borrowing will be evaluated differently, depending on what kind of relationship is being asserted. Some studies have demonstrated that what others have identified as a passing quotation is instead the most overt sign of a deeper structural relationship. The more the borrowing conforms to widely understood types and procedures, the more readily it is likely to be recognized and accepted. Indeed, in some genres borrowing is so frequent that it is assumed until disproved; in a medieval motet, for example, the appearance of a melody in the tenor is normally taken as evidence of its prior independent existence as a monophonic tune even if no other source has been found.

(*d*) The extent and exactness of the similarities between the new and older pieces affect judgments of whether borrowing has occurred. On the one hand, a thorough reworking, disguised borrowing or subtle allusion is more difficult to hear and to prove than a direct parallel; on the other hand, a work that changes its source very little may be heard as a performance, transcription or arrangement of the original, rather than as a new piece based on borrowing. (Since this distinction is not stable through time, the ensuing history of borrowing will include transcription and arrangement and will note ambiguities between borrowing and performance.)

(*e*) Proof of borrowing is incomplete until a purpose can be demonstrated. If no function for the borrowed material can be established, its use remains a mystery and the resemblance may be coincidental. Reliance on the borrowed material as a theme, structural element or point of prominence makes its function clear. When sketches or drafts are available, they may demonstrate that the composer used the existing music as a starting-point and may clarify the intended role of the borrowed material if it is disguised.

(*f*) Interpreting the associative or extra-musical meaning of the borrowing can also clarify its function and support a claim that borrowing has occurred. This is especially important when the borrowed material lacks a clear, purely musical function or seems to be introduced arbitrarily; indeed, these are often signs that an extra-musical interpretation is intended.

The questions in Table 1 centre on the piece itself, as is appropriate to a typology, but the context in which the borrowing occurs should also be considered in studying individual cases and in tracing a history of borrowing in music. Among important aspects to consider are contemporary attitudes towards various uses of existing music in new pieces; the sense of ownership, if any, attributed to the original composer of a piece, as opposed to those who rework the same material in performance or new compositions; the artistic purposes served by borrowing in a given genre or era; elements of the culture or of musical practice that encourage certain kinds of borrowing or discourage others; and what the use of a piece as a source for another and the way it is used might reveal about the reception of the earlier piece and the way it was regarded. Such questions move beyond a typology towards a fuller evaluation of borrowing within the history of music.

See also ALLUSION; ARRANGEMENT; MODELLING; QUOTATION; and TRANSCRIPTION.

2. MEDIEVAL MONOPHONY. The concept of borrowing elements from one piece to use in another depends on the idea of the piece itself. Accordingly, the traceable history of musical borrowing begins in the medieval repertories of liturgical chant for the Byzantine, Roman and Ambrosian rites, the first surviving large bodies of music in which individual pieces were fixed in notation.

Commonalities among chants within and across these repertories testify to ongoing processes of re-using and reworking melodic material that probably extend back to the earliest Christian observances and their Jewish

predecessors. Similarities of contour in some chants of the same mode and function suggest that they were elaborated from an existing reciting formula, sometimes linked with characteristic melismas; this can be seen for example in Gregorian tracts, which are typically based on one of two melodic formulae. Other chants of the same mode and type share melodic figures, suggesting processes of improvisation or composition by combining existing units of melody, called centonization; this is common in melismatic chants such as the gradual and alleluia in the Gregorian repertory. Some melismas were relocated from one chant to another. Existing melodies were also adapted for new texts (e.g. for antiphons and hymns), and the different chant repertories have individual variants of melodies for certain texts, indicating adaptation either one from another or both from a common source.

In all these cases, the existing piece being adapted is of the same type as the new piece (although it does not always share the same liturgical function), has the same monophonic texture, and derives from an earlier period in the same broad tradition; the melodic substance of the earlier piece is taken over in whole or large part, providing the structure for all or part of the new melody, but is altered to suit the new text and circumstances and perhaps local stylistic preferences; re-use of melodic material is the standard procedure for creating new works; and ownership is not attributed to those who created the earlier piece, who are in most cases unknown, but is assumed by those who use the music and by the church it serves.

Chants composed after notation had standardized the repertory provide the earliest examples of borrowing in which both the new piece and the source are fixed in notation and thus can be studied. Processes of adaptation, re-use and reworking similar to those in the older layers of the repertory are apparent in newly composed tracts, graduals, office antiphons and other genres of chant. For example, the chants of the new Feast of Corpus Christi, first celebrated in 1247 and liturgically codified over the next several decades, were adapted from chants of the same type with different texts, drawn from more than a dozen other feasts; some were greatly altered, others changed only minimally (Mathiesen, B1983).

Authorized chants in the Gregorian rite were often augmented in the 9th to 13th centuries through the addition of melismas (sometimes borrowed from other chants), the application of new words to existing melismas or the addition of new words and music before a chant or before each of its phrases. The third type was called a trope, a term often used for the other two types as well. The added text elaborates on or explains the original text, like a gloss on scripture. The addition had practical uses, in explaining the relation of the liturgical text to the feast day or clarifying a theological issue, but adding music or poetry also lent greater artistry to the celebration of a feast. Some tropes borrow from or rework music and text from other tropes, in a process akin to the adaptation of chant. Not surprisingly, the practice of troping seems to have originated or to have been widely practised only after the texts and music were as fixed as the scriptural canon itself, especially in the areas in which the Gregorian rite had been standardized under Charlemagne. The addition of text and music was perhaps less an act of creating a new work through borrowing than it was the performance of an existing work with accretions, like an embellished opera aria or a concerto with a new cadenza, and like these it may have been an avenue to exhibit creativity in performing music that was otherwise fixed.

The account in Notker's preface to his *Liber hymnorum* (884) of the development of the sequence characterizes this form as a kind of trope, applying new text to the jubilus melismas of alleluias. But the actual relationship of Notker's and other early sequences to existing alleluias shows not a simple application of text but a reworking of the borrowed melody, often followed by or interpolating new material or involving internal repetition; ex.1 compares the first two verses of Notker's *Christus hunc diem* with its source, *Alleluia, Dominus in Sina*. Many sequence and hymn melodies were re-used or adapted for new texts in a process of contrafactum or for German translations of the original Latin.

Contrafacta also appear in the secular monophonic repertory. In some cases a new song borrows the melody and part of the text of an existing one, in an act of tribute or perhaps competition; for example, the melody and first line of Gautier de Coinci's *Amours dont sui espris* are taken from Blondel de Nesle's song of the same title. Raimbaut de Vaqeiras is said to have improvised his *Kalenda maya* to a melody he had heard played by jongleurs. Some German Minnelieder are contrafacta or adaptations of troubadour or trouvère songs, and secular melodies were often given sacred Latin texts. Other songs rework existing melodies more freely. Some French songs

from the mid-12th to mid-14th centuries incorporate a refrain, an aphoristic text set to a short melody that appears in more than one song and may also appear alone or in a motet. In these secular repertories, it is unclear whether a melody was considered to belong with a certain text or to the poet-composer as its author; if so, the borrowing or adaptation of a melody may indicate that it was regarded as especially worthy of re-use and imitation. Alternatively, melodies may have been regarded as common property, available for reworking to suit new texts. Indeed, there may not yet have been a concept of authorship for music, as there was for poetry; manuscript attributions apparently refer to the poet rather than the composer, to judge from the many trouvère poems that survive with two or more different melodies yet with attributions to the same trouvère.

3. POLYPHONY TO 1300. The major forms of polyphony to 1300 – organum, discant and motet – were all based on existing melodies, usually chant. Thus the early history of polyphony is largely a history of musical borrowing. The polyphonic versus and conductus are the main exceptions, as they were not based on chant, but early polyphonic examples may have been adapted from monophonic versions, and some conductus borrowed from existing polyphony.

It has been suggested that liturgical polyphony was an extension of the idea of troping: an embellishment of the prescribed chant, adding music not before or between phrases of the chant but simultaneous with it. If true, this shows a conceptual commonality between two uses of existing music that might seem to have nothing in common in procedure or style.

If troping may be considered a performance of an existing work with accretions rather than the creation of a new work through borrowing, early polyphony was arguably also a manner of performance rather than a kind of borrowing. Singing a chant with a drone or in strict parallel octaves, 5ths or 4ths does not result in a new piece but rather in a different way of presenting an existing one. This is still true of the mixed parallel and oblique organum described in *Musica enchiriadis* (*c*850–900), whose rules generate the added voice or *vox organalis* almost automatically below the chant melody or *vox principalis*. In each of these styles, the polyphony enhances the presentation of the existing chant; the added voice lends greater resonance and thus weight and solemnity, and the use of a drone or oblique motion closing on a unison heightens the sense of melodic direction and cadential closure and thus clarifies the phrase structure.

11th-century organum suggests a tradition that could be conceived as either a method of improvised performance or a style of composition. The style of mixed parallel and oblique organum described in Guido of Arezzo's *Micrologus* (1025–6) opened more options to singers than that of *Musica enchiriadis*, requiring more choices to be made before performance if it was to be sung by a group. Practical sources such as the Winchester Troper (first half of 11th century) included pieces in this style that were fixed in notation, the first polyphony to appear outside treatises, apparently crossing the line from a manner of performance to a compositional method based on borrowing. The new style of free organum that emerged in the later 11th century, described in *Ad organum faciendum* (*c*1100), may still have been regarded as a style of performance, as a soloist could improvise a suitable organal voice (now above the chant and moving mostly in contrary motion with perfect consonances between the voices) by following the rules laid out in the treatise. But practical sources as early as the Chartres fragments (*F-CHRm* 4, 109 and 130, late 11th century) include written works in this style which may be viewed as pieces based on borrowed chant; so too may the examples recorded in the treatises, such as the setting of the troped *Kyrie 'Cunctipotens genitor'* from *Ad organum faciendum* (ex.2). The placement of the added voice above rather

Ex.2 *Cunctipotens genitor* from *Ad organum faciendum*

than below the chant makes the new melody more prominent, but it still adds resonance and clarifies the phrasing, now marked by more frequent cadences on unisons or octaves. It appears that this kind of polyphony was intended for soloists; for example, only the solo portions of *Alleluia, Justus ut palma* (the opening of the respond and all but the final word of the verse) are set in polyphony in *Ad organum faciendum*. From this point until well into the Renaissance, polyphony seems to have been reserved for soloists, although this is not clear in all instances. When the original chant was performed in alternation between soloists and choir (as in responsorial chants) or between half-choirs (as in Kyries and Kyrie tropes), the polyphonic setting alternates between polyphony and choral monophony, so that the form of the source tune continues to shape the new piece.

The subsequent development of polyphony based on chant moves decisively to a composed rather than improvised tradition, representing the creation of new pieces through borrowing rather than ways of performing existing music. Aquitanian polyphony, as shown in manuscripts from the early 12th century at the monastery of St Martial in Limoges, features the first known examples of florid counterpoint, in which several notes in the upper voice are sung against a single note in the lower voice. The Codex Calixtinus (*c*1170) from Santiago de Compostela includes a setting of *Cunctipotens genitor* in this style, excerpted in ex.3 (*see* SOURCES, MS, §IV, 3). A comparison between this and ex.2 shows a similar preference for perfect consonances, contrary motion and cadences at the unison or octave, but the greater freedom and faster motion of the upper voice now make it the focus of interest, instead of the slower-moving lower voice that carries the chant. The result is music in which more is new than old, and it is likely to be heard as a new piece based on borrowed material rather than as a performance of the chant with accompaniment. Here the new piece has

the same liturgical function as the old, incorporates it whole and adopts its structure, while augmenting the durations of the original melody and cadencing more frequently. This reflects a context in which the chant was liturgically required but a polyphonic setting could be substituted, at least for those portions performed by soloists, and might be preferred over the naked chant because of its greater sonority and decorative beauty.

These same characteristics hold true for the *Magnus liber* created by Leoninus about 1163–82 and later revised by Perotinus and others of the Parisian Notre Dame school, which sets the solo portions of graduals, alleluias and responsories for the major feasts of the liturgical year in two-part counterpoint. This represents perhaps the first attempt to create a coherent repertory based on musical borrowing, embellishing the specially important services with the most elaborate polyphony yet heard. Here segments of florid organum alternate with sections of discant called clausulae, in which the lower voice borrowed from chant moves almost as rapidly as the upper voice or duplum. Later portions of the repertory clearly use the rhythmic modes, and the discant sections of Leoninus's settings use at least the 1st mode; the notation is ambiguous in the sections in organal style. In both organum and discant sections, cadences occur much more frequently than in the original chant, and the structure is more dependent on cadences between the voices and on the alternation of organum and discant style than on the original phrasing of the chant. In some of the discant sections, the chant is set in a repeating rhythmic pattern, and a segment of the melody may be repeated with new material in the duplum (*see* MAGNUS LIBER, ex.2), foreshadowing the isorhythmic procedures of the 14th century. This is the earliest application of abstract structural compositional principles to borrowed material, the first time in polyphony that the borrowed melody is reshaped to create a new form rather than determining the form of the music.

Within this repertory, we also see the earliest apparent tradition of refashioning polyphonic works, as later composers freely reworked Leoninus's music or substituted new sections of discant or organum for passages based on the same segment of chant. These include three- and four-voice settings by Perotinus and perhaps others. In some cases a third voice or triplum is added above an

Ex.3 *Cunctipotens genitor* from Codex Calixtinus

existing two-voice discant clausula, a form of reworking through addition that continued up to the 15th century. Some manuscripts contain several alternative settings of the same passage, so that the performance of a liturgical item in any year might draw on a different concatenation of sections in organum and discant, so long as the entire chant is present in the lower voice. This suggests a view of the *Magnus liber* as common property, a fund of possibilities to be used at the discretion of the singers and reworked at will.

These ideas of reworking existing polyphony and drawing on a common fund of polyphonic music continue in the early motet. The first motets were created (probably in the early 13th century) by fitting a poetic text to the duplum of a discant clausula, combining the traditions of polyphony and the textual trope. This represents at least two layers of borrowing, as the clausula borrows a segment of chant for its lower voice (and may borrow its rhythmic patterning from an earlier clausula on the same melody), and the motet borrows the entire musical fabric of the clausula, sometimes adjusting the notes to fit the text. Early motet texts often related to the theme of the chant or feast from which the tenor was taken and reflected the syllables of the original text through assonance, in the tradition of textual tropes, which shows the influence of the borrowed material on text as well as music. A motet may be reworked in turn, adding a third voice with the same or another text or replacing the first text with a new one; this occurred frequently as motets travelled to England, Germany, Italy and Spain over the course of the 13th century. In comparing related motets, it is not always clear which is the source and which the reworking, prompting some scholars to prefer the term 'intertextuality' to 'borrowing' for this repertory.

Once the motet was established as a genre, new ones were composed that were not derived from clausulae, typically featuring two voices, each with its own text, above a tenor taken from chant. Later texts might be secular or sacred and in French as well as Latin, and were less often related in subject or sound to the text of the tenor. Melodies for later motet tenors were borrowed from a range of chant, not solely the responsorial melismas of the discant clausulae; some even used French vernacular tunes in their original rhythm. Thus the motet grew away from its original context and became an independent genre based on a borrowed melody.

Borrowing was so intrinsic to the motet that it also occurred in the upper voices, which in some cases borrowed from refrains or chansons, sometimes requiring adjustments to the tenor. The refrain cento combined several refrains in a tenor or other part, while the *motet enté* was a subgenre in which a borrowed refrain (both text and melody) served as a point of departure for textual and musical expansion. Borrowing and reworking also ran in the other direction, as parts of some motets were reworked as chansons.

During the later 13th century the tradition of reworking existing motets as if they were common property gave way to the composition of new motets with individual features, spurred on by the more exact notation of Franco. Both the interest in novel tenors, such as the street cry 'Fresh strawberries!' in the anonymous *On parole/A Paris/Frèse nouvele*, and the heightened rhythmic complexity in the upper voices of motets in the style of Petrus

de Cruce, suggest a concern for creating pieces based on borrowed material but marked by individuality.

Throughout the development of medieval polyphony, borrowing from chant was clearly a given, and the later borrowing of secular tunes for motet tenors or refrains was a variant on the long-established practice of using chant melodies. The medieval concept of music encouraged borrowing, in accord with related practices of glossing scripture and other texts, decorating manuscripts and revisiting common themes in art and architecture. Even in reworking polyphonic music to create a motet from a clausula or a new motet from an existing one, when the composer of the original may have been alive and known to the reworker, there was apparently no sense of ownership or deference to the music's original form to impede this process. The constant stream of new music based on old music testifies to a simultaneous regard for tradition and renewal.

4. 14th century. In 14th-century Ars Nova motets, the chant is laid out in isorhythm, which codifies in the concepts of talea and color the repeating rhythmic patterns and melodic segments of earlier clausula and motet tenors. In the isorhythmic motet, the systematic use of borrowed material to create an abstract musical structure reaches its first peak. Vitry's taleas are often rhythmically complex and each motet is highly individual in structure and proportion.

Machaut and other composers used specific Vitry motets as models, emulating aspects of their structures while apparently seeking solutions that were equally individual. Machaut's *Aucune gent/Qui plus aimme/Fiat voluntas tua* borrows the talea, color and structural elements of Vitry's *Douce playsence/Garison/Neuma* (Leech-Wilkinson, C1982–3). Often the later work expands upon a concept or plan used in the earlier one. This is an early instance of a tradition that endures to the present, of using a specific work as a model for a new one while simultaneously doing something new and different. Moreover, it shows that composers were beginning to borrow aspects of music other than melodies, in this case features of the isorhythmic design. Such borrowing between motets continued, along with the isorhythmic motet itself, until about 1440 (Allsen, C1992). The recognition of an individuality worth emulating in a particular piece by a particular composer suggests a radical change in the sense of ownership, at least in this repertory, from the common fund of musical material characteristic of Notre Dame organum and early motets to an attribution of certain musical ideas as belonging to an individual composer or work. This is confirmed by the increasing tendency of scribes and theorists in the 14th and 15th centuries to attribute works to particular composers in music manuscripts and treatises, in contrast to the longstanding general practice of anonymous transmission. The study of borrowing is marked from this point onward by the contrast, not always easy to map, between use of material that is collectively owned and available and emulation of ideas that are identified with a particular composer or work. What is particularly interesting here is that it is often the structure, not the melodies, that is seen as individual and worthy of emulation. In addition, some motets borrowed or quoted texts from earlier motets, and this may have been as significant as the musical borrowings in shaping the work.

The 14th century also saw the rise of polyphonic settings of texts from the Mass Ordinary, including the complete Ordinary cycle in Machaut's *Messe de Notre Dame*. Here the Kyrie, Sanctus, Agnus Dei and *Ite missa est* are set in isorhythmic style with liturgically appropriate chants in the tenor (the Kyrie, excerpted in ex.4, uses the same chant melody as in exx.2 and 3); the Gloria and

Credo are each in conductus style without borrowed material, closing with an isorhythmic Amen. Of the many other settings of Ordinary texts, some share musical material, suggesting in some cases an attempt at musical unification between movements of a mass now separated in the manuscripts, and in other cases borrowing through a combination of contrafactum and reworking. One of Ciconia's Gloria–Credo pairs is based on his motet *Regina gloriosa*, and Antonio Zacara da Teramo borrowed material from his secular songs in several mass movements, anticipating the cantus-firmus/imitation mass of the later 15th century.

Several 14th- and 15th-century treatises describe a distinctive English tradition of improvised discant applied to chant in note-against-note fashion. While this seems to have begun as a manner of performance rather than of composition with borrowed material (as discussed above in relation to early polyphony), it led in the 14th and early 15th centuries to discant compositions in three parts with the chant in the middle voice.

Outside the motet, secular polyphonic music of the 13th and 14th centuries was most often composed without borrowed material, but borrowing does occur. Contrafacta appear in the polyphonic as well as monophonic repertory; for example, many of Oswald von Wolkenstein's polyphonic lieder are contrafacta. In addition, some late 14th-century French chansons quote text and music from others, perhaps continuing a tradition stretching back to the troubadours of poems and songs that quote and respond to earlier ones; for example, *Phiton, Phiton* by Magister Franciscus quotes from Machaut's ballade *Phyton, le mervilleus serpent*, and Ciconia's *Sus une fontayne* quotes the beginnings of three ballades by Philippus de Caserta (Günther, C1972).

The 14th century also saw the earliest surviving instrumental works based on musical borrowing. These are intabulations of vocal music for keyboard, arrangements that normally include most or all voices of the model, sometimes redistributing notes or omitting an inner voice the better to fit the hands, and add melodic decorations, especially in the upper voice, apparently reflecting improvisatory practice. Intabulations may have arisen from a practice of transcribing vocal works, normally written in separate parts in choirbook format, into tablature, so that keyboard players could perform more than one part at a time; such transcriptions might be better considered a performing realization of the existing work rather than a new work based on borrowing. The earliest intabulations, three motets from the mid-14th-century Robertsbridge Manuscript (*GB-Lbl* Add.28550), already transcend these limits with the ornamentation of the upper voices and should be considered separate pieces based on reworking borrowed material (*see* ARRANGEMENT, ex.1). Examples from later in the century, such as those in the Faenza Codex (*I-FZc* 117) on French and Italian secular songs, are highly embellished, showing the skill of the composer and providing a challenge to the performer.

The uses of chant in the 14th century extend earlier practices of embellishment, and contrafacta and intabulations of vocal polyphony continue in new forms the longstanding tradition of reshaping existing music for a new use. But the growing recognition of the individual in 14th-century culture is reflected in the emergence of works that explicitly engage in dialogue with earlier works, in both the motet and chanson repertories. In attempting to outdo Vitry in an aspect of isorhythmic structure, Machaut acknowledged the individuality and craft of his predecessor and attempted to proclaim his own.

5. RENAISSANCE MASS CYCLES. Isorhythmic motets, settings of texts from the Mass Ordinary and Proper, and works in English discant style continued to be composed up to the mid-15th century. But new genres based on borrowed music and new methods of reworking emerged in sacred and secular contexts, in both vocal and instrumental music, during the next two centuries.

Works of the early 15th century based on liturgical chant often place it in the superius rather than the tenor and present it in paraphrase, altered and embellished without obscuring the contour and phrasing of the original. Essentially, these are settings of the paraphrased chant with simple accompaniment. As in earlier polyphonic elaborations of liturgical chant, the new work serves the same liturgical function and takes its form from the chant, but adds resonance, solemnity and artistry; the placement of the chant in the upper part preserves its prominence, while the lower parts reinforce the cadences through directed contrapuntal motion. In Du Fay's setting of *Kyrie 'Cunctipotens genitor'* (ex.5, on the same chant as in exx.2–4), the superius is paraphrased from the chant and accompanied in the style of fauxbourdon, in which the tenor mostly parallels it a 6th below and a middle voice follows the superius a 4th below. Paraphrase was a new manner of treating chant. Previously chant had been the foundation, from organum to the isorhythmic motet, but here it is the melody, reshaped to fit the new melodic style, including Du Fay's typical rhythmic variety and cadential figuration. Reworking existing melodies through paraphrase became characteristic of the Renaissance and has continued as a prominent method of borrowing ever since, from the elaborations of *Christ lag in Todesbanden* in Bach's Cantata no.4 (see ex.11 below) to the recasting of folk and popular melodies as themes in the music of 19th- and 20th-century composers. In virtually every case, there is a stylistic gulf between the source, usually monophonic and often quite old, and the new work,

embodied in the artistry with which the source is reworked into a melody suitable for the current style.

Musical borrowing reached a peak of interest and complexity in the polyphonic Mass Ordinary cycles of the 15th and 16th centuries. Although only the first two movements were performed without intervening chant or other music, these cycles were conceived as units, and composers sought methods to link the movements to one another. Polyphonic settings of liturgically appropriate chant, as in Machaut's Mass and Du Fay's early *Missa Sancti Jacobi*, were related only by similarities in number of voices, texture, sonority and style. Composers interested in linking movements more closely turned to musical similarities between movements, involving borrowing between movements and very often borrowing from an existing piece. One early solution was to begin each movement with similar music, referred to as a head-motif or motto.

Further unification, and perhaps new levels of meaning, resulted when each movement was based on the same borrowed music, as is true of the majority of 15th- and 16th-century masses. Essentially, two kinds of sources were used, monophonic and polyphonic, with two main forms of elaboration, based on cantus firmus practice or, beginning some time around 1500, the new style of pervasive imitation. Four main types of mass resulted, which have been termed the cantus-firmus mass (or tenor mass); the cantus-firmus/imitation mass; the paraphrase mass; and the imitation mass (or parody mass). Masses were normally titled by the source from which they borrowed.

The cantus-firmus mass uses the same monophonic melody, usually drawn from chant, as a cantus firmus in all movements, usually in the tenor and most often in longer note values than the other voices. The genre seems to have been inaugurated by English composers in the 1430s or 40s with works such as Dunstaple's Mass on the antiphon *Rex seculorum* and Power's Mass *Alma Redemptoris mater* and continued in numerous examples by Du Fay, Ockeghem and later composers. The choice of cantus firmus may have been motivated by the associations it carried, relating to its text, its place in the liturgy or the feast for which the mass was to be performed (as in the early English examples), but these reasons are now often obscure. The way the cantus firmus is treated varies widely and seems to have been a locus for composers to demonstrate their ingenuity. Sometimes this involves a proportional scheme or other procedures reminiscent of the isorhythmic motet; in other cases the cantus firmus is treated more freely, or the treatment may vary between movements. Certain melodies were used by many composers, such as *Caput* (from an antiphon in the English Sarum rite), and later masses on the same melody are sometimes modelled directly on one or more predecessors, suggesting a tradition of emulation and competition between composers; for example, the Ockeghem *Missa 'Caput'* is modelled on that attributed to Du Fay, and the Obrecht on both of them. Here two kinds of borrowing operate simultaneously, drawing the melody from a monophonic chant and rhythms, layout and other structural features from one or more polyphonic predecessors.

A large number of masses draw their cantus firmus from a voice, usually the tenor, of a polyphonic work, usually a secular song but sometimes an instrumental work or motet. The original rhythm of the cantus firmus is usually preserved, sometimes with proportional augmentation. While these have long been considered cantus-firmus masses, it has recently been shown that virtually all of them borrow to some extent from all voices of the polyphonic model, giving them some features of the imitation mass (Steib, D1992). Various terms have been proposed for this type, but none has yet been widely accepted; the term cantus-firmus/imitation mass will be used here. The first of this type appears to be Du Fay's *Missa 'Se la face ay pale'* (*c*1450), based on his own chanson, which uses the tenor of the chanson in the tenor of the mass and draws from all voices of the model near the end of the Gloria, Credo and Sanctus (ex.6). Here the inclusion of all voices highlights the growing recognizability of the source tenor, which in the Gloria is first presented in triple augmentation of its original durations, then in double, and finally at the same speed as in the chanson. Most composers who use polyphonic models borrow from all voices, but the extent of borrowing from voices other than the tenor varies from relatively little in the masses of Du Fay to a large amount in those of Johannes Martini. Along with variety in the extent of borrowing, there is a range of techniques, from direct borrowing of an entire polyphonic complex to realigning the counterpoint, rewriting some of the voices, compressing or extending phrases through paraphrase, enlarging points of imitation and writing new points of imitation on motifs that were not imitative in the source. Here too a tradition of competitive mass settings emerged, including multiple masses on Du Fay's *Le serviteur* and Hayne van Ghizeghem's *Allez regretz* and *De tous biens plaine*.

The paraphrase mass extends borrowing to some or all voices of the mass, yet draws only on a monophonic model, usually a chant. This type is anticipated in Martini's *Missa domenicalis* and *Missa ferialis* (*c*1470s–80s), in which chants from the Ordinary cycles for Sundays and weekdays respectively are paraphrased in the tenor and often anticipated in one or more voices, resulting in a point of imitation. In a mature paraphrase mass such as Josquin's *Missa 'Pange lingua'* (*c*1520, ex.7) and *Missa 'Ave maris stella'*, all movements are based on the same chant, all voices are virtually equal in importance, and all paraphrase the chant to varying degrees in a series of points of imitation based on the successive phrases of the chant.

The imitation mass, so named from the use of the phrase 'missa ad imitationem' in the titles of 16th-century published masses of this type (Lockwood, D1966), borrows from all voices of a polyphonic model and is distinguished from the cantus-firmus/imitation mass in that no single voice is taken over complete as a cantus firmus. In an imitation mass, composers may borrow the entire contrapuntal fabric of a phrase or some part of it, such as the primary motif or a series of chords. Changes may include writing new points of imitation on borrowed motifs, emphasizing motifs that were not prominent in the original or de-emphasizing motifs that were, changing melodic details, changing the alignment of the parts, changing the order in which motifs appear, repeating ideas and omitting ideas. The opening and closing phrases of the model frequently open and close each movement of the mass, as suggested by the descriptions of the imitation mass in Pietro Pontio's *Ragionamento di musica* (1588) and Pietro Cerone's *Il melopeo y maestro* (1613). Mouton's *Missa 'Quem dicunt homines'* (*c*1515), on a

motet by Richafort, is typical in beginning each movement with a new reworking of the motet's opening point of imitation, achieving considerable variety while clearly linking movements to each other and to the source (ex.8). The imitation mass became the leading type in the 16th century and continued into the 17th, gradually being displaced by types not based on borrowed material.

The purposes and meanings of the borrowings in all four types of mass are subjects for debate. It seems clear from the comments of Pontio and other theorists that musical unity was a goal, and using the same source for each movement guarantees it. Some works based on chant were apparently associated with the feast day on which the chant was performed, but this is not certain in all cases; in the same way, some masses based on motets may have been intended for performance in the same service as the motet. Reworking existing music was central to the centuries-old tradition of liturgical polyphony, and the

x = note from chant
() = repetition of phrase from chant

introduction of new sources and new methods of elaboration was part of that tradition. Masses based on polyphonic works or written in apparent competition with earlier masses on the same source suggest a concept in music akin to that of imitation in rhetoric. There is evidence for this concept in the 16th century, since Aaron, Zarlino and other theorists use the rhetorical term *imitatio* for the reworking of a polyphonic model, and masses on polyphonic models are often titled with the formula 'Missa ad imitationem' followed by the title of the model. Whether it can be applied to the 15th century is in dispute (Brown, D1982; Perkins, D1984; Burkholder, D1985; Wegman, D1989; Meconi, *JM*, D1994), and the large number of masses in both centuries based on the composer's own composition suggests purposes other than the emulation of a revered model that is at the heart of rhetorical imitation. The words of secular songs or motets may have carried significance. Josquin's *Missa 'Di*

Dadi' is based on Morton's chanson *N'aray je jamais mieulx que j'ay*, but presents only the first line of the chanson, asking a question ('Will I never have better than I have?') that has spiritual as well as secular meanings, until the whole cantus firmus appears at the 'Osanna' during the elevation of the host, symbolizing the answer in salvation through Christ (Long, D1989). In addition, it has been suggested that some masses quote or allude to chansons other than that used in the tenor, evoking their texts in order to enrich the meaning of the mass text (Reynolds, D1992). Such a reference to music in order to bring its text to the mind of the listener was apparently new in the 15th century, and later became a significant aspect of programmatic borrowing.

See also CANTUS FIRMUS; FAUXBOURDON; HEAD-MOTIF; IMITATION; MASS, §II, 6–9; MOTTO; PARAPHRASE; PARODY (i); PARODY MASS; RHETORIC AND MUSIC; SETTING (ii); and TENOR MASS.

6. OTHER RENAISSANCE SACRED MUSIC. Other liturgical vocal music of the Renaissance used borrowed material in ways similar to masses. Motets were often based on existing chants with the same texts and used a variety of approaches. A comparison of settings of *Alma Redemptoris mater* shows the frequent and varied use of paraphrase, including Du Fay's paraphrase of the chant in the superius, Ockeghem's use of the chant as a paraphrased cantus firmus and Palestrina's use of paraphrase in all voices in points of imitation. Some motets drew a cantus firmus from a chant other than that from which its text was borrowed, as in the motets of Johannes Regis, or from a secular song, linking the two texts; Josquin's *Stabat mater* uses as a cantus firmus the tenor of the widely known chanson *Comme femme desconfortée*, whose words (though probably not sung in the motet) provide a poignant commentary to the Latin text through their depiction of a woman disconsolate at the death of a beloved. Some 16th-century motets reworked a polyphonic model in the manner of an imitation mass movement (Macey, D1993). Others relied on an existing motet as a structural model, with little or no melodic borrowing (Fromson, D1992). But many motets used no borrowed material, and this became standard by the late 16th century.

Hymns and *Magnificat* settings, long performed antiphonally, were from about the 1430s onwards often set in alternating plainchant and polyphony. Du Fay's complete cycle of hymns for the important feasts of the liturgical year established the pattern of alternating plainchant in the odd-numbered verses with a three-voice setting used for all of the even-numbered verses of a hymn. Later composers varied this pattern, using four voices, setting the odd-numbered verses, alternating two polyphonic settings, or providing a new polyphonic setting for each even- or odd-numbered verse. The last was standard for *Magnificat* settings and became so for hymns by the 1490s. One of the challenges of the form was providing a different setting for each verse, particularly for the formulaic canticle tones of the *Magnificat*.

Du Fay's and other early 15th-century settings paraphrased the chant in the superius. Hymns from the late 15th century to the 16th use the chant as a cantus firmus, at first in long, even notes accompanied by active counterpoint in the other voices, later often paraphrasing the hymn in one or more of the other voices, generally before its appearance as a cantus firmus (*see* HYMN, §III, 1 and 2, ex.8 and ex.9). In 16th-century settings, the pervasive imitation of motifs from the hymn and the closeness in style of the cantus firmus to the other voices makes the texture similar to that of the paraphrase mass or motet. 16th-century composers wrote *Magnificat* settings using the same approaches to borrowing and reworking as for hymns, but they also adapted methods familiar from the mass. These include settings with pervasive imitation, often paraphrasing the *initio* and *terminatio* of the canticle tone in points of imitation, as in the *Magnificat* settings of Palestrina, and parody or imitation *Magnificat* settings based on secular works or motets, including almost 40 by Lassus. Imitation *Magnificat* settings are among the few settings from the Renaissance not to be based on the plainchant canticle tones. There are also a few based on other cantus firmi, similar in style to cantus-firmus mass movements.

Parallel to polyphonic vocal settings of hymns and the *Magnificat* are settings for organ of hymns, canticles, psalm tones and antiphons, performed in alternation with plainchant. Descriptions of such *alternatim* performances date back to the 14th century, but the earliest extant examples of organ settings are a hymn and *Magnificat* in the Faenza Codex from the early 15th century (*I-FZc* 117). This is also the earliest source of organ versets for the mass, which treat items of the mass in the same manner, for example by alternating phrases of the Kyrie between organ and voices. Organ versets were often improvised, but many were written down, and several organ masses or other collections of liturgical organ settings were published in the 16th century. Until the mid-17th century, organ hymns, *Magnificat* settings and versets were almost invariably cantus-firmus settings of the appropriate segment of chant. From the mid-16th century, some composers introduced elements from parallel vocal genres, such as anticipating the cantus firmus with points of imitation derived from it.

The Lutheran Reformation in the early 16th century led to the creation of a new repertory of sacred music based on the chorale. Chorales were initially sung by the congregation in unison and unaccompanied. Most were adapted from chant, from German devotional songs (many of which were themselves reworkings of chant) and from secular songs, or were composed using conventional melodic types and formulae. Techniques of adaptation ranged from simple contrafactum to ingenious reworkings, such as Luther's reshaping of the Gregorian hymn *Veni Redemptor gentium* as the chorale *Nun komm der Heiden Heiland* (ex.9). Chorales in turn were arranged in polyphonic settings in varying styles. Early settings present the chorale in the tenor, either harmonized in chordal style or treated as a cantus firmus in long notes, sometimes preceded by imitation in the other parts; later settings include harmonizations with the chorale in the top voice and a style of chorale motet in which each line of the chorale is treated in imitation by all voices. Organists probably improvised chorale settings for *alternatim* performance with the choir or congregation, but few survive from before the 1570s and 80s, when several collections were published of settings for organ in mostly chordal style, some perhaps intabulations of vocal settings. Tunes for singing metrical translations of the psalms in the Calvinist and other Reformed churches were also sometimes adapted from chant or from secular songs. Psalm tunes were in turn reworked for new translations of the psalms into Dutch, German, English and other

languages and were used in polyphonic settings in cantus-firmus style, imitative counterpoint or simple harmonizations, by Bourgeois, Goudimel, Sweelinck and others. The French noël repertory (Catholic but non-liturgical) included melodies adapted from popular songs, polyphonic chansons, and hymns, tropes and other chants.

7. Renaissance secular music. The importance of liturgical chant and a long tradition of basing new works on existing music may partly explain the centrality of borrowing for sacred music in the Renaissance. Yet borrowing in various forms is almost as pervasive in secular repertories, suggesting that it was part of the period's basic concept and practice of music.

Polyphonic German songs from about 1450 to about 1550 are often settings of monophonic lieder, treating the existing tune as a cantus firmus accompanied by two or three independent contrapuntal lines. Isaac's two settings of *Innsbruck, ich muss dich lassen* represent variants of this tradition, the first treating the tune as a cantus firmus in canon in the inner voices (a setting that Isaac re-used in the Christe of his *Missa carminum*, a borrowing of a borrowing) and the second placing the tune in the cantus over a largely homophonic harmonization. Both approaches also appear in polyphonic settings of French popular monophonic tunes, as in the *chansons rustiques* (Brown, D1959).

The chanson repertory of Josquin's time is replete with different polyphonic versions based on the same tune and text. Some of these are settings of monophonic tunes, often in cantus-firmus style. But many are reworkings of polyphonic chansons, and some chansons were adapted dozens of times. The variety of techniques used is exemplified by Hayne van Ghizeghem's *De tous biens plaine*, one of the most frequently adapted: one reworking adds a fourth voice *si placet*; three substitute a new contratenor; two retain two voices of the original and add two new voices; 28 borrow the superius, tenor or contratenor as a cantus firmus and add one to three new voices (in three cases with a new added text); two combine one voice from this chanson with one from another existing chanson and two new voices; and one reworks parts of all voices of the model (Meconi, *JRMA*, D1994). Reworkings appear to begin about 1450 with numerous alternative versions of *O rosa bella* and become increasingly common in the second half of the century. This coincides with or soon follows the practice of basing mass cycles on polyphonic secular works; the two are almost certainly related, with many of the same composers active in both traditions. Yet there are differences in the two practices, most notably that the secular reworkings tend to present the borrowed voice or voices without transposition or significant alteration, in the same voices and rhythmic values as in the original. Such a reworking may have served several purposes, such as bringing an older work up to date by adding a fourth voice or smoothing out the contratenor; providing a fresh version of a familiar favourite, akin to 'covers' of hit recordings in late 20th-century popular music; or demonstrating the skill of the composer in recasting a well-known model, a combination of 'emulation, competition, and homage' (Brown, D1982). Some reworkings seem to have been written by students, to judge from their lesser quality, their preservation anonymously in only one source and, in rare cases, evidence of correction and revision; it seems likely that imitation of a model chanson was a frequent mode of instruction in composition. The tendency to return repeatedly to the same models, such as *Fors seulement* and *Fortuna desperata*, suggests that composers were conscious of engaging in a tradition involving competition with each other and a search for new and individual ways of treating common material. In contradistinction to the 19th and 20th centuries, when inventing a distinctive melody or style came to be valued most highly, Renaissance musicians seem to have regarded the reworking of existing material as a test of compositional skill, demonstrating one's inventiveness not in what one starts with but in what one does with it.

Chanson reworking continued throughout the 16th century, partly in response to the demand for published music for amateurs. Attaingnant and others recast four-voice chansons for three or two parts or for voice and instruments and published them repeatedly, often without attribution (Heartz, D1971). The most popular songs, such as Didier Lupi Second's *Susanne un jour* (Levy, D1953), Sandrin's *Doulce memoire* (Dobbins, D1969–70) and Sermisy's *Jouyssance vous donneray*, were reworked for fewer parts, for instruments, as contrafacta, in new chansons based on cantus firmus or paraphrase, as psalm

tunes or dance melodies, and in other ways, normally without attribution to the original composer. Both the frequency of re-use and the frequent lack of attribution suggest a musical culture in which reworking was undertaken primarily for utilitarian reasons, to adapt music to a new function or performing ensemble, and in which ownership of music lay with the user as much as or more than with the originator.

Frottolas often quoted or alluded to text and music of other frottolas or earlier works. By contrast, Italian madrigals seldom drew from existing works and were in turn reworked less often than chansons or frottolas, primarily in arrangements for two or three voices or voice and instruments. Interest in correct declamation, expressive inflection and vivid illustration of the words inspired invention of new music uniquely suited to the text and made emulation less satisfying, even when composers set the same poem. But at least some madrigal composers drew on earlier works as models for procedures or effects, usually without melodic borrowing; for example, some of Monteverdi's early madrigals are modelled on ones by Luzzaschi, Marenzio and Wert (Watkins and La May, D1986; Tomlinson, D1987). English madrigal composers used Italian works as models; for example, Morley borrowed directly, reworking several ballettos of Gastoldi and canzonets and madrigals of other composers, while Weelkes used works of Salamone Rossi as models for his first madrigal collection, borrowing points of imitation, melodic contours, rhythms and textures (Cohen, D1985).

The Renaissance also saw the development of genres based on quotation (rather than reworking or modelling), in which recognizing the quoted material is part of the game. The quodlibet, practised mostly in Germany from the 15th century to the mid-18th, combined quotations from several songs, usually with humorous intent. Successive or homophonic quodlibets, the most common type, present a patchwork of brief musical and textual fragments in one voice, including folksongs and street cries, accompanied by voices without quotation. Simultaneous or polyphonic quodlibets combine in counterpoint two or more such patchwork voices, two or more complete borrowed melodies, or a mixture of both types. Related forms in other nations include the *ensalada* (Spain), *fricassée* (France) and *incatenatura* or *misticanza* (Italy). The English medley tends to present a series of complete songs rather than fragments. The Latin American *ensaladilla* was a quodlibet villancico comprising a series of existing villancicos strung together with linking passages.

Much instrumental music of the Renaissance was based on borrowing. Intabulations of vocal music continued throughout the Renaissance and into the 17th century. Numerous keyboard intabulations appear in German manuscripts, notably the Buxheimer Orgelbuch (*see* ARRANGEMENT, ex.2). The rise of music printing and of amateur interest in performance in the early 16th century led to many published collections of intabulations for keyboard, lute, vihuela and other plucked string instruments, with varying degrees of embellishment (*see* ARRANGEMENT, ex.3). Such transcriptions testify both to the popularity of the vocal originals, which ranged from motets to madrigals and villancicos, and to the readiness of musicians to rework existing music to suit new circumstances. The more elaborate reworkings display the compositional and performing virtuosity of the intabulator, and essentially constitute variations on the vocal model.

The canzona began as an instrumental arrangement of a polyphonic chanson, like the four in M.A. Cavazzoni's *Recerchari motetti canzoni* (1523). His son Girolamo Cavazzoni's canzona on Josquin's *Faulte d'argent* (published 1543) considerably reworks its model, eliminating the canon between contratenor and quinta pars, rewriting the opening point of imitation (whose original imitation at the unison would be ungraceful on the organ), adjusting the rhythm, compressing the opening phrases of five and seven bars respectively to four each, and making similar changes throughout to create a substantially new work on the same motivic ideas and formal and harmonic plan (ex.10). Later canzonas were composed using newly invented material in a similar style, and many ensemble canzonas were transcribed for keyboard or lute before the newly composed keyboard canzona was established around 1600. Thus the canzona, like the motet, began as a genre defined by its use of borrowed material and evolved by the early 17th century into an independent work, normally free of borrowing.

Another genre originally derived from vocal models was the instrumental setting of chant or other melody in cantus-firmus style, apparently not intended for liturgical use. Most striking is the English tradition of In Nomine compositions for consort or keyboard. The practice originated in instrumental performances and intabulations of the 'In nomine Domini' section of Taverner's Mass on the Sarum antiphon *Gloria tibi Trinitas*, which uses the chant as a cantus firmus. Later English composers borrowed the cantus firmus for new instrumental works, which became known as 'In Nomine', and some also adapted motifs from Taverner's other voices. Akin to the *Caput* mass tradition, In Nomines involved direct borrowing of a monophonic tune coupled with emulation of previous polyphonic works based on that tune, resulting in a chain of competitive composition in which the way one worked with borrowed material while introducing something new was part of demonstrating one's skill as a composer.

Dance music was often improvised over a given cantus firmus. Numerous tunes for the basse danse were drawn from French chansons. Other dances were based on repeating basses or chordal schemes such as the passamezzo and folia, which served both as schemes for improvisation, like the 12-bar blues in the 20th century, and as material to be borrowed and reworked into compositions for lute, keyboard or instrumental consort.

The most significant use of borrowing in instrumental music was the new genre of variations. Borrowing and variation are clearly related; most types of borrowing in the Renaissance, from paraphrased hymns and instrumental intabulations to the imitation mass, resemble one or more free variations on the source, and embellishing a newly composed theme is similar to reworking an existing piece. But pieces conceived as sets of variations first appear in the 16th century, especially in Italy, Spain and England, in works for lute, vihuela or keyboard. Spanish and Italian variation sets were often based on repeating basses or harmonic frameworks commonly used for improvisation. Examples of these, including the passamezzo, folia, romanesca, Ruggiero and Spagna, appear in Mudarra's *Tres libros de musica en cifras para vihuela* (1546) and the *Tratado de glosas* (1553) by Diego Ortiz.

Other works presented a cantus firmus in a succession of varied settings, as in the *diferencias* (variations) on *O gloriosa Domina* by Luys de Narváez (1538), or combine melodic variations with a repeating bass, as in the latter's variations on *Guárdame las vacas*. English composers wrote variations on short repeated ground-bass figures, sometimes borrowed, and cantus-firmus variations on hymns and other liturgical chant. In the closing decades of the 16th century and the early 17th century, English composers for virginal such as Bull and Byrd cultivated all current types of variations, including variations on traditional bass patterns, cantus-firmus variations, melodic variations on popular songs and fantasias on borrowed motifs such as the diatonic hexachord and other commonly used solmization figures. Writing variations on a borrowed theme remains one of the most prominent uses of musical borrowing down to the present day; indeed, it is so common that it is seldom thought of as a kind of borrowing.

This survey of borrowing in the Renaissance from the mass to secular instrumental music shows how widespread borrowing practices were, how often new music depended on reworking older material, how habitual borrowing was for composers, and how varied and often masterly were their methods of adaptation. Within repertories that included music on newly invented subjects and music on

borrowed ones, such as motet, chorale and canzona, there appear to have been few distinctions between works that borrowed and those that did not in how the musical material was used and the work was structured. Clearly the focus of composition was on skilful elaboration, not originality in invention. Luther's famous comment that Josquin was 'the master of the notes', which 'must do as he wills', confirms that mastery lay not in the material but in what the composer did with it. The frequent return to the same melodies and models for reworking, from *O rosa bella* to *Susanne un jour* and the romanesca, suggests that these formed part of a core repertory for one or more generations, as familiar as the Beethoven symphonies to 19th-century concertgoers and as jazz standards to 20th-century fans, and that part of the pleasure of music was to hear the familiar in a new guise.

8. THE BAROQUE ERA. Early 17th-century composers continued many of the borrowing practices of the previous century. Monteverdi's Vespers (1610) included cantus-firmus settings of psalms and two of the *Magnificat*, an instrumental sonata on the litany melody *Sancta Maria, ora pro nobis* and an imitation mass on a Gombert motet. Frescobaldi wrote variations on the Ruggiero, romanesca and other popular tunes; capriccios on *La sol fa re mi*, the ascending and descending hexachord, and other frequently used subjects; keyboard settings of hymns and the *Magnificat*; and, in the organ masses of *Fiori musicali* (1635), settings of plainchant Kyrie sections to be performed *alternatim* with chant, including *Kyrie 'Cunctipotens genitor'*.

Yet several forms of borrowing declined in significance after 1600. Settings of Latin liturgical texts such as hymns and the *Magnificat* were less likely to incorporate the original chant, partly because the modern style differed radically from the old modal tunes and from earlier styles of elaborating them. By the 18th century, when the chant appeared as a cantus firmus, as in the 'Confiteor' of Bach's Mass in B minor (*c*1747–9), it was a rhetorical gesture, an evocation of an archaic style regarded as especially dignified and sacred. An intense focus on the proper declamation and expression of texts, both secular and sacred, promoted a search for individual solutions rather than extensions of tradition. Composers after about 1630 tended to avoid parody, paraphrase and cantus firmus procedures in their masses and Latin motets in favour of devising a unique musical treatment appropriate to the text and the circumstances of performance. Similarly, instrumental sonatas, canzonas, toccatas, ricercares and other forms relied primarily on new musical material.

Composers did not cease imitating each other, but they tended to borrow styles and conventions more often than melodies or polyphonic complexes. Monteverdi's *stile concitato*, invented for *Il combattimento di Tancredi e Clorinda* (1624), was imitated by Grandi and Schütz, and his *Lamento della ninfa* (published 1638) helped establish a tradition of laments over a descending tetrachord ostinato, including laments by Cavalli, Cesti, Purcell and Handel. Lully's overtures and concertos by Corelli and Vivaldi likewise set a pattern for later composers. Once such styles and conventions were established, however, any number of works might have served as models, making borrowing from any particular piece difficult to trace.

Still, borrowing in the Baroque era was frequent, in three main arenas: music on standard harmonic or bass patterns; genres based on borrowing, such as variations, chorale settings, organ mass and quodlibet; and reworking existing music, either one's own or another's, for a new purpose. The last of these began to raise issues of originality and plagiarism for critics in the 18th century and later (see §9, below).

Dances, vocal and instrumental settings, and variations continued to be composed on bass patterns and melodies inherited from the 16th century, and new ones entered the repertory. Strophic songs, duets and instrumental variations on the romanesca and Ruggiero reached their peak in the first third of the 17th century. The folia melody and bass was current in Spain and Italy through the 1670s and a variant form ('Folies d'Espagne') remained popular up to 1750, especially in France and England. The opening chorus of the final dance of the Florentine intermedi of 1589, by Cavalieri, became well known as the *Ballo del Gran Duca* or *Aria di Fiorenza* and was adapted in over 100 dances, intabulations and other compositions (Kirkendale, E1972). The chaconne began as a Mexican dance-song imported to Spain and Italy, where its repeated harmonies developed into ostinato bass patterns used across the Continent for variations; passacaglia basses had a similar evolution from harmonic formulae used as guitar ritornellos for Spanish songs. Variation sets on these chord progressions or bass patterns, such as Frescobaldi's *Partite sopra passacagli* (1627), were imitated by later composers in a tradition that culminated in the orchestral and choral chaconnes and passacaglias of Lully, Purcell and others. Variations on bass ostinatos and harmonic patterns were popular all over Europe. As the century continued, direct borrowing decreased as conventional patterns and figures emerged. These conventional basses and harmonic progressions are in some respects comparable to melodic formulae in early chant; in both cases, the music that survives in notation appears to have resulted in part from a tradition of improvising new realizations of a familiar formula. The overlap between using a convention and emulating a particular work is illustrated by Bach's Passacaglia in C minor for organ, which drew on broad generic traditions, borrowed the first half of its bass ostinato from an organ passacaglia by André Raison and emulated textures and procedures from Buxtehude's Passacaglia in D minor.

Many variations in the first half of the 17th century were composed on original material, including the new forms of strophic variations, variation canzona, variation sonata and variation ricercare, but borrowed material continued to be used. Northern composers from Sweelinck to Bach wrote variations on chorales, usually in a series of cantus firmus settings, and Sweelinck, Scheidt and later composers also wrote melodic variations for keyboard on secular songs, often treating the melody less as a line to be decorated than as a general framework.

While the use of Latin chants in new works decreased, compositions based on chorales proliferated in Lutheran Germany. These included four-part harmonizations with the chorale in the upper voice; chorale motets using cantus-firmus procedure or imitation of each phrase in all voices; the chorale concerto practised by Praetorius,

Schein and Scheidt, which introduced chorale melodies into the new concerted Italian vocal genres; the chorale ricercare, an organ counterpart of the chorale motet in which each line of the chorale was treated in fugal imitation; the chorale fugue, in which only the first or first two lines were imitated fugally; chorale variations (or chorale partita) for organ; the chorale fantasia, a large organ work that freely developed a chorale, often presenting each line in more than one manner; and the chorale prelude, a setting of the chorale tune in embellished form with simple accompaniment or as a cantus firmus above or amid imitative or figurative counterpoint, played on the organ to introduce the tune before the congregation sang a chorale.

Most elaborate was the chorale cantata, which set one verse of the chorale text in each movement and borrowed its tune for some or all movements, using a variety of methods from cantus firmus to paraphrase and imitative polyphony and usually ending with a chordal setting of the chorale melody for chorus, sometimes decorated with obbligato instrumental parts. Bach's Cantata no. 4, on *Christ lag in Todesbanden* (?1708), is a late but well-known example, with a different approach in each movement (ex.11). The first verse is in chorale motet style with the chorale as a cantus firmus in long notes in the soprano, motifs paraphrased from it in other voices and the chorale's opening auxiliary-note figure echoing throughout the texture. The second verse features a paraphrase of the chorale in the soprano, anticipated and accompanied by several statements of the descending step that opens the chorale. After other types of settings in later movements, the final verse is a straightforward four-part harmonization. More numerous than pure chorale cantatas were cantatas that incorporated a chorale in one or more movements, interspersed with biblical verses or other poetry set as recitatives and arias. Chorale settings were also interpolated into other sacred works, as in Bach's Passions. Movements on other texts, especially for chorus, often incorporated a chorale as a cantus firmus in either voices or instruments; Bach's Kyrie in F BWV233*a* uses *Christe du Lamm Gottes* in this way. The ingenuity with which composers used and transformed chorales is impressive. All types of chorale reworking linked the music heard to tunes and texts familiar to the congregation, reinforcing the didactic message of the chorale while introducing artistry and variety.

Many organ masses were composed and published in Italy in the first half of the 17th century and in France in its last third. The Italians continued to use chant, usually in cantus-firmus style, but French composers such as Raison and François Couperin tended more often to paraphrase or even omit the chant. The popularity of singing noëls at Midnight Mass at Christmas led Charpentier to include several noël melodies in his *Messe de minuit pour Noël* for voices and orchestra; organists composed numerous settings of noëls and, beginning in the 18th

century, *messes en noëls*, in which each verset was based on a noël melody.

Such works exploited the listener's pleasure in recognizing familiar tunes in a new context. The same was of course true of the quodlibet, medley and similar forms, which continued through the 17th and 18th centuries, and of stage works that incorporated borrowed music. Familiar songs, sometimes with altered or new texts, were sung in the plays of Shakespeare and in Jacobean city comedies in the early 17th century (Austern, E1985). The French *comédie en vaudevilles* and the English and North American ballad opera, both especially popular in the first half of the 18th century, were comic plays with numerous interpolated songs that set new words to familiar traditional or popular melodies.

9. REWORKINGS AND ISSUES OF ORIGINALITY. The type of borrowing practised in the Baroque era that has seemed most foreign to later centuries was the re-use or reworking of entire pieces. 19th-century notions of originality regarded reworking one's own music as unoriginal and taking another's work without due credit as plagiarism. These ideas began to emerge during the 18th century, and their gradual acceptance led to a fundamental change in attitudes towards and practices of borrowing.

In the 17th and 18th centuries, music was designed for a particular circumstance, sometimes for a single occasion, and music that was not recast for a new use would often not be heard again. It is therefore no surprise that composers felt free to re-use or rework their own music to suit a new purpose, occasion or audience. Monteverdi rewrote the lament from his opera *L'Arianna* (1608) as a madrigal sequence for five voices to include in his sixth book of madrigals (1614) and later created a sacred contrafactum of it as *Pianto della Madonna*, published in *Selva morale e spirituale* (1641); similarly, he reworked his canzonetta *Chiome d'oro* as a motet, *Beatus vir*. Lully recast his *tragédie-ballet Psyché* (1671) as an opera (1678). Purcell re-used earlier music frequently in his incidental music for plays and often excerpted and adapted solo songs and duets from larger works. Vivaldi re-used arias in later operas, and his instrumental and vocal works often share ritornello material. Rameau arranged instrumental music from *Les Indes galantes* as a series of harpsichord pieces titled *Quatre grands concerts* (1735) and borrowed phrases and refrains from his harpsichord pieces in his operas. Bach recast many of his secular cantatas as sacred cantatas and reworked individual cantata movements in new cantatas, the *Christmas Oratorio* and the Mass in B minor; he also adapted several violin and other concertos as harpsichord concertos for his own concerts. Handel frequently re-used or reworked earlier compositions, most famously in *Messiah* (1742) and in many of his operas. Most of these adaptations made available for new performances or for publication music that otherwise would no longer have been performed, and the others made the music usable in new contexts, such as for religious services or home performance. Many also represent new and sometimes ingenious extensions for musical ideas the composer had already worked with, demonstrating both the hitherto unrealized potential in the material and the skill of the composer. Often a similarity of wording, affect, subject or dramatic situation makes the earlier music appropriate for a new text and helps to explain why the composer was reminded of a particular piece and chose it for reworking.

Composers also frequently adapted music by others, and often for the same reasons. Monteverdi reworked Caccini's monodic setting of *Sfogava con le stelle* as a five-voice madrigal, perhaps as an answer to Caccini's criticism in the preface to *Le nuove musiche* of the new style of polyphonic madrigals championed by Monteverdi (Horsley, E1978). Aquilino Coppini wrote and published three books of sacred contrafacta of madrigals by Monteverdi and others (1607–9), making works in the new style available for worship and devotions. Lutenists, guitarists and keyboard performers transcribed or recomposed music for voices or other instruments for their own. In the New World, Spanish and French missionaries appropriated tunes of the indigenous peoples for Christian texts. Schütz reworked secular duets by Monteverdi and motets by Gabrieli and Grandi. Lully's operas were parodied at the Théâtre Italien, with comic texts set to his music.

By the late 17th century, any opera being revived with new singers in a different city was likely to be presented as a pasticcio to some degree, as singers routinely substituted arias they already knew or that better suited their voices; in the 18th century, impresarios often assembled pasticcios by adapting existing arias by diverse composers to an existing or a new libretto. Several Handel operas were pasticcios in whole or part; he reworked pieces by Stradella, Kerll, himself and others in his oratorio *Israel in Egypt* (1739); he drew extensively on Muffat and to a lesser extent on Telemann and Domenico Scarlatti in his instrumental works; and he frequently used motifs from existing works in new contrapuntal contexts. Bach transcribed concertos by Vivaldi, Johann Ernst of Saxe-Weimar, Telemann and others for organ or harpsichord, arranged sonatas and a fugue by Reincken for keyboard and pieces by Telemann and Couperin for organ, and wrote fugues on themes by Albinoni, Corelli and Legrenzi. His late motet *Tilge, Höchster, mein Sünden* (1741–6) was based on Pergolesi's *Stabat mater*. The motives for these reworkings included competition for Monteverdi, studying and absorbing another composer's style for Schütz and Bach, practicality and profit for Coppini and the opera impresarios, and the challenge of composing a new work on a given model, and almost all made the existing music usable in new circumstances.

The most interesting reworkings also improved on the source in some way, in accord with Mattheson's advice in *Der vollkommene Capellmeister* (1739): 'Borrowing is permissible; but one must return the object borrowed with interest, i.e., one must so construct and develop imitations that they are prettier and better than the pieces from which they are derived'. In some cases, the original composer was identified or would have been known to listeners. That composers did not always identify their sources is not surprising for an era in which music was valued for its usefulness as entertainment, as accompaniment to worship or as expressive vehicle for a text, rather than as an art practised for its own sake. More artisan than artist, a composer of this time was expected to

provide appropriate music that was fresh but not necessarily original.

Composers in the Baroque sought recognition for their innovations and credit for their compositions, as did Gesualdo and François Couperin in publishing music that had circulated without their permission, but they seldom claimed ownership of musical material when it was reworked by others. Cavalieri strongly asserted his priority as first to use the *stile rappresentativo*, but there is no sign that he or anyone was as concerned that he was the composer of the music that became known as *Ballo del Gran Duca*, subject of so many compositions in the early 17th century. Imitation of existing material was accepted and skilful reshaping lauded in music as in literature and the other arts, as had been true for centuries. The occasional complaints of plagiarism or misappropriation from the 16th century to the early 18th usually concerned the attribution of entire works, not the borrowing of musical material for reworking (Pohlmann, A1962).

But in English critical writings of the mid-18th century there began to emerge a new concern for originality as superior to imitation in literature (Buelow, E1988). Edward Young wrote in *Conjectures on Original Composition* (1759):

An Imitator shares his crown, if he has one, with the chosen Object of his Imitation; an Original enjoys an undivided applause. An Original may be said to be of a vegetable nature; it rises spontaneously from the vital root of Genius; it grows, it is not made: Imitations are often a sort of Manufacture wrought up by those Mechanics, Art, and Labour, out of pre-existent materials not their own.

Within two generations, originality and genius were considered central to the creative process, and direct borrowing from a model – part of imitation in literature since Quintilian – risked accusations of plagiarism. Writers on music soon adopted the same attitudes, and by the early 19th century the invention of new melodies and new effects had replaced the skilful manipulation of given material as the sign of a great composer. Only in the training of young composers did overt imitation still meet approval. Romanticism has no more profound source than this change in emphasis from the continuity and collectivity of a tradition sustained through imitation of exemplary models to the individualism of an artistic culture that prized genius, inspiration and innovation.

As a sign of the change in values, by the early 19th century Handel stood accused of plagiarism (Horncastle, E1822) for practices that seem today like particularly excellent examples of what had been a long and distinguished tradition of creatively reshaping borrowed material, using a wide range of procedures (Harris, E1990; Winemiller, E1994 and E1997; Risinger, E1996). Handel has been a focus for studies of borrowing for two centuries, because of the historical irony that he was the most significant composer associated with England, where the critical emphasis on originality began, yet he reworked his own music and borrowed from others more often than his contemporaries. Indeed, the issue is so significant in Handel scholarship that there is a modern publication of his sources (Roberts, E1986–8).

10. LATE 18TH CENTURY. The late 18th century can be seen as a time of transition between old attitudes towards borrowing and new ones. Some forms of borrowing common in the Baroque era were still practised, some declined in popularity and some changed, while new types appeared. Operatic pasticcios were staged in Italy and London until the end of the century and (under the name 'quodlibet') in Vienna early in the 19th century. Ballad operas appeared in England and North America into the early 19th century, and a German adaptation of one helped to launch the German Singspiel. French comic operas were translated and adapted as far away as Sweden, and Mozart's early Singspiel *Bastien und Bastienne* (1768) was modelled on Rousseau's *Le devin du village*. Medley continued in England, where Richard Charke introduced the medley overture. Arrangements and transcriptions continued, including arrangements of operatic excerpts for wind ensembles and transcriptions of ensemble music for keyboard. Arrangements of Haydn's instrumental themes for voice and keyboard with English words testify to the popular demand for his music in England. On the other hand, elaborate compositions on chorale tunes appeared less frequently, replaced by modest functional music designed to support congregational singing. Variations on ostinato basses and chorales virtually disappeared after 1750. Melodic variations became the predominant type throughout Europe, with the theme presented first, the harmony preserved in each variation (sometimes with a change to the parallel minor for some middle variations) and the melody elaborated with changing figuration yet always recognizable. Composers turned out hundreds of variation sets, often on borrowed themes, for sale to amateur performers on the piano, guitar, flute, violin and other instruments. Mozart's variations for piano on popular songs, opera arias and dances by other composers were among his most popular works. In his later sets the final variation was often an expanded fantasia on material from the theme.

In the realm of reworkings, composers occasionally reshaped their own music into new guises. Mozart recast music from his Mass in C minor K247/417*b* as the oratorio *Davidde penitente* K469 (1785) and converted several of his serenades into symphonies. He frequently re-used melodic cells from his own earlier works, often in other genres. Haydn adapted movements of symphonies nos.63 and 73 from the overtures to his comic operas *Il mondo della luna* and *La fedeltà premiata* and movements of three late symphonies from chamber works, and he recast his orchestral piece on the seven last words of Christ (?1786) for string quartet (1787) and then as an oratorio (1796–7). Imitation of models was still practised, particularly as a means of instruction, but the extensive borrowing seen in Handel or Bach was rare among mature composers. The young Mozart's first four keyboard concertos, composed at the age of 11, were compiled from keyboard works by Raupach, Honauer and others, and five years later he reworked three J.C. Bach piano sonatas as piano concertos, a year before his first concerto on original themes (no.5, K175, 1773); a gradual development is evident from straightforward arrangement in the first group through freer reworking in the second to increasing independence from models in the last. Later he learnt styles through emulation, but with overt borrowing restricted to brief phrases of melody and aspects of procedure and form, as in the second movement of his quartet K168, modelled on a quartet movement by Ordonez (Brown, F1992). Even in his last months, Mozart modelled parts of his Requiem (1791) on Michael Haydn's

C minor Requiem in instrumentation, style, texture, form and text setting, while avoiding more direct references.

New uses of borrowed material that continued into the 19th century appeared in music of Mozart and Haydn, especially late in their careers. At the bidding of publishers in London and Edinburgh, Haydn arranged hundreds of Scottish, Irish and Welsh folksongs for voice accompanied by violin and continuo or violin, cello and keyboard, helping to establish a tradition of folksong settings. He paraphrased folksongs as themes in symphonies and other instrumental works, perhaps to suggest a folkish atmosphere or create a national impression, as in the finale of his London Symphony no.104 (1795), whose theme echoes a London street song. During the supper scene in the Act 2 finale of Mozart's *Don Giovanni* (1787), an onstage band (wind octet with cello) plays excerpts from operas by Martín y Soler and Sarti as well as his own *Le nozze di Figaro*, just as might occur at an aristocratic dinner. This is an early instance of using quotation in an opera or programmatic work to represent a performance of a particular piece of music; Biber's *Battalia* (1673) is a rare precedent, with its quodlibet of eight different folksongs in five different keys, representing the songs of the soldiers encamped before the battle. Mozart arranged Bach and Handel fugues for string trio or quartet (1782) and reorchestrated *Messiah* and three other vocal works by Handel (1788–90) to bring them closer to current taste for performances sponsored by Baron van Swieten, inaugurating a tradition of Bach arrangements and Handel reorchestrations that continued for a century and a half.

11. 19TH CENTURY. Despite increasing emphasis on originality, some traditional forms of borrowing continued into the 19th century, some forms that had lapsed were revived and new ones appeared. The range of sources from which composers borrowed expanded with the growing interest in nationalism, exoticism and historicism. The revival of older music and the emergence of a permanent repertory of musical classics meant that new works were presented side by side with works of the past, and it was natural that composers would reflect on music of the past through borrowing in various forms, including reviving earlier styles of borrowing. Paradoxically, borrowing itself became a method for achieving individuality; by infusing folksongs or other national or exotic elements into their music, or by invoking music of past centuries through quotation or use of characteristic procedures within a modern style, composers were able to set their music apart from the contemporary mainstream and find a niche in the new marketplace for music.

French organ composers continued to write 'messes en noëls' and settings of Gregorian chant for *alternatim* performance until *alternatim* organ music was banned from services in 1903. Most chorale settings were simple and utilitarian, but new interest in Bach's organ music led several composers to use chorales in more complex works intended for organ recitals, not for use in church. Three of Mendelssohn's Six Sonatas for organ op.65 (1844–5) incorporate chorales, sometimes in novel ways, and the last is a chorale partita. Also notable are Brahms's chorale preludes (1896) and Reger's chorale fantasias (1898–1900). The Bach revival also brought new interest in the chorale cantata and chorale motet and in including chorale movements in German oratorios. Mendelssohn wrote five chorale cantatas (1827–32, not published in his lifetime), Brahms a chorale motet (*c*1860) and Reger four chorale cantatas (1903–5), and Mendelssohn interpolated chorales in his *St Paul* (1836), on the model of the Bach Passions. All of these look to Bach in reviving genres that had declined or disappeared after his death, in their use of chorales, and in the ways they treat the melody, from cantus firmus to paraphrase. Similarly, the interest in music before Bach and the effects of the Cecilian Movement led to a renewal of Gregorian chant as a source and of traditional ways of adapting it, especially among composers active in France, from Liszt to d'Indy. Others from Bruckner to Satie used melodic formulae and fragments from chant to suggest an ancient sacred style.

Variations continued, now more often on original than on borrowed themes and including the new types of character variations, virtuoso variations and fantasia variations. Some variation sets featured elaborate introductions that gradually revealed the theme to be used, as in Chopin's Variations on Mozart's 'Là ci darem la mano' for piano and orchestra (1827), which also interpolated a ritornello between the variations. The interest in music of the past as both subject and model is clear in Liszt's revival of Baroque ostinato variations in his prelude, variations and chorale for piano on Bach's *Weinen, Klagen, Sorgen, Zagen* (1859) and in *Rhapsodie espagnole* for piano (*c*1867) on the Folies d'Espagne, best known to the 19th century in Corelli's variation set. Brahms also drew on the past for themes and procedures, ending his variations on a theme of Handel (1861) with a fugue and those on a theme attributed to Haydn (1873) with extended development over a bass ostinato.

The spread of musical literacy and inexpensive manufacture of instruments, especially pianos, led to a mass market for sheet music for amateurs to play at home. Transcriptions and arrangements flourished in this market; in the century before recordings, it was through transcriptions for two or four hands at the piano that many first heard or played for themselves the symphonies and opera excerpts of the day. Some transcriptions were faithful to the original and thus might be considered a new version rather than a new work; others involved some reworking or elaboration. Freer still was the new form of the operatic paraphrase for piano, as practised by Liszt and other virtuosos; his *Réminiscences de Don Juan* (1841) reorders the excerpts he draws from Mozart's *Don Giovanni* and adds interludes and further development to create a new dramatic outline that implies Don Giovanni's triumph rather than defeat (Riethmüller, G1984). The same range between strict transcription and free paraphrase can be found in operatic and other works arranged for wind bands and dance orchestras. Popular for both piano and band or orchestra was the potpourri, a series of melodies taken from one or more operas or other sources and strung together by linking passages.

Folksongs and other national melodies were frequently used by 19th-century composers, in accord with the Romantic interest in common folk, regional characteristics and the exotic, and with nationalist movements in culture and politics. Composers from Beethoven to Brahms, Tchaikovsky and d'Indy wrote settings for folksongs; those active at the end of the century concentrated on songs of their own nation, while Beethoven, like Haydn, specialized in British and Irish songs. Liszt wrote keyboard works on Hungarian, French, English, German, Czech, Polish, Russian and other national themes. In

tribute to the lands in which he travelled and performed, Gottschalk wrote caprices and paraphrases for piano on melodies from Spain, the USA and Latin American nations, often incorporating several tunes in one piece. Many composers borrowed or paraphrased folk melodies as themes, from the Russian tunes Beethoven included in his Razumovsky quartets (1805–6) in honour of his Russian patron to the Russian and Ukrainian folksongs in Tchaikovsky's first two symphonies and the Amerindian motifs in MacDowell's Second ('Indian') Suite for orchestra (1891–5). Such use of folk melodies in themes lent a national or exotic flavour to the music, depending on whether one was borrowing music of one's own people or that of another. But this flavour could also be achieved through stylistic evocation, which is more common than direct borrowing; for example, Glinka's opera *A Life for the Tsar* (1834–6) incorporates only two existing melodies, and the Russian character owes more to his frequent use of melodic formulae drawn from Russian tunes.

The precise associations carried by certain tunes made them useful for programme music. Beethoven's *Wellingtons Sieg* (1813) and Tchaikovsky's *1812* overture (1880) are just two of many battle pieces to quote national hymns; in some cases, a tune represents a performance of it by the soldiers or their band, while in others it more abstractly represents one of the opposing armies. More numerous are works that use borrowed tunes to create a certain atmosphere rather than to relate a series of events. Brahms's Academic Festival Overture paraphrases four German student songs to evoke university life, in honour of the occasion for which it was composed, his receipt of an honorary degree at the University of Breslau in 1880. Some quotations are intended to suggest their texts. Beethoven added quotations of 'Notte e giorno faticar' from *Don Giovanni* and a waltz titled *Keine Ruh bei Tag und Nacht* to variation 22 of the Diabelli Variations (1819–23) as a sly response after Diabelli pressed him to finish the work more quickly. Strauss quoted several of his own pieces in *Ein Heldenleben* (1897–8) to signify his protagonist's 'works of peace'.

Two brief motifs, B–A–C–H and the opening of the Dies irae chant, became perhaps the most frequently quoted ideas in classical music, partly because of their strong associations. J.S. Bach used the subject B–A–C–H (B♭, A, C, B♮) in the unfinished final fugue of *The Art of Fugue*; the 19th-century Bach revival brought fugues on the subject by Schumann, Liszt, Reger and others, and Beethoven, Mendelssohn and other composers used it in other genres. Ralph Waldo Emerson observed that 'Next to the originator of a good sentence is the first quoter of it'; indeed, it is the first quoter that makes a statement into a quotation, which can then be quoted repeatedly. Thus Berlioz's use of the Dies irae, the sequence from the Mass for the Dead, in the last movement of his *Symphonie fantastique* (1830) as a signifier of death and the diabolical spawned hundreds of others, including Liszt's *Dante Symphony* and *Totentanz*, Musorgsky's *Songs and Dances of Death*, Saint-Saëns's *Danse macabre*, Tchaikovsky's *Francesca da Rimini* and later works by Rachmaninoff and many other 20th-century composers, which often shortened the chant to its first eight or four notes. Its meaning depended as much on earlier quotations as on its original associations.

As in centuries past, composers often re-used their own music to suit new circumstances or reveal hitherto unrealized potential. More than a third of Beethoven's compositions reworked his existing music in some way, such as the transcription of his own Piano Sonata in E op.14 no.1 as a string quartet in F; the use of a theme from the ballet *Die Geschöpfe des Prometheus* (1800–01) in a contredanse and as the theme of the *Eroica Variations* for piano (1802) and the variation finale of the 'Eroica' Symphony (1803); and the reshaping of a humorous canon into the theme of the finale of his last string quartet (Lutes, G1975). Rossini recast numbers from earlier operas to create new ones, adapting arias to suit the new words, plot situations and singers. Schubert, Brahms and Mahler borrowed from their own songs in their instrumental works. Berlioz and Bizet re-used passages from earlier works that had been set aside or left unfinished. Wagner's *Wesendonck Lieder* served as studies for *Tristan und Isolde* (1857–9). Bruckner used material from his masses in his later symphonies. Fauré returned in his late works to themes drawn from earlier songs (Nectoux, G1978–9). Composers' re-use of their own music was surprisingly common for a century that so highly valued originality. In some cases, this continued earlier forms of re-use and reworking for a new audience or occasion, as when Rossini recast an aria from an earlier work for a new opera in a different city; in other cases, such as a song in an instrumental work, the composer may have expected listeners to recognize the reference and recall the original text or emotional content.

Recent scholarship on borrowing in the 19th century has often centred on influence between composers, sometimes emphasizing what one piece shares with its model, sometimes focussing on how the new piece transforms or transcends the model. Some studies have applied Harold Bloom's theory of 'the anxiety of influence', which describes artistic creation as an oedipal struggle to overcome the potentially overwhelming impact of an artistic forefather and achieve originality and asserts that a strong younger artist 'misreads' an older work in order to create space for his own art (Bloom, G1973; Korsyn, G1991; Yudkin, G1992; Bonds, G1992 and G1996). This may be too narrowly Freudian, even patriarchal (see the critique in Whitesell, G1994–5), but has the advantages of reflecting the 19th-century emphasis on originality and individuality and of seeing influence not only in similarity but also in the choice to depart from a model.

Composers emulated works in the same genre in order to learn from their predecessors, as an act of homage, or out of rivalry. Beethoven's dependence on Mozart's String Quartet in A K464 in composing his own Quartet in A op.18 no.5 (1799–1800) shows some of each, as he adopts procedures from the model but seeks to surpass it; his late String Quartet in A minor op.132 (1825) achieves a sublimation of the same model. Schubert's late piano sonatas borrowed from or were modelled on Beethoven, and his sonata forms in turn became a model for those of Brahms. Brahms's op.9 variations (1854) use the theme of Schumann's own op.9 and refer to other piano works of both Robert and Clara Schumann, in a gesture of homage towards his friends and advocates. Beethoven's Fifth Symphony was a model for Mahler's Second and Fifth Symphonies in both musical elements and narrative conception. Most scholarship has focussed on Austrian and German composers, but recent studies have demonstrated the influence of Meyerbeer on Verdi's operas of the 1840s, of Gade's C minor symphony and E minor

piano sonata on those of Grieg in the same keys, and of Liszt's B minor Sonata on MacDowell's *Eroica Sonata*.

Composers have often adopted models from earlier generations in order to forge a connection with the past. Beethoven's *Missa solemnis* (1819–23) drew on Handel's *Messiah* and Mozart's Requiem, and Mendelssohn's oratorios were modelled on those of Handel and Haydn and on the Bach Passions. The finale of Brahms's Fourth Symphony (1884–5) is historicist on many levels, reviving the old form of chaconne variations, adapting a bass ostinato from the finale of Bach's Cantata no.150, and using as models for form, procedure and numerous details Bach's chaconne for solo violin (which Brahms had transcribed for piano left hand), the finale of Beethoven's 'Eroica' Symphony, Buxtehude's E minor Ciacona, and Beethoven's Piano Variations in C minor (Burkholder, G1984–5; Knapp, G1989–90). This overlapping of historical models from three centuries (and of different ways of borrowing from a model) anticipated the free mixing in the 20th century of elements drawn from the entire sweep of music history.

It has often been argued that references to existing music create meaning. References to songs or other vocal music can suggest their texts, which may give an implied programme to an apparently 'absolute' instrumental work or may add new levels of meaning to a texted one. Thus Brahms's echo of his song *Regenlied* in *Nachklang* (respectively nos.3 and 4 of his op.59, 1873) heightens the ironic reversal of image in the latter, as rain turns to tears, and his use of their shared opening phrase as the main theme of the finale of his Violin Sonata in G op.78 (1879) suggests his expressive intentions for the sonata (Parmer, G1995–6). Mahler's lengthy reference in the last of the *Lieder eines fahrenden Gesellen* (1883–5, rev. 1891–6) to a scene from Donizetti's opera *Don Sebastian*, in which a man witnesses his own funeral, conveys the feelings of Mahler's protagonist with stunning clarity for those who recognize the allusion (Ringer, G1988). Schumann's Second Symphony (1845–6) alludes to both instrumental and vocal music while tracing the same evolution from struggle to triumph as Beethoven's Fifth Symphony; perhaps the work was intended to convey Schumann's own struggle to come to terms with the Viennese Classical tradition, symbolized by the opening reference to Haydn's last symphony, and make it his own, as suggested by the gradual emergence of a melody from Beethoven's song cycle *An die ferne Geliebte* (one that Schumann had borrowed earlier in his Piano Fantasy op.17), so that the Beethoven theme seems to result from Schumann's own compositional effort (Newcomb, G1983–4). Such interpretations have become more common in recent studies, as scholars seek to identify relationships between works and understand their significance.

Several mutually reinforcing trends dramatically changed musical culture in the 19th century, including a growing market for sheet music and public performances, a new level of connoisseurship, the notion of music as an art practised for its own sake, identification of the composer as an artist (no longer an artisan) with an individual voice, the rise of a permanent repertory of musical classics and the resulting split between art music and popular music. These changes brought with them greater interest in the composer as a personality and, at least in art music, a greater tendency than ever before to ascribe ownership of a musical work to its composer rather than to those who commissioned, performed or heard it. This was codified in more favourable copyright laws and in a new scrupulousness in playing the notes the composer wrote rather than allowing the performer leeway for embellishment and adaptation. In these circumstances, originality grew in importance. Borrowing was fully accepted for genres in which it was traditional, from variations to potpourris, and for conveying through music the flavour of a national or ethnic group, exotic culture or past era by borrowing music that was essentially foreign to the current musical idiom. These had in common the understanding that the composer was placing existing music in a new and very different context. But emulation of earlier works of the same genre, the lifeblood of musical tradition, became problematic, although still used in the training of composers. Too close a similarity to another composer's work in melody or style could bring criticism for unoriginality or plagiarism; only sly allusion, like a wink to the connoisseur, or addressing the same musical issues in a new and original way could allow the younger composer to reach a level equal with his predecessors.

12. 20th-century art music to 1950. Given the increasing emphasis on originality in art music, it is remarkable how frequently 20th-century composers incorporated existing music. As in the 19th century, borrowing was often used to give music a national or regional flavour or to evoke the past. Composers continued to use traditional types of borrowing, reworking their own music, drawing on models and writing variations on borrowed themes. A new element was the growing gulf in musical style and language between modern music, now often post-tonal, and the folk, popular or pre-modern art music most often used as a source. Whereas in the 19th century the borrowed material often sounded exotic or unusual in idiom in comparison to the work in which it was used, the complex and relatively unfamiliar idioms of many modernist and avant-garde composers reversed this, so that the borrowed tonal material, whether recognized or not, was perceived as the most familiar element. Composers, especially after World War II, exploited this to achieve effects from comfort and nostalgia to shock and alienation.

Interest in folk music increased in the early 20th century. Vaughan Williams, Kodály, Bartók, Canteloube, Charles and Ruth Crawford Seeger and many others made significant contributions to ethnomusicology by collecting, transcribing and providing accompaniments for folksongs from their nation or region, often aided by the new recording technologies, before the traditional societies that gave birth to the music withered under the impact of modern life. Folksongs were presented in elaborate orchestral settings, such as Canteloube's *Chants d'Auvergne* (1923–30) and Copland's *Old American Songs* (1950–52), as well as in arrangements for chorus or for solo voice and piano, in settings for piano or instrumental ensemble and in instrumental suites, such as Grainger's *Lincolnshire Posy* (1940) for band. Vaughan Williams and others adapted folksongs as hymn tunes, continuing a tradition of sacred contrafacta that extended back to medieval times.

To some modern composers, 19th-century forms seemed inadequate for concert music on folk and other national tunes. Schoenberg criticized 'folkloristic' composers for using folktunes as symphonic themes, for they were complete in themselves and thus unsuited for development: 'there never remains in popular tunes an unsolved problem, the consequences of which will show up only later' (Schoenberg, H1975). Yet those committed to using national melodies found solutions to this concern through new approaches to form. Stravinsky's *Rite of Spring* (1911–13) and Bartók's *Improvisations on Hungarian Peasant Songs* op.20 (1920) used tunes so brief and motivically constructed that they seem to demand repetition, treated them in continuous variation, and derived harmonies, figuration and linking passages from their elements. Vaughan Williams's *Five Variants of Dives and Lazarus* for strings and harp (1939) was not a set of variations, but a free treatment of five different versions of a tune he and others had collected, linked with imitative and developmental passages based on melodic ideas extrapolated from the tune. This was concert music that was formally innovative in the Romantic tradition but also true to its source, a folktune with many authentic variants. Among the most effective solutions to the problem Schoenberg identified was cumulative form, used by Ives in his Third Symphony (*c*1908–11) and four violin sonatas (*c*1908–17), in which the borrowed theme (almost always a hymn tune) appeared in full only at the end of the movement and was preceded, not followed, by development of its motivic fragments and variants (Burkholder, H1995). This formal reordering made full use of 'developing variation' (in Schoenberg's term) while capitalizing on the sense of completion offered by the culminating statement of the entire borrowed tune. Other composers used similar strategies, such as the black American composer Nathaniel Dett in his choral fantasy *The Chariot Jubilee* (1921), based on the spiritual *Swing Low, Sweet Chariot*.

Such use of folk and national melodies helped to convey a national, ethnic or exotic character, seen also in Falla's use of Andalusian folk music and Spanish Renaissance music, Gershwin's borrowings from blues by W.C. Handy, Jewish scales and motifs in works of Bloch, Schoenberg and Bernstein, Villa-Lobos's use of Brazilian popular music, American folksongs in works of Copland, Harris and Schuman, Busoni's and Beach's use of Amerindian melodies, Japanese music in Puccini's *Madama Butterfly* (1904) and Holst's *Japanese Suite* (1916), Mexican Indian materials in Chávez's *Sinfonía india* (1935–6) and Balinese melodies in McPhee's *Tabuh-Tabuhan* (1936) and Britten's *The Prince of the Pagodas* (1956). Methods of adaptation range widely, from direct quotation to more distant paraphrase.

The music of Ives illustrates the variety of borrowing procedures composers used in the first half of the century, including traditional techniques such as variation, arrangement, setting, paraphrase, cantus firmus, medley, quodlibet and programmatic quotation. The effect or meaning conveyed varies as much as the methods used, from depicting the performance of music and thus the situation in which it was heard (like the bugle playing *Taps* at a memorial service in *Decoration Day*, *c*1915–20) to meditations on the musical material itself, with many gradations in between. In addition to cumulative form, Ives's most striking invention was collage, in which a swirl of quotations and paraphrased tunes is added to the musical fabric. He used this effect in orchestral works such as *Washington's Birthday* (*c*1915–17) and *The Fourth of July* (*c*1914–18) to convey a sense of remembering past events, here respectively a barn dance and a festive celebration. Each borrowed tune is related by type or motif to his main theme, and one tune will suggest another that resembles it in melody or rhythm or is of a similar genre or character, in an apt evocation of the way remembering an event, person or thing can bring others to mind involuntarily through association or resemblance. He achieved a similar stream-of-consciousness effect in several songs through 'patchwork', a technique he adapted from Tin Pan Alley songwriters (see §14 below), stitching together fragments from songs of the past to suggest memories of *The Things our Fathers Loved* (1917) and from Civil War and patriotic tunes in *He is There!* (1917) to suggest that the American entry into World War I continued the idealism of the crusade against slavery.

Awareness of the past resulted in numerous works that referred to or incorporated music of previous centuries. Composers continued to use the Dies irae and B–A–C–H motifs, which now evoked not only the original source but a long tradition of quotation. The B–A–C–H motif suited the 'back to Bach' movement between the world wars and the chromatic language of many modernists, and it was incorporated into 12-note series in works by Schoenberg, Webern, Piston and others as an act of homage and in assertion of a link to the great tradition. Other uses of the past also served to make a statement. English composers seeking to establish a distinctive national music used works from 16th- and 17th-century English composers as themes, as in Vaughan Williams's Fantasia on a Theme by Thomas Tallis (1910) for strings and Britten's *Young Person's Guide* (Variations and Fugue on a Theme of Purcell, 1946) for orchestra; Britten's *Nocturnal* (1963) for guitar adapted cumulative form in presenting a series of variations that only gradually reveal their theme, a Dowland air stated in full at the end. Pfitzner's opera *Palestrina* (1912–15) used the legend that Palestrina had saved polyphony at the Council of Trent by composing the *Missa Papae Marcelli* to argue by analogy that there was still merit in the older Romantic style; in the climactic scene, Palestrina is urged to write the mass in the old style by the spirits of past composers and inspired by angels singing melodies from it (some actual quotations, others intended to suggest it). Satie made a statement of a different sort in his satirical piano pieces, mocking some of the most popular works in the piano repertory by citing Chopin's Funeral March (identified in the music as 'la célèbre mazurka de Schubert') at a tearful point in the second of his *Embryons desséchés* (1913) and recasting Mozart's Turkish rondo as a slow (but 'très turc') 'Tyrolienne turque' in the first of his *Croquis et agaceries d'un gros bonhomme en bois* (1913).

Many composers prepared transcriptions of older works, such as Respighi's three suites of *Ancient Airs and Dances*, Elgar's, Henry Wood's and Stokowski's orchestrations of Bach organ works and Britten's Purcell realizations; some transcriptions, such as Ravel's orchestration of Musorgsky's *Pictures at an Exhibition* (1922), have become more familiar than the originals. When executed by composers commonly identified with modern atonal styles, some such works transcend the genre of

transcription and become 'recompositions' that impose a post-tonal musical structure on a tonal model. Webern's orchestration of the six-part ricercare from Bach's *Musical Offering* (1934–5; *see* ARRANGEMENT, ex.6) divides each line among several instruments to create an effect of pointillism or *Klangfarbenmelodie* and to highlight atonal set relationships, all typical of Webern's music. In *Monumentum pro Gesualdo* (1960), Stravinsky used instrumentation to fragment Gesualdo madrigals into a Stravinskian juxtaposition of opposing groups characterized by different timbres and tonal areas. Stravinsky's reworkings of 18th-century music in *Pulcinella* and Tchaikovsky's in *The Fairy's Kiss* and Schoenberg's recompositions of Handel in the Concerto for String Quartet and Orchestra similarly reinterpret the older music by emphasizing in it what is most congruent with the modern composer's style and by adding motifs, gestures and procedures typical of his most characteristic music. This reversal has been interpreted variously as a 'misreading' in the terms of Harold Bloom's 'anxiety of influence' (Straus, H1990) and as a comment on the irretrievable distance of the past tradition (Auner, H1996). As scholars have developed the view that modern music is engaged in a dialogue with the past, such recompositions, once seen as oddities, have assumed fresh significance as the most overt expression of the ambivalence composers feel towards the past.

As in the 19th century, composers frequently relied on specific models. Often these were works of immediate predecessors, such as Wagner's *Tristan und Isolde* for Debussy's *Pelléas et Mélisande* (Abbate, 1981), Ravel's *Rhapsodie espagnole* for Stravinsky's *Firebird* or Debussy's *Syrinx* for Varèse's *Density 21·5* (Baron, H1982). But sometimes composers reached back further, as when Schoenberg modelled the first movement of his 12-note String Quartet no.3 (1927) on that of Schubert's String Quartet in A minor D804, Stravinsky drew on Verdi and on treatments of the Oedipus story by Mendelssohn and Purcell for his *Oedipus rex* (1927) and on Mozart for *The Rake's Progress* (1951), and Britten modelled aspects of his *War Requiem* (1961) on the requiem settings of Mozart and Verdi. These suggest a deliberate engagement with the past tradition, combining homage or competition with a recognition of the gulf between common-practice tonality and modern idioms. Some cases imply broader meanings; Bartók's use of the 'Heiliger Dankgesang' movement from Beethoven's String Quartet in A minor op.132 as a model for the middle movement of his Third Piano Concerto (1945) drew a parallel between their lives, for Beethoven wrote the quartet movement as an expression of thanks after recovering from an illness, and Bartók too felt that he was regaining his strength after years of ill-health.

Programmatic quotation was as frequent in the 20th century as in the 19th. Debussy quoted *God Save the King* to convey the Englishness of his subject in *Hommage à S. Pickwick, Esq. P.P.M.P.C.* and *La Marseillaise* to link fireworks to patriotism in *Feux d'artifices* (both in Préludes for piano, book 2, 1912–13). Quotations of folkish tunes, both imagined and real, in Berg's *Wozzeck* (1917–22) and *Lulu* (1929–35) comment ironically on the action on stage. Hindemith's overture to *Mathis der Maler* (1934–5), re-used as the first movement of the symphony he extracted from the opera, depicts a 'Concert of Angels' and states the chorale *Es sungen drei Engeln* three times in succession near the beginning and again near the end. Often, what seems to be a quotation has a more pervasive presence in the music. The Bach chorale *Es ist genug*, which appears near the end of Berg's Violin Concerto (1935) in fulfilment of its programme as a Requiem, is foreshadowed from the beginning, its opening notes embedded in the work's 12-note series. Richard Strauss's *Metamorphosen* (1945), a mournful meditation on the effects of war, culminates in the theme from the funeral march of Beethoven's 'Eroica' Symphony after having developed its motifs and gestures.

13. ART MUSIC AFTER 1950. After World War II, some composers were anxious to reject the past and insist on the new. Serial composers such as Babbitt and Boulez avoided the references to the past common in Berg and Schoenberg and created a wholly self-referential music through serialization of rhythm, dynamics and articulation as well as pitch. The early chance music of Cage likewise focussed on present experience and avoided the familiar. In this context, the re-emergence of overt quotation seemed radically new and daring, especially when entire pieces began to be made out of borrowed music, much of it tonal. The belated diffusion of Ives's music provided one model, Stravinsky's recompositions another, as did Joyce's novels in literature, and collage, pop art and postmodern architecture in the visual arts. Composers rediscovered the pleasure of reworking existing material, but now the subject of their music was frequently their relationship to the past tradition.

Peter Maxwell Davies turned to chant and English Renaissance music early in his career, basing his wind sextet *Alma Redemptoris mater* (1957) on the chant and its setting by Dunstaple. Subsequent works drew on chant, English carols, the sacred music of Gesualdo, early motets and other sources, especially the In Nomine of Taverner, reworked in two fantasias (1962 and 1964) and in his opera on Taverner's life (1962–70). Characteristically, the borrowed material is distorted and subjected to modern techniques of manipulation, emphasizing the distance from the past. George Rochberg turned away from serialism after the death of his son in 1964 and in *Contra mortem et tempus* and *Music for the Magic Theater* (both 1965) juxtaposed passages quoted or derived from earlier composers with his own music, seeking to evoke 'the many-layered density of human existence'. His *Nach Bach* (1966) for harpsichord was a 'commentary' on Bach's Partita no.6 in E minor, interspersing fragments and transformations of the Bach with free atonal passage-work, and his *Ricordanza* (1972) for cello and piano is a hyper-Romantic work based on Beethoven's Cello Sonata op.102 no.1. B.A. Zimmermann's *Musique pour les soupers du roi Ubu* (1966) was a 'collage' of music from the Renaissance to the modern era. Lukas Foss described his *Baroque Variations* (1967) as 'not so much "variations" on three familiar pieces of baroque music as they are "dreams" about these pieces'; the three movements take respectively works by Handel, Domenico Scarlatti and Bach and distort them by making parts inaudible, fading in and out, echoing passages in different rhythms, changing note placement, adding and subtracting notes and using clusters, indeterminacy and other effects associated with the contemporary avant garde (ex.12). In the third movement of his *Sinfonia* (1968–9), Berio took the third movement of Mahler's

* In this movement sounds as written ** Play natural harmonics throughout; sounds as written

Second Symphony (itself adapted from a Mahler song), subtracted some parts and passages, and overlaid it with quotations from over 100 works from the Baroque to the 1960s; each quotation is linked in some way to the Mahler or to texts spoken over the music, including excerpts from Samuel Beckett's *The Unnamable*, resulting in a vast, dream-like stream of interconnected ideas. In all of these, the appearance of the older music and the way it is treated is surprising and novel, but the quoted music itself is often familiar. This meant that listeners could follow the progress of a work more easily than they could in serial or avant-garde music, where themes (if they existed at all) were too unfamiliar to grasp, and as a result works with borrowed material have often had a wider appeal than a composer's other music. At the same time, the contrasts between the borrowed material and the often strange ways it was transformed or juxtaposed with quite different music could be fascinating and expressive, commenting by implication on the fragmented, pluralistic culture and music of the modern era, the gulf separating the present from the past or the modern sense of time, space and simultaneity.

Other works took an even more radical stance towards music of the past. Tape pieces from Cage's *Imaginary Landscape no.5* (1952) to Stockhausen's *Gesang der Jünglinge* (1955–6) and *Telemusik* (1966) subjected recorded music to tape and electronic manipulation, treating it in some cases as equivalent to other recorded sounds used for *musique concrète*. In *Cheap Imitation* (1969), Cage followed the melodic line of Satie's *Socrate*

and transposed segments of varying lengths into different keys using chance operations. (The work was written when the copyright owner refused permission to perform the Satie in conjunction with a dance already choreographed to fit its rhythm, so Cage changed the pitches to create music no-one could claim to own: hence the title). In *Hymns and Variations* (1979) for voices and *Some of The Harmony of Maine* (1978) for organ he took partsongs of Billings and Belcher and deleted portions, again using chance. These works challenge received ideas of authorship, ownership and the integrity of the musical work. So did Kagel's *Ludwig van* (1969), a jumble of individual lines extracted from Beethoven and superimposed, composed as a kind of anti-homage. Schnittke often borrowed existing music, as in the passages from Beethoven, Chopin, Strauss, Grieg, Tchaikovsky, Haydn, jazz, the Dies irae and his own earlier works in his Symphony no.1 (1969–72). His cadenza (1983) for Beethoven's Violin Concerto, first movement, quotes five later violin concertos, those by Bartók (both), Berg, Shostakovich and Brahms; in the context of the familiar concerto, his modern style is jarring and the quotations doubly so, bringing into consciousness the peculiar contradiction between our identification of each work with its historical moment (and our insistence on its stylistic purity) and our concert repertory in which music from many eras appears side by side, as if time did not matter.

Many others have used borrowed material prominently, including Tippett, Henze, Crumb, Schnebel, Schafer, Schat, Rzewski, Louis Andriessen and Holloway. Methods and goals have varied widely, but most works have dramatized the distance between current aesthetics, idioms and procedures and those of the past. Borrowing has often provided a way to reintroduce tonality without renouncing newer procedures. In contrast to the cult of originality earlier in the century, the hermeticism of serialism and the ideology of musical progress, this turn to the familiar and to the past opened up possibilities and paved the way for a new pluralism extending from neoromanticism to minimalism.

In the 1980s and 90s borrowing took on a gentler aspect. The rise of neo-romanticism lessened the gulf between current and earlier idioms and between concert and popular music, and composers often borrowed to represent a blending of idioms rather than disjunction. John Corigliano's Symphony no.1 (1990) commemorates musician friends lost to AIDS by incorporating music they played. Philip Glass based his *Low* Symphony (1992) on themes drawn from the experimental pop music recording *Low* by David Bowie and Brian Eno, drawing their work into the world of the symphony. Christopher Rouse and Claude Baker are among the American composers who borrow in much of their work. Rouse's Cello Concerto, written for Yo-Yo Ma, makes a conspicuous citation from Monteverdi's *L'incoronazione di Poppea*, and his Piano Concerto (1999), written for Emanuel Ax, uses Schumann's as a point of departure. Baker's *The Mystic Trumpeter* (1999), written for the St Louis SO, interweaves material from Ives's *The Unanswered Question*, Messiaen's *Vingt regards sur l'enfant Jésus*, Rochberg's *Music for the Magic Theater* (itself based on borrowed material) and *Reis glorios* by the medieval troubadour Giraut de Bornelh to convey images from the Whitman poem that gives the work its title and programme. For the listener who recognizes none of the references, the character of the music suffices to suggest the programme. The smooth integration of borrowed and new music lends a sense of narrative unity quite the opposite of the disjunctions between context and quotation so often felt in music of the 1960s.

For some commentators in the 1960s and after, the extensive use of borrowing in 20th-century avant-garde works raised issues concerning the autonomy of the musical artwork. Seen in historical perspective, the concept of the autonomous musical artwork is so young that this seemed like a return to normality. While many works juxtaposed fragments, as in a collage, stressing the disjunction with the past, others sought a synthesis, recognizing that modern listeners know many kinds of music and seeking to bring them together in a unified vision. Parallels with borrowing and allusion in other arts have been explored; music scholars have begun to apply to music the rich literature on intertextuality and allusion in literature and postmodernism in the arts.

14. POPULAR MUSIC, JAZZ AND FILM MUSIC. Musical borrowing in American and European popular music has only recently begun to be studied, but it is clear that borrowing plays a major role. In the 17th and 18th centuries, popular tunes and famous airs were frequently re-used for newly composed texts, in such genres as the vaudeville, broadside ballad and ballad opera. Numerous collections of 'parodies' in France made music composed for the stage or the aristocracy available to the middle class in new arrangements and with new texts. Contrafactum continued to be a frequent practice in 19th-century popular music, including such famous examples as the American national anthem *The Star-Spangled Banner* (1814), with new words by Francis Scott Key to John Stafford Smith's tune for the English drinking-song *To Anacreon in Heaven* (*c*1775). German street songs were often adaptations of melodies from popular marches, dances or songs from operettas or Singspiele, with new, usually sentimental or humorous words (*see* GASSENHAUER). Melodies of 19th-century American popular songs and hymns are often related, as if a songwriter began with a fragment of a familiar tune and extended it. Thus the American Civil War songs *The Battle Hymn of the Republic* (1862, itself a contrafactum of William Steefe's *Glory, Hallelujah* of *c*1856 and *John Brown's Body* of *c*1859), *The Battle Cry of Freedom* (1862) and *Tramp, Tramp, Tramp* (1864) all have phrases with very similar melodic contour (ex.13) and were all published in the same key. The composer of the last two, George Frederick Root, probably intended an allusion to be heard, at least unconsciously. His earlier song heightens its patriotic appeal by recalling the most popular rallying song in the North. His later song, on the Union soldiers languishing in Southern prisons, poignantly echoes the songs that inspired so many to volunteer, and the chorus evokes images of marching (from *The Battle Hymn*) and the flag, the boys and freedom (from *The Battle Cry*), reminding the families at home of the noble cause their loved ones were serving.

The recasting of existing music into new arrangements for new media is a constant feature of popular music, a tradition in which musicians and audiences continued to regard music as belonging to the user rather than the composer far longer than in the art-music tradition. Thus Stephen Foster arranged popular songs and Italian opera

excerpts for one to four instruments in his collection *The Social Orchestra* (1854), and J.P. Sousa included his own potpourri on Sullivan's *The Sorcerer* and his *Carmen March* based on melodies from Bizet's opera in his collection *Evening Pastime: a Selection of Favorite Duets* (1879). Arrangements were generally received as versions of the original work, although some were rather distant from it, but variation sets, paraphrases and other works based on familiar tunes are more clearly instances of borrowing. 19th-century brass bands and military bands often played arrangements of popular songs. In the USA a genre of march emerged at the middle of the century that incorporated a popular song in one strain or presented a medley of several tunes. In the 20th century, medleys arranged from folksongs, Christmas songs, musicals, film scores or other familiar sources were a staple of the band repertory. Music for the quadrille was often arranged from popular songs or stage works, as in the quadrilles by Johann Strauss the younger on operas by Balfe, Flotow, Verdi, Meyerbeer and Auber. Chabrier's *Souvenirs de Munich* for piano four hands (1885–6) is a pleasantly satirical quadrille on themes from *Tristan und Isolde* whose humour derives from the incongruous appearance of Wagner's serious themes in a most unserious form; Fauré took the Chabrier as a model for his similar quadrille *Souvenirs de Bayreuth* (?1888) on themes from the *Ring* cycle.

Songs for the British music hall and the continental cabaret sometimes quoted or parodied familiar music for satirical effect, as did American minstrel shows and operatic troupes. John Brougham's burlesque extravaganza *Pocahontas* (1855) borrowed a wide range of music, from Bellini and Verdi operas to Stephen Foster songs. In Vienna, J.N. Nestroy and his collaborators parodied operas by Rossini and Meyerbeer (music by Adolf Müller) and Wagner's *Tannhäuser* and *Lohengrin* (music by Carl Binder). Arthur Sullivan often used stylistic parody in his operettas, as in the Handelian music for the entrance of the judge in *Trial by Jury* (1875), and also used direct quotation; *The Mikado* (1885) borrows two Japanese songs to establish the locale, then quotes Bach's G minor organ fugue when the Mikado's song refers to Bach.

American Tin Pan Alley songwriters from the 1890s to the 1920s frequently quoted a familiar song just before the final cadence of the chorus, as in George M. Cohan's *The Story of the Wedding March* (1901), which quotes Mendelssohn's wedding march, or Irving Berlin's *Alexander's Ragtime Band* (1911), which quotes Foster's *Old Folks at Home*. The musical reference is normally alluded to in the text, which may borrow words from the quoted song or describe a performance of the quoted music. Cohan's *The Yankee Doodle Boy* (1904) quotes *Yankee Doodle* like this in the chorus, but the verse is a patchwork of patriotic tunes, including *Yankee Doodle*, *Dixie*, *The girl I left behind me* and *The Star-Spangled Banner*. Other songwriters wrote such patchworks and Ives adopted the format for several of his art songs. Quotation for humorous effect or in relation to a text continued in popular songs throughout the 20th century; the Beatles' *Glass Onion* (1968) referred to their earlier *Strawberry Fields Forever* and *The Fool on the Hill* in the text and quoted short motifs from each, and a 1992 country song recorded by Pam Tillis used the much-quoted 'Hootchy-Kootchy Dance' of Little Egypt to suggest an Egyptian milieu for the singer's comment that she is 'the Queen of Denial' (i.e. 'the Nile'). Frank Zappa used borrowed material in most of his music, ranging from *The Battle Hymn of the Republic* and the march from *Aida* to the *Twilight Zone* theme and fragments of Varèse and Webern, almost always as a comment on the text.

Re-use, reworking and extension of existing music are basic elements of West African musical practice and continued in black American music of the 19th and 20th centuries. The concept of borrowing, developed in the study of European written repertories, is less appropriate to these traditions than the concept of sharing materials and traditions. This avoids implications of ownership, singularity and originality, and acknowledges that there is often no distinct entity from which to borrow. Recent scholarship has introduced the term 'signifying' for the characteristic approach of black American musicians; the materials of music are considered common property, and anyone who engages with those materials in an expressive way is 'signifying' on them. As slaves were converted to Christianity, they adapted work-songs to Christian texts and improvised new songs on similar material to create a new tradition of spirituals (Epstein, 1977). Blues and jazz involved improvisation and composition based on existing harmonies, melodies and bass patterns, and similar

practices continued into popular music derived from black American traditions, including rhythm and blues and rock and roll.

Jazz improvisation is typically based on existing pieces but has been viewed as a performance of a piece rather than a new work based on borrowing. However, improvisers from Louis Armstrong onwards often quote familiar tunes in the middle of a solo as a joke, comment or meaningful allusion, and soloists from Charlie Parker onwards borrow passages from recorded solos by other artists as a homage or other gesture. In the early 1940s, bop artists wrote numerous 'contrafacts', new jazz melodies to the chord 'changes' (harmonic progressions) of popular tunes, such as Parker and Dizzy Gillespie's *Anthropology* (on the chord progression of Gershwin's *I got rhythm*, the most frequent source for contrafacts) and Parker's *Ornithology* (on Morgan Lewis's *How High the Moon*). This practice, like the use of the traditional 12-bar blues, allowed the artists to create melodies in the new jazz style yet continue to improvise on familiar harmonic patterns. This facilitated the learning of new repertory, challenged musicians' creativity and provided a site for competition between artists using the same material. The parallels with the 16th- and 17th-century practice of improvising and composing new melodies and variations over familiar bass lines and harmonic patterns are obvious, with a new twist: a new tune and title meant that no royalties or performing fees were due on the songs from which the harmonic progressions were borrowed. This again asserted the traditional African concept of music as common property within a music industry that tended to devalue and underpay black American musicians.

New forms of borrowing emerged with the development of recording technology in the late 20th century. Pop musicians sometimes borrowed recorded material from their own songs or from other music, overlaying new and borrowed elements in the recording studio. An early example was Simon and Garfunkel's *Save the life of my child* on their *Bookends* album (1968), in which the opening of their first hit *The Sound of Silence* (1965) was dubbed in with electronically enhanced echo as part of an interlude. Black American musicians devised new genres based on the manipulation of recorded material, drawing both on technology and on black American traditions of re-using existing music. In the late 1970s, disco artists frequently used previously recorded bass and rhythm tracks as a backing for new songs. Rap emerged from a practice of improvising rhymed poetry over instrumental passages from existing slow disco or funk recordings; the first rap recording to reach the top 40 in the pop charts, *Rapper's Delight* (1979) by the Sugar Hill Gang, used excerpts from Chic's slow disco hit *Good Times* (1979). Scratching was a technique of rotating a record manually under a stylus to produce rhythmic, percussive sounds, first practised live by disc jockeys at parties, then used on recordings, beginning with *Adventures in the Wheels of Steel* (1981) by Grandmaster Flash and the Furious Five. The invention of digital sampling made manipulation of recorded material easier, and rap recordings began to include many more 'samples', digitally recorded snippets of music, speech or sounds; Public Enemy's *Night of the Living Baseheads* (1988) includes numerous samples, each of which adds meaning and resonance to the song's anti-drug and anti-racist message. Clarification of copyright law in the early 1990s forced rappers to ask permission to use samples and to give credit, stimulating them to reduce the number of samples and to diversify their sources to include classical music, where permissions were often easier and less expensive to obtain. Samples have been used by many others besides rap musicians, notably in the *Plunderphonics* (1989) of John Oswald, which directly engages issues of ownership.

Throughout the 20th century, musicians in popular traditions have reworked or quoted classical music. Some Tin Pan Alley songs were expressly about classical music; Berlin's *That Mesmerizing Mendelssohn Tune* (1909) described the romantically intoxicating powers of Mendelssohn's 'Spring Song' (*Song without Words* op.62 no.6) and interleaved its opening figure with new material in ragtime style. Ragtime orchestras arranged classical works in ragtime style, as in performances by Will Marion Cook's Southern Syncopated Orchestra based on Mendelssohn's Wedding March and a Rachmaninoff prelude (1918–19). Opera was a presence in jazz; Fletcher Henderson's *Araby* (1924) was based on Valentine's aria 'Avant de quitter ces lieux' from Gounod's *Faust*, and Louis Armstrong inserted quotations from *Rigoletto*, *Pagliacci* and other operas into his improvised solos alongside popular tunes. The opening theme from Tchaikovsky's First Piano Concerto became a popular hit song as *Tonight we Love* (1941), and Robert Wright and George Forrest's musical *Kismet* (1954) was based on melodies by Borodin. Duke Ellington adapted Tchaikovsky and Grieg for jazz band in his *Nutcracker Suite* and *Peer Gynt Suite* (1960), and Stan Kenton did the same for Wagner. Emerson, Lake and Palmer reworked Musorgsky's *Pictures at an Exhibition* and Copland's *Fanfare for the Common Man* as rock music in an attempt to raise rock to the level of art music. Barry Manilow framed his song *Could it be Magic* (1975) with the beginning and end of Chopin's C minor prelude. The disco version of the first movement of Beethoven's Fifth Symphony, titled *A Fifth of Beethoven*, was a novelty number, but Malcolm McLaren's songs *Madam Butterfly*, *Death of Butterfly* and *Carmen* on his 1984 album *Fans* were intriguing retellings of the operas' stories in pop style, woven around the heroines' most famous arias. The motivations for borrowing from classical sources have ranged from recycling good melodies for a new audience to humour, irony or commentary, often exploiting the perceived distance between the 'high' culture of art music and the broad-based popular culture.

Film music has relied on existing music from the beginning. Early silent films were accompanied by music that was improvised or assembled by a pianist or organist, who matched emotionally appropriate music to the events on the screen. After 1905, publishers printed collections of music, keyed by situation, drawing mostly on classical instrumental works, and cue sheets were issued for particular films suggesting which pieces to use for each segment; the result was a pastiche. From the 1910s, orchestral scores were created for some larger films, again drawing on existing music; Joseph Carl Breil's score for *Birth of a Nation* (1915) included excerpts from symphonic works and Civil War songs appropriate to the dramatic action. When technological advances made sound films possible in the late 1920s, early sound films such as *The Jazz Singer* (1927) continued to incorporate existing music. As original scores were commissioned,

composers changed from direct borrowing to the use of models or the adaptation of music with strong associations. Max Steiner's music for *King Kong* (1933) adopted Wagner's leitmotif system and echoed the Fasolt and Fafner motif from *Das Rheingold* in King Kong's leitmotif; Steiner's score in turn was subject to endless imitation. Composers adapted ethnic materials to set a scene, as in Steiner's use of Jewish melodies in *Symphony of Six Million* (1932) and Herbert Stothart's use of English folk melodies in *David Copperfield* (1935). Later film scores draw on all of these traditions. Some are pastiches of existing music, such as *2001* (1968), which uses classical works from Johann Strauss to Ligeti, and *American Graffiti* (1973), which uses American pop music of the 1950s to convey time, place and situation. Some are modelled on existing works; John Williams's score for *Star Wars* (1977) relies heavily on Holst's *The Planets*, and Takemitsu's battle scene for *Ran* (1985) is modelled directly on the first section of 'Der Abschied' from Mahler's *Das Lied von der Erde*, conveying profound sorrow through sound, style and musical reference. Film composers often reworked their scores into concert music, as in Prokofiev's cantata *Alexander Nevsky* (1938–9), Copland's suite from *The Red Pony* (1948) and Korngold's Violin Concerto (1945, using themes from his 1930s film scores). Cartoons often use or parody classical music for comic effect, as in Scott Bradley's *The Cat Concerto* (1947) on Liszt's Hungarian Rhapsody no.2 and Carl Stalling's skewering of Wagner in the Bugs Bunny classic *What's Opera, Doc?* (1957). Another realm for musical borrowing is underscoring advertisements, in which familiar music, from Vivaldi's 'Four Seasons' to the Beatles' *Revolution*, can be used to lend certain associations to a product.

15. RESEARCH ON BORROWING. This survey of borrowing in the Western musical tradition from the Middle Ages to the present shows that the use of existing pieces in new works is both more varied and more pervasive than has usually been acknowledged. At some times and in some repertories borrowing is the rule, at other times the exception, and at still other times a possibility that carries particular significance. Extent and methods vary, but every composer or improviser borrows and reworks existing music, and procedures of borrowing are as important a part of a composer's equipment as counterpoint, harmony, texture and form. Until the 20th century, it was normal for composers to be trained through the imitation of models and the manipulation of borrowed material; this is still true in popular genres.

Scholars have studied aspects of borrowing in music since the emergence of musicology as a field, and there is now a vast literature on the subject. Early research was hampered to some extent by the cult of originality that arose in the 19th century. Writers in the 19th and early 20th centuries often felt obliged to address the morality of borrowing or distinguish legitimate forms of borrowing from plagiarism, and this was still occasionally a theme in the later 20th century (Noé, A1963 and A1985; Carroll, A1978; Rosen, A1980–81). Each era, genre or composer tended to be treated as some kind of special exception from a presumed norm of artistic autonomy; even in Renaissance studies, where borrowing became a subject of central of central importance, there developed largely separate traditions of scholarship on vocal and on instrumental music. This made similarities, differences and historical connections between borrowing practices of various eras and repertories difficult to see or evaluate. New discoveries were generally couched in terms of older ones, so that the same instance might be described as parody, quotation, borrowing or plagiarism, depending on whether the writer was acquainted with the literature on the Renaissance mass, 20th-century music or Handel.

The popularity of quotation and collage in art music since the 1960s and the growing interest in the same period in scholarship of music of the 19th and 20th centuries have stimulated a flood of new research on borrowing in music since Beethoven and reconsiderations of borrowing in earlier eras. There have been many attempts to clarify terminology and make the distinctions necessary for categorizing and describing borrowing practices. With an increasing awareness of the extent of borrowing in every period, scholars are beginning to identify which practices overlap and which are unique to certain repertories or composers. Approaches to influence, borrowing, allusion and intertextuality in the parallel fields of art history and literary criticism are bringing fresh insights to the study of borrowing in music and to the relationships between the arts. The expansion of research is making it possible for the first time to see all the uses of existing music, from contrafactum, organum and cantus firmus to collage, jazz contrafacts and digital sampling, as aspects of a single field that crosses historical periods and research specializations.

J. PETER BURKHOLDER

Borry. *See* BOURRÉE.

Borsai, Ilona (*b* Cluj, 10 April 1924; *d* Budapest, 8 July 1982). Hungarian ethnomusicologist. She took degrees in Latin, ancient Greek and French at the Hungarian University of Cluj (1946); in 1949 she moved to Budapest, where she studied music education and choir training (1949–51) and musicology (1956–61) at the Academy of Music. Her teachers included Kodály, Szabolcsi and Bartha. In 1961 she became an assistant at the folk music research group (from 1974 the musicological institute) of the Hungarian Academy of Sciences. Her main research topics were folksongs of northern Hungary (the 'Palots' [Polovetz] ethnic group), Hungarian children's songs (games and chanted rhymes), Egyptian folksongs and Coptic liturgical music. She conducted many field expeditions in Hungary and Hungarian-speaking areas of Romania as well as several expeditions to Egypt (1966–7, 1969, 1971), recording many thousand items from each area; she published the results in about 20 studies in specialist journals, mostly with transcriptions and analyses of the recorded examples. Besides co-editing several books of children's songs and Hungarian and Slovakian folksongs, she lectured at various international congresses, mainly on Coptic music.

IMRE OLSVAI/R

Borsaro, Arcangelo (*b* Reggio nell'Emilia; *fl* 1587–1616). Italian composer. He was a Franciscan monk; despite his active life as a composer, mainly of church music, he seems not to have held a church post. His earliest collections are in the lighter forms; at least three seem to have been lost. The spiritual *Pietosi affetti* (1597) was popular enough to be reprinted in 1616 with continuo added. The surviving secular volumes contain pieces in a playful style, mainly for three voices, the lowest of which is usually an alto. After 1600 he was one of the many north Italian composers who imitated Viadana's small-scale concertato style, though for mass and Office music, such as the Requiem music of 1608 and the liturgical items in the *Concerti* of 1605, he retained a transitional polyphonic or double-choir style. Some of his double-choir motets are unified by a triple-time refrain: an example is *Sit nomen Domini* (1605), whose interludes are for groups of soloists drawn from both choirs. If the liberal selection of his motets found in contemporary German anthologies is representative, he seems to have been fond of sonorous, low-pitched textures (TTBB) when writing for four voices. His collections of 1611 and 1615 show a more experimental mixture of voices and instruments: the latter contains a *Quem vidistis* for soprano or tenor and four instruments, which, for presumably provincial church music, is an early example of such scoring.

WORKS

all except anthologies published in Venice

Il quarto libro delle canzonette, 3–4vv (1598)
Vespertina psalmodia, 8vv, ... duoque cantica ... addito psalmo 139 (1602)
Concerti ecclesiastici ... si contengono mottetti, 1–8vv: Domine ad adiuvandum, Dixit Dominus, falsi bordoni, Mag, 5vv; una Compieta, 8vv; messa, 8vv; litanie che si cantano nella Santa Casa di Loreto, 8vv, bc (org), op.9 (1605)
Sacri sacrificii per gli deffonti ... 8vv, op.10 (1608)
Novo giardino de concerti, 8vv/insts, bc ... li contengono alquante Antifone del cantico della Beata Virgine ... et altri motetti, op.11 (1611)
Odorati fiori: concerti diversi, 1–3vv, bc (org), con altri da concertare, vv, insts ... con un capriccio da sonare, op.12 (1615)
Secondo libro dell'odorati fiori, concerti diversi, 1–3vv, bc, (org), op.13 (1616)
27 motets in 1611^1, 1612^3, 1613^2, 1621^2, 1622^2, 1623^2, 1626^2, 1627^1, 1627^2; 4 motets in *D-Bsb*, *PL-WRu*; according to *EitnerQ*, 2 motets in Liegnitz, Bibl. Rudolfina, and 2 canzonettas in 1570^{19} (attrib. Arcangelo da Reggio)

JEROME ROCHE

Borsdorf, Friedrich Adolf (*b* Dittmannsdorf, Saxony, 25 Dec 1854; *d* London, 15 April 1923). German horn player and teacher. He studied with Lorenz and Oskar Franz at the Dresdner Konservatorium (1869–74), later playing in a military band. On gaining a contract at Covent Garden, he moved to London in 1879. After various engagements in the provinces, including one with August Manns in Glasgow, he settled in London, playing the horn for Hans Richter and in the Queen's Hall Orchestra. He resigned from the latter over the dispute about deputies, becoming a founder-member of the LSO, whose widely admired horn section became known as 'God's Own Quartet'.

On arrival in England Borsdorf was obliged to discard his German horn in favour of the widely used French model. Borsdorf's instrument was made in 1821 by L.-J. Raoux for Giovanni Puzzi, the Italian player active in London in the mid-19th century. His performance was a revelation, being marked by a sure attack (rare at the time), excellent phrasing, breath control and dynamic range. His example, as well as that of his German contemporary Franz Paersch, who was also in England at the same time, had a vitalizing effect on British horn playing.

Not only an outstanding orchestral and chamber player, Borsdorf also had considerable influence as a teacher. In 1882 he became a professor at the Royal College of Music, and also at the Royal Academy of Music in 1897. His many successful pupils included Alfred and Aubrey Brain (his successor at the RAM) and Frank Probyn (his successor at the RCM). He also taught his three sons: Oskar, who emigrated to the USA; Emil, who was a member of various London and British provincial orchestras; and Francis Bradley, who held principal positions with the LPO and the orchestra of Sadler's Wells Opera (later the English National Opera), retiring in the early 1980s.

Bortkiewicz [Bortkievich], **Sergei** [Sergey] **Eduardovich** (*b* Kharkiv, 28 Feb 1877; *d* Vienna, 25 Oct 1952). Austrian pianist and composer of Russian origin. He studied at the Kharkiv Music School with Bensch (piano) and at the St Petersburg Conservatory (1896–9), where his teachers

included van Ark (piano) and Lyadov (theory). In 1900 he entered the Leipzig Conservatory to study for two years with Reisenauer (piano) and Jadassohn (composition). From 1904 to 1914 he lived in Berlin, where he taught for a year at the Klindworth-Scharwenka Conservatory. Although he won some renown as a pianist, he became better known as a composer and performer of his own works. His greatest success of that period was the Piano Concerto no.1. At the outbreak of World War I he returned to Russia, but was forced to emigrate in 1919. He settled first in Constantinople, and then in Vienna where he lived from 1922 until his death; he became an Austrian citizen in 1926. Although a Bortkiewicz Society was founded in Vienna in 1947, Bortkiewicz's adherence to 19th-century ideals of virtuosity meant that he was soon virtually forgotten.

Bortkiewicz's piano style was quite typical of the post-Romantic Russian tradition: based on Liszt and Chopin, influenced by Tchaikovsky and Russian folklore, and virtually unaffected by 20th-century musical trends in western Europe. His craftsmanship was meticulous, his imagination colourful and sensitive, his piano writing idiomatic; a lush instrumentation underlines the essential sentimentality of his melodic invention. The grandiloquent sweep of the Piano Concerto no.1 is, at times, faintly reminiscent of Rachmaninoff; the Concerto no.2, for left hand alone, was made known by Wittgenstein, for whom it was written. Bortkiewicz mastered the skills of the past without adding anything distinctly personal or original, though Walter Niemann (*Das Klavierbuch*, Leipzig, 1910) warned against underestimating him.

WORKS
(*selective list*)

Op: Akrobaten, op.50, *c*1938

Orch: Pf Conc. no.1, op.16, perf. 1912; Othello, sym. poem, op.19; Vc Conc., op.20, 1922; Vn Conc., op.22, 1923; Pf Conc. no.2, op.28, left hand, perf. 1930; Pf Conc. no.3 'Per aspera ad astra', op.32 (1927); Oesterreichische Suite, op.51; Sym. no.1, op.52, *c*1940; Ov., op.53; Sym. no.2, op.55, *c*1940; Jugoslawische Suite, op.58

BORIS SCHWARZ/SIGRID WIESMANN

Bortnyans'ky [Bortniansky], **Dmytro Stepanovych** [Bortnyansky, Dmitry Stepanovich] (*b* Hlukhiv, Ukraine, 1751; *d* St Petersburg, 28 Sept/10 Oct 1825). Ukrainian composer, singer and music director, active in Russia. He began his musical training early, possibly at the Hlukhiv choir school, and in 1758 went to sing in the Russian imperial court chapel in St Petersburg, where he became one of Empress Elizabeth's favourite choirboys. Singled out for his unusual talent, he was trained in opera and eventually performed major roles in court productions: in 1764 he played the role of Admetus in H.F. Raupach's *Al'tsesta*.

During this period he studied composition with Galuppi. In 1769, after Galuppi had left for Venice, Catherine the Great sent Bortnyans'ky to further his studies there, with Galuppi. His first extant compositions date from his years in Italy: he composed three *opere serie*, two of them, *Creonte* (1776) and *Alcide* (1778), for Venice and the third, *Quinto Fabio* (1778), for Modena, several settings of Roman Catholic texts including an *Ave Maria* (1775), a *Salve regina* (1776) and a multi-movement Gloria. His setting of the entire Catholic Mass Ordinary in German, *Nemtskaya obednya* (German Liturgy), may also have originated during this period.

In 1779 Bortnyans'ky was recalled to the Russian court. Initially he was engaged only as a staff composer and assistant director at the imperial court chapel, but when Paisiello left Russia in 1783, Catherine the Great awarded Bortnyans'ky one of Paisiello's former posts, as Kapellmeister to her son Paul at the Maliy Dvor (Lesser Court). Until 1796, Bortnyans'ky continued to compose sacred music for Catherine, producing probably the bulk of his Orthodox choral music during this period. For Paul he meanwhile composed secular music reflecting the taste of his court, notably three operas: *La fête du seigneur* (1786), *Le faucon* (1786) and *Le fils rival, ou La moderne Stratonice* (1787). All are in the style of *opéra comique*, with short musical numbers simple enough to be performed by amateur visitors. Performances of the operas were sometimes followed by choral cantatas, presumably composed by Bortnyans'ky as well. Bortnyans'ky also taught the harpsichord and piano to the royal family and wrote several keyboard and chamber works. His collection of French *romances* (1793) is the earliest known one by an Eastern Slavonic composer.

After the death of Catherine the Great in 1796, Paul I assumed the throne and appointed Bortnyans'ky director of the imperial court chapel, making him the first native Slavonic composer to hold that post. Bortnyans'ky apparently composed rather little after this (a few large-scale occasional cantatas for court events, hymns and chant harmonizations), and directed his attention to improving the musical standards and living conditions of the singers. During his tenure, the chapel increased its membership to 108 singers and expanded its repertory to include Western works such as Haydn's *Creation* (performed 1802), Mozart's Requiem (1805), Handel's *Messiah* (1806) and Beethoven's *Christus am Ölberge* (1813). His weekly open choral rehearsals and concerts became central to the cultural life of St Petersburg.

Bortnyans'ky now exerted an influence well beyond St Petersburg. In 1815, aiming to standardize musical practice throughout the Russian Orthodox Church, he compiled and published a liturgical cycle in the style of *prostoye penie* (plainchant) that was distributed throughout Russia. Through a government *ukaz* (decree) of 1816, Bortnyan'sky and the imperial court chapel won the exclusive right to print sacred music in the Russian Empire, a monopoly that continued into the late 19th century. However, Bortnyans'ky did not use his powers to promote his own choral concertos; he began to revise them for publication only late in life (they were published posthumously in the 1830s and reprinted by Rezelius of St Petersburg in 1834; see Kuzma, 1996). According to legend, his favourite choral concerto, *Vskuyu priskorbna yesi, dusha moya?* ('Why are you mournful, O my soul?'), was sung at his deathbed.

Regarded by both Russians and Ukrainians as a central figure in their music histories, Bortnyans'ky is credited with developing their genre of the sacred choral concerto

to its highest forms. These multi-movement *a cappella* works may be described as Mozartean in their melodic content and Beethovenian in their symphonic treatment of the choral texture. Each of the concertos (which include at least 35 for four-voice chorus and ten for double chorus) explores various and unusual combinations of solo and tutti voices. During the 19th century Bortnyans'ky's choral concertos and hymns gained popularity across Western Europe; some copies of concertos preserved in the library of the Hofkapelle in Vienna date from as early as 1780. Berlioz, who heard the concertos in Russia in the 1840s, praised the 'incredible freedom' of their approach to choral sonority (*Les soirées de l'orchestre*, Paris, 1852) and included Bortnyans'ky's music in several of his own concerts in Paris. Several works, notably the *Izhe Kheruvimy* (Cherubic Hymn) no.7 and *Kol' slaven nash Hospod'* ('How great is our Lord'), were translated into Latin and German and widely published in Western anthologies; some still appear in Western hymnals. Closer to home, Bortnyans'ky's death perhaps marked the end of the era of Westernization in Eastern Slavonic music history. His music was criticized first by Glinka for its sentimental nature and later by the nationalist school for its italianate style. Rimsky-Korsakov, for example, called the sacred music 'one continuous mistake in the understanding of Russian church style', and A.N. Serov a 'weak echo of the Italians of the Mozartean era' (see Kuzma, 1992, 1996). In the Soviet era, music historians traced a folk idiom in the music, attempting thereby to restore Bortnyans'ky's legitimacy as a native Slavonic composer. Despite shifting critical perceptions of his style, his sacred works have remained staples of the Russian Orthodox repertory. The post-Soviet subsequent reopening of churches in Russia and Ukraine has stimulated a concurrent revival of Bortnyans'ky's music.

SACRED CHORAL CONCERTOS

for SATB unless otherwise stated; numbering follows both editions; all in T iiA

1 Vospoyte Hospodevi pesn' novu [Sing unto the Lord a new song]; 2 Torzhestvuyte dnes' [Celebrate this day], 1st movt for SSATB; 3 Hospodi, siloyu tvoyeyu vozveselitsya tsar' [O Lord, in thy strength the king shall be glad]; 4 Voskliknite Hospodevi, vsya zemlya [Make a joyful noise unto the Lord, all ye lands]; 5 Uslyshit tya Hospod' v den' pechali [May the Lord hear thee in the day of trouble]; 6 Slava vo vyshnikh Bohu [Glory to God in the highest]; 7 Priidite vozraduyemsya Hospodevi [Come let us rejoice in the Lord]; 8 Milosti tvoya, Hospodi, vo vek vospoyu [Of thy mercies, O Lord, shall I sing for ever]; 9 Sei den', yeho zhe sotvori Hospod' [This is the day which the Lord hath made]

10 Poyte Bohu nashemu, poyte [Sing praises to our God, sing praises], also in version for 5vv according to Rïtsareva (1979); 11 Blahosloven Hospod', yako uslysha hlas moleniya moyeho [Blessed is the Lord, for he hath heard the voice of my supplication], also in version for 8vv according to Rïtsareva (1979); 12 Bozhe, pesn' novu vospoyu tebe [O God, a new song shall I sing unto thee]; 13 Raduytesya Bohu, pomoshchniku nashemu [Rejoice in God, our helper]; 14 Otryhnu serdtse moye slovo blaho [My heart overflows with a good word]; 15 Priidite, vospoim lyudiye [Come, let us sing, o ye people]; 16 Voznesu tya, Bozhe moy, Tsaryu moy [I will exalt thee, O my God, my king]

17 Kol' vozlyublenna seleniya tvoya, Hospodi [How lovely is thy dwelling place, O Lord]; 18 Blaho yest' ispovyedatisya Hospodevi [It is good to give praise unto the Lord]; 19 Reche Hospod' Hospodevi moyemu [The Lord said unto my Lord]; 20 Na Tya Hospodi, upovakh' [In thee, O Lord, have I trusted]; 21 Zhiviy v pomoshchi Vyshnyaho [He that dwelleth in the help of the Most High]; 22 Hospod' prosvyeshcheniye moye [The Lord is my light]; 23 Blazheni lyudiye vedushchii voskliknoveniye [Blessed are the people who know jubilation]; 24 Vozvedokh ochi moi v hory [I will lift up mine eyes to the mountains]; 25 Ne umolchim nikohda, Bohoroditse [We will never be silent, Mother of God]; 26 Hospodi, Bozhe Izrailev [Lord, God of Israel]

27 Hlasom moim ko Hospodu vozvakh [With my voice unto the Lord have I cried]; 28 Blazhen muzh, boyaysya Hospoda [Blessed is the man, that feareth the Lord]; 29 Voskhvalyu imya Boha moyeho [I will praise the name of my God]; 30 Uslyshi, Bozhe, hlas' moy [Hear, O God, my voice]; 31 Vsi iazytsy vospleshchite rukami [O clap your hands, all ye nations]; 32 Skazhi mi, Hospodi, konchinu moyu [O Lord, make me to know mine end]; 33 Vskuyu priskorbna yesi, dusha moya? [Why art thou cast down, O my soul?]; 34 Da voskresnet Boh [Let God arise], also in version for 8vv according to Rïtsareva (1979); 35 Hospodi, kto obitayet v zhilishchi Tvoyem? [Lord, who shall abide in thy tabernacle?]

for SATB, SATB; numbering follows both editions; all in T iiB

1 Ispovemsya tebe, Hospodi [I will confess to thee, O Lord]; 2 Khvalite, otrotsï, Hospoda [Praise the Lord, ye servants of the Lord]; 3 Priidite i vidite dela Bozhiya [Come and see the works of the Lord]; 4 Kto vzïdet na horu Hospodnyu? [Who shall see the Lord's mountain?]; 5 Nebesa povedayut' slavu Bozhiyu [The heavens are telling the glory of God]; 6 Kto Boh veliy, yako Boh nash? [Who is so great a God as our God?]; 7 Slava v vïshnikh Bohu [Glory to God in the highest]; 8 Vospoite, lyudiye, boholepno v Sionye [O people, sing joyfully in Zion]; 9 Se nïnye blahoslovite Hospoda [This day praise the Lord]; 10 Utverdisya serdtse moye o Hospode [Strengthen thyself my heart, in the Lord]

*c*23 others: 20 for 4vv, 1 for 6vv, 2 for 8vv, unauthenticated/lost

LITURGICAL SETTINGS AND SACRED HYMNS

for 4 voices unless otherwise stated; all in T i:1–3

Obednya [Liturgy], SSA: Slava i nynyey; Izhe kheruvimy (Glory to thee) [Cherubic Hymn]; Veruyu (I believe); Tebe poyom (We sing to thee); Dostoyno yest' (It is truly meet); Otche nash [Our Father]; Khvalite Gospoda [Praise the Lord];

Prostoye peniye (arr. of liturgy), 2vv, 1814

Arkhanhel'skiy hlas [Song of the Archangel], 3 solo vv, 4 vv (for feast day of the Annunciation); Blahoobraznïy Iosif [The noble Joseph]; Da ispravitsya molitva moya [Let my prayer arise], 4 settings, 1 F, 2 d, 3 g, 4 d, all for 3 solo vv; Da molchit vsyakaya plot' cheloveka [Let all mortal flesh keep silence] SATB, SATB; Dostoyno yest' [It is truly meet]; Himn Spasiteliu [Hymn to the Saviour] (D.I. Khvostov), 1v, pf; Hospodi, siloyu tvoyeyu vovzeselitsya Tsar' [O Lord, in thy strength the king shall be glad]; Is polla ye ti, desnota [Many years to you, O master], 3 solo vv, chorus; Izhe Kheruvimy [Cherubic Hymn], 7 settings for SATB/(1v, pf), 1 E♭, 2 d, 3 F, 4 C, 5 F, 6 F, 7 D (*RUS-SPit*), 2 settings for SATB, SATB, 1 c, 2 B♭; Khavalite Hospoda s nebes [Praise God from the heavens] (comm ant), 2 settings, 1 F, 2 C; Kol' slaven nash Hospod' [How great is our Lord] (M.M. Kheraskov), 2 versions, 1 for 1v, 1 for SATB; Mnogaya leta [Many years], 2 versions, Bol'shoye [Greater], Maloye [Lesser]; Molitvï pered obedom i uzhinom [Prayers before meals]; Nadezhda i predstatel'stvo [Hope and intercessor], 3 solo vv, chorus; Otche nash [Our Father], *RUS-SPsc**; O tebe raduyetsya, Blahodatnaya, vsyakaya tvar [In thee, O blessed one, all creation rejoices] Predvyechniy i neobkhodimiy [Pre-eternal and circumscribed (God)] (Iu.A. Isledinsky-Meletsky), 1v, pf; Raduytesya pravednii o Hospode [Rejoice ye righteous ones in the Lord], SATB, SATB; Slava i nïne, Yedinorodnïy Sïne [Glory to thee, only-begotten son], SATB, SATB; Slava tebe, Bozhe nash [Glory to thee, our God]; Tebye Boha kvalim [We praise thee O God], 4 settings for SATB, 1 F, 2 C, 3 F, 4 B♭; 10 settings for SATB, SATB, 1 D, 2 C, 3 C, 4 B♭, 5 C, 6 C, 7 C, 8 D, 9 C, 10 B♭; Tvoryay anhelï svoya dukhi [Thou makest thine angels spirits], SATB, SATB; Vecheri tvoyeya [Thy supper] (comm ant), SATB, SATB; Vkusite i vidite [Taste and see] (comm ant), 3 settings, c, for SATB, SATB (later arr. for SATB), E♭, c, both for SATB;

Voskresny Bozhe [Rise up, O God], 2 versions, both for 3 solo vv, chorus; Vo vsyu zemlyu [Of all the earth], 2 settings, 1 C, 2 C, both SATB, SATB; V pamyat' vyechnuyu [In eternal memory], 2 settings, E♭, B♭, both SATB, SATB; Yavisya blahodat' Bozhiya [The grace of God has appeared], 4 settings, 1 A, 2 E♭, 3 G, 4 E♭, all for SATB, SATB;

OTHER SACRED CHORAL
for 4 voices otherwise stated; all in T i:1–3

Chant harmonizations and arrs.: Anhel vopiyashe [The angel announced] (Gk. chant); Arkhanhel'skiy hlas [Song of the Archangel] (znamenniÿ chant), 3 solo vv, chorus; Chertoh tvoy [Thy bridal chamber] (Kievan chant); Da ispolnyatsya usta nasha [Let our mouths be filled] (Kievan chant); Nïne silï nebesnïya [Today the powers of heaven], 3 settings, E♭, a (Kievan chant), also in version for SATB, SATB; Pod tvoyu milost' [Under your mercy] (Kievan chant); Pomoshchnik i pokrovitel' [Helper and protector] (Gk. chant); Priidite, ublazhim Iosifa [Come, let us bless Joseph] (unknown chant source); Slava i nïne, Deva dnes' [Glory be, today the Virgin] (Bulg. chant); Slava i nïne, Yedinorodnïy Sïne [Glory be, only-begotten son] (Kievan chant); Telo Khristovo priimite [Receive the body of Christ] (comm ant, Kievan chant)

MARIKA KUZMA

Bortolotti, Mauro (*b* Narni, Terni, 26 Nov 1926). Italian composer. He studied with Caporali, Germani and Petrassi at the Rome Conservatory (1944–56), receiving diplomas in the piano, the organ and composition. In addition he attended the Darmstadt summer courses (1957–68) and in 1967, having developed an interest in electronic music, he worked with Grossi in Florence and Pisa. He was a founder-member of the Rome-based contemporary music group Nuova Consonanza (1961) and in 1968 he won a special award in the Casella composition competition. A one-time contributor to Italian radio, he also taught music history at the Accademia Nazionale di Danza, Rome, and composition at the Frosinone and Rome conservatories. In 1995 he was appointed artistic director of the Orchestra Regionale Lazio.

Rather than encouraging him to adopt a serial method which he himself had not fully absorbed, Petrassi advised his pupil to acquire established techniques (cf the Bartókian Concerto for Orchestra of 1955–6). Bortolotti began to explore newer procedures only after his attendance at Darmstadt. In his subsequent concern with total serialism, aleatory processes and electronic music (exemplified respectively by *Toute sa vie*, *Frammenti 5* and *Motetto*), he avoided any extreme or dogmatic approach. And the progressively increasing anti-discursiveness of *Studi per trio*, *Studio per e.e. cummings no.2*, *Transparencias* and *E tuttavia . . .* did not inhibit the urge to communicate which he inherited from the realistic tendencies in postwar Italian culture. On the other hand, though he could still work in harmony with that culture during the 1950s (as in the *Tre poesie* of 1957), he later had to realize the divergence between his poetic aims and his technical evolution, which tended to accept no possibilities but irrationality and radical abstraction. Hence the imbalance between instrumental refinement and colloquial affability in such works as *Paréntesis para cinco* and the emergence of a deep unease, intellectual and existential, in *Contre 2* and *Grazie per essere venuti!*.

STEFANO LEONI

Borton. *See* MORTON, ROBERT and BORDON, PIETER.

Börtz, Daniel (*b* Hässleholm, 8 Aug 1943). Swedish composer. He studied the violin and theory with Fernström in Lund and composition privately with Rosenberg before attending the Stockholm Musikhögskolan (composition, Blomdahl and Lidholm). He also studied electronic music with G.M. Koenig at the University of Utrecht. He was a permanent member of the Swedish Composers' Society (1971–9) and its secretary from 1972 to 1979. He teaches orchestration at the Musikhögskolan, Stockholm, and is a member of the Royal Academy of Music.

Börtz's extensive output is dominated by ten Sinfonias, which are mostly cast in a single movement in order not to disrupt the symphonic process; also prominent are his eleven *Monologhi*, created to elicit the emotional and expressive qualities of different solo instruments or the human voice. During the 1970s he composed two church operas and a chamber opera, but it was not until the 1990s that he became recognized as a leading Swedish opera composer. He won a substantial success on the operatic stage when his two-act opera *Backanterna* ('The Bacchantes'), after Euripides, was given at the Stockholm Opera, with Ingmar Bergman as director. This opera, the story of the misfortune of the last great matriarchy, was written on Bergman's initiative and designed to show the foolishness of all kinds of fundamentalism.

WORKS

Stage: Muren – Vagen – Ordet [The Wall, the Way, the Word] (church op, 3, B.V. Wall), unperf.; Den heliga Birgittas dod och mottagande i himlen [The Death of St Bridget and her Acceptance in Heaven] (church op, 2, Wall), Lund, 7 Oct 1973; Landskab med flod [Landscapes with a River] (chbr op, 2, J. Ljungdahl, after H. Hesse: *Siddhartha*), U. of Århus, 1974; Backanterna [The Bacchantes] (op, 2, J. Stolpe and G.O. Eriksson, after Euripides), Stockholm, Kungliga, 2 Nov 1991; Marie Antoinette (C. Fellbom), Stockholm, Folkoperan, 21 Jan 1998

Vocal: Josef K (F. Kafka), recit, 8 vv, SATB, tape, orch, 1969; Nightflies (T. Tranströmer), Mez, cl, trbn, 3 perc, pf, org, vc, 1973; Introitus och evangeliemotett (Bible), Bar, 3 choruses, orch, 1975–6; Gryningsvind [Dawn Wind] (P. ROLF HAGLUND

Borumand, Nur Ali (*b* Tehran, 1905; *d* Tehran, 1976/7). Iranian musician and music teacher. He was brought up in a household frequented by musicians, poets and artists.

His formal musical training started at the age of 12 in the form of *tār* lessons with Qolam Hossein Darvish Khan (1872–1926). In 1922, Borumand was sent to Germany where he attended secondary school. There he became familiar with European music and learnt the piano for two years. He continued to pursue his interest in Iranian music while studying medicine. However, failing eyesight and eventual blindness forced him to return to Iran in 1938, and after this he devoted his life to Iranian music. Over the next 30 years he led a secluded existence, studying *tār* and *setār* with a number of prominent masters, including Esmail Qahremani (*b* 1907), Mussa Ma'rufi (1889–1964) and Habib Somai (1901–46), with whom he also studied the *santur*.

In the mid-1960s Borumand began to take on a more public role and started to teach at the newly established music department at Tehran University. He later taught at the Centre for the Preservation and Propagation of Iranian Music established in Tehran in 1971. Many of his students became prominent musicians. Borumand was not primarily a performer, and for this reason was little known by the general public, but he was highly regarded as a teacher because of his excellent knowledge of the traditional classical repertory (*radif*). He became known outside Iran through the writings of two of his non-Iranian pupils, the ethnomusicologists Bruno Nettl and Jean During.

Borumand was a somewhat controversial figure because of his rather idiosyncratic view of the classical Iranian tradition and his conservative attitude to many of the changes that the tradition underwent, particularly from the 1950s onwards (including the introduction of staff notation). However, he was highly respected among many musicians of the late 20th century and his legacy lives on in the music and writings of those who studied with him.

LAUDAN NOOSHIN

Borup-Jørgensen, (Jens) Axel (*b* Hjørring, 22 Nov 1924). Danish composer. In 1927 his family moved to Sweden, where in 1944 he took his student's examination, in Linköping. After the war he was accepted at the Royal Danish Conservatory of Music in Copenhagen and in 1950, after studying with Anders Rachlew, he passed the music teacher's examination in piano. As a composer, apart from studies in instrumentation with Schierbeck and Jersild, he is self-taught.

Borup-Jørgensen's earliest compositions, for example *Lille serenade* op.1 for string quartet op.1 (1948) and *Marine skitser* ('Marine Sketches') for piano op.4b (1949), are inspired by an impressionistically coloured Swedish romance tradition. His works of the first half of the 1950s moved towards Expressionism. This, in Music for Percussion and Viola op.18 (1955–6), was punctuated by sections of a motoric character reminiscent of Bartók. He was partly influenced by the condensed language of the Finnish-Swedish lyricist Gunnar Björling, which led him to work with increasingly reduced material; the *Winter Pieces* for piano op.30b (1959) are in an atonal, pointillist style.

When Danish musical life became receptive to Central European influences, about 1960, Borup-Jørgensen was among the first musicians to attend the summer courses in Darmstadt (1959 and 1962). This did not bring about a stylistic reorientation, but his encounter with Ligeti's early orchestral works and the works of the Swedish composer Bo Nilsson left traces in his output from the 1960s, primarily in the orchestral work *Marin* ('Marine') op.60 (1963–70), one of his more notable compositions. In this 25-minute symphonic suite, which depicts the sea in suggestive images, harmonic clusters, random principles and untraditional performance methods are integrated in music that is highly differentiated in sound.

Although Central European music of the 1950s was of great significance to Borup-Jørgensen, he has not used serial or structuralist principles of composition; his music is fundamentally intuitive in concept. The use of avant-garde elements is governed by his unique sensitivity towards differentiation in sound, rhythm and dynamics. As a natural extension of this, he constantly investigates alternative forms of instrumental expression and has developed his own notation, often graphically based.

The works after 1970 have an added depth in harmony and overall sound. At the same time, the pointillist type of composition is replaced by more cohesive formal structures, as in *Sirenernes kyst* ('The Coast of Sirens') for seven instruments and tape (1985), in which quiet, refined sound effects overlie a multi-track tape of women's singing. The solo works from this period focus on forms of expression specific to the instrument, as in *Thalatta! Thalatta!* for piano op.127 (1987), which expresses the piano's 'singing' resonance in the treble register. Nature, Nordic light and the seasons are persistent sources of inspiration for Borup-Jørgensen, and in the works inspired by nature he often reaches the outer limits of his universe of expression, for example the statically lyrical in *Nordisk sommerpastorale* op.51 (1964) and the eruptively dramatic in *Musica autumnalis* op.80 (1977).

WORKS

(selective list)

NIELS ROSING-SCHOW

Borwick, Leonard (*b* Walthamstow, 26 Feb 1868; *d* Le Mans, 17 Sept 1925). English pianist. As a youth he was sent to the Hoch Conservatory in Frankfurt, where he studied under Clara Schumann. He made his début at Frankfurt (1889) with a performance of the 'Emperor' Concerto, and in May 1890 appeared in London at a Philharmonic Society concert as soloist in the Schumann Concerto. After this he built up a reputation as a pianist of distinction, especially in works from the standard repertory. Although much in demand for solo engagements, Borwick also took part in chamber concerts with the Joachim Quartet; from 1893 he collaborated with the Irish tenor Harry Plunket Greene, and for ten years the two artists gave joint recitals. Before World War I he travelled widely, performing in various European countries as well as in Australia and America.

At a time of intense international competition, Borwick was able to demonstrate with ease that an English pianist of calibre could equal his foreign rivals on the concert platform. His interpretations of Schumann and Chopin were regarded as outstanding, although he also included Bach, Mozart, Liszt and Brahms in his programmes. He later developed an enthusiasm for Ravel and Debussy, and made brilliant transcriptions of Debussy's *Fêtes* and the *Prélude à l'après-midi d'un faune*. He defended the practice of adaptation on the ground that the pianist could lend a special 'colouring' to musical ideas originally conceived with other instruments in mind.

E.D. MACKERNESS

Borzio [Bortio, Borri], **Carlo** (*b* Lodi, nr Milan; *fl* *c*1656–95). Italian composer. A member of the clergy, he was *maestro di cappella* of Lodi Cathedral and later of the Philippine Congregation there. His output includes operas and oratorios, many to texts by his friend Francesco de Lemene, who was also from Lodi; about 1656 Borzio performed in improvised comedies at the poet's house. His most important work is *Il Narciso*, which was revived for Queen Christina of Sweden at Rome in March 1679. The music includes a wealth of short, rhythmically regular arioso passages and a remarkable number of arias, justified by the opera's pastoral theme.

WORKS

Gratitudine umana (C.M. Maggi), Isola Bella, Lake Maggiore, theatre of Count Vitaliano Borromeo, Dec 1670, collab. P. Magni, rev. as Affari ed amori, Milan, Regio, 1675; *I-IBborromeo*, inc.; lib *Gu*, *Mb*, *Mc*, *Rn*

Il Narciso (favola boschereccia, F. de Lemene), Lodi, 29 Sept 1676, *IBborromeo*, *Rvat*, *Vnm*; 1 aria ed. M. Zanon, *Raccolta di 24 arie* (Milan, 1914)

Il secolo trionfante (versi musicali), Lodi, Oratorio di S Filippo Neri, 1695

Il cuore di S Filippo Neri (dialogo musicali), Lodi, Oratorio di S Filippo Neri

La carità (orat, Lemene), Lodi, Oratorio di S Filippo Neri

I quatro novissimi, ed altre centate (Lemene)

Dialogo pastorale (Lemene)

LORENZO BIANCONI (with JENNIFER WILLIAMS BROWN)

Bos, Coenraad Valentijn (*b* Leiden, 7 Dec 1875; *d* Mount Cisco, NY, 6 Aug 1955). Dutch pianist. He studied at the Amsterdam Conservatory with Julius Röntgen and then at the Hochschule für Musik in Berlin, but left during his first year there to accompany the baritone Eugen Gura on tour. Among the singers he subsequently accompanied were Raimund von Zur Mühlen, Anton van Rooy, Frieda Hempel, Ernestine Schumann-Heink and Julia Culp. In 1896 he accompanied Anton Sistermans in the first performance of Brahms's *Vier ernste Gesänge*, in Vienna. Bos, called by Gerald Moore 'the doyen of accompanists', also performed with many celebrated instrumentalists, including Joachim, Kreisler, Sarasate, Casals and, in 1929, the young Menuhin. He made a number of recordings of lieder: Schubert with Elisabeth Rethberg, Brahms and Schumann with Elena Gerhardt and Wolf with Alexander Kipnis and Gerhard Hüsch, among others. From 1934 to 1952 he taught accompaniment at the Juilliard School of Music in New York.

ANK REINDERS

Bosca, Matteo (*fl* 1526). Italian composer. Otherwise unknown, he entered into a contract with the printer Niccolò de' Giudici on 5 March 1526 to print 500 books of *canzoni* at a cost of 27 ducats; 50 more copies were printed in October. The publication can be identified with the *Libro primo de musica de la salamandra* (Rome,

1526) that Ferdinand Columbus bought in Rome in 1530. No copy survives. (B.J. Blackburn: 'The Printing Contract for the *Libro primo de musica de la salamandra* (Rome, 1526)', *JM*, xii (1994), 345–56)

BONNIE J. BLACKBURN

Bosch, Maura (Louise) [Hess, Marjorie Ann] (*b* Reading, PA, 8 Aug 1958). American composer. She studied at the Hartt College of Music (BM 1978) and Princeton University (MFA 1982), where her teachers included Alexander Lepak, Milton Babbitt, Edward T. Cone and Peter Westergaard. She believes that all of her works 'arise from a basic premise of performing music as theatre' and should be presented in '[their] own theatrical space', away from traditional venues of concert and opera. In 1990 she co-founded Corn Palace Productions, a music theatre company in Minneapolis, to perform her operatic works. *Mirabell's Book of Numbers*, a surrealistic opera based on poems by James Merrill, was completed in 1991.

Bosch's eclectic style draws on both acoustic and electronic instruments. Although she has written for a variety of media, her compositions share a common focus on words. *Her Light Self* (1997), an 'electro-acoustic collage', features phrases of text performed in canon with a recorded recitation of the same material. The *ZELDA* songs (1997), on feminist texts by the composer, are rooted in popular music idioms that provide a wide range of musical expression. Her instrumental works also originate with texts that provide descriptive imagery or expressive intent.

Bosch, Pieter Joseph van den. *See* VAN DEN BOSCH, PIETER JOSEPH.

Bosch Bernat-Verí [de Bernat-Veri], **Jorge** (*b* Palma de Mallorca, 8 Nov 1737; *d* Madrid, 2 Dec 1800). Spanish organ builder. He built the organs for the chapels of the Dominican and Franciscan convents in his native town and trained his pupil, Gabriel Thomás, who built a number of organs on Mallorca. Later King Carlos III summoned Bosch Bernat-Verí to Madrid, where he completed the magnificent instrument begun by Leonardo Fernández Dávila for the royal palace of Oriente. He subsequently built an important organ for the metropolitan church of Seville, which was placed in the chancel on the south side of the altar but was destroyed at the end of the 19th century. Antonio Ponz described this instrument in glowing terms in his *Viage de España* (Madrid, 1774–87). Bosch Bernat-Verí may be considered the most famous Spanish organ builder of the second half of the 18th century. After his death his work was continued by his brother-in-law Juan Debono.

GUY BOURLIGUEUX

Boschetti, Gerolamo (*b* Mantua; *fl* 1591–1611). Italian composer and singer. He is documented as *maestro di cappella* at the Madonna dei Monti, Rome, in 1591 and from 1593 to 1594. He occupied a similar position at the Santa Casa, Loreto, between 25 May 1594 and 20 April 1595, and from 1 November 1608 until 31 July 1611 he is recorded as a contralto in the Cappella Giulia in Rome. During his years in Rome he was patronized by Carlo Trotti, an ecclesiastic; the second book of madrigals, which is warmly dedicated to Trotti, also contains a piece in his honour, *Ornasti voi signor*.

IAIN FENLON

Boschetti, Giovanni Boschetto (*b* Viterbo; *d* Loreto, 22 May 1622). Italian composer. That he came from Viterbo is stated by Paolo Agostini in his fourth book of masses (1627). He was probably *maestro di cappella* at the Seminario Romano in 1619, and in 1620 he acted temporarily as *maestro di cappella* of Santo Spirito in Sassia, Rome, in place of Cesare Zoilo. On 17 March 1622 he became *maestro* of the Santa Casa, Loreto, but died just over two months later. He wrote the five *intermedi Strali d'amore* for a performance of a comedy at Viterbo on 14 February 1616. The published extracts consist of a few choruses, recitatives and arias, all rather innocuous, prefaced by a long description of the action (reproduced by Ambros, 415–21, in German with several music examples). Of the other music in the same volume the two solo madrigals and the solo sonnet setting are the most striking; the latter, *False gioie*, is, like one of the madrigals, extravagantly embellished and is not dissimilar to certain pieces in Caccini's *Nuove musiche e nuova maniera di scriverle* (1614). Like several composers of the Roman school, however, Boschetti seems to have been less happy in the most up-to-date styles, an impression also conveyed by the rather routine concertato motets of his 1616 and 1620 volumes.

NIGEL FORTUNE

Boschi, Francesca. *See* VANINI, FRANCESCA.

Boschi, Giuseppe Maria (*b* Viterbo; *fl* 1698–1744). Italian bass. He married the contralto FRANCESCA VANINI, probably in 1698, but does not appear in cast lists until 1703, when he sang the role of Oronte in Francesco Gasparini's *Il più fedel fra i vassali* at Casale Monferrato. He appeared in Venice in four operas by Gasparini and two by Lotti in 1707, and was re-engaged there in 1708–9 and 1713–14, singing in five further operas by Lotti and others by Caldara, Handel (*Agrippina*, 1709) and C.F. Pollarolo. He sang at Vicenza in 1707, Ferrara and Vienna in 1708, Bologna in 1709, 1717 and 1719, Verona in 1715, and Genoa in 1717. He made his London début with the Queen's Theatre company in Mancini's *Idaspe fedele* (1710), sang in Giovanni Bononcini's *Etearco* and created Argante in Handel's *Rinaldo* (1711). From 1714 he was a member of the choir at S Marco, Venice, but was allowed frequent leave of absence. He was at Dresden from 1717 to 1720, singing in Lotti's *Giove in Argo* (1717), *Ascanio* (1718) and *Teofane* (1719). Handel engaged him from 1720 to 1728 in London where he sang in all 32 operas produced by the Royal Academy, including 13 by Handel and seven each by Bononcini and Ariosti. He reappeared in Venice in 1728–9 in three operas, two by Porpora, and was still living there in 1744.

Giuseppe Maria Boschi: caricature by Anton Maria Zanetti (i), pen and brown ink (Fondazione Giorgio Cini, Venice)

Boschi's voice had a compass of G to *g'* and the tessitura of a high baritone. James Miller's line 'And Boschi-like be always in a rage' points to the style in which he excelled. He usually played villains or tyrants, and the power and agility of his voice encouraged Handel to accompany many of his arias with energetic counterpoint, though the voice is often doubled by the instrumental bass. In 15 operas Handel scarcely ever allowed him a slow aria. Lotti wrote very similarly for him in *Teofane*.

WINTON DEAN

Boschot, Adolphe (*b* Fontenay-sous-Bois, 4 May 1871; *d* Neuilly-sur-Seine, 1 June 1955). French writer and music critic. From an early age he devoted all his spare time to music, though except for private violin and piano lessons he never studied formally. He was nevertheless a very fine amateur player on the violin and piano. After his baccalauréat (1889) and military service (1889-90), he studied literature at the Sorbonne. On leaving there in 1895, he associated with several people of the Paris literary world (notably Huysmans and E. de Goncourt). In 1897 he completed his first work, *Essai sur la crise poétique*. At the same time, Boschot began contributing articles on literary criticism, art and music to the *Revue bleue* and other periodicals; from 1910 he was music critic of the *Echo de Paris*, and from 1919 of the *Revue bleue*. He was elected a member of the Académie des Beaux-Arts (Institut de France) in 1926, and in 1937 succeeded Widor as permanent secretary.

Besides his writings on music, Boschot published several essays on literature (principally Théophile Gautier) and the arts. It was perhaps his literary background, breadth of sympathies and, in the best sense of the word, amateur approach to music, that made him an early champion of two (at that time) neglected composers: Mozart (he founded the Société Mozart with Wyzewa and Saint-Foix in 1901) and Berlioz. He was led to the latter by his study of the Romantic movement and devoted half a century to gathering material for his monumental and constantly revised biography of the composer. His shorter writings include contributions to *Histoire du théâtre lyrique en France* (Paris, *c*1936) and Norbert Dufourcq's *La musique des origines à nos jours* (Paris, 1946).

ERIC BLOM/MALCOLM TURNER/JEAN GRIBENSKI

Bosco, Johannes de. *See* BOSQUET.

Bosco, Mwenda Jean [Mwenda wa Bayeke] (*b* Bunkeya, 1930; *d* nr Lubumbashi, 22 Sept 1991). Congolese composer and guitarist. He began to play the guitar at the age of 16 in Jadotville (now Likasa) in the Belgian Congo, and within a few years, by the 1950s, he had developed a highly individual style, the KATANGA GUITAR STYLE, which he maintained throughout his nearly 40-year career. He was discovered by the South African musicologist Hugh Tracey on a field-trip to the Congo and was first recorded in Jadotville in 1952. That year he received the first prize of the newly established Osborn Awards for the 'best African music of the year' for his composition *Masanga njia*. He began a full-time professional career, and by the late 1950s he was one of the most acclaimed composers of guitar-songs in Central Africa. From 1952 to 1962 Bosco recorded approximately 156 pieces for the Gallotone Company of South Africa. In 1959 he spent six months in Nairobi. He took part in the Newport Folk Festival in 1969 and undertook an extensive concert tour throughout Europe in 1982 (see illustration). Bosco's death in a car accident was a shock to his admirers throughout the world.

Bosco's most famous guitar compositions include *Masanga njia*, *Bombalaka*, *Sokochomale zikita*, *Mwàámi*, *Namlia ee*, *Kitambala moja* and *Bibi mupenzi* (all included on the CD *Mwenda Jean Bosco*, 1997). The first study, including transcriptions of Bosco's music, was carried out by David Rycroft and published in 1961 and 1962. Rycroft compared the dual F–G tonality in *Masanga njia* to William Byrd's *The Woods so Wild*. Bosco's unique music influenced many of his guitarist contemporaries in Central and East Africa, including John Mwale in Kenya and Faustino Okello in Uganda, among others. The Kenyan-born English musicologist John Low studied the guitar in Lubumbashi with Bosco in 1979, and his book *Shaba Diary* is an account of Bosco's personality and music.

GERHARD KUBIK

Boscoop, Cornelius Symonszoon. *See* BUSCOP, CORNELIS SYMONSZOON.

Bose, Fritz (*b* Messenthin, Stettin, 26 July 1906; *d* Berlin, 16 Aug 1975). German musicologist. From 1925 to 1933 he attended the University of Berlin, where he studied ethnomusicology with Hornbostel, organology with Sachs, music history with Abert and Schering, the psychology of sound with Stumpf, psychology with W. Köhler and ethnography with K.T. Preuss. He took the doctorate in Berlin in 1934 with a dissertation on the music of the Uitoto people of Colombia, and completed the *Habilitation* at the same institution in 1939 with a study on musical style as a racial trait. With the Nazi regime's dismissal of Hornbostel, Bose became director of the Berlin University's acoustics institute in 1934; in 1941 he was appointed a regular assistant lecturer, covering folk music, ethnomusicology, acoustics and musical phonetics. From 1935 he also served as music consultant for the Race and Resettlement Office of the SS. In 1953 he became director of the history department in the Institut für Musikforschung, Berlin, and in 1966, as head scientific adviser, became director of its folk music department. He held a teaching post at the Technical University in Berlin from 1963 and an honorary professorship from 1967. He retired in 1971.

Embarking on his career in the first years of the Nazi regime, Bose's early work focussed on developing a scientific approach for relating music and race. Thereafter, his work centred largely on organology, folk music and ethnomusicology. In 1966 he founded the Deutsche Gesellschaft für Musik des Orients, which he directed until 1972; from 1956 to 1972 he initiated and led a research commission into song, music and dance in the Deutsche Gesellschaft für Volksliedkunde. Editor of the *Jahrbuch für musikalische Volks- und Völkerkunde* (1963–), he contributed to *MGG1* and wrote all the ethnomusicological articles for the 12th edition of Riemann's *Musik-Lexikon*.

HANS HEINRICH EGGEBRECHT/PAMELA M. POTTER

Bose, Hans-Jürgen von (*b* Munich, 24 Dec 1953). German composer. He studied at the Frankfurt Musikhochschule with Hans Ulrich Engelmann (composition) and Klaus Billing (piano), among others. In 1974 he attended the Darmstadt summer courses for the first time and signed a publishing contract with Schott in Mainz. Two years later he discontinued his studies and moved to Munich to work as a freelance composer. In the period immediately thereafter, he wrote the large-scale work *Morphogenesis* (first performed in 1976 by the Südwestfunk SO under Ernest Bour) and the one-act opera *Das Diplom*. Commissions from the Hamburger Staatsoper (for the one-act opera *Blutbund*, 1974) and the Berlin Festival (for the String Quartet no.2, 1976–7) followed. The ballet *Die Nacht aus Blei* (1981), written during his first residency at the Villa Massimo in Rome (1980), greatly increased his professional recognition. He soon received commissions from the Berlin PO for *Idyllen* (1982–3), in celebration of the orchestra's centenary, and Ensemble Modern for *Sappho-Gesänge* (1983). He devoted his second visit to the Villa Massimo (1985) mainly to the completion of his first full-length opera, *Die Leiden des jungen Werthers*. During these years he also became a regular visitor to Ireland, acquiring a cottage in 1984 where he could devote himself to composition.

In 1989 Bose became composer-in-residence to the Sharoun Ensemble of Berlin. In the years that followed, his work as a teacher became increasingly important, first at the Hitzacker Summer Festival and the 'Jugend componiert' Weikersheim courses, and later with a short-term appointment at the Salzburg Mozarteum (1991). In 1992 he was appointed professor of composition at the Munich Musikhochschule. Music drama now featured more prominently in his output, eventually influencing his writing in instrumental genres as well. The piano concerto *Salut für Billy Pilgrim* (1986), for example, has close links with the opera *Schlachthof V* and the Fourth String Quartet (1998) includes quotations from Franz Kafka. His numerous awards include the Heinrich Strobel Stiftung of Südwestfunk, the Mozart Stiftung, the Berlin Art Prize (1977), the Hessische Cultural Prize, the Munich Förderpreis für Musik, the Stuttgart Förderpreis (1987), the BMW prize for music drama (for *63: Dream Palace*), the composition prize of the Fondacion Prince Pierre de Monaco (for *63: Dream Palace*), the Schneider Schott Music Prize (1988), the Christoph und Stephan Kaske Stiftung (1998) for his activities as a teacher, and membership in the Berlin Academy of Arts (1986) and the Bavarian Academy of Fine Arts, Munich (1986).

Bose's works, at least from the 1990s, attempt to reconcile postmodern tendencies and the modernist tradition. His structural and temporal concepts are founded largely on the work of individualists such as Bernd Alois Zimmermann and Ligeti. Through his study of astrophysics, neurobiology and chaos theory, he has developed a concept of musical and temporal structure free from conventional linearity. Even in early works, such as the first two string quartets (1973, 1976–7), his inclination towards the layering and serial organization of complex, tonally differentiated areas is evident. In the spirit of modernism, his predetermined structural plans and their realization in sound engage in a dialectical relationship. Although the label 'new simplicity' (which was applied to the String Trio after its Darmstadt première in 1978) is inappropriate to Bose's works, it does indicate an essential factor of his composition: there is always a pronounced and important semantic dimension. This intimate, concealed layer is often articulated in concrete sensuous sound patterns and in drama that can be directly experienced. Structural complexity is not employed for its own sake, but as a vehicle for direct sensuous perception against an autobiographical background.

Bose has increasingly supplemented his interlocking and overlapping of semantically laden tonal areas with microtonal material and electronic techniques, such as sampling. In his works from the opera *63: Dream Palace* (1989) onwards, and in a spirit of reflective postmodernism, he has enriched the process of temporal layering and serial organization with different stylistic elements from the past and present. Music drama, in particular, has become the scene for structurally heterogeneous musical material, seldom involving direct quotation and never constituting a collage merely for outward show. Different semantic and historical layers are used as opportunities for musical scene-setting and characterization, an ideal he recognizes in Mozart's operas (such as in the ball scene in *Don Giovanni*). It is not surprising, then, that the modern classics he most admires have been works by Stravinsky and Richard Strauss, whose complex melodic ornamentation and playfully mobile music drama he has increasingly employed as a model. In his combination of structural modernism and polystylistic postmodernism, he suggests that composition at the beginning of the 21st century should reject a polarization of trends and

ideologies and instead develop technical variety by linking various processes together.

SIEGFRIED MAUSER

Boselli [Bosello], **Constantino.** *See* BASELLI, CONSTANTINO.

Bösendorfer. Austrian firm of piano makers. Ignaz Bösendorfer (*b* Vienna, 28 July 1796; *d* Vienna, 14 April 1859) founded the firm in 1828 after an apprenticeship with Joseph Brodmann. He recognized the need for an instrument that could respond to the demands for volume and pitch stability made by the virtuosos of the 1830s. In a legendary incident only a Bösendorfer piano survived an evening of Liszt's playing. In 1830 Bösendorfer received the first 'kaiserlich und königlich' designation granted to a piano maker. The firm reached its technological zenith and greatest fame under Ignaz's son Ludwig (*b* Vienna, 15 April 1835; *d* Vienna, 9 May 1919), who trained with his father. Ludwig's patents from the early 1860s concentrated on improvements to the Viennese action. He was staunchly conservative on issues of piano design, resisting the innovations made by Steinway and Chickering between the 1860s and the 1890s in both the use of metal and the technique of framing. Ludwig moved and expanded the factory but retained an artisan system of production. The output between the 1860s and 1909 (when Ludwig sold the company) never exceeded 423 instruments per year, mostly grands. More than a third were sold in Vienna and most of the remainder within the Habsburg empire. By 1909 only 7% were purchased abroad. Bösendorfer despised the piano's rise in popularity and modern factory methods of manufacture. He railed against marketing schemes and insisted on maintaining an early 19th-century Viennese sound, spurning the fashion set by Steinway. In the early 1900s Bösendorfer still offered a choice between Viennese and Erard action. In the 1870s he declared the Steinway duplex scale a fraud and attacked the aliquot system pioneered by Blüthner, advances which had enhanced the sonority of the grand piano through the addition of sympathetic string lengths. Yet in the late 1890s he publicized a design for an 'Imperial' piano (*see* PIANOFORTE, fig.34). This 2·9-metre concert grand, still manufactured more than a century later, adds eight notes on the bass (*C‴–G‴*) placed under a black removable flap. Bösendorfer believed he had thus outsmarted his competitors by creating not mere passive resonance but new sounds, which were used by such composers as Busoni.

Ludwig Bösendorfer opened the 500-seat Bösendorfer-Saal in Vienna in 1872; most major Viennese chamber music premières from Brahms to Schoenberg took place there until its closure in 1913. Bösendorfer was a lifelong patron and director of the Gesellschaft der Musikfreunde, and supplied the conservatory with pianos. He became a legendary personality in Vienna, a symbol of the anti-modern 'Alt-Wiener'. Having sold the firm to the Hutterstrasser family in 1909, he died in obscurity and relative poverty. In 1936 the Bösendorfer became the piano of the BBC studios. The Hutterstrassers sold the firm in 1966 to the Kimball piano company. By the late 20th century the Bösendorfer firm was producing between 200 and 300 pianos a year. They occupy a market niche as a prestigious alternative to Steinway and Yamaha instruments. The firm makes six grands (lengths 1·7, 2·0, 2·25, 2·75 and 2·9 metres). Rebuilt Bösendorfers appear as period instruments used for 19th-century repertory, and the Imperial grand is still used in concert. The Bösendorfer piano has a sweet and mellow sound, though it fails to project brilliance. It has a loyal but limited following among pianists.

LEON BOTSTEIN

Bosio, Angiolina (*b* Turin, 22 Aug 1830; *d* St Petersburg, 1/13 April 1859). Italian soprano. She studied in Milan, making her début there in 1846 as Lucrezia in *I due Foscari*. Two years later she appeared for the first time in Paris, again as Lucrezia, and then went on an extended tour of North America. She made her London début in 1852 at Covent Garden as Adina (*L'elisir d'amore*). The following year she sang Gilda in the first London performance of *Rigoletto*. Other Verdi operas in which she appeared were *Ernani*, *Luisa Miller*, *Il trovatore* and *La traviata*. Engaged for the winter season of 1855–6 in St Petersburg at a salary of 100,000 francs, she died suddenly in Russia at the age of 28.

ELIZABETH FORBES

Boskop, Cornelius Symonszoon. *See* BUSCOP, CORNELIS SYMONSZOON.

Boskovitch [Boskovics, Boskowitch, Boskovich], **Alexander** [Sándor] **Uria** (*b* Kolozsvár [now Cluj-Napoca], 16 Aug 1907; *d* Tel-Aviv, 5 Nov 1964). Israeli composer and music critic of Hungarian origin. He grew up in a highly religious family – some of his forebears were Hassidic rabbis – which originated from the Moravian town Boskovice. Educated at the Jewish lyceum Tarbut in Cluj during the period in which it briefly flourished before forced Romanization and repression of the Jews in Transylvania, he studied the piano with Hevesi Piroska and then in Vienna with Victor Ebenstein. In 1927 he took advanced studies in Paris with Lazar Levi (piano), Dukas (composition) and Boulanger, which shaped his predilection for French music, in particular Debussy and Milhaud. Back in Cluj, he became, in 1930, one of the conductors of the State Opera and founded a fine Jewish amateur orchestra named after Karl Goldmark. In 1937 he contributed to a volume on Jewish topics with a study of contemporary Jewish music, the revival of which he related to the Russian influence on music after Wagner. He followed Sabaneyev's example in regarding the collection and publication of Jewish folksong as a prerequisite for the emergence of such a music, stressing the linear, non-harmonic nature of Jewish musical expression. Concurrent with the essay, he composed *Chansons populaires juifs* (1936), a suite on Jewish folksongs which he had heard during a fieldwork expedition to villages in the Carpathian mountains.

The rise of fascism brought an end to his work at the opera. In 1938 the newly founded Palestine Orchestra invited Boskovitch to attend the première of his folksong suite under Dobroven, following which he settled in Tel-Aviv. His parents stayed in Cluj and perished in the holocaust, an event which was to have a lasting effect on his personality. After a few years of hardship, Boskovitch was one of the founders of the Tel-Aviv Academy of Music (1944), where he taught theory and composition. From 1944 to 1951 he also composed incidental music for the theatre, and in 1956 he became music critic of the influential daily *Ha'aretz*.

There is a direct link between Boskovitch's ideological thought, as expressed in his essays and reviews, and the stylistic traits of his works. He considered any good music as context dependent, i.e. representing the specific time and place of its composition; thus, for example, the melos of eastern European Jewish folksong that he had used in 1936 did not suit the style he wished to see emerge in the newly formed Israel. He expected a number of attitudes from the Israeli composer: to undertake the role of collective leader and spokesman, to avoid any personalized Romantic expression, to derive inspiration from the static desert landscapes and powerful sunlight and even more from the 'dynamic landscape' of biblical and modern spoken Hebrew, as well as from Arabic, both language and music. In the early 1940s he composed four songs for the Yemenite singer Bracha Zephira and made arrangements for the dancer Yardenah Cohen of Arabic instrumental music originally played by three Iraqi Jews; he also transcribed the full gamut of Arabic *maqāmāt*. Yet he maintained the use of Western instruments; and his coupling of Western art music and local elements typifies 'Mediterranean music', a term he coined. The second movement of his Oboe Concerto, for instance, is based on the improvisatory nature of a *taqsīm*, with the oboe imitating the *zurna*, gradually expanding the *maqām* range over a recurring orchestral rhythmic ostinato with no harmonic evolution (ex.1). At the same time, a Western conception of closed form is retained, articulated through melodic and registral recapitulation. The *Suita shemit* ('Semitic Suite') displays the most consistent application of Boskovitch's ideology: discarding the harmonic parameter (with the exception of the last movement), the suite is based on dance rhythms, mostly asymmetric, that move monodically or in heterophonic textures.

After 1946 Boskovitch fell into a long period of silent reappraisal – partly due to family reasons and teaching pressure, partly due to studies of Jewish and Indian mysticism – broken only by the composition of some incidental music, the source of a few moving folklike songs such as *Dudu*. When he resumed composition fully with *Shir hama'alot* ('Song of Degrees') in 1959, it was in a style still related to the *Semitic Suite*. But soon after he abruptly adopted serialism, which he still considered ideally suited to his non-Romantic, non-harmonic thought. In the *Concerto da camera*, for example, oriental, ornamental motivic fragments are serially unified and organized into a structure modelled on the Baroque toccata, while his last major work, *Ada'im* ('Ornaments'), continued to develop this approach in large-scale orchestral form. Outspoken, articulate and highly committed, Boskovitch's ostensible inconsistencies and shifts of direction are representative of an intensive period of change in Israeli society. He fulfilled a major role in the first generation of Israeli art music.

JEHOASH HIRSHBERG

Boskovsky, Alfred (*b* Vienna, 9 Feb 1913; *d* Vienna, 2 July 1990). Austrian clarinettist. He first learnt the violin, playing in string quartets at home. It was only when he entered the Vienna Music Academy, at 16, that he took up the clarinet, studying with Leopold Wlach from 1929 to 1936. In 1936 Weingartner engaged him for the Staatsoper, and in 1937 he joined the Vienna PO, becoming principal clarinet in 1941. In 1940 he was appointed to teach at the Academy. Boskovsky played throughout the world with the Vienna Octet, which was founded in 1947 by his brother Willi. His tone was remarkably clear, his interpretations strictly classical.

PAMELA WESTON

Boskovsky, Willi (*b* Vienna, 16 June 1909; *d* Visp, 21 April 1991). Austrian conductor and violinist. He studied at the Vienna Music Academy from the age of nine and won the Kreisler Prize there at 17. His début at a concert given by the Vienna Railway Company marked the beginning of a solo career that continued alongside his orchestral and chamber music activities. He joined the Vienna PO in 1932 and was made one of the orchestra's four leaders by Knappertsbusch in 1939. He remained at the front desk of the Vienna PO and the Vienna Staatsoper orchestra until 1971. He was also head of the violin school at the Vienna Academy (from 1935) and founder of the Vienna Octet (in which his brother, Alfred, played the clarinet) and the Vienna Philharmonic Quartet. He conducted the Vienna New Year's Day Concert from 1954 to 1979, as well as the Vienna Johann Strauss Orchestra, which he re-formed in 1969. Boskovsky was unsurpassed in his intuitive feeling for the music of Johann Strauss and his contemporaries, and was also much admired in Mozart, whose complete dances and marches he recorded with the Vienna Mozart Ensemble. He made distinctive recordings of several operettas, including *Die Fledermaus*, Zeller's *Der Vogelhändler* and Lehár's *Paganini*, as well as numerous discs of waltzes and polkas by Strauss and other composers. He was awarded the Mozart medal from both Salzburg and Vienna, and the Austrian Ehrenkreuz.

LESLIE EAST

Bosmans, Henriëtte (Hilda) (*b* Amsterdam, 6 Dec 1895; *d* Amsterdam, 2 July 1952). Dutch pianist and composer. Her father, Henri Bosmans, had been principal cellist of the Concertgebouw Orchestra, while her mother, Sara Benedicts, taught piano for 40 years at the Amsterdam Conservatory. Henriëtte studied the piano with her mother, gaining a piano teaching certificate *cum laude* from the Maatschappij tot Bevordering der Toonkunst in Utrecht at the age of 17. By the 1920s her career as a pianist was firmly established. She appeared with leading European conductors such as Monteux, Mengelberg and Ansermet, with a repertory including Mozart, Beethoven, Brahms, Rachmaninoff, Grieg, Franck and Debussy. Between 1929 and 1949 she performed 22 times as soloist with the Concertgebouw Orchestra. She was also active in a number of chamber music ensembles.

She began composing in her teens, studying harmony and counterpoint with Jan Willem Kersbergen and, later, instrumentation with Cornelis Dopper (1921–2). Many of her works were inspired by musicians with whom she performed. Her friendships with the cellists Marix Loevensohn and Frieda Belinfante resulted in several works for cello, including two concertos and *Poème* for cello and orchestra. Until 1927 her music was characterized by broad, lyrical lines, with clearly discernible Romantic influences. In the years she studied with Pijper (1927–30), her style quickly became less Romantic and the instrumentation more transparent and colouristic, suggestive of the techniques and atmosphere of Debussy and Ravel. The *Concertino* for piano and orchestra, which was selected for the ISCM festival in Geneva in 1929, is harmonically related to Debussy. In 1934 Bosmans became engaged to the violinist Francis Koene, who died the following year. The *Concertstuk* for violin and orchestra, intended for Koene, was given its first performance by Louis Zimmerman in 1935 with the Concertgebouw Orchestra conducted by Mengelberg. It received many performances at home and abroad, including the USA. Koene's death, together with the impending war, were probably the main reasons that Bosmans stopped composing until after the war. During the war Bosmans refused to become a member of the Kultuurkamer, which was required of all Dutch musicians. At the end of August 1942, performance of her music was banned. She earned an income playing in private concerts. After the war Bosmans concentrated almost solely on vocal compositions. She wrote the passionate *Doodenmars* ('March of the Dead') to a text by Clara Eggink, and a more hopeful orchestral song, *Lead, kindly light* (1945), to a poem by Cardinal John Henry Newman, first

performed on 3 November 1945 by the soprano Jo Vincent and the Concertgebouw Orchestra conducted by Adrian Boult. In the last years of her life Bosmans formed a duo with the French singer Noëmie Perugia, who inspired her to write a large number of songs, mostly on French texts. Her songs vary strikingly in character and have a high degree of expressive tension. Many are narrative and ballad-like, the music artfully underlining the text. She was equally skilled in setting both French and German poetry, such as Heine's *Das macht den Menschen glücklich*. After the war she also regularly contributed articles on music to various Dutch newspapers and periodicals. She received a posthumous knighthood.

HELEN METZELAAR

Bosnia-Hercegovina (Serb.-Croat Republika Bosna i Hercegovina). Country in eastern Europe. Located in the Balkan peninsula, it has an area of 51,129 km² and a population of 4·34 million (2000 estimate). It emerged as an independent state in the late 12th century, becoming a kingdom in 1377. It was conquered by the Ottoman Turks in the second half of the 15th century and remained under the Ottoman rule until 1878 when, following the decision of the Berlin Congress, it was occupied by Austria-Hungary and then officially annexed in 1908. At the dissolution of the Habsburg monarchy in 1918, it became a part of the kingdom of Yugoslavia. In 1945, on the formation of the Federal Republic of Yugoslavia, it became one of its constituent republics. Following the breakup of Yugoslavia, it was proclaimed an independent state in 1992.

I. Art music. II. Traditional music.

I. Art music

Little is known about the cultivation of music in medieval Bosnia. Its territory was exposed to the influences of both Western and Eastern Christianity, Catholicism being, on the whole, better represented. Catholicism was more efficient, particularly after the 1340s under the influence of the Franciscans, while Orthodox monasticism lacked the organizational force of its Catholic counterpart. In addition, a Bosnian form of dissenting Catholicism, the Bosnian Church, attracted a sizable following, including some members of the ruling class. Nothing is known about the specific musical aspects of worship in the Bosnian Church. There are only a few surviving fragments of chant in late Byzantine notation that refer to dignitaries of the Orthodox church in Bosnia. Though small in number, fragments of Western chant are more numerous and have survived through the efforts of the Franciscans who, throughout the period of Ottoman domination, were the custodians of the Bosnian medieval heritage.

Although no sources of secular music survive, the activity of various musicians, especially instrumentalists in the service of the king and various aristocratic families, is well documented in Dubrovnik archival sources of the first half of the 15th century. The sources mention 'piffari', 'lautarii' and 'tubicines' who often came to play at important festivities in Dubrovnik and were paid for their services. Likewise, Dubrovnik musicians are mentioned taking part at Bosnian state occasions. A late 15th-century inventory of the household belongings of a refugee Bosnian aristocratic family, Hranić, includes an 'organić' (a portable organ). It is not known whether the composer of lute ricercares and Petrucci's editor Franciscus Bossinensis (Francis of Bosnia) came to Italy as an already educated musician, but it is safe to assume that he belonged to the wave of Bosnian refugees who settled in Dalmatia and Italy during the late 15th century.

During the period of Ottoman rule, from the late 15th century to 1878 (for details of which *see* OTTOMAN MUSIC and ARAB MUSIC), musical activity of both the Catholic and Orthodox communities was severely restricted. Nevertheless, since the Franciscans tended to receive at least some of their education, including musical education, in Italy, there is some evidence of the continuity of musical activity among them. In 1687 Matheus Bartl (Mato Banjalučanin) wrote his *Regulae cantus plani pro incipientibus*, and during the 18th century several Franciscans wrote mass settings (Marijan Aljinić, Augustin Soljanin, Vice Vicić). Stjepan Marjanović continued this tradition in the 19th century with his *Missae novissimae sanctorum* (1846). The first modern organ in Bosnia was installed by the Franciscans in Fojnica in 1801.

Although mainstream Islam discouraged music as a part of the religious ceremony, a particular contribution to music among the Bosnian Muslims was made by the Sufi dervishes. The Qadiri, Naqshabandi, Mevlevi and other orders were active in Bosnia and their religious songs, referred to by the slavicized Turkish term of Arabic provenance *ilahija*, represent a tradition, still insufficiently researched, that stands halfway between the provinces of folk and art music. Some poetry for the *ilahije* was written in Turkish, but a great deal of it also in Serbo-Croat, especially since the late 18th century by, among others, Abdurrahman Sirri, Muhamed Mejli and Omer Humo.

The Austro-Hungarian administration after 1878 ushered in a period of lively cultural and musical activity and opened links with the other parts of the Dual Monarchy. At first the backbone of organized musical life was provided by numerous military bands, which, apart from their traditional duties, acted as centres of musical activity in civilian circles, often transforming themselves according to need into full symphony orchestras. Some of the military bandmasters left a broader impact as conductors

and educators in the areas in which they served. Among those were Franz Lehár, father of the composer of operettas, the popular composer of marches and waltzes Julius Fučik, active in Sarajevo between 1897 and 1900, and, especially, Alexander Zellner and Josip Chládek. Frequently they were Slavs from other parts of the monarchy who, in addition to discharging their regular duties, felt the need to contribute to Bosnian culture inspired by a sense of Slavonic solidarity. Visiting artists started appearing in the 1880s; the young Fritz Kreisler gave his first recital in Sarajevo in 1893.

The first opera performance dates from 1882, when the company of the Deutsches Sommer-Theater in Sarajevo performed Flotow's *Alessandro Stradella*. This was followed in the 1880s and 90s by the seasons provided by the troupes directed by Julius Schulz, Emil Berle and Leon Bauer. After that opera performances were given mainly by visiting companies from Zagreb and Osijek. The Sarajevo Männergesangverein was founded in 1886 and continued its activity until 1929. Local communities, divided on religious grounds, founded their own choral societies. Among the earliest were the Serbian societies Njeguš in Tuzla (1886), Sloga in Sarajevo and Gusle in Mostar (both founded in 1888), the Croatian societies Trebević in Sarajevo (1894), Majevica in Tuzla (1896) and Nada in Banja Luka (1898), the Muslim ones, Jedinstvo in Derventa and Gajret in Sarajevo (both 1903), and the Jewish society La Lira in Sarajevo (1900). The first music school was opened by Franjo Matějovský in 1908.

The impetus created during the Austro-Hungarian period continued after the formation of the kingdom of Yugoslavia in 1918, although the period between the two World Wars was comparatively less vibrant. A belated copy of the Central European music societies, the Sarajevo Philharmonic Society, founded in 1923, was the main organizer and inspirer of concert activity, supporting chamber ensembles and maintaining a semi-professional symphony orchestra. The society, along with the Sarajevo Music School and the Sarajevo National Theatre (founded in 1921), were the only bodies that disregarded the division along the national grounds which continued to be made by the choral societies. These societies achieved a considerable degree of artistic maturity, but on the whole the Croatian and Serbian ones tended to cultivate music by the composers of their national groups active outside Bosnia, which had a detrimental effect on the development of Bosnian composers. This established a pattern that persisted until after World War II, whereby the musical life of Sarajevo, and of Bosnia-Hercegovina in general, was characterized by a high level of achievement in the areas of instrumental and vocal performance which was not adequately matched by the activity of local composers. In addition, during the Austro-Hungarian period, as well as during the kingdom of Yugoslavia, music was seldom seen as an art in its own right, having been taken mainly as a vehicle for the advancement of various national causes.

After the slow development during the inter-war period, musical life received a considerable boost when in 1945 Bosnia and Hercegovina became one of the constituent republics of Yugoslavia. The socialist state discouraged the activity along the lines of religious denominations and the stress was laid on the state support of central musical institutions. The Sarajevo Opera became a permanent company in 1946 and within a short period of time established a wide repertory under the directorship of Cvjetko Rihtman and Tihomir Mirić. Its orchestra formed the nucleus of the National SO, founded in 1948 (renamed the Sarajevo PO in 1953). Sarajevo RSO was founded in 1962. While the Philharmonic concentrated predominantly on the standard international repertory, the orchestra of the radio inclined towards a more modern repertory and the new Yugoslav music.

Several music colleges were founded – in Sarajevo, Mostar, Banja Luka and Tuzla – and the Sarajevo Music Academy established itself from its foundation in 1955 as the main centre of artistic and academic excellence. A number of composers and conductors who had already established their reputations elsewhere in Yugoslavia, primarily in Zagreb, settled in Sarajevo and greatly contributed to the lively and diverse musical activity. Boris Papandopulo, Mladen Pozajić and Ivan Štajcer raised Sarajevo Opera to a standard comparable to the older Yugoslav companies. Though not neglecting the standard repertory, during the 1950s and 60s the opera and its affiliated ballet ensemble became particularly known for its attention to contemporary repertory, performing works by Britten, Egk, Menotti, Shostakovich and Henze, as well as giving first performances of operas and ballets by contemporary Yugoslav composers.

The Croatian composers Boris Papandopulo, Ivan Brkanović, Mladen Stahuljak, Ruben Radica, and Schoenberg's Berlin pupil Miroslav Špiler, the Serb Božidar Trudić and the Slovene Dane Škerl were all active in Sarajevo at various times between 1940s and the 1970s. The concentration of talent and of performing forces in Sarajevo tended to diminish the activity in other centres, although Banja Luka and, especially, Mostar succeeded in maintaining permanent ensembles.

For a while after World War II the presence in the region of composers from outside Bosnia tended to overshadow the activity of local composers, among whom several nevertheless demonstrated individual voices. Vlado Milošević (1901–91) was inspired by folk music to which he added a dose of neo-classicism. Avdo Smailović (1917–84) started with a nationalist inspiration and gradually assimilated more modern tendencies; a similar shift from neo-classicism to modernism is evident in the work of Nada Ludvig-Pečar (*b* 1929). Vojin Komadina (1933–97) combined a variety of influences ranging from a modified 12-note system to aleatory techniques and created an individual style in which discreet suggestions of Bosnian folk music were transformed into musical utterances firmly based in an avant-garde idiom. From the mid-1960s Sarajevo gained within Yugoslavia the reputation of a centre of pop and rock music, and several Sarajevo-based bands developed individual experimental styles.

After the breakup of Yugoslavia, the destruction caused by the war of 1992–5 dealt a severe blow to the musical life and institutions in the whole of Bosnia, and especially in Sarajevo and Mostar. In addition, unique documents for the study of the country's musical past were lost with the burning of the National Library in Sarajevo.

II. Traditional music

1. INTRODUCTION. This subsection examines the traditional music of Bosnia and Hercegovina before the beginning of the 1992–5 war. It does not consider the drastic effect of the extermination of traditional music forms or the musical trends provoked by the recent war, 'ethnic cleansing', forced migrations of Bosnian ethnic groups and the destruction of countless cultural artefacts. While attempting to highlight the relevant socio-cultural processes that have influenced the development of particular forms, genres and repertories of folk and popular music, it is not yet possible to analyse the turbulent changes in musical expression and the redefinition of musical forms by the national groupings still in conflict.

Cultural sources from the medieval period are scanty, offering insufficient information to promote serious discussion or to draw conclusions about the music of the time. During the long rule of the Ottoman Turks in Bosnia and Hercegovina (from 1463 to 1878), the musical traditions of the region included religious chant of the three major ethnic-religious groups: the Roman Catholic Croats, the Orthodox Christian Serbs and the Bosnian Muslims.

During the Austro-Hungarian annexation (from 1878 to 1914), Bosnia and Hercegovina began to follow Western mainstream cultural trends. The Bosnian people have, however, retained a definite propensity for their traditional musical styles.

The music of Bosnia and Hercegovina is best understood in the light of a multicultural heritage, with divergent older and more recent folk music styles. Although some Bosnian traditions are very specific in origin and style compared to others (such as Sephardi Jewish practice), all of them can be recognized as parts of a complex cultural entity. Cultural confluences and tolerance, which existed until recently, were the result of long-lasting multi-religious and multi-ethnic life. The recent nationalistic efforts to separate strictly ethnic cultures and musics have no historical foundation.

A major divergence can be observed between the forms, repertories and stylistic features of rural and urban musical practices of the area. Further distinctions of style and repertory may be drawn between different ethnic groups and the sexes, specific regions (most relevant for rural music forms) and older and newer forms and genres. There are also many differences between the secular and religious musical traditions of existing religious-ethnic groups.

2. RURAL FOLK MUSIC. Because of the geographical and socio-economic isolation of the area, the rural music of Bosnia and Hercegovina is generally regarded as the oldest and most conservative in the entire region. It retains very rudimentary stylistic features and is mostly associated with archaic ritual functions. Some of the most typical archaic musical elements reveal similarities with the traditional music of other parts of the Balkans: Croatia, Montenegro, Serbia, Albania, Bulgaria and northern Greece.

Village people of all ethnic groups performed music in a similar style. Only some ritual forms associated with particular ceremonies, for example the Muslim wedding, were stylistically distinct from the ceremonial songs of other ethnic-religious groups. An example to the contrary involves songs and rituals of pagan-Christian origin for St George's Day, which survived until recently in both Christian and Muslim tradition. Until 1992, differences in traditional rural music styles were based on regional rather than ethnic-religious lines. These usually corresponded with the dialect regions of the Serbo-Croat language and with other specific factors of traditional social, economic and cultural life, including folk costumes, folk architecture, etc.

Vocal forms dominate the rural musical tradition. They are the sole form of musical expression for rural women of all ages. In the past, many musical forms were related to particular annual and life-cycle rituals, especially those of the pastoral population, which dominated the central part of the Dinaric Alps. Ritual music forms were experienced as more codified and less exposed to change, which explains why they were considered the most conservative and 'ancient' music forms in the region. In the 20th century, especially after World War II, most of the 'ancient songs' disappeared as the corresponding rituals and contexts vanished. Some of them continued to be performed outside their original function, surviving in the memories and reminiscences of the older performers.

The most numerous ritual music forms were *svatovske pjesme* or wedding songs. They were sung by either women or men but always separately. Female wedding songs were very distinctive in character, function and musical-poetic features, and they covered the most ritualistic actions of the ceremony. An omission of some part of the ritual would require the elimination of the corresponding wedding songs.

The various forms of the female wedding repertory were performed by groups of girls or women. In Hercegovina, they were named *kolarice* after the *kolo* circle dance performed while singing. Male wedding songs were usually sung as *zdravice* ('toasting' songs) and *putničke pjesme* ('travelling' songs; ex.1). In Bosnia and western Hercegovina these songs were performed by a group, while in eastern Hercegovina they were sung alternately by two individuals using an extended and trembling singing style. This typical male style was named

potresanje ('trembling'), *ojkanje* (singing with an emphasis on the exclamation 'oj') or *turčijanje* (singing in an extended Turkish-like style). A similar vocal style was applied to travellers' songs and *kiridžijske pjesme*, the songs of travelling merchants (fig.1). These forms disappeared in the 1930s along with the activities they accompanied.

Other ritual songs were part of Christian and pre-Christian ceremonies, including *lazaričke pjesme* (St Lazarus songs), *čarojičarske* and *vučarske* (songs of the masked rituals). *Lazaričke pjesme* were performed by groups of women on St Lazarus Saturday, eight days before Orthodox Easter. In the 1980s, these songs were performed only by Karavlah women (a marginal group of Romanian-Roma origin) for Serbian people in several villages in north-eastern Bosnia. The other two ritual forms were performed exclusively by groups of men in the winter season and during weddings, and they disappeared shortly after World War II.

Many other traditional rural songs accompanied or followed certain communal activities, including *vlačiljske*, *žetela'ke* and *kosa'ke pjesme* (flax combers', women reapers' and haymakers' songs respectively). The textual content of these songs was directly connected to the corresponding action, but only *vla'iljske* were performed during work, while the other two song types were performed before and after it.

Uspavanke (lullabies) and *tužbalice* (laments) were very common forms of female music expression. Muslim women, however, did not perform laments because of their religious and philosophical attitude to death. These song types were intimately connected to ritual situations, yet some Muslim lullabies were elaborated into more lyric and musically expressive forms. Laments were performed by either female family members or professional mourners and they included narrative text which was improvised in performance. Accordingly, their musical structure was limited to short repetitive formulae with occasional opportunities for variation and the presentation of contrasting musical patterns that closely followed the dramatic textual content. Similar compositional principles were used in other narrative songs, that is, in female ballads and male epics.

Lyrical rural songs, female and male, mainly performed within single-sex groups, were the most common and appropriate for entertainment. Various rural music forms were recognized and named according to their functions, formal structure, polyphonic vocal organization and their use of specific kinds of melismatic notes. Different stylistic factors were recognized in particular regions as the crucial stylistic determinate in naming of song types. Singing style might be further distinguished according to gender designation, territorial characteristics, association with a specific geographic or former administrative-political region, or even with a single village.

Melodies are based on descending diatonic or chromatic note rows the range of which rarely exceeds a 4th or a 5th. Their narrow melodic intervals do not correspond to the tempered system. Tonal relationships are generally unstable.

Melismatic notes are used liberally and with great diversity. The most typical are grace notes, here named *sjecanje* or *jecanje* (cutting or sobbing). They are recognized as an important characteristic of the *ganga* (ex.2), the most common song type of Hercegovina and south-western Bosnia. Upward- and downward-moving 'slicing' notes at the end of melodic lines or strophes are common in the older songs, especially when performed by women. Extended melismatic groups were also used in male wedding, travelling and toasting songs. Melisma is considered an essential feature in rural music practice and the most important factor in defining song genres and specific musical forms.

Polyphonic singing in two or, more rarely, three parts, within single-sex groups of two to five singers is most common. Within the polyphonic structure the interval of the major 2nd is the most characteristic. It is used at the ends of phrases and as the most dominant vertical interval

Ex.2 *Ganga* from northern Hercegovina, transcr. A. Petrović

♩ = 72

♩ = 60

- ziš

I je kad je te - bi vo - lja

ni - sam, dra - gi, ru - ža ja

na sred po lja da do - la - ziš ij

at cadences. Aesthetically, the major 2nd is experienced as a consonant interval, as opposed to the treatment of the same interval as a dissonance in the Western musical tradition.

The metre of the verses and the rhythm of the music are adaptable. Rural people recognize two major kinds of rhythm in their music: *podkorak*, with a fixed rhythmic unit; and *uravan*, in which the rhythm is flexible. The most common verses in rural folksong are based on lines of eight (5+3, 4+4) or ten (6+4, 5+5) syllables.

Formally, vocal music is divided into *kratke* and *duge pjesme*, or songs with 'short' and 'long' musical lines. *Kratke* are songs with a narrative character. Musical interpretation is subordinate to poetic expressiveness and verses are usually sung to a short, repetitive musical line. Occasionally, exposed and contrasting musical lines are added to make the musical structure more dynamic. The most typical forms based on *kratke* are epics performed by males, ballads and laments performed by females, and *potrkuše*, or 'running' songs. This latter type is typical for northern Bosnia and is performed polyphonically with two interdependent parts creating an unbroken flow of sound. Unlike *kratke*, the textual component of *duge pjesme* is subordinate to the musical expression. These 'long' songs may be very short in textual content, but extremely elaborate musically. They normally involve the exposition and repetition of refrains, exclamations, and one or two verses made up of repeated shorter verse units and repeated single words.

Emphatic dynamics are used for outdoor singing and for artistic communication across large distances. The middle voice register is predominant in both male and female vocal styles. Only grace notes and melismatic slicing upwards may be performed in the upper register, in a falsetto voice.

All these stylistic features are typical of *starinske pjesme* ('ancient' songs), which survived until recently. However, some newer forms including the *ganga* have absorbed these older stylistic components and shaped them in a new and original manner. *Na bas*, or *bećarac*, is an example of a new kind of polyphonic song that explores a wider melodic frame than the older forms. This singing style rapidly spread from Croatia into the rural environments of Bosnia and Hercegovina before and after World War II, replacing many of the older polyphonic songs and songs with ritual functions like wedding songs. As a result, the interval of a minor 3rd is slowly replacing the major 2nd, and the perfect 5th has become an obligatory final resolution for *na bas* songs.

3. Urban vocal folk music. During the period of Ottoman Turkish rule, urban folksongs with an oriental character became a specific genre in the newly established urban environments. In the cities of Sarajevo, Jajce, Mostar, Travnik and Banja Luka, transplanted elements of oriental-Islamic culture strongly influenced the formation of specific attitudes towards all aspects of life and culture, and the Ottoman model became generally accepted and locally expressed among Islamicized south Slav people. Musically, this Ottoman influence meant the introduction of new stylistic elements, forms and instruments to the previous local cultural traditions. It also led to the formation of new urban attitudes about music distinct from the experiences and values of rural people, both Christians and rural Muslim converts, who maintained a cultural distance from the Muslim mainstream.

Bosnian music and musical interpretations adapted to fit the more intimate atmosphere of indoor urban performances. Vocal music of a lyrical character became the preferred and predominant form. These Muslim lyric songs were called *turčija*, meaning a song in Turkish style, but they different significantly in style and form from the rural *turčija*. At the beginning of the 19th century the urban term was replaced by *sevdalinka* (pl. *sevdalinke*), from the Turkish word 'sevdah', meaning passion, love and amorous yearning. *Sevdalinka* songs have a wide melodic range and a modal character related to the Turkish *makam* (pl. *makamlar*), including *hidžaz*, *usak* and *nahvan*. They are performed by a solo singer in mainly free and asymetric (*aksak*) rhythm, allowing for considerable melismatic interpretation. *Sevdalinke* with very elaborate melismatic formulas at the beginning and the end of the melostrophes are called *ravne pjesme*, or 'plain' songs, and they require a very soft dynamic and timbral presentation (ex.3).

During the Ottoman era, this type of music was favoured by local Muslims. Near the end of the 19th century, the *sevdalinka* was a shared musical heritage for most Bosnian urban populations, and it remains one of the strongest Bosnian cultural symbols and one of the most popular traditional song types. However, the general socio-cultural changes of the 20th century transformed *sevdalinka* performance practice in significant ways. The oriental, non-tempered modal system of the early *sevdalinka* was replaced by the Western tonal system, and the melodic and rhythmic structure of songs became more fixed and less conducive to elaborate melismatic interpretations. The intimate nature of early *sevdalinka* performance – solo or voice accompanied by *saz*, a long-necked lute – was augmented with the modern instrumental accompaniment of *tamburica* orchestras or Western instrumental ensembles.

In the 1950s the *sevdalinka* found wide popularity through radio and television programmes and concert performances. The most successful modern interpreters of the *sevdalinka* were Zaim Imamović, Nada Mamula, Himzo Polovina, Safet Isović, Zehra Deović and Emina Zečaj.

4. Instruments. The traditional instruments and instrumental music of Bosnia and Hercegovina may also be divided along rural and urban social lines. The drastic differentiation between the sexes in all traditional society created a taboo against women playing or even handling musical instruments, although listening to instrumental music by women was accepted.

Rural instrumental music was performed as accompaniments to dance and song or as improvisational forms. Interestingly, until the 1940s there existed in rural practice a unique phenomenon called *nijema kola*, or 'silent' dances, that had no instrumental or vocal accompaniment. Only the jingling sounds of women's jewellery and the steps of the dancers provided rhythmic accompaniment for the 'silent' dances for different functions.

Instrumental improvisations were named *čobanska svirka*, literally 'shepherds playing'. Aerophones were the most common type of instrument used in traditional pastoral culture for improvisations, including a variety of end-blown flutes: *svirala*, *slavić*, *jednojka* (all single flutes) and *dvojnice* (double flute). Also common was a single-reed droneless bagpipe with a double chanter, called a *diple*. The placement of finger-holes on these instruments reflected the specifics of local tonal practice rather than definite pitch relationships. The instruments with two

melody pipes, *dvojnice* and *diple*, followed the patterns of local polyphonic practice (fig.3).

These aerophones were commonly used by indigenous peoples of all ethnic-religious origins. Only the *zurna*, a double-reed instrument introduced by the Ottoman Turks, was played exclusively by Gypsy and local Muslim professional musicians of the lowest social class. An ensemble of two *zurne* and drum often played during Muslim weddings and other festive occasions. In the period after World War II, these ensembles were found only in a few Muslim villages in north-east and north-west Bosnia. The *zurne* used in Bosnia were about 30 cm long and tuned to the same pitch, but they played different parts according to the local rural polyphonic practice.

The most outstanding bowed string instrument was the *gusle*, with one or rarely two strings. The singing of epics accompanied by the *gusle*, referred to as *guslarske pjesme* (guslar songs), was a common tradition among all indigenous ethnic groups until the 1930s. Later, the guslar songs became identified as the exclusive cultural heritage of the Serbs. Consequently, most epic singers of Muslim origin had to abandon their tradition since their historical interpretations of the epics did not conform to the official construction of historical events dictated by the Serbs.

A variety of long-necked lutes, generically referred to as *tambura*, reached Bosnia from the East during the Ottoman period. Examples of these instruments, with from two to eight strings, include the *tamburica* (the smallest type of *tambura*), *bugarija*, *karadžuzen*, *šargija* and *saz*. The *saz* was the most elaborate of these lutes and was used exclusively in urban Muslim practice to accompany the *sevdalinka*. The *pivačka tambura* ('singing *tambura*') was used to accompany epic singing. Until the middle of the 19th century, the *tambura* was played primarily by Muslim people to accompany songs and dances. Near the end of the Ottoman period, Christians adopted the practice as well. In the second half of the 19th century, the *tambura* spread from Bosnia to Croatia and to Vojvodina, the northern province of present-day Serbia. Soon after the *tambura* was transplanted to these regions, it was adjusted to the Western tempered system and fashioned in many different sizes and registers. These adjustments led to the formation of *tambura* orchestras, or *tamburaški orkestri*. At the end of the 19th century, the *tambura* became the most popular instrument in Croatia and one of the strongest national symbols. In Bosnia, however, the *tambura* remained in the local tuning and continued to accompany rural songs and dances. In the 20th century, rural people of northern Bosnia added the violin to form an ensemble that included *tambura* and *šargija*.

3. Diple player from western Hercegovina

Most membranophones were imported by Turkish military bands, or *mehterhane*, and were predominant in Muslim musical practice. Small kettledrums called *talambas* or *dulbas* were often played at public occasions to announce important events. The *bubanj* was the traditional drum to accompany *zurne*. Female Muslims and Sephardi Jews used a narow frame drum with or without jingles, call *def* or *daire* by Muslims and *pandero* or *panderico* by Sephardim, in their musical traditions. The members of the Bosnian Sufi orders Naqshabandi and Kadiri also played a kind of small kettledrum and frame drum with rings, called *kudum* and *binbir halka* respectively.

Large and small cymbals, called *zile*, were also imported with the Turkish military bands and were used extensively in Muslim wedding ceremonies. Several kinds of idiophone were also played by children, but they were generally treated as toys rather than as musical instruments.

The Austro-Hungarian annexation introduced many Western instruments into the region, including the accordion, the clarinet, the violin, and the guitar and bass guitar. These instruments were used by professional and semi-professional groups to perform *kola* folk dances, instrumental accompaniments for the *sevdalinka* and newer popular songs. Some effects of this Western influence on local performance practice included the adoption of Western tempered tuning and harmonic progressions, the amplification of the musical sound, the creation of new musical mannerisms, which diminished the creative role of the solo singer, and a tendency towards virtuoso playing by the leading instruments, with the accordion usually having the most prominent role.

5. Muslim religious chant. Islamic religious chant was introduced during the process of Islamicization in the early period of the Turkish occupation. It was the first musical genre of an Islamic-oriental character to serve as a basic model for the development of Bosnian Muslim music, both religious and secular.

The Bosnian *mekam*, the Bosnian version of Islamic religious chant, underlies the total local musical complex much like the Turkish *makam* or Arabic *maqām*. However, the Bosnian form was exclusively applied to the forms of religious chant: the cantillation of *sura* (chapters from the Qur'an; the interpretation of *ezan* (call to prayer); and the chanting of *dova* (prayer or blessing), *kasida* (ode) and *ilahija* (hymn). The parallel musical term for secular Muslim songs was *kajda*. Some concepts of the Bosnian *mekam* have also been applied to the religious chants of the Bosnian Sephardim.

The modal concept of *mekam* (or *makam*) was known among Bosnian urban Muslims and Sephardim until the beginning of the 20th century. Bosnians living on the periphery of the Islamic world, however, used only a small number of *makams*. Conservative chanters nowadays still base their chants in some degree on the Turkish *makam*, but they have no theoretical knowledge about the modal system. Younger Muslim clergy who received their religious education in Arab countries have adopted to some degree the Arabic *maqāmāt*, but they have not been widely accepted.

All religious chants are performed in Arabic, except the religious hymns of *ilahije*, which are sung in the Bosnian and Turkish languages. *Ilahije* were popular within the existing Sufi brotherhoods of Naqshabandi, Kadiri and Mevlevi. They were also sung in secular situations, primarily by women, as long narratives. Mothers would

Ex.4 Excerpt from female *ilahija*, transcr. C. Rihtman

often sing *ilahije* instead of lullabies to their children in the cradle (ex.4). Many *ilahije* melodiesbecome so popular that they were transplanted to Bosnian Sephardi liturgical chants and to *sevdalinke*.

The Muslim chants of Bosnia, however, were not unified in style and treatment. Chants in the villages were more influenced by the rural folk tradition. Urban people with more religious education performed more elaborate styles of chant but referred to them exclusively as *čitanje*, or readings. Rural Muslims, however, treated their style of chant drenched in local performance practice as a true form of musical expression.

6. Sephardi Jewish music. From the 16th century until World War II, Sephardi Jewish music had a distinctive tradition in Bosnia, existing alongside indigenous musical styles. Bosnia was an important site for Sephardi Jewish music within the Sephardi diaspora during this time. After World War II, Jews were almost completely assimilated with other local ethnic groups, and most of their musical traditions were lost. Only a few Sephardi interpreters of Bosnian origin living abroad – *ḥazan* Eliezer Abinun (1912–92), who lived in England and Israel, and the singer Flory Jagoda (*b* 1924), who lives in the USA – maintained through their interpretations a Bosnian version of Sephardi sacral chants and secular singing. Some older Bosnian Sephardi Jews kept these music idioms alive in memory, but they did not perform them.

Bosnian Sephardi music is primarily urban. Bosnian Sephardim first settled in Sarajevo and by the 18th century they had populations in several other cities, including Travnik, Doboj and Višegrad. Religious music was performed in Hebrew exclusively by men, while secular songs were sung by women in the Judeo-Espanjol language (locally named Djideo), which is now called Ladino.

Both religious and secular Sephardi music practised until the beginning of the 20th century was strongly influenced by local Muslim music. Only the cantillation of the Bible retained a fixed musical presentation, although it absorbed some local musical nuances. The local dialect of Bosnian Sephardi religious music, expressed in psalms, hymns, *bakhashots* and *piyyutim*, incorporated many

aspects of the modal patterns, elaborated melismas (ex.5), predominantly free rhythm, and nasal timbre of Muslim music in general. Songs from Sephardi secular repertory (romances, wedding songs and lyric songs) were also strongly influenced by Bosnian Muslim music.

In the 20th century, Bosnian Sephardim became exposed to socio-cultural changes in Central Europe. They found new musical models in the religious chants of rival Ashkenazi Jews, who started to settle in Bosnia after the Austro-Hungarian annexation. Younger Bosnian Sephardim also came into contact with reformed Judaism and modernized chants during their education abroad in Vienna, Graz, Budapest and Prague. At this time, westernized Sephardi chants co-existed with traditional Bosnian-style chants, which remained important among the older and more orthodox Bosnian Sephardim.

Secular Sephardi songs also came into contact with external musical influences at this time. In the 1930s, the Sephardi upper class and intelligentsia introduced into their *romancero* and song lyrics elements of popular Spanish and Latin-American music (e.g. a tango rhythm). The Western guitar began to accompany female songs, which previously had had only *pandero* (tambourine) accompaniment. Its introduction brought with it many non-traditional, Western-influenced melodic and rhythmic patterns.

7. Newly composed folksongs. The massive urban migration of rural populations after World War II created a certain disorientation in musical expression in Bosnia, Hercegovina and Serbia. Resettled people lost their ties to rural musical culture and were confronted with unfamiliar urban and Western-influenced musical styles. Only after the 1960s did the new musical phenomenon called *muzika u narodnom duhu* ('music in the folk spirit') or later *novokomponovana narodna muzika* ('newly composed folk music') compensate for the previous loss of rural musical forms. In style, it was a selective hybrid of rural and urban songs, reflecting a search for a new urban identity. These songs signalled a break from 'authentic' folk music, which is communally composed and transmitted, since the authors of these songs – poets, composers and arrangers – were individuals seeking profit and fame.

Officially judged by policy supervisors as a corrosion of traditional music culture or as an unwanted subculture, the commercial success of this newly composed folk music genre since the 1970s has been both surprising and controversial. The major venues and media channels for this music are cafés, music festivals, recordings and, most recently, radio and TV programmes.

Since the 1980s, this musical trend has moved further towards internationalization through the linkage of contemporary Near Eastern music (predominantly Turkish) with Western pop music and Bosnian *sevdalinka*. In the most recent conflict in Bosnia and Hercegovina, this Bosnian-oriental idiom of 'newly composed folk music' was heralded as the most appropriate musical expression for the endangered Bosnian Muslims.

BOJAN BUJIĆ (I), ANKICA PETROVIĆ (II)

Bosquet [Boquet] (*fl* late 14th century; *d* before 30 Nov 1406). French composer. He is probably identifiable with Johannes de Bosco (Boscho, Bosquo) or Jean du Bois, a cleric and singer from Tournai who can be traced from about 1364 to 1406. In 1371, while rector of Ascq (near Lille), Johannes de Bosco received a canonicate at St Pierre, Lille. He served Cardinal Jean de Blauzac, Bishop of Nîmes (vicar-general in Avignon under Gregory XI), as *cubicularius* until 1379 (and probably for the previous 15 years), together with Richardus de Bozonvilla, who later became *magister capellae* in Avignon (1394–1405). From 1391 to 12 December 1404 Bosco was a singer in the chapel of the antipope Clement VII; in 1393 he received a papal grant as a musician to Duke Louis II of Anjou, a title he must have acquired before 1390. In 1394 Bosco and 13 other singers, including the composers Hasprois and Haucourt, swore allegiance to the new pope, Benedict XIII. Bosco renewed his oath after the pope's flight from Avignon in 1403; the next year he followed Benedict to the abbey of St Victor at Marseilles, but he did not accompany the pope to Italy at the end of 1404. (A Catalan cleric with the very common name Johannes de Bosco, traceable during the siege of the papal palace in 1398, must have been a different person.) Johannes de Bosco, the papal singer, seems to have spent the last two years of his life at the Bourges palace of Jean, Duke of Berry (the uncle of Louis II of Anjou). The name Johannes de Bosco or Jehan du Bois appears as a vicar of the Ste Chapelle at Bourges from the time of its dedication in 1405 to 1406, next to those of three other composers: Pierre Fontaine, Guillaume le Grant and Paullet. He must have died shortly before 30 November 1406, since petitions for the reversion of his benefices in Le Mans and Reims are recorded from this date.

Two compositions survive with ascriptions to Bosquet or Boquet: a three-voice Gloria (which appears with an additional contratenor in Coussemaker's copy of *F-Sm* 222), and a four-voice Gloria (which has a different contratenor and a longer Amen in *I-Bu* 2216, where it is attributed to 'Nicolaus de Capoa'). Both settings are copied in the important early 15th-century manuscript *I-Bc* Q15 (ed. in CMM, xi/2, 1959, and PMFC, xxiii, 1989–92) and have two syllabically texted upper voices which often exchange phrases and sometimes imitate one another, accompanied by one or two slower textless voices. Although the four-voice Gloria has identical passages in the lower parts, there are no isorhythmic patterns in the upper voices. Certain fragments attributed to 'Jean du Bois', apparently sketches of polyphonic compositions, in the Archives Départementales du Cher in Bourges, are almost certainly by the singer at the Ste Chapelle.

A 'Johannes de Bosco alias Peliçon' is cited among the canons of Nevers Cathedral in 1399; and papal documents (Di Bacco) show that he was a cleric of the diocese of Nevers as early as 1378, with a document of 1394 petitioning for the Nevers canonry and stating that he held a chaplaincy in the diocese of Auxerre. He is almost certainly the composer of the three-voice Gloria and Credo attributed to 'Peliso' (Pelison, Pellisson, Pellissonus) in the Apt Manuscript (*F-APT* 16bis) and other sources (ed. in CMM, xxix, 1962, and PMFC, xxiii). Tomasello has argued that this name is alluded to in the list of papal singers from 1396, but Günther has suggested that the reference is simply to Johannes de Bosco. In contrast to

the 'Bosquet' Glorias, the 'Pelison' pieces use major prolation, have only one texted voice and seem to come from an earlier generation. It is unclear whether they ought to be regarded as earlier pieces by the same composer or as the work of a different man. The Pelison compositions resemble those of Hasprois and Haucourt, with whom Johannes de Bosco is associated in the Avignon documents; the Bosquet pieces are more like those of Césaris, Fontaine, Guillaume Legrant and Paullet, who all served in the Ste Chapelle of Bourges from 1405–6.

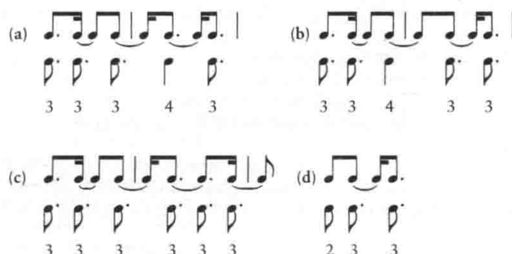
URSULA GÜNTHER (with GILBERT REANEY)

Bossa nova. In Brazilian popular music, a movement that originated about 1958–9 and effected radical stylistic changes in the classical urban SAMBA. The word 'bossa', from Rio de Janeiro slang, means loosely 'special ability', 'shrewdness', 'astuteness' and the like. The term 'bossa-nova' first appeared in Antônio Carlos Jobim's song *Desafinado* (1959) whose melody with complex intervals (diminished 4ths, minor 6ths) and a rather tortuous shape was intended to suggest the idea of a singer with a certain vocal insecurity. Its melodic and harmonic complexity was justified by the song text as 'bossa nova'. The originators of the new style included Jobim himself as a composer and João Gilberto primarily as a singer and guitarist. Their first important recording was *Chega de Saudade* (March 1959). Although the samba figured prominently in their repertory it was not their exclusive genre.

One of the features of the new style, affecting popular music in general, and the samba in particular, was a deliberate avoidance of the predominance of any single musical parameter. Before bossa nova the melody was generally strongly emphasized, to satisfy the basic requirement of an easily singable tune; bossa nova, however, integrates melody, harmony and rhythm. The performer has a vital role in this integration, but heavy emphasis on the singer's personality is altogether avoided. Strongly contrasting effects, loudness of voice, fermatas or scream-like high pitches are generally excluded from a proper bossa nova singing style; the singing should flow in a subdued tone almost like the normal spoken language. The characteristic nasal vocal production of bossa nova is a peculiar trait of the *cabaclo* folk tradition of north-eastern Brazil, but was rare in earlier urban music. As a soloist the interpreter no longer opposes the accompanying ensemble: they are reconciled. The guitar as an accompanying instrument is emphasized and, whether as a solo or accompanying instrument, may present a harmonic structure with two functions: one of traditional harmonic support, and the other a percussive function, stressing the rhythmic strokes chordally. Both functions are frequently integrated in the same chord entity, as shown in many performances of Baden Powell, Brazil's foremost guitarist in the 1960s. Certain harmonic formulae have almost become clichés since the advent of bossa nova, such as the shifting of major and minor modes in a tonic–dominant relationship (e.g. A♭ minor to D♭ major). The pattern of modulations is the opposite of those in jazz, which usually follow an ascending order in the circle of 5ths and have greater harmonic tension. Except for certain processes of chord formation (particularly altered chords) there is less jazz influence than some early critics believed. A trait traceable to jazz and perhaps related to bebop is the highly improvised style on an implied theme of some bossa nova instrumental pieces. The most remarkable innovation of bossa nova music is in its rhythmic structure, which affects the very foundation on which the samba was built. The rhythmic structure of the bossa nova samba possibly had its origin in both the folk and the classical samba formulae (ex.1). João Gilberto

Ex.1 Classical samba rhythms



was mainly responsible for extracting and isolating those elements that constitute his famous guitar stroke, called in Portuguese 'violão gago' ('stammering guitar'; ex.2).

Ex.2 João Gilberto's characteristic bossa nova rendition of the samba rhythm.

Many variants of that basic rendering have developed, their common trait being the predominance of ternary divisions against the binary one which occurs only once (exx.3*a*, *b* and *d*) or not at all (ex.3*c*). These variants have been the point of departure for many ingenious drummers and guitarists towards a previously unknown rhythmic versatility. Bossa nova song texts are also innovatory, and are valued not only for their expressive content but also for the sonorous individuality of their words. Some affinity has been noticed between bossa nova texts and Brazilian concrete poetry. In several examples the lyrics seem to have been conceived together with the music, so close are the verbal rhythm and the melodic (cf Jobim's *Samba de uma nota só*, *Desafinado* and *A garota de Ipanema*).

Ex.3 Bossa nova rhythmic formulae

During the early to mid-1960s bossa nova became linked with a social protest movement. Musically the introduction of international pop styles, especially rock music from England and the USA, gave rise to a dynamic hybrid style which reached its peak with the group Tropicália.

GERARD BÉHAGUE

Bossard [Bossart, Bosshart]. Swiss family of organ builders. They were active especially in German-speaking Switzerland, but also in French-speaking Switzerland, Alsace and southern Germany, and were one of the most important organ-building families in the country in the 18th and early 19th centuries. Their heyday was undoubtedly the first two-thirds of the 18th century, in the time of their founder Josef Bossard (*b* Baar, 1665; *d* 1748) and of his son Viktor Ferdinand Bossard (1699–1772); the masterpiece which they constructed at the monastery of St Urban, Switzerland (1716–21), was never surpassed nor even equalled by any of their organ-building descendants. The Bossards are known to have built 62 new organs; 41 building contracts for these are in the Bossard family archives (now in the Zug town archives) and about a dozen instruments survive (in some instances only cases and fronts).

As a rule their organs comprise *Hauptwerk*, *Rückpositiv* and Pedal, with mechanical slider-chests and continuous casing. Their method of construction was based entirely on the south German Baroque ideas of the 18th century, but with some French and Italian influences. The treble stop Suavial 8′ (only from *c*′), which is located at the front of the case, is a typical feature and, like the Italian Voce umana, is tuned to vibrate against the Prinzipal 8′. The tierce stops and the reeds show French influence.

The Bossards did not adopt the innovations in European organ building which took place about the 1840s (such as the sliderless wind-chest and the abandonment of the *Rückpositiv*). Because of this, the last work of Franz Josef Remigius Bossard (1777–1853), in the Augustinerkirche, Zürich (1845), met with scathing criticism, the *Neujahrsblatt der Allgemeinen Musikgesellschaft Zürich* of 1860 describing it as 'furnished with devices which remind one of earlier times and which are a far cry from the achievements of recent years'.

Franz Josef Remigius's father, Karl Josef Maria (1736–95), the son of Viktor Ferdinand, was also an organ builder; Franz Josef's son, Franz Bossard (1804–68), was an assistant in the craft.

FRIEDRICH JAKOB

Bossi [Bossi-Urbani, Vegezzi-Bossi, Balbiani-Vegezzi-Bossi, Brondino-Vegezzi-Bossi]. Italian family of organ builders. The founder of the firm, Antonio Bossi, was born in Mendrisio, Switzerland, and began organ building around 1550. The family later moved to Como in Italy, and in 1635 Gabriele Bossi (*b* 1604) established his workshop in Bergamo and in the same year built an organ for S Salvatore, Venice. His son, Giovanni Antonio Bossi, was responsible for the organ of Bergamo Cathedral between 1729 and 1738. His son, Angelo Bossi (1707–76) built organs in Lombardy whose children, Giuseppe (1738–1803) and Francesco (1742–1816), started independent firms. Giuseppe built a quarter-tone enharmonic organ at the Malmaritate, Milan (1780), and the organ at S Maria Maggiore, Bergamo. His son Carlo (*d* 1836) moved to Lodi and built organs in Lombardy, Piedmont, Emilia-Romagna and Switzerland. Carlo's two sons also worked independently: Felice Bossi settled in Piedmont, building the organ for Turin Cathedral (1874), while Adeodato Bossi (1805–91) remained in Bergamo, changing the family name to Bossi-Urbani. This branch of the family's activities was continued by Luigi Balicco and later Angelo Piccinelli.

Felice adopted Giacomo Vegezzi, re-naming the firm Vegezzi-Bossi. Giacomo's son Carlo Vegezzi-Bossi (i) (1858–1927) built organs in the Liceo Filarmonico, Bologna (1908, demolished 1931), and the church of S Carlos, Buenos Aires (1910), Argentina. On the marriage of Carlo's daughter Alessandra to Celestino Balbiani (1919), the firm Balbiani-Vegezzi-Bossi was formed. In 1865 Giacomo, who had lost his wife, married an organ builder, Annetta Vittino (1816–86), who was the daughter of Carlo Vittino, an organ builder in Centallo, near Cuneo. Their son, Francesco Vegezzi-Bossi (1870–1943) inherited the Vittino workshop in 1908 and the firm was continued by Francesco's son Carlo Vegezzi-Bossi (ii) (1900–77), grandson Francesco Vegezzi-Bossi (1937–84) and great-grandson Enrico Vegezzi-Bossi (*b* 1960). Enrico went into partnership with Bartolomeo Brondino (*b* 1961) under the name Brondino-Vegezzi-Bossi.

Carlo Vegezzi-Bossi (i) was a skilled pipe-voicer. His organs had a warm sonority and an enchanting late-Romantic, symphonic quality. The Bossi organs before him were built in the typical Lombardic style: majestic ripieno and a wealth of colourful 'da concerto' stops (reeds and flutes) throughout the range of the instrument.

UMBERTO PINESCHI

Bossi, Marco Enrico (*b* Salò, Lake Garda, 25 April 1861; *d* Atlantic Ocean, 20 Feb 1925). Italian composer, organist and pianist. Born into a family of organists, he studied with his father, Pietro Bossi (1834–96), then at the Liceo Musicale, Bologna (1871–3), and at the Milan Conservatory (1873–81), where his teachers included Ponchielli. In 1881 he was appointed organist at Como Cathedral, and in due course he won worldwide renown as one of the finest organists of the day. He moved to Naples in 1890 as teacher of harmony and the organ at the conservatory, later becoming director of the Licei Musicali in Venice (1895–1902) and Bologna (1902–11) and of the Liceo (Conservatorio from 1919) di S Cecilia, Rome

(1916–23). He died at sea while returning from New York.

Bossi's few completed operas had little success; but he won lasting respect, mainly in Italy, for his instrumental and choral compositions. Internationally he is remembered largely for his organ pieces, the best of which (e.g. the widely performed G minor Scherzo op.49 no.2) are still very effective. However, the *Canticum canticorum* was particularly highly praised in its time, in Germany as well as Italy. Today the work perhaps impresses more by sincerity and solid craftsmanship than originality, but the opening pages of *Il paradiso perduto* – a representation of chaos, with pulseless rhythms, bare 5ths and flattened 7ths – show that Bossi was capable of vivid poetic evocation, while *Giovanna d'Arco*, the most dramatic of his choral works, suggests that he had more sense of the theatre than his operas revealed. Among his orchestral pieces, a vigorous if slightly academic Organ Concerto and the elegant rather Wolf-Ferrari-like *Intermezzi goldoniani* have continued to be revived occasionally in Italy; and of the chamber compositions, the two violin sonatas have proved especially worthy of renewed attention: the profoundly expressive, subtle-textured slow movement of the second is one of Bossi's most inspired utterances.

With Martucci and Sgambati, Bossi led the revival of Italian non-operatic music at the turn of the century, and, like them, he turned to northern Europe for the main sources of his style: there are signs of the influences – not always fully assimilated – of Mendelssohn, Schumann, Liszt, Franck, Brahms and (in more adventurously chromatic pieces such as the *Konzertstück* op.130) Reger. In his last years he showed little sympathy with the radical young; but such new departures as the very refined chromaticism of the Five Pieces for piano op.137 (1914), or the ladders of perfect 4ths in *Santa Caterina da Siena*, reveal that he was not wholly unreceptive to the new sounds of the 20th century.

WORKS
(*selective list*)
most dates are those of publication

OPERAS

Paquita (i), unpubd, Milan, Conservatorio, 1881
Il veggente (1, G. Macchi), op.69, Milan, Dal Verme, 4 June 1890; rev. as Il viandante (lib rev. C. Zangarini), Mannheim, 7 Dec 1906
Malombra (R. Simoni), conceived 1904, posthumously completed from sketches by R. Bossi [music] and L. Orsini [lib]
2 others, unperf., 1 unfinished

VOCAL

Messa da Requiem, op.90, male vv, str, hp, hmn/org, 1892–3; Messa da Requiem, op.83, chorus, org ad lib, 1893, later rev.; Mossa d'Averno (cant., Leo XIII), op.87, 4vv, pf, hmn/org, 1893; Il cieco (G. Pascoli), op.112, Bar, chorus, orch, 1898; Canticum canticorum cantata biblica, op.120, Mez, Bar, chorus, orch, org, 1900; Il paradiso perduto (poema sinfonico-vocale, L.A. Villanis, after J. Milton), op.125, solo vv, chorus, orch, org, 1902; Giovanna d'Arco (mystery, L. Orsini), op.135, solo vv, chorus, orch, org, 1914
Much other church music, incl. at least 6 masses, mass movts and smaller pieces; smaller choral works, songs and partsongs

INSTRUMENTAL

Orch: Conc., op.100, org, hns, timp, str, 1895 (1900); Suite, op.126, 1904; Intermezzi goldoniani, op.127, str, 1905; Konzertstück, op.130, org, brass, timp, str, 1908, rev. 1910, also version for org solo; Theme and Variations, op.131, 1908; Fantasia sinfonica, op.147, org, brass, hp, timp, str, 1923
Chbr: Vn Sonata [no.1], op.82, 1893; Pf Trio [no.1], op.107, 1896; Vn Sonata [no.2], op.117, 1899; Pf Trio [no.2], op.123, 1901; Santa Caterina da Siena, op. posth., sketched for vn, pf, 1924, posth. realized by R. Bossi for composer's intended instrumentation of vn, hp, cel, str qt, org
Kbd: over 30 op. nos. for org, other org pieces, *c*30 op. nos. for pf, other pf pieces, pf duet music, hmn pieces
Principal publishers: Bertarelli (Milan), Breitkopf & Härtel, Capra (Turin), Carisch, Dahlström, Euterpe, Izzo (Naples), Kistner, Leuckart, Peters, Pisano (Naples), Pizzi (Bologna), Ricordi, Senff

JOHN C.G. WATERHOUSE

Bossi, (Rinaldo) Renzo (*b* Como, 9 April 1883; *d* Milan, 2 April 1965). Italian composer, son of Marco Enrico Bossi. After studying in Leipzig (1902–4) he became an opera conductor, later teaching composition in Parma, Milan and Venice. As a young man he associated himself with progressive trends: in 1911 he was a member of Bastianelli's short-lived pressure group known as the Lega dei Cinque or I 'Cinque Italiani' and in some works he rejected thematicism in favour of an instinctive, free-ranging succession of musical images. But his modernity seldom went beyond the free use of 9th and 11th chords, progressions derived from the whole-tone scale, frequent unrelated triads and 7ths, and occasional excursions into simple bitonality. At his best he used such resources with pungent wit, reinforced by vivid, kaleidoscopic instrumentation – the amusing *Pinocchio* is an outstanding example, as, to a lesser extent, is his most successful opera *Volpino il calderaio*. He was also capable of such errors of taste as the garishly pictorial *Le sagre d'Italia*, but the almost total neglect of his more ambitious works may be unfair. Though never staged, his opera *Nell'anno mille* has a striking subject: the widely held belief that the world was about to end in AD 1000.

WORKS
(*selective list*)

Stage: Passa la ronda! (op, 1, L. Orsini, after R. Francheville), op.20, 1913, Milan, Lirico, 3 March 1919; Nell'anno mille (op, prol, 3 scenes, G. Pascoli and Orsini), op.25, 1915–16, rev., RAI, 1956; Volpino il calderaio (op, 1, Orsini, partly after W. Shakespeare: *The Taming of the Shrew*), 1923, Milan, Carcano, 14 Nov 1925; Burla valdostana (ballet), op.33, 1925, San Remo, 20 Feb 1935; I commedianti alla corte di Francia (op, 3, G. Adami), op.37, 1930, unperf.; Rosa rossa (op, 1, Bossi, after O. Wilde), op.18, RAI, 9 Aug 1938, staged Parma, Regio, 9 Jan 1940; Il principe felice (radio op, 1, Bossi, after Wilde), op.52, RAI, 11 Oct 1951; La crociata degli innocenti (poema francescano in 3 sequenze e 4

quadri, E. Possenti, after G. d'Annunzio's film scenario), op.53, RAI, 1962; 2 other ballets, ?unperf

JOHN C.G. WATERHOUSE

Bossinensis, Franciscus (*b* ?Bosnia; *fl* 1510). Italian arranger and composer of lute music. His only known works are two collections of frottolas for voice and lute printed by Petrucci in 1509 and 1511. Altogether they contain 126 frottolas and 46 ricercares. The frottolas are transcriptions of four-voice models by Tromboncino, Cara, Pesenti, F. d'Ana, F. de Luprano, A. Capriola and others, of which all but 16 had already appeared in Petrucci's frottola publications. (Some of the others may have been taken from Petrucci's tenth book, now lost.) Bossinensis intabulated the tenor and bass parts for the lute, omitting the altus, and set the vocal line above the tablature in mensural notation. Lute tunings in D, E, G and A are implied by the relation between the tablature and the vocal notation. The Italian lute tablature is explained in the 'Regula per quelli che non sanno cantare' which appeared in all Petrucci's lute publications. The two books offer a broad selection of frottolas, incorporating many types from the simpler odes, *barzellette*, frottolas and *strambotti* to settings of *ottava rime* and Petrarch canzoni, but his method of transcription is for the most part mechanical, adding none of the improvisatory melodic decorations which are found in the vocal intabulations in Petrucci's earlier lutebooks. Bossinensis reproduced the parts faithfully, making modifications for some *musica ficta* and occasionally adding a note to a chord. By omitting the altus part, which often contributed little of linear interest, he underlined the essentially three-part texture of the genre. In the *strambotto Amiando e desiando* by the celebrated poet and improviser Cariteo, he for once departed from his usually strict intabulation, supplying a more idiomatic and florid lute part than the model in Petrucci's ninth book (the two versions are printed in Disertori, 1957). In both Bossinensis's books the frottolas are followed by a collection of unpretentious ricercares of his own which are associated with the various frottolas by a system of letter symbols, indicated on the title-page. The ricercares, which were probably played before (or after) their respective frottolas, are related to them by modality and not by any thematic content.

JOAN WESS/R

Bossler, Heinrich Philipp Carl (*b* Darmstadt, 22 June 1744; *d* Gohlis, nr Leipzig, 9 Dec 1812). German music printer and publisher. Around 1769 he worked as a copper engraver and in 1779 invented a machine which simplified music engraving. He founded his publishing firm in Speyer in 1781; in 1785 another branch (Krämer & Bossler) was established in Darmstadt, where the company moved in 1792. By 1796 almost 300 titles had been published. Bossler settled in Gohlis, near Leipzig, in 1799. The publishing house, later directed by his son Friedrich Bossler, closed in 1828. Bossler's publications included works by south German composers and Beethoven's three *Kurfürstensonaten* WoO47 (1783), as well as the periodical *Musicalische Realzeitung* (1788–90). (H. Schneider: *Der Musikverleger Heinrich Philipp Bossler (1744–1812)*, Tutzing, 1985)

HANS-MARTIN PLESSKE

Bosso [Bossius], **Lucio** (*b* Lodi; *fl* 1600–10). Italian composer and organist. He was an organist at Lodi when his *Motectorum quinque vocum liber primus* (Venice, 1600) was published, a work known to Eitner but no longer extant (see *EitnerQ*). His other known works are the *Motectorum senis vocibus liber primus* (Venice, 1606) and the madrigal *Ardon le chiome d'oro*. The latter was included in Antonio Savetta's *Madrigali a cinque, a sette, et a otto voci* (Venice, 1610), a collection assembled in honour of the marriage of Lancilotto Corradi and Claudia Carminati and dated from Lodi on 20 June 1610.

□

Bossu, Adan le. *See* ADAM DE LA HALLE.

Bostel, Lucas von (*b* Hamburg, 11 Oct 1649; *d* Hamburg, 15 July 1716). German librettist. From 1670 he studied law at Heidelberg and Leiden and received a doctorate. In 1674 he undertook an educational tour of Europe lasting five years and on his return to Hamburg became

connected in some capacity with the newly founded opera. Approximately two years later his first libretto was performed, *Vespasianus* (Hamburg, 1681), with music by J.W. Franck, for whom he wrote another four texts: *Diocletianus* (Hamburg, 1682), *Attila* (Hamburg, 1682), *Der glückliche Gross-Verzier Cara Mustapha* (Hamburg, 1686) and *Der unglückliche Cara Mustapha* (Hamburg, 1686); he also provided texts for operas by Förtsch (*Der hochmütige, gestürzte und wiedererhobene Crösus*, Hamburg, 1684, and *Der unmöglichste Ding*, Hamburg, 1684), and by Strungk (*Theseus*, translated from a text by P. Quinault, Hamburg, 1683). In 1687 he became Syndicus to Hamburg, on whose behalf he took part in a number of diplomatic missions, including, in 1697, attendance at the conference that led to the Peace of Ryswick. In 1709 he was elected mayor of Hamburg.

Bostel was the most important poet in the early years of the Hamburg opera: his seven texts are superior in every way to the librettos of C. Richter, Elmenhorst and Förtsch. His *Cara Mustapha* is a landmark in the first decade of the Hamburg opera; in it Bostel realized an effective clear development of the plot through highly imaginative language. He had a preference for the alexandrines typical of 17th-century French poetry and employed dramatic nuances of language, especially in the frequent alterations of rhythm contributing to the dramatic climaxes of many scenes. His *Der hochmütige . . . Crösus* retained its popularity longer than almost any other libretto written during the first decades of the Hamburg opera: as well as the initial setting by Förtsch there are two different settings by Keiser (the second as late as 1730) and an adaptation for the Brunswick court opera with music by Schürmann.

GEORGE J. BUELOW

Boston (i). American city, capital of Massachusetts. Settled in 1630, it is the principal city of the region of the six north-eastern states called New England. Distinguished by the breadth and intensity of its musical life, Boston has long been a leading centre for composition, performance, music citicism and music education, and an important seat of music publishing and instrument manufacture. Several politically independent municipalities, among them Cambridge and Wellesley, are here considered parts of 'Greater Boston'.

1. EARLY HISTORY. In 1620 separatists from the Church of England left the Netherlands and landed at what is now Plymouth, Massachusetts. They carried with them the psalter that Henry Ainsworth published in Amsterdam in 1612, which contained the psalms in English prose and verse, with the music of 39 tunes (borrowed from English, French and Dutch psalters). In 1630 a Puritan group established the Massachusetts Bay Colony at Boston and quickly organized a complex society that, within ten years, founded Harvard College and a book press. They too restricted their music to songs based on the psalms, preferring Sternhold and Hopkins (London, 1562) and music from Ravenscroft's psalter (1621).

A group of 30 clergy from the colony devised new rhymed, metrical translations of the psalms, resulting in the Bay Psalm Book of 1640, the first North American book in English. The first edition known to include music was the ninth (1698), but meanwhile this American book had also been printed in England and was in relatively wide use there. The 13 tunes in the 1698 edition are from John Playford's *A Breefe Introduction to the Skill of Musick*.

By the mid-1660s the psalm tunes originally learned by rote were performed on both sides of the Atlantic by 'lining out', a practice in which a precentor sang or declaimed a single line of text which the congregation then repeated in solo. After the turn of the century the feeling arose that lining out had outlived its usefulness and should be replaced by musically literate singing according to the rules of art music. New England clergy led the way toward reform through polemical tracts appearing in Boston from 1720. Singing schools were organized to teach it, and the appetite for music they created gave rise in turn to the 'first New England School' of American composers; chief among the Yankee tunesmiths of the later 18th century was William Billings.

2. CONCERT LIFE TO 1881. The earliest documented public concert in America took place in Boston on 30 December 1731, in 'Mr Pelham's Great Room'. Among the city's leading musicians in subsequent decades was the organist William Selby, who came from England in 1771 and directed a performance of Handel's 'Hallelujah' Chorus (accompanied by the 64th Regimental Band) two years later. A seminal figure was the German-born Gottlieb Graupner, who arrived in 1797 having served as oboist in Haydn's London orchestra. As conductor, publisher, and music and instrument dealer, Graupner was an entrepreneurial force. His Philo-Harmonic Society, begun in 1809 and lasting at least until 1824, resembled a club as much as a pioneering orchestra; its repertory included Haydn alongside many now forgotten composers. Graupner was also in 1815 a founding member of the Handel and Haydn Society, America's oldest enduring oratorio society. George K. Jackson, the first doctor of music to settle in America (in 1797), was another significant Boston proponent of Handel and the religious choral literature.

The centrality of sacred music, crowned by *Messiah*, was reinforced by Lowell Mason, Boston's leading music educator and a successful fashioner of hymns. Although Mason disdained the secular, the Boston Academy of Music (which he co-founded with George James Webb in 1833) formed an orchestra directed by Webb; it introduced Boston to seven Beethoven symphonies as well as to symphonies by Mozart and Mendelssohn. This group was succeeded, from 1839 to 1847, by a musicians' cooperative, the Boston Musical Fund Society.

The prevailing calibre of performance may be gleaned from an anecdote told by Thomas Ryan, an expert chamber musician who took part in a single abortive

rehearsal of Mendelssohn's *A Midsummer Night's Dream* overture as a member of the Musical Fund Society conducted by Webb; the work was abandoned as unplayable. An orchestra that specialized in Mendelssohn's overture was the Germania Musical Society, which first appeared in Boston in 1849 and later settled there before disbanding in 1854. This group of 25 youthful Germans not only set unprecedented performance standards throughout the USA, but dispersed influential musicians to individual American cities. In Boston the leading Germania alumnus was Carl Zerrahn, a conductor less progressive than New York's Carl Bergmann (also a former Germanian), but a constructive and inspirational force, disciplined and unflappable, as leader of the Handel and Haydn Society (1854–98).

A post-Germania landmark in orchestral performance was the 50th anniversary of the Handel and Haydn Society in 1865, for which an orchestra of 100, including former Germanians, was assembled under Zerrahn. In its wake, the Harvard Musical Association created for Zerrahn a semi-professional orchestra about half as large; begun in 1866 and discontinued in 1882, it was the primary local ensemble prior to the Boston SO. But Zerrahn's orchestra, however indispensable, was far from the polished group with which Theodore Thomas had begun to tour. An 1869 Boston visit by Thomas's orchestra was remembered by William Foster Apthorp for inflicting 'humiliating lessons in the matter of orchestral technique'. (But Thomas brought the Handel and Haydn Society to New York in 1873 when he needed an expert chorus for Handel, Beethoven and Mendelssohn.) A jolt of another kind, also in 1869, was the five-day National Peace Jubilee and Musical Festival, for which Patrick S. Gilmore assembled an orchestra of 1000 and 10,000 choristers. The programme for the opening concert listed (in the following order): a Lutheran chorale, the *Tannhäuser* overture (with a 'select orchestra of 600'), a Mozart Gloria, the Bach-Gounod *Ave Maria* (with 'the violin obbligato played by two hundred violinists'), *The Star-Spangled Banner* (with bells and cannon), an 'American hymn', the *William Tell* overture, 'Inflammatus' from Rossini's *Stabat mater*, the Coronation March from *Le prophète*, the Anvil Chorus from *Il trovatore* (with 100 anvils played by Boston firemen) and *My Country 'Tis of Thee* (with 'the audience requested to join in singing the last stanza'). A popular and financial success, attended by President Grant and other dignitaries, the festival spawned a less successful sequel in 1872.

A presiding influence on local musical growth, and a major factor in the evolution of musical high culture nationally, was the Transcendentalist and one-time Unitarian minister John Sullivan Dwight. Dwight considered great music 'religious' and called Beethoven 'sacred'. He campaigned to purify 'classical' music of such influences as Gilmore, Gottschalk and Stephen Foster. His principal vehicles were *Dwight's Journal of Music* (1852–81), the leading American periodical of its kind, and the Harvard Musical Association, on whose committee he served. The Association's programming philosophy – to be 'above all need of catering to low tastes', to promote 'only composers of unquestioned excellence, and . . . nothing vulgar, coarse, "sensational", but only such as outlives fashion' – embodied Dwight's severe conservatism; his enthusiasms stopped with Mendelssohn, Schumann and Chopin.

If the Handel and Haydn Society, which resisted Berlioz and Brahms, reinforced local purism, other important Boston influences, notably the Wagnerite conductor B.J. Lang and Thomas Ryan's Mendelssohn Quintette Club, welcomed the music of the moment. Dwight had served to refine taste and promote appreciation, but by the 1880s was a retarding force; compared to New York, Boston was slow to accept Berlioz, Brahms, Liszt and Wagner. In 1881 Dwight confessed: 'What challenges the world as new in music fails to stir us to the same depths of soul and feeling that the old masters did and doubtless always will. Startling as the new composers are, [they] do not bring us nearer heaven'. He added: 'We revenge ourselves with pointing to the unmistakeable fact, that in the concert-giving experience of to-day, at least in Boston, the prurient appetite for novelty . . . seems to have reached its first stage of satiety'. Apthorp, in a shrewd eulogy for Dwight, summed up: 'What he was, he was genuinely and thoroughly; fashion had no hold on him.'

3. The Boston SO to World War I. Boston's need for a more professionalized, cosmopolitan and focussed musical community resulted in 1881 in the formation of the Boston SO. This was the brainchild of Henry Lee Higginson, a financier whose lifelong passion was music. Resolving to give Boston a 'full-time and permanent' orchestra that would 'offer the best music at low prices', Higginson created an ensemble soon regarded as peerless in the USA and comparable to the best abroad. He paid all salaries and deficits, but conferred artistic control on his conductors. Some recent accounts of his philanthropy stress the Gilded Age plutocrat rather than the cultural democrat. It is true that Higginson forbade his musicians to form a union or to play popular music on days they rehearsed or performed (a Wednesday-to-Saturday prohibition sometimes wrongly characterized as full-time); that his own musical tastes were relatively conservative; that his orchestra was a Brahmin cultural stronghold. At the same time, he reserved 'rush seats' for non-subscribers and began 'popular concerts' – the future Boston Pops.

The Boston SO offered 20 concerts and 20 public rehearsals in its first season, 26 concerts and rehearsals a season later. The first conductor, George Henschel (1881–4), was replaced by an Austrian disciplinarian, Wilhelm Gericke, whom Higginson heard in Vienna, and it was Gericke who polished and refined Boston's orchestra (1884–9). His successor, Arthur Nikisch (1889–93), was a Romantic in outlook and temperament, and less interested in precision; his interpretative liberties in Beethoven's Fifth caused a furore. The orchestra moved to Symphony Hall, its current home, in 1900. Nikisch was replaced by Emil Paur (1893–8), after which Gericke returned (1898–1906).

Boston had by 1900 fostered a vigorous school of composers, to which the Boston SO was notably receptive. John Knowles Paine, whose professorship in music at Harvard University was unprecedented in the USA, was a father figure whose two symphonies (1875, 1879) pay homage to Beethoven and Schumann; but his late opera *Azara* (1883–98) is Wagnerian. Of Paine's progeny, G.W. Chadwick, whose music resonates with hymns, fiddle tunes and popular song, may be considered America's first significant nationalist composer; his works were played 78 times by the Boston SO between 1881 and 1924. Other 'Boston boys' (Chadwick's term) included Amy Beach, Arthur Foote and Horatio Parker. The most

progressive Boston composer was the German-born Charles Martin Loeffler, whose influences included the French symbolists. A true community, influential in its day, the pre-World War I Boston composers cannot be fairly described as 'classicists' or Germanic clones; their worth is still not recognized. At the same time, Boston's discomfort with Dvořák's 'New World' Symphony and 'American' String Quartet, rebuked by local critics and composers (1893–4) for absorbing 'barbaric' plantation songs and Amerindian chants, revealed a strain of élitist conservatism not evident in New York.

With the arrival of Carl Muck in 1906, the Boston SO obtained a world-class conductor who combined Gericke's efficiency with energy and power; his Boston recordings, the orchestra's first, document an interpretative personality more restrained than Nikisch's (as documented by the latter's recordings in Berlin). Muck was followed by Max Fiedler (1908–12), but thereafter returned, only to fall foul of anti-German war hysteria; interned as an enemy alien, he left the USA in 1918 vowing never to come back. The same year, Higginson relegated control of the orchestra to a group of nine citizens, incorporated as the Trustees of the Boston SO. Postwar Germanophobia insured that the orchestra would not have another German-born music director for decades to come; it also impugned the music of Chadwick and other German-trained local composers, whose works faded from the repertory.

4. Concert life after World War I. Muck's successors, Henri Rabaud (1918–19) and Pierre Monteux (1920–24), presided over a transitional period. In 1920 more than 30 players who wished to affiliate with the Boston Musicians' Protective Association, the local union of the American Federation of Musicians, went on strike and were replaced by musicians of Monteux's choice. (The Boston SO was the last important American orchestra to join the union, in 1942.) The glamorous Sergey Koussevitzky (1924–49) influentially championed the music of Copland and such other postwar Americans as Barber, Bernstein, Hanson, Harris, Piston and Schuman. It was under Koussevitzky that the orchestra took over the Berkshire Music Festival, acquired Tanglewood and in 1940 opened the Berkshire Music Center (renamed the Tanglewood Music Center in 1985; *see* Tanglewood). In the meantime, in 1929 Arthur Fiedler, a member of the orchestra since 1915, organized the Esplanade Concerts as free, outdoor programmes of symphonic and light music in the band shell on the banks of the Charles River. In 1930 Fiedler succeeded Alfredo Casella as conductor of the Boston Pops, a position he held until his death in 1979. In 1980 he was succeeded by John Williams, who in turn was followed by Keith Lockhart in 1995. For the Boston SO's 50th anniversary season (1930–31) Koussevitzky commissioned Stravinsky's Symphony of Psalms, Hindemith's *Konzertmusik* and works by Copland, E.B. Hill, Honegger, Prokofiev, Respighi and Roussel. Koussevitzky's successors were Charles Münch (1949–62), Erich Leinsdorf (1962–9), William Steinberg (1969–72) and Seiji Ozawa (from 1973).

5. Opera and musical theatre. Puritan traditions slowed the development of theatre in Boston, but an anti-theatre law of 1750 did not prevent 'readings' of English ballad and comic operas. Over 150 ballad operas had been performed in Boston before 1800. In the late 1820s the resident opera company of New Orleans performed its French repertory in Boston, but Italian opera was not patronized by the upper classes in Boston to the extent that it was in New York. Therefore no serious attempts to promote Italian opera in Boston occurred before 1847, when an Italian company based in Havana played the first of two seasons in the Howard Anthenaeum. Travelling companies continued to visit during the next two decades, and opera in English opened at the new Boston Theatre in 1860. The Strakosch and Mapleson touring companies and others played in Boston, and a week-long Wagner festival in 1877 presented three early works and *Die Walküre*. The American première of *HMS Pinafore* was given in Boston in 1878, and in 1883 the new Metropolitan Opera company of New York began its annual visits to Boston. The Boston Ideal Opera Company (the Bostonians) was highly successful throughout America between 1879 and 1905.

In 1895–6 a season of opera, mostly light, French works sung in English by young Americans, was presented at the Castle Square Theatre by C.E. French. Charles A. Ellis, manager of the Boston SO, also presented an opera season early in 1899, with the New York SO in the pit and Walter Damrosch as both a business partner and conductor. Wagner enthusiasm peaked in Boston in the 1890s: Damrosch brought Wagner to the Boston Theatre, and B.J. Lang presented a concert version of *Parsifal* in 1891.

Increased public demand finally spurred the musical élite to push for Boston's first permanent opera company. Henry Russell and the department-store magnate Eben D. Jordan, jr founded the city's first important resident company, the Boston Opera Company. Jordan invested more than $1 million in the new Boston Opera House and guaranteed the company's deficit for three years. The first season opened on 8 November 1909 with Ponchielli's *La Gioconda*, starring Lillian Nordica in the title role. In 1914 a costly spring season in Paris resulted in bankruptcy in 1915. During the next two seasons Max Rabinoff mounted the Boston Grand Opera Company, but thereafter there were only annual tours by the Chicago Opera between 1917 and 1932 and later the San Carlo Opera. The building was demolished in 1958.

There was no important local opera production again until Boris Goldovsky established the New England Opera Theatre in 1946. Goldovsky's former protégée Sarah Caldwell (with James Stagliano and Linda Cabot Black) formed a new company in 1958 first known as the Boston Opera Group and later as the Opera Company of Boston. It presented significant American and world premières.

In 1975 a number of the city's smaller companies joined to form the Boston Lyric Opera, initially to provide performance opportunities for resident singers. In 1991 the Boston Opera Theater was formed by Caldwell's associates, performing in the Colonial Theater, known for pre-Broadway trials of musicals. Peter Sellars and the conductor Craig Smith, working with locally based singers, rehearsed their bold, updated productions of Handel and Mozart in Boston.

6. Choruses. The earliest choral singing in Boston was the first settlers' congregational psalm singing, which continued through later times of controversy over the relative virtues of the old style and the cultivated new style promoted in the singing schools. Church and

community choirs were formed throughout New England from the 1750s. The work of George K. Jackson, who in 1812 organized a concert of Handel's music, was instrumental in broadening the musical repertory of Boston's churches.

The Handel and Haydn Society was formed for the purpose of 'cultivating and improving a correct taste in the performance of sacred music, and also to introduce into more general practice the works of Handel, Haydn, and other eminent composers'. It gave its first concert on 25 December 1815 and served as the prototype for similar organizations in other cities. At Christmas 1818 the society gave its first performance of the complete *Messiah*; on 16 February 1819 *The Creation* followed. The first edition of *The Boston Handel and Haydn Society Collection of Church Music*, anonymously edited by Lowell Mason (president of the society 1827–32), was published in 1822. Christopher Hogwood has directed the society since 1986, completing the transformation of the organization into a professional chorus accompanied by a period-instrument orchestra, expanding the group's reputation through recordings and tours, and fostering collaborative projects with other art forms (including jazz).

Several English-style glee clubs were the ancestors of three long-lived choral societies: the Apollo Club of about 50 male voices, founded in 1871 and led by B.J. Lang; the Boylston Club, founded in 1873 as a male-voice group devoted to relatively light music and converted in 1877 into a chorus of mixed voices with a serious repertory; and the Cecilia Society, established in 1874 under Lang to perform with the orchestra of the Harvard Musical Association. In 1877 it separated from the association, and under Lang presented the Boston or American premières of 105 works. In 1889 it gave the first of more than 100 peformances with the Boston SO. Arthur Fiedler became its conductor in 1930, but the chorus declined after his departure until Donald Teeters assumed the conductorship in 1968.

The periods of greatest activity of these groups overlapped with current choral societies, many of which are affiliated with educational institutions. In 1912 A.T. Davison of the Harvard faculty took over direction of the glee club, and in 1913 he also took over the Radcliffe (College) Choral Society. In the late 1940s the Chorus Pro Musica was founded by Alfred Nash Patterson, and the New England Conservatory Chorus came under the direction of Lorna Cooke de Varon. The Tanglewood Festival Chorus was established in 1970 under John Oliver to perform with the Boston SO at Tanglewood and in Boston. Numerous other professional and amateur choral societies are currently active in Boston.

7. OTHER ENSEMBLES AND PERFORMERS.

(i) Smaller ensembles. In 1844 the Harvard Musical Association began a series of six annual chamber music concerts that continued for five years. The public performance of chamber music acquired an important place in musical life with the founding of the Mendelssohn Quintette Club in 1849 under the leadership of Thomas Ryan. The German pianist and composer Otto Dresel (1826–90), a pupil of Hiller and Mendelssohn, settled in Boston in 1852 and was much admired for his tireless efforts on behalf of J.S. Bach, Schumann and Robert Franz. In 1858 B.J. Lang, who had been a member of the Liszt circle in Europe, returned to Boston to start an active career that included conducting the world première of Tchaikovsky's First Piano Concerto (1875) at Music Hall, with Hans von Bülow as soloist. The Euterpe Society was founded in 1879 as a membership subscription scheme for the presentation of chamber concerts and recitals.

The stability and skills of the Boston SO provided a new kind of community artistic resource. Franz Kneisel, who became leader in 1885, founded the Kneisel Quartet, which made its reputation during its 20 years in Boston. The success of the Longy Club, established in 1900, developed a new taste for French wind music, which was later featured by the Boston Flute Players Club, founded in 1920 under the direction of Georges Laurent. In the late 19th century Boston led America in the popular Victorian custom of 'at homes', small-scale concerts in private residences.

The Boston Symphony Chamber Players were founded by the orchestra's management in 1964. A large variety of chamber organizations and series have prospered in the 20th century. The Pro Arte Chamber Orchestra, a professional cooperative founded in 1978, is one of the few musician-run groups in the USA. Concert series of broad general interest are presented under various auspices.

The 'early music movement' has a long history in Boston. Interest in 'original instruments' dates back to well before 1905, when Arnold Dolmetsch began to make them for the Chickering company. Ruth Charlotte Dana introduced Gregorian chant at Boston's Church of the Advent in the 1840s. On 22 January 1875 in Boston's Mechanics Hall, the first of 'Four Historical Concerts' was presented by George Osgood and F. Boscowitz, featuring Josquin's *Tu pauperum refugium*, madrigals by Le Jeune and Morley, J.S. Bach's Italian Concerto and other keyboard works by Bull, Byrd, Rameau and Kuhnau performed on a harpsichord provided by Chickering.

In 1938 a group of string players from the orchestra formed the Boston Society of Ancient Instruments under Alfred Zighera. Bodky's Collegium Musicum, founded in 1942 and succeeded by the Cambridge Society for Early Music, established standards of performance nearer to those achieved today, and eventually the Boston Camerata, founded in 1954 by Narcissa Williamson and directed from 1968 by Joel Cohen, became one of the country's best-known groups of this kind. Martin Pearlman's Boston Baroque, founded in 1973 as Banchetto Musicale, has acquired an international reputation. The Boston Museum Trio plays period instruments from the collections of the Museum of Fine Arts, and the Boston Early Music Festival and Exhibition, first held in 1981, has continued its highly successful biennial sessions presenting early music groups and instrument makers from Boston and around the world.

Influential contemporary music groups in Boston are Collage, founded in 1972 and drawing its players from the Boston SO; Boston Musica Viva (founded 1969), which gave the premières of 72 works written for the group in its first 20 years; Dinosaur Annex (founded 1975); and the Alea III (founded 1978).

(ii) Vernacular traditions. Popular entertainment music was an important feature of Boston musical life, although its influence has been played down. The popular English songwriter and entertainer Henry Russell lived in Boston for a while in the 1830s, and with the founding of Kendall's Boston Brass Band in 1835 a continuous

tradition of significant band activities was initiated. B.F. Keith's 'mother house of vaudeville' opened in 1894 in Boston's main entertainment district, Scollay Square (now Government Center). This mecca was in the Tin Pan Alley of Boston where Irving Berlin played in the basement of Woolworth's. Fred Allen, who started as a juggler in a Scollay Square vaudeville house, called the amusement mecca 'the hot foot applied to the high-button shoe'.

By 1915 many noted black musicians were active in area night clubs. In the 1920s the pianist Sid Reinherz contributed to the change in style from late rag to early stride, and Leo Reisman led a fine jazz-style big band in the Brunswick Hotel. Mal Hallett's popular band had a distinguished membership that in 1933 included Gene Krupa and Jack Teagarden. The bandleader Vaughan Monroe began his career as a singer with the Jack Marshard 'society orchestra' in 1936. Other similar groups were led by Meyer Davis, Eddy Duchin and Ruby Newman.

Distinguished individual jazz musicians from the area included Serge Chaloff, Bobby Hackett and Max Kaminsky. George Wein, who began his career as a jazz pianist after leaving Boston University, became internationally known as a jazz impresario. Joan Baez began her career as a folksinger at Boston University. Gunther Schuller's New England Ragtime Ensemble, with players from the New England Conservatory, was one of the principal participants in the rediscovery of ragtime music in the early 1970s. Joshua Rikfin, while a faculty member at Brandeis University, also arranged and produced recordings by Judy Collins, and, as a pianist, made some of the first recordings in the Scott Joplin revival. Boston continues to be a fertile ground for the development of rock music. The J. Geils Band (formed in 1967) and the band called Boston (1975) attained great popularity, and in the 1990s a new generation of musicians, producers and studio agents promoted numerous new groups, many of whom have been honoured at the SKC Boston Music Awards.

8. Theatres and concert halls. Early public performances of music were organized in private homes, coffee houses and religious meeting houses. A law of 1750, re-enacted in 1785, prohibited theatrical entertainments of all kinds, but it was commonly circumvented by billing such events as 'lectures' or 'readings'. In 1792 the New Exhibition Room was opened for 'lectures, moral and entertaining' with a 'gallery of portraits, songs, feats of tumbling, and ballet pantomine' but it was promptly closed in 1793.

Public demand brought swift change, and in 1793, the Boston Theatre, designed by Charles Bulfinch to be one of the grandest in the USA, was opened. It was often called the Federal Street Theatre, especially after the Haymarket Theatre opened in 1796, and spoken drama and ballad opera were popular on both stages. Graupner later had a concert room in the same building as his home and shop. His Philharmonic concerts took place in Pythian Hall and later the Pantheon. The Handel and Haydn Society's early performances were given in churches such as Stone Chapel and then Boylston Hall. From 1835 to 1843 the Boston Theatre, remodelled and renamed the Odeon, was the home of the Academy of Music.

In 1827 the Tremont Theatre was built. After a fire, it was reopened as the Baptist Tremont Temple, which survives as rebuilt in the 1870s after another fire. The Lion Theatre of 1836, built for 'dramatic and equestrian performances', taken over in 1839 by the Handel and Haydn Society and renamed the Melodeon, was the successor to the Odeon as Boston's leading concert hall.

In 1845 the Millerite Tabernacle was refitted as a theatre, the Howard Athenaeum, which in 1847 saw Boston's first important season of Italian opera. It was closed in 1953, after long years of service as the Old Howard, a famous burlesque house, and was destroyed by fire in 1961. In the 1840s the Chickering firm's showrooms were the site of such serious musical events as the Harvard Musical Association's chamber concerts, and by the 1850s there was a Chickering Hall. Minstrel shows played at the Adelphi (opened 1847) and the Lyceum (1848). The Harvard Musical Association raised a construction fund of $100,000 for a new hall, and on 20 November 1852 they opened the 2700-seat Music Hall, which provided a new rallying point for the city's musical life.

In 1854 the New Boston Theatre opened, and from 1860 various operas were produced there. The Continental Theatre opened in 1866 and prospered with a long run of the musical *The Black Crook*. In 1876 Harvard's Memorial Hall had appended to it the 1400-seat Sanders Theatre, which became the university's principal auditorium and was the site of the Boston SO's Cambridge concert series for about 80 years. In 1896 the little Steinert Hall was opened by the Steinert Piano Co.

In the spring of 1893 Henry Lee Higginson said that he would discontinue maintenance of the Boston SO unless the Music Hall, endangered by planned street and subway construction, could be replaced within little more than a year. The estimated cost of $400,000 was quickly subscribed and McKim, Mead & White designed the New Boston Music Hall, later named Symphony Hall. The collaboration of Wallace C. Sabine, then a young member of the Harvard physics department, made this the first scientifically designed auditorium.

Jordan Hall (cap. 1019), built in 1908 at the New England Conservatory, is well suited to solo recitals and performances by smaller groups. In 1909 the 2700-seat Boston Opera House opened, its acoustic design also by Sabine. A theatre-building boom occurred in Boston at the opening of the 20th century; in 25 years eight new playhouses and 16 movie theatres were constructed, with most theatres featuring live orchestras. The Metropolitan Theatre, opened in 1926 as a splendid vaudeville and movie palace and later used as an opera and ballet house (sometimes called the Music Hall or the Metropolitan Center), was closed in 1982. The Hatch Memorial Shell was built in 1940 for free outdoor concerts given on the Charles River Esplanade by Arthur Fiedler and members of the Boston SO. Massachusetts Institute of Technology opened its fine 1238-seat, general-purpose Kresge Auditorium in 1955.

9. Instruments. Before American independence almost all musical instruments used in Boston had been imported from England and later from the Continent; but by the mid-19th century Boston was exporting instruments to Europe and South America. Collections are owned by the Boston Public Library, the Boston SO, Boston University, Harvard University, the Museum of Fine Arts and the New England Conservatory.

The first organ in New England, probably the second in the Colonies, was installed in the home of Thomas

Brattle by 1711, and the first locally built organ was left unfinished by Edward Bromfield. A contemporary report of the period 1810–15 said that only six Boston churches then had organs. Among early organ builders were William Goodrich, the firms of Hayts, Babcock & Appleton and Hook & Hastings, and John Rowe. In 1854 a successful organ business was begun by Henry L. Mason and Emmons Hamlin, with financial backing from Lowell Mason and Oliver Ditson. Its products became well known in Europe, and its profits helped to finance the manufacture of the fine Mason & Hamlin pianos, begun in 1883, which eventually outweighed the reed-organ business in importance and resulted in its sale in 1911.

In 1855 a committee of citizens raised $10,000 to build an organ in the Music Hall. Ordered from the German firm of Walcker in Ludwigsburg, the organ was finally dedicated on 2 November 1863 by John Knowles Paine, B.J. Lang and others. It was the largest organ in North America and one of the three or four largest in the world. It had fallen into disrepair by the early 1880s, however, and was eventually removed.

A spinet built by John Harris in 1769 was probably the first keyboard string instrument made in the Colonies. Benjamin Crehore, originally a cabinet maker, was building harpsichords and string instruments by 1792, and by 1797 he had begun to make pianos. Jonas Chickering made his first piano in 1823 and took out several important patents during the 1840s. The prospering Chickering company opened its new factory in 1855 as the second largest building in the country, exceeded in size only by the US Capitol. In 1927 the company moved to East Rochester, New York, as part the American Piano Company. In addition to Mason & Hamlin, several other Boston makers produced good pianos for home and school use, most of them ultimately absorbed by the Aeolian Corporation. Boston continues to support makers of fine harpsichords and other early keyboard instruments. William Dowd and Frank Hubbard, who established a joint workshop in 1949, worked independently from 1958. The Eric Herz workshop began operations in 1954. Jeremy Adams, who worked with Dowd, became an independent maker, restorer and rebuilder in 1968.

A few early 17th-century settlers are believed to have brought viols to America. Within 50 years prosperous individuals were importing string instruments; Benjamin Crehore began to make them in Boston during the 18th century. George Gemunder, who trained in Paris under Vuillaume, and his brother August opened their shop in Boston in 1847, but moved to New York in 1851. The firm of J.B. Squier, established in 1886, was later remembered principally as a manufacturer of strings.

William Callender began to make wind instruments in 1796, and others continued the trade through the 19th century, though with little distinction until William S. Haynes started his flute company in 1900. Haynes and his foreman Verne Q. Powell were influential in establishing the silver flute in the USA. Powell started his own firm in 1926 and made Boston a leading centre of flute making; in 1961 he sold it to a group of his employees. Brannen Brothers, founded in 1977, was joined in 1978 by the English flute maker Albert K. Cooper. In 1901 Cundy-Bettoney started to build woodwind instruments that were destined for the educational market, and in 1925 the firm began to produce what were said to be the first metal clarinets.

Boston became a centre of brass-instrument manufacture after the establishment of Edward Kendall's Boston Brass Band in 1835. The firms of E.G. Wright and Graves & Co. combined about 1869 to form the Boston Musical Instrument Manufactory, known for its fine band instruments during the late 1880s. In 1884 Thompson and Odell founded the Standard Brass Instrument Co., which also made guitars and banjos; it was later taken over by the Vega company. George B. Stone started his business in percussion instruments in 1890. The Zildjian family's cymbal business, founded in Constantinople in 1623, moved to the Boston area in 1929.

10. Education and libraries.

(i) Education. Early settlers were concerned with musical education, and devotional singing is said to have had a place in the original curriculum at Harvard College, founded in 1636. The first published musical teaching material is the 'admonition to the reader', in the Bay Psalm Book of 1640, and the instructive introductions to 18th-century tune books extended this practice. By 1720 the traditional 'old way of singing' came under attack from those who favoured musically literate 'regular singing', and singing schools were established. A century of Yankee tunesmiths wrote and published the psalm settings and hymns that were their teaching pieces, but early 19th-century hymnodic reformers sought to replace earlier American psalmody with 'scientific' European models.

Lowell Mason studied the methods of Swiss educational theorist Pestalozzi and applied them to the children's music classes that he taught in churches and private schools. In the Boston Academy of Music he held teacher-training classes in addition to its concerts. In 1837 he introduced music to the curriculum in the Boston public schools at his own expense, and in the following year the Boston school board created the first programme of free, public-school instruction in music under his direction.

Harvard University, in Cambridge, was the first college in the USA, founded to train young men for the ministry. Its evolution into a secular university was slow, and music at first had a place there only in connection with religion. As early as 1808 there was interest enough in music among Harvard undergraduates for them to form the Pierian Sodality, whose members formed the basis of the Harvard Musical Association in 1837 (though the name was not assumed until 1840). It had no formal connection with the college but acted as a alumni advisory group, and in 1838 recommended that instruction in music be added to the curriculum. Its efforts had no effect, however, until 1862, when Harvard appointed John Knowles Paine to the post of college organist and instructor in music. In 1875 he became a full professor of music. During his long tenure (until his death in 1906), Paine taught many important composers and music historians during the height of the 'Second New England School' of composers. Walter Piston taught several generations of composers at Harvard until his retirement in 1960.

The Perkins Institute and Massachusetts School for the Blind (founded in 1832) added music to its programme in 1833, with Mason as teacher. Two new music schools opened in February 1867: the Boston Conservatory (founded under the direction of violinist and composer Julius Eichberg) and the New England Conservatory (founded by Eben Tourjée). The College of Music at Boston University was founded by Tourjée in 1872. In

1916 Georges Longy opened the school bearing his name, to offer instruction in solfege and theoretical subjects as taught in France. Schoenberg taught for one year at the Malkin Conservatory, which functioned from 1933 to 1954. The Berklee College of Music was founded by Lawrence Berk in 1945 to train professional musicians for work in jazz and other non-classical traditions. Among its graduates are Keith Jarrett, Quincy Jones and Branford Marsalis.

There are many other institutions of higher education in which music has an important place, including Brandies University (in nearby Waltham, founded in 1948 as the only non-religious Jewish-sponsored university in the USA), Massachusetts Institute of Technology, Northeastern University, Tufts University and Wellesley College.

There is a long-standing tradition of community music schools in the Boston area. The Elma Lewis School of Fine Arts is a highly valued institution in the black community, and earlier music schools were maintained by the city's Italian, Jewish and Lithuanian communities.

(ii) Libraries. The principal music libraries in Boston proper are the collection (begun in 1859) at the Boston Public Library, whose enormous archival value can hardly be assessed from the admirable published catalogues (of 1910 and 1972), and those at Boston University, the Harvard Musical Association, the Massachusetts Historical Society, the New England Conservatory of Music and the Boston Athenaeum. In Cambridge, Harvard's holdings are principally in the Houghton Library, the Isham Memorial Library and the Eda Kuhn Loeb Music Library. Wellesley College also has a fine music library. At some distance from the city but of great importance for their collections of Americana are the Essex Institute in Salem and the American Antiquarian Society in Worcester. A librarians' informal discussion group that first met in 1974 became a productive consortium of 16 institutions called Boston Area Music Libraries, which in 1983 issued the monumental publication *The Boston Composers Project.*

11. Writers on music. The first book-length work of general musical literature published in the USA was probably John Rowe Parker's *A Musical Biography or Sketches of the Lives and Writings of Eminent Musical Characters, Interspersed with an Epitome of Interesting Musical Matter* (Boston, 1824). His *The Euterpiad, or Musical Intelligencer* (1820–23) was the city's first musical periodical. *Dwight's Journal of Music* (1852–81) covered local, national and international musical issues. Dwight and other early 19th-century Boston-based writers promoted abstract instrumental music's elevation from mere entertainment to a vehicle of moral enrichment and led America in establishing high-art idealism and the classical canon.

The Ditson firm, which published *Dwight's Journal* from 1868 and then several lesser journals, also published important books. Near the end of the 19th century L.C. Page began to publish some handsome editions of books by the Elsons, Lahee and Rupert Hughes. From 1872 Boston's first woman journalist to write on musical issues, Sallie White, regularly reported in the *Boston Post.*

William Foster Apthorp, who began publishing musical criticism in the *Atlantic Monthly* in 1872, became the programme annotator for the Boston SO in 1892, an influential position in forming public opinion. His successors have included Philip Hale, John N. Burk, Michael Steinberg and Steven Ledbetter. Among the Boston newspaper critics were Olin Downes, H.T. Parker and Richard Dyer. Recent scholars at Harvard, Boston University, Wellesley College and Brandeis have made important contributions to music scholarship, while William Schwann began publishing his authoritative catalogues of recordings in 1949.

12. Printing and publishing. The first music known to have been printed and published in North America appeared in the ninth edition of the Bay Psalm Book (Boston, 1698), in which 13 tunes are printed from woodblocks. The next appeared in two instruction books, one by John Tufts (1721 or earlier), the other by Thomas Walter (also 1721), which was probably the first North American music printed from engraved metal plates. Two collections by Josiah Flagg (1764 and 1766) and at least part of William Billings's *The New-England Psalm-Singer* (1770) were engraved by Paul Revere. The first American set of type for printing music was cast in Boston by William (or possibly John) Norman, first used in the *Boston Magazine* in 1783.

Between 1798 and 1804 P.A. von Hagen (father and son) issued about 100 publications. Graupner was Boston's principal music publisher for about 25 years, beginning in 1802. The Handel and Haydn Society, which he helped form, paid him five cents per page, then a considerable sum, for the music of Haydn's *The Creation.* James Hewitt published in Boston from about 1812 to 1817. There were many other firms, and Ditson expanded and absorbed dozens before being absorbed itself by Theodore Presser in 1931.

In 1876 Arthur P. Schmidt founded a new firm that energetically published works by many American composers, including Beach, Bird, Chadwick, Foote, Hadley, MacDowell, Paine and others. The Schmidt catalogue is now owned by Summy-Birchard. Cundy-Bettoney, dating back to 1868 and specializing in wind music, is now part of Carl Fischer; the Wa-Wan Press, founded in 1901 by Arthur Farwell, was acquired by G. Schirmer in 1912. Specialist publishers include the firm of Robert King (established 1940), which was devoted to brass music until its expansion in 1982. Two remaining older firms are the Boston Music Company (founded 1885) and E.C. Schirmer (founded 1921), which is especially strong in choral music.

Boston (ii) (Fr. *valse Boston*). A slow ballroom dance related to the waltz. It originated in the USA during the 1870s and quickly spread to England, but did not become popular on the Continent until after 1900. It was the first modern ballroom dance requiring the feet to be kept pointing straight forward rather than turned out and to be done mostly with the feet flat on the floor rather than on the toes. In its period of greatest international popularity the Boston was danced with the hands on the partners' hips, the man's feet outside the woman's, and using fewer swirling motions across the floor than the waltz. Unlike the waltz (with three steps to a bar) or the *valse à deux temps* (with two steps to a bar in a minim-crotchet rhythm), the Boston's steps were of equal duration, three in two bars, accompanied by a hemiola ostinato; the tempo was about 44 bars per minute. After World War I the Boston regained popularity, particularly in Germany as the 'English waltz' with sentimental melodies, and as a 'hesitation' waltz with frequent suppressions of beats or whole bars in the accompaniment. The Boston was used in several concert pieces, including Hindemith's *Suite 1922*, Schulhoff's *Esquisses de jazz* (1927) and Conrad Beck's *Zwei Tanzstücke* (1929).

Boston Musical Instrument Manufactory. American firm of band instrument makers. It was formed in the late 1860s when a group of brass instrument makers working at 71 Sudbury Street, Boston, combined their skills and resources. The original group included George M. Graves, William E. Graves, E.G. Wright, Henry Esbach, Louis F. Hartman and William G. Reed. All were partners and workmen in the firms of E.G. Wright and Graves & Co. A case of musical instruments exhibited in September and October 1869 at the Massachusetts Charitable Mechanic Association fair won the new company a silver medal. It became a leading producer of band instruments, notably 'three star' cornets and trumpets during the late 1880s. The company made instruments for several of the leading band soloists as well as for hundreds of community bands across the country. It was reincorporated in 1913 as the Boston Musical Instrument Company and was sold to Cundy Bettoney in 1919. Instruments by this firm are found in most American collections, notably the John H. Elrod Memorial Collection, Germantown, Maryland; the Janssen Collection, Claremont, California; America's Shrine to Music Museum, University of South Dakota; and the Essig Collection, Warrensburg, Missouri.

ROBERT E. ELIASON

Bostridge, Ian (Charles) (*b* London, 25 Dec 1964). English tenor. He read history and philosophy at both Oxford and Cambridge (and later published a work on witchcraft in the 18th century) before he embarked on singing studies with various teachers, at the Britten-Pears School at Aldeburgh, and finally with Fischer-Dieskau. Bostridge made his recital début at the Wigmore Hall in London in 1993, and his opera début at Covent Garden as the Fourth Jew in *Salome* (1995). He sang a much acclaimed Peter Quint with the Royal Opera at the Barbican Theatre in 1997, made his ENO début, as Tamino, in 1996, and returned to the Royal Opera as Vašek (*The Bartered Bride*) in 1998. He was also much praised for his Hylas in concert performances of *Les Troyens*, under Sir Colin Davis, in London (1993). In recital he has become a leading exponent of lieder (in particular *Die schöne Müllerin* and *Winterreise*) and of the songs of Britten, and is also a penetrating interpreter of the Evangelist in both

Bach Passions. His recordings include Sellem and Tom Rakewell in different sets of *The Rake's Progress*, *Die schöne Müllerin*, *Winterreise* (in a film made for television), *Dichterliebe* and Britten's *Serenade*. All disclose his peculiarly attractive, silvery tenor and his innate gift for pointing every facet of a text.

ALAN BLYTH

Bosworth. Firm of music publishers. The company was founded in 1889 in Leipzig by an Englishman, Arthur Edwin Bosworth (1858–1923), assisted initially by Thomas Chappell and Carl Kratochwill. The aim was to protect the copyrights of the Gilbert and Sullivan operas in Austria, since at that time there was no copyright agreement between Britain and Austria. Zeller's operetta *Der Vogelhändler* was published in 1891 and was the most successful individual work published by the firm. Bosworth opened branches in London (1892), Paris (1896), Zürich (1908) and Brussels (1914); the latter survived until 1955 and published works by Belgian composers such as Joseph and Léon Jongen, Vreuls and Absil. His most far-reaching achievement was founding a publishing house in Vienna (1902) and acquiring the Austrian music publishers Kratochwill and Chmél. By doing so he obtained important copyrights, including Lehár's *Gold und Silber* waltz. Bosworth's sons, Laurence Owen Bosworth (1886–1952) and Arthur Ferdinand Bosworth (1893–1959), succeeded him when he died. By World War II several more German and Austrian catalogues had been acquired, most importantly that of Roehr of Berlin. Meanwhile, in England, Bosworth's publications of Beringer's piano tutor, Ševčik's violin method and many of Moszkowski's works were having great success, and the British Empire rights to the Steingräber catalogue and the Catholic church music catalogue of Joseph Laudy & Co. were acquired. International success was achieved with the publication of Albert Ketèlbey's works. After the Leipzig premises were destroyed in the war, a new German firm was established in Cologne because of the difficulties in operating a business in the Russian sector of Germany. Since then the firm has published more choral and educational music. Curt Gräfe took over after the Bosworth brothers died and was followed by Fritz Hartmann between 1961 and 1968. Reimar Segebrecht became director in 1969. The Cologne, London and Vienna branches maintained independent publishing programmes until 1996 when the Vienna branch closed. In February 1998 Bosworth became part of the Music Sales group.

ALAN POPE/R

Bote & Bock. German firm of music publishers. It was founded in Berlin on 1 February 1838 when Eduard Bote and Gustav Bock (*b* Berlin, 2 March 1813; *d* Berlin, 27 April 1863) purchased C.W. Froehlich & Co. The Berlin firms of Moritz Westphal and Thomas Brandenburg were acquired in 1840 and 1845 respectively. In 1847 Eduard Bote withdrew from the business. From 1863 to 1871 Bock's brother Emil Bock (*b* Berlin, 17 March 1816; *d* Berlin, 1 April 1871) directed the firm, followed by Gustav's son Hugo Bock (*b* Berlin, 25 July 1848; *d* Berlin, 12 March 1932), who acquired the publishing firm of Lauterbach & Kuhn in Leipzig in 1908. He was supported by his sons Gustav Bock (*b* Berlin, 17 July 1882; *d* Wiesbaden, 6 July 1953) from 1908 and Anton Bock (*b* Berlin, 7 Nov 1884; *d* Hildesheim, 28 Jan 1945) from 1911. The publishing house was completely destroyed in 1943, then under the direction of one of Hugo Bock's grandsons, Kurt Radecke (*b* Freiburg, 7 July 1901; *d* Berlin, 16 June 1966). The firm was a family limited partnership, and from 1966 was under the management of Dieter Langheld (*b* Darmstadt, 2 May 1911; *d* Berlin, 3 March 1998) and Kurt Radecke's son, Hans-Jürgen Radecke (*b* Berlin, 25 Aug 1932); in 1948 a subsidiary in Wiesbaden was established. In 1996 Bote & Bock was acquired by Boosey & Hawkes; the combined business now operates under the name of Boosey & Hawkes – Bote & Bock GmbH & Co.

Under Gustav Bock the publishing firm began by issuing light music and salon music of Berlin (e.g. Gustav Lange and August Conradi), as well as inexpensive new editions of works by classical composers. In the second half of the 19th century it became the leading firm in northern Germany for opera publication (e.g. Gounod's *Faust*, entitled *Margarethe*, Nicolai's *Die lustigen Weiber*, Meyerbeer's *L'Africaine* and operas by Flotow, Brüll, Mascagni, Kienzl and Smetana). It also acquired the rights to all Offenbach's operettas and Johann Strauss's *Waldmeister*. Through the purchase of Lauterbach & Kuhn much of Reger's work became the property of Bote & Bock. Besides further operas (e.g. d'Albert's *Die toten Augen* and *Tiefland* and Respighi's *La campana sommersa*) the firm also published important instrumental works by Liszt, Tchaikovsky, Anton Rubinstein, Dvořák, Paderewski, Mahler and Richard Strauss (*Symphonia domestica*).

After 1945 the firm continued to publish editions of early music (C.P.E. Bach, Caldara and Alessandro Scarlatti), but much of Boris Blacher's work was acquired and the firm now concentrates mainly on new music (Wagner-Régeny, Klebe, Gottfried von Einem, Paul Dessau, Kelterborn, Yun, Nabokov, M.C. Redel, Glanert, Oehring and F.M. Beyer).

Bothy ballad [bothy song]. A type of folksong originating in, or concerned with life in, Scottish farm bothies (the living quarters of unmarried male farmhands during the 19th and early 20th centuries). Bothy workers themselves frequently classed any folksong as a bothy ballad. *See* SCOTLAND, §II, 5.

Botkin, Vasily Petrovich (*b* Moscow, 27 Dec 1811/8 Jan 1812; *d* St Petersburg, 10/22 Oct 1869). Russian writer and critic. He is sometimes known under his pseudonym, Vasily Fortep'yanov. His brother Sergey Petrovich (1832–89) was a distinguished chemist and a pioneer in Russian medicine. Vasily was the oldest son of a family of tea merchants, and for some time directed the firm. However, when still in his 20s he wrote articles on music for journals and newspapers, including *Teleskop* and *Moskovskiy nablyudatel'*. As a widely travelled and cultured man he made substantial contributions throughout his life to important learned journals. He made a detailed study of aspects of Shakespeare's plays and also published papers on German and Russian literature. In December 1839 an article by him on Italian and German music ('Ital'yanskaya i germanskaya muzïka') appeared in *Otechestvennïye zapiski*, and in 1848 and 1849 he published an account of Italian opera in St Petersburg, *Sanktpeterburgskaya ital'yanskaya opera v techeniye dekabrya 1848 i yanvarya 1849*; both articles are included in *V.P. Botkin: Literaturnaya kritika, publitsistika, pis'ma*, ed. B.F. Yegorov (Moscow, 1984). Further articles on Italian opera appeared in the journal *Sovremennik*, 'Ital'yanskaya opera' (no.1, 1850) and 'Ital'yanskaya opera v Peterburge v 1849' (no.2, 1850). Botkin was actively associated with the Zapadniki, or Westernizers, the group of Russian writers and intellectuals which included Granovsky, Belinsky, Herzen, Stankevich and Botkin's close friend Turgenev, and which opposed the policies of Nicholas I, holding the view, in contradistinction to the Slavophiles, that Russia should attempt to absorb what it could from western European culture and should adopt progressive European ideas in all spheres of life. It followed that Botkin tended to concentrate his writings almost exclusively on the literature and music of the West. A three-volume collected edition of his works (*Stat'i o muzïke*) was published in St Petersburg (1890–93).

GEOFFREY NORRIS

Botoler, Charlotte. *See* BUTLER, CHARLOTTE.

Botstein, Leon (*b* Zürich, 14 Dec 1946). American conductor and music historian. He moved to New York with his family in 1949 and subsequently attended the University of Chicago and Harvard University, studying the violin with Roman Totenberg and conducting with Richard Wernick and Harold Farberman. In 1975 he was appointed president of Bard College, where he holds the Leon Levy Professorship of the Humanities. Named music director of the American SO in 1992, Botstein has restored the ensemble to prominence through thematic concerts, performances of rare repertory and innovative educational programmes. He became music director of the American Russian Youth Orchestra in 1995, and has appeared extensively as a guest conductor in Europe, Asia and South America. In 1990 he founded the Bard Music Festival, which has presented pairs of weekends focussing on Brahms, Mendelssohn, Richard Strauss, Schumann, Dvořák, Bartók, Ives, Haydn and Tchaikovsky, with accompanying volumes of essays devoted to each composer. Sceptical of inherited performing traditions, Botstein is most at home in late 19th-century repertory, but is also firmly committed to the music of living composers. His recordings include such 19th-century rarities as Bruch's *Odysseus* and Joachim's Violin Concerto, as well as music by contemporary American composers. In 1992 he was appointed editor of *The Musical Quarterly*. Many of his writings place music in a larger cultural context, often revealing links with intellectual history as well as other arts such as painting and architecture.

RICHARD WILSON

Botstiber, Hugo (*b* Vienna, 21 April 1875; *d* Shrewsbury, 15 Jan 1942). Austrian writer on music and administrator. He studied at the Vienna Conservatory with Robert Fuchs and subsequently had private lessons from Zemlinsky. At the same time he attended Adler's musicology course at Vienna University and graduated with a dissertation on the organ and keyboard works of Pachelbel. In 1896 he was appointed assistant to Mandyczewski in the library of the Gesellschaft der Musikfreunde. Four years later he was made secretary of the newly founded Wiener Konzertverein in which post he contributed greatly to making its orchestra the second most important in Vienna and to encouraging its modern orientation. From 1904 to 1911 he was editor of the *Musikbuch aus Österreich*. In 1905 he became administrative director of the conservatory of the Gesellschaft der Musikfreunde. From 1913 to 1938 Botstiber was the general secretary of the Wiener Konzerthausgesellschaft, which took its name from its headquarters in the Konzerthaus. With his talent as an organizer he succeeded in raising the new institution to a level at which it was able to compete with the century-old Gesellschaft der Musikfreunde in promoting first-rate concerts. In 1938 he was forced by the political upheaval in Austria to emigrate to England. Besides his administrative work Botstiber was active as a writer on music.

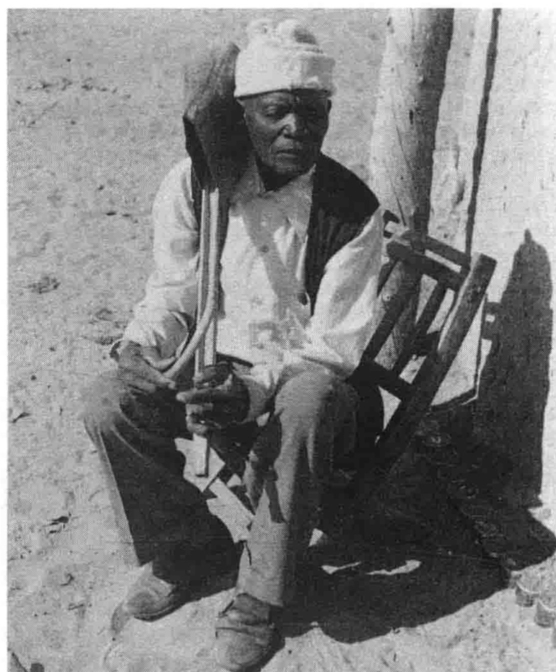
MOSCO CARNER



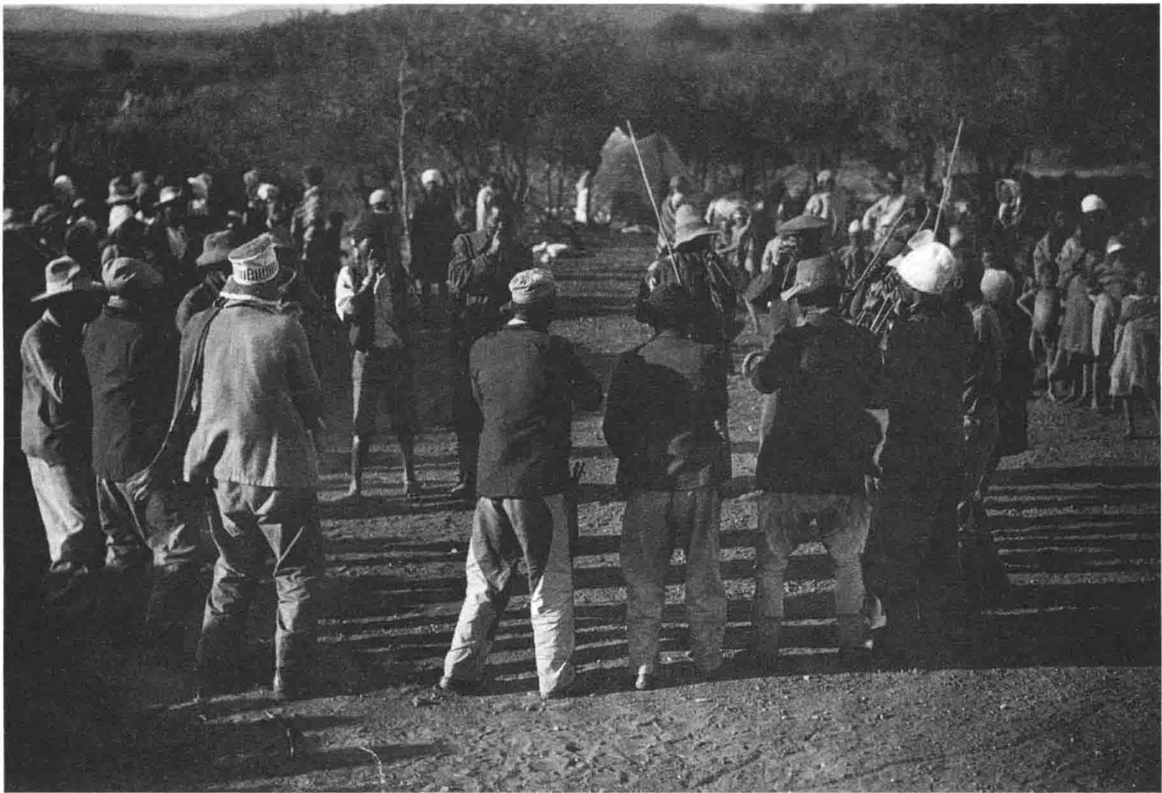
Botswana, Republic of. Country in southern Africa. It has an area of 581,730 km² and a population of 1·62 million (2000 estimate). Its main inhabitants are the Tswana who are related to the Sotho of Lesotho and the Pedi of South Africa. Other peoples in Botswana include the Kalanga peoples of the north, who are related to the Shona peoples of Zimbabwe and the Khoisan of the Kalahari desert, who were formerly called 'Bushmen' (and many of whom still prefer to be so-called) and later referred to as 'San', a term that is now considered by some to be even more derogatory. Variations in the terrain, climate and vegetation have tended to mould and modify the tribal styles of music-making to suit both the environment and the temperament of local peoples. Vegetation further restricts the construction of instruments to those types for which the raw materials can be found locally, so that drums are generally found in forest areas, flutes where there are reeds and unaccompanied choral singing in open grass plains. These types of music-making are all found in Botswana.

1. Tswana musical traditions. 2. Khoisan musical traditions.

1. Tswana musical traditions. Among the Tswana, *golletsa* is the term applied to the production of sound by playing an instrument with the hands or mouth. Varieties of musical bow are the most common instruments. The *kwadi* or *losiba* is the Tswana successor of the Gora, which was a stringed wind instrument of the Khoikhoi (Hottentots). Like the *lesiba* of Lesotho, this instrument consists of a shaft of hollow river reed about 1 metre long. A string made from sinew or wire is secured to a strip of quill attached to the stave at one end and to a small tuning peg at the other. The instrument is played mainly by males, both young and old, and is often carried by travellers and herdboys. The *sekokwane* is a bow of solid wood without an attached resonator: it is fitted with a wire string, traditionally of either sinew or hair from a cow's tail, which is struck with a reed. An empty milk sack of dried skin or a wooden vessel is used as a temporary resonator. Other musical bows include the *letlhaka*, made from a river reed, and the *lekope*. Both are played by women and employ harmonics that resonate within the player's mouth cavity. The *segankuru* (*segaba* in some districts) is made from a stout piece of wood, approximately 1 metre long, with a trough hollowed out of it nearly all the way along its uppermost surface (fig.1). It has a wire string attached to a tuning peg and is played with a very small bow strung with animal hair, nowadays often from the tail of a cow. A resinous tree gum is applied to the bow to help grip the string. The *segankuru* exists in various forms, and it normally uses a 5-litre can placed over the upper end as a resonator, but a version using the mouth as a resonator has also been observed.

The Tswana are famous for their stopped-flute ensembles (similar to those of the Khoikhoi). Approximately 13 *ditlhaka* (*dithlaka*) (flutes) make up the ensemble (fig.2). In the 1970s the flutes were preferably made of unjointed lengths of metal tubing. Each flute yields a single pitch, and they are played in hocket fashion. The *mothlabi*, the teacher and tuner of the ensemble, conducts the ensemble on ceremonial occasions. Only men play the flutes, dancing while they play; this activity is called *gobina ditlhaka* ('to dance to the flutes').

Women may beat drums, clap hands and occasionally utter *megolokwane* (ululations) to encourage the players. *Meropa* (plural of *moropa*) are single-headed conical



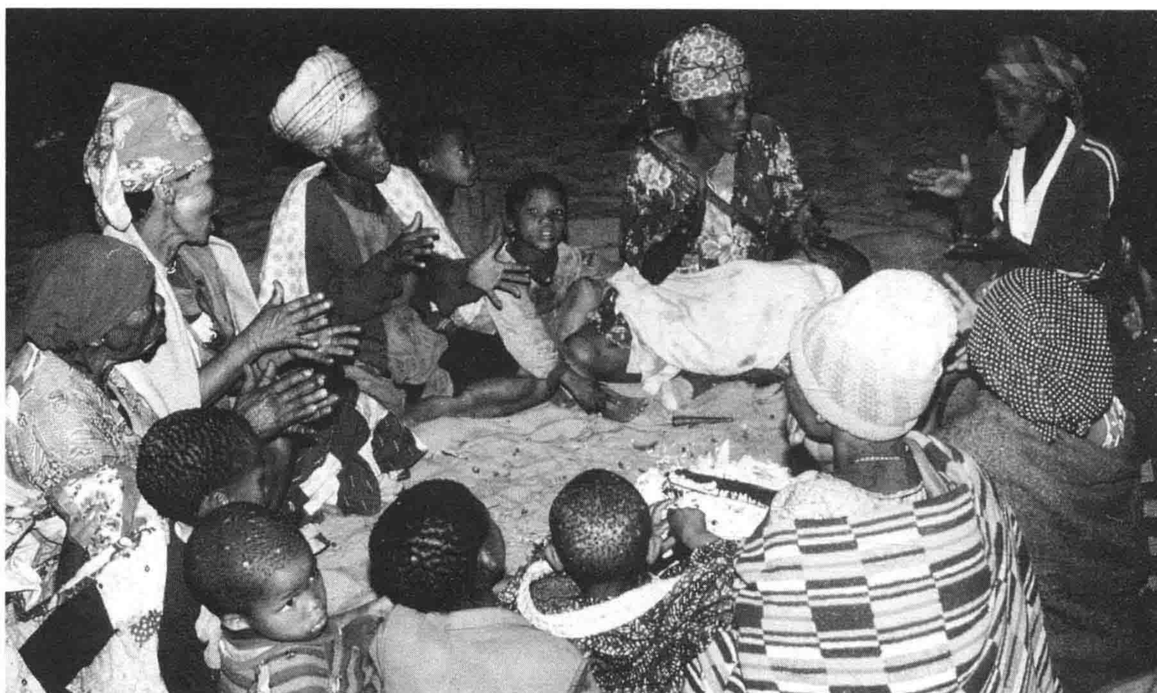
1. Montlebosigo playing the segankuru with a resonator made from a 5-litre can, Nata, northern Botswana, 1982

wooden drums with their heads pegged in position; women beat them with their hands on ceremonial occasions. *Matlho* (*mathlo*), dancing rattles made from cocoons filled with small stones or seeds and threaded on a thong, are wound round the ankles of the dancers. *Mapapata* (animal horns) are essentially ceremonial instruments and are used as signal trumpets, while *diburuburu* (bullroarers) are now merely children's toys. The *setinkane*, a lamellophone resembling the Shona *mbira*, was introduced into Botswana from countries further north. It normally resonates by resting on a small tin can or other hollow vessel.

Known collectively as *gobina*, singing and dancing are regarded as virtually synonymous. The songs are composed by ordinary people, as well as by professional songmakers, and deal with topical subjects. They include rain songs, circumcision songs and triumph songs known as *dikoma*. The social function of local songs is to amuse, praise and maintain group loyalties. Tswana vocal music is primarily pentatonic, whether or not it has instrumental accompaniment. Tswana is a tonal language, therefore the melodic line of the song is flexible, being largely controlled by the requirements of semantic tone.

Traditional Tswana praise-poetry is often called 'praise-singing'. This is misleading, since unlike the *pina* (song), the *leboko* (praise-poem) is not sung in the ordinary way. On important ceremonial occasions, the praise-poet displays his oratory by delivering his poetry in a high-pitched voice and with very rapid articulation. Thus the boundary between song and oral literature is blurred, and its study calls for cooperation between linguists and ethnomusicologists.

2. Khoisan musical traditions. The Khoisan speaking 'Bushmen' (or San) live in the Kalahari region of southern Africa, comprising most of Botswana, a large part of Namibia and extending into southern Angola and



2. *Tswana stopped-flute (ditlhaka) ensemble*

northern areas of South Africa. It is estimated that there are more than 55,000 Khoisan speakers altogether, and possibly as many as 70,000. Their short stature and similarities in their life style have led people to compare their music to the Central African 'pygmies'. Until recently, they maintained their own culture as hunter-gatherers, living in small groups of 30–50 people related either directly or by marriage. The group existed without a leader, and close cooperation among its members was vital. They were nomadic when it was necessary to follow game, often travelling long distances and setting up temporary camps along the way. More recently, large areas of land have been fenced off for cattle grazing, preventing natural game migration. As a result, the Bushmen have been forced to settle and become farmers, a way of life that does not come easily to them.

The music of the Khoisan developed along different lines from that of the Tswana and other neighbouring peoples, with the exception of the Nama 'Hottentots' to whom they are closely related. However, there are many instruments and musical styles adopted by the Khoisan from these peoples, and the reverse is also true. Vocal music is most important, and it is a vital part of an event central to their lives, the Healing Dance, at which 50–70 people may be present (fig.3). On such occasions women sing, accompanied by their own clapping and the sound of leg rattles worn by men who dance in a circle around them. The singing is highly polyphonic, involving the use of head tones (yodel effects), wide intervals and interweaving of melodic lines. Here, as in their traditional existence, cooperation is necessary. Some of the dancers eventually achieve a state of trance, and in this condition, according to Khoisan beliefs, they are able to perform acts of healing by laying their hands on people to draw out the cause of suffering. The same songs are sung on quite different and more casual occasions, for instance as a lullaby or during work. Much of their instrumental music is also based on the healing song melodies.

The mouth bow (*g!oma* or *goma*, *n!ao* or *nao* etc.) has been used possibly for as long as the Khoisan have used bows as hunting weapons (*see* MUSICAL BOW). Wire is nearly always substituted for the gut string of the hunting bow, perhaps because it produces a more distinct tone. One end of the bow is held against the player's mouth, while tapping the string with a light stick. The two sounds produced are a low-pitched fundamental note from the string and a range of harmonics resonated within the player's mouth cavity. A common practice is to tie a piece of cord around the bow-stave and the string, dividing it into two slightly unequal sections, thus producing two fundamentals, and two sets of harmonics normally three semitones apart. They have a variety of instruments that use the bow as a basis; some of these use resonators other than the mouth, such as metal, wooden or plastic vessels.

Another instrument associated with the Khoisan over a long period of time is the *kwashi* (*//kwashi*) or *joma* (*zhoma*), a pluriarc. The resonator originally consisted of a hollowed-out log, perhaps 40 cm long, with four or more bow-like extensions protruding from holes in one end. Gut strings ran between the ends of these extensions and the far end of the log, and were plucked with the thumbs and fingers. In contemporary Botswana, the wooden body is replaced by a 5-litre can and the strings

3. Khoisan Healing Dance, Ghanzi district, western Botswana, 1994

are wire. The instrument is normally used to accompany solo songs about a variety of everyday matters.

The lamellophone became popular among the Khoisan in the 1950s, when it was introduced via greater contact with the Tswana and other neighbouring peoples. The Khoisan *dongo* is frequently used to imitate Healing Songs. It can be used either as a solo instrument or to accompany one or two voices. Other instruments adopted in a similar way are the *segankuru* and drums similar to those found in the north of the country. Guitars are increasingly common and are played in the style of popular music common throughout southern Africa, as well as used to play traditional melodies.

FELICIA M. MUNDELL/JOHN BREARLEY

Bott. German family of musicians.

(1) **Anton Bott** (*b* Gross-Steinheim, nr Mainz, 24 Dec 1795; *d* Kassel, 19 Dec 1869). He was the younger brother of Johann Joseph Bott, a musician in the Darmstadt Kapelle who wrote many dances and variations, mostly for guitar. Anton trained as a military musician and became a friend of Spohr, through him obtaining a position as oboist in a regimental band at Kassel. He was also an unpaid violinist in the Kassel Kapelle. From 1854 he supported himself solely as a music teacher. Among his compositions are *6 caprices pour le violon seul d'après la manière de jouer de Paganini* (Leipzig, 1834).

(2) **Katharina Louise Bott** (*b* Darmstadt, 1824; *d* after 1881). Pianist, niece of (1) Anton Bott and daughter of Johann Joseph Bott. She studied with her father and made her first public appearance in Darmstadt at the age of nine. She performed in the Netherlands (1835), London (1838) and later in New York, where she eventually settled and was still teaching the piano in 1881; she also composed some piano pieces.

(3) **Jean Joseph Bott** (*b* Kassel, 9 March 1826; *d* New York, 28 April 1895). Violinist, pianist, conductor and composer, son of (1) Anton Bott. He received his first music lessons from his father, then (1840–42) studied the violin and composition with Spohr and theory with Moritz Hauptmann. His first public performance as a violinist and pianist at the age of ten was followed by four tours between 1838 and 1846. At 15, through Spohr's influence, he received (for four years) the first stipend given by the Frankfurt Mozartstiftung. In 1846 he joined the orchestra of the Kassel Kapelle, becoming leader in 1849 and second Kapellmeister to Spohr in 1852. He left Kassel in summer 1856, and in autumn 1857 became Kapellmeister at Meiningen. He greatly improved the orchestra, which had both Spohr and Liszt as occasional guest conductors, and in 1861 organized the first music festival there. In 1865 he took a similar position in Hanover, where he stayed for 12 years until he was forced to retire after falling off the podium in a state of intoxication while conducting Liszt's oratorio *Die heilige Elisabeth* in the presence of the composer (who quickly came to the rescue by completing the performance). From then on he lived in Magdeburg as director of the newly founded conservatory and continued his concert career. In 1885 he settled in New York, where he became director of the Long Beach Badekapelle and a private teacher. His compositions owe much to his mentor Spohr, whose favourite pupil he was. Indeed Spohr went so far as to describe Bott as 'perhaps another Mozart', but this promise was never fulfilled.

Other musicians in the family, all children of (1) Anton Bott, were Jacob, violinist in the Kassel Kapelle, who composed some dances and variations for piano; Marie Louise, music teacher in Kassel and, after Jean Joseph's death, in New York; and perhaps Nikolaus, a timpanist in Kassel.

WORKS

Vocal: Der Unbekannte (op, 3, E. Biberhofer, after L. Angely: *Die beiden Galeerensklaven*), Kassel, 20 Aug 1854, lost; Actäa, das Mädchen von Corinth (op, 4, J. Rodenberg), Berlin, Kgl, April 1862, *D-Ksp**; pubd pieces for male vv

Inst: 2 syms., 1850, 1870, lost; 4 ovs., 1843–51, 2 in *Km*; 3 vn concs.; 2 vn concertinos; numerous pubd pieces, vn, pf/orch; numerous pubd études, dances, salon pieces, pf

SERGIO MARTINOTTI/CHRISTOPHER FIFIELD

Bott, Catherine (*b* Leamington Spa, 11 Sept 1952). English soprano. After studying at the GSM with Arthur Reckless she spent several years as a member of Swingle II. In 1980 she began to appear regularly in the New London Consort, and subsequently worked with other British period-instrument ensembles in Europe, Latin America and the USSR. She has established herself as a leading virtuoso in 17th-century music, from Caccini and Monteverdi to Blow and Purcell, of whose mad songs she is a noted exponent. Her recordings, which include Salome in Stradella's *San Giovanni Battista*, Handel arias and Fauré's Requiem, reveal her acute dramatic perception and distinctive sensuality. As Purcell's Dido, which she recorded with Christopher Hogwood in 1994, Bott exhibits a brooding nobility which has won many plaudits.

JONATHAN FREEMAN-ATTWOOD

Bottaccio, Paolo (*fl* 1609–15). Italian composer. According to the title-pages of his publications of 1609 he was *maestro di cappella* of Como Cathedral. His small surviving output shows that he was versatile within the limits of a provincial post; he published vesper psalm settings for double choir (a fairly conventional sort of liturgical music for this period) and madrigals in the usual five parts as well as some double-choir ones; his two motets in the volume edited by Francesco Lucino (Milan, 1617[2]) are in an up-to-date concertato manner. His canzonas show that he belonged to a flourishing school of composers of instrumental ensemble music based in Milan and headed by G.P. Cima. (J. Roche: *North Italian Church Music in the Age of Monteverdi*, Oxford, 1984)

WORKS

I sospiri con altri madrigali a 5 et 8 voci ... libro primo (Venice, 1609)
Il primo libro delle canzoni da suonare a 4 e 8 voci (Venice, 1609)
Psalmodia vespertina ... 8 vocibus ... liber primus, op.4 (Milan, 1615)
4 works in 1617[2]; 1 mass in 1623[1]; 21 compositions in the Pelplin Tablature, Culm Diocesan Seminary Library

JEROME ROCHE

Bottarelli [Botarelli], **Giovanni Gualberto** (*fl* 1762–79). Italian librettist. He was house poet at the King's Theatre in London in the 1760s and 70s and author or adapter of more than 25 opera texts. A poet of the same name wrote librettos set by Graun at Berlin in the early 1740s, but whether this is the same person is doubtful. The London Bottarelli was chiefly employed in piecing together pasticcios based on frequently revived works of Goldoni, Calzabigi, Petrosellini, Pizzi and others. He also provided new librettos for J.C. Bach, including *Orione* (1763), *Zanaida* (1763), and probably *Carattaco* (1767) and *La clemenza di Scipione* (1778), as well as *Leucippo e Zenocrita* (1764) for Mattia Vento. Among Bottarelli's more important adaptations are *Orfeo ed Euridice* (1770), based on Gluck with additional music by Bach, and a reworking of Galuppi's *Li tre amanti ridicoli* as *Il filosofo di campagna* (1768). His wife was a singer, and his son F. Bottarelli also worked at the King's Theatre as translator.

CURTIS PRICE

Bottazzari, Giovanni (*b* probably Mantua; *fl* 1663). Italian composer and guitarist. One published collection of his music for guitar survives: *Sonate nuove per la chittarra spagnola* (Venice, 1663/*R*; 1 ed. in Hudson). In the preface he stated that he was giving no pedagogical details because he was not a teacher and because his book is not for beginners. The music is quite complex, using the *battute* and *pizzicate* styles found in the works of Foscarini, Corbetta and Granata and advanced techniques such as *campanelas* and imitation. In addition to the standard allemandes, courantes and sarabandes, the book contains four preludes, three passacaglias, three toccatas and two

gigues, all grouped by key into suites. Bottazzari seems to have been particularly concerned with exploring new sonorities on the guitar: the first eight suites use bar chords for their tonic, and the other suites are written with six different scordatura tunings (including two unique to this book).

GARY R. BOYE

Bottazzi, Bernardino (*b* Ferrara; *fl* 1614). Italian composer, theorist and organist. He was an Observant Franciscan friar and is known only by the first book of his *Choro et organo … in cui con facil modo s'apprende in poco tempo un sicuro methodo per sonar su l'organo messe, antifone, & hinni sopra ogni maniera di canto fermo* (Venice, 1614). It is a didactic work dealing with the liturgical duties of the choirmaster and organist. Under 18 headings Bottazzi set out the principal rules of counterpoint and provided guidance that would enable the organist to respond in the correct mode and with good counterpoint to the plainchant of the choir. The intabulations of the organ responses are printed. The volume includes several organ works by Bottazzi: three masses, two Credo settings, hymns for the whole year, Marian antiphons and a *ricercare cromatico*. Although clearly didactic in character, they are not lacking in a liveliness and musicality characteristic of the Ferrara organ school: the ricercare is a notably poetic and well-constructed piece and the hymns, which are among the last examples of the genre, are also interesting. Bottazzi was a minor representative of the Ferrara organ school, but his book is of particular interest for the light it sheds on the traditions, forms, and manner of performance of Italian organ music based on plainchant in the late 16th and early 17th centuries.

ADRIANO CAVICCHI

Bottée de Toulmon, Auguste (*b* Paris, 15 May 1797; *d* Paris, 22 March 1850). French music historian and librarian. He studied at the Ecole Polytechnique, thereafter receiving a degree in law. However, being of independent means, he was able to devote himself to music. An amateur cellist, he received compositional and theoretical training in music from Desvignes, Cherubini and Reicha, as a result of which he composed several pieces (none of which was published), including two string quartets, a Passion, a ballet, several masses, and an *opéra comique* performed *c*1820 at the Hôtel Lambert. Fétis claimed the credit for turning Bottée towards 'l'archéologie musicale' in 1827; however, Choron and Perne were also influential.

In 1826 Bottée travelled to Italy, Germany and Austria, meeting Kiesewetter in Vienna; thereafter they maintained lifelong correspondence. In 1831 he began unsalaried work as librarian at the Paris Conservatoire, restoring order after Fétis's departure; he remained in the post until 1848, when he suffered a mental breakdown. During his tenure he expanded the library's holdings of 15th- and 16th-century repertory with his own copies (in over 90 volumes) of manuscripts held in the libraries of Munich and Vienna. Determined to acquire copies of hitherto inaccessible manuscripts in the Cappella Sistina for Paris, he pressed the bibliophile Fortunato Santini to work on his behalf: however, his political naivety combined with Santini's lack of specialist knowledge ensured that Baini's archive remained closed to both men. Cherubini respected Bottée's work, lobbying for two years to secure him membership of the Légion d'Honneur, which he was granted in 1838.

As a member of the Société Royale des Antiquaires and the Comités Historiques de l'Instruction Publique, Bottée regularly presented academic papers and gained governmental support for major projects, such as the publication of *L'homme armé* and *De Beata Virgine* masses spanning three centuries, and a multi-volume collection of unpublished documents relating to the history of French music from 1200 to 1700. However, like other large-scale projects (he tried several models for a general history of music and nearly finished a history of post-Gregorian music in Europe), these remained incomplete. His published output is slim: a few short pamphlets of uneven quality. More important historiographically are the numerous boxes of private notes and drafts conserved at the Bibliothèque Nationale, Paris, which reveal a questioning intellect, though not a first-class historian.

KATHARINE ELLIS

Bottegari, Cosimo (*b* Florence, 27 Sept 1554; *d* Florence, 31 March 1620). Italian lutenist and composer. He was in Munich at the court of Duke Albrecht V of Bavaria by 1573, when he was appointed a gentleman of the chamber (*gentiluomo della camera*). He edited an anthology of works by Munich court composers, *Il secondo libro de madrigali a cinque voci de floridi virtuosi del Serenissimo Ducca di Baviera* (RISM 1575[11]), himself contributing two madrigals (ed. in DTB, new ser., iv/7, 1981). Bottegari was a favourite of the duke and not above courtly intrigue; in particular he entered into a competitive rivalry with the Kapellmeister, Lassus. An engraving inscribed 'Cosomus Bottegarius Tenor' (in *I-Bc*) shows him wearing the gold necklace given to him by Duke Albrecht in 1573 (reproduced in Kirkendale, plate VIII).

Bottegari visited Florence several times between 1576 and 1578, probably on diplomatic missions, and in 1579, following the death of Duke Albrecht, he returned permanently to Florence, marrying shortly afterwards. With the succession of Ferdinand de' Medici in 1588 he entered the court rolls, not as a salaried performer but as a gentleman of independent means; he was a member of

the order of St Stephen and pursued various commercial enterprises. In 1595 he sent a musical 'capriccio' on the Este coat of arms to Duke Alfonso II in Ferrara. He later named Duke Cesare d'Este as his executor, bequeathing to him his books, including his manuscript lutebook (*I-MOe*, Mus. C 311; ed. in WE, viii, 1965). The manuscript is decorated on the frontispiece with the coat of arms of the dukes of Bavaria. Dates scattered through the volume suggest that it was in use from 1573 until after 1600. It contains 127 works for voice and lute and a few dances and fantasias for lute solo. About 40 of the compositions are by Bottegari, including madrigals, motets and miscellaneous strophic works, along with a number of devotional works in Latin and Italian. Motets by Pietro Vinci, Wert and Lassus appear, along with arrangements by Bottegari for voice and lute of madrigals by Rore, Lassus, Vincenzo Ruffo, Striggio (i), Palestrina, Malvezzi, Fabrizio Dentice and Nola, and villanellas and canzonettas by Vecchi, Primavera, Conversi and Giovanni Ferretti. The manuscript is the principal (often unique) source of the surviving works of Ippolito Tromboncino, a Venetian singer and lutenist active about 1550. The most recent repertory includes two stanzas of Caccini's *Fere selvaggie* (from *Il rapimento di Cefalo*, Florence 1600, and printed in *Le nuove musiche* in 1601/2).

DAVID NUTTER

Bottesini, Giovanni (*b* Crema, 22 Dec 1821; *d* Parma, 7 July 1889). Italian double bass player, conductor and composer. His father Pietro, a clarinettist and composer, taught him the rudiments of music at a very early age. Before he was 11 he had sung in choirs, played the timpani with the Teatro Sociale in Crema and neighbouring towns, and had studied the violin with Carlo Cogliati, a friend of his father and one of the town's leading players. In 1835 his father applied to the Milan Conservatory, where the only remaining scholarships were for bassoon and double bass. Within a few weeks young Bottesini had learnt enough about the double bass to satisfy the governors, and on 1 November he began to study at the Conservatory with Luigi Rossi (to whom he dedicated his early *Tre grande duetti per contrabbasso*). His professors for harmony, counterpoint and composition were P. Ray, Nicola Vaccai and Francesco Basili.

So rapid was his progress that in 1839 he left the conservatory with a prize of 300 francs for solo playing. He put the money towards a fine instrument by Carlo Giuseppe Testore which he is reputed to have found lying in a puppet theatre under a heap of rubbish. He preferred his instrument to have three strings, which he tuned a tone higher than was usual; his bow was of the so-called French style commonly used in England today. His highly successful concert début at the Teatro Comunale, Crema, in 1840 led to many engagements in Italy and in Vienna. He was appointed principal bass at the Teatro S Benedetto, Venice, where he met Verdi, whose *I due Foscari* was being performed there. This was the beginning of a lifelong friendship.

Bottesini was successful also in other directions. In 1846, together with his colleague Arditi, he went to Havana, as principal bass at the Teatro de Tacón. There he conducted the première of his first opera, *Cristoforo Colombo*. Concert tours and engagements followed, taking him to New Orleans, New York, London and all over Europe. His début in London on 26 June 1849 at Ella's Musical Union astounded the audience. He played some solos and took the cello part in a quintet by Onslow. He was nicknamed the 'Paganini of the double bass', and contemporary writings bear witness to his extraordinary agility, purity of tone, intonation and exquisite phrasing: 'How he bewildered us by playing all sorts of melodies in flute-like harmonics, as though he had a hundred nightingales caged in his double-bass!'. The following year he was made an honorary member of the Philharmonic Society of New York. He went to Mexico in 1853, St Petersburg in 1856 and then again to Paris where he directed the Italian Opera (1855 and 1857). He became musical director of the Real Teatro Bellini, Palermo, from 1861 to 1863 and held similar appointments in Spain (Barcelona and Madrid) and in Portugal.

Bottesini soon devoted an increasingly large part of his life to composing and conducting. From 1862 to 1865 he subscribed to the Società del Quartetto di Firenze; his D major String Quartet was published in a miniature score and performed at the Concorso Basevi in 1862. In 1870 his opera *Vinciguerra* ran for 40 performances in Paris and in January of the following year his comic opera *Alì Babà* was presented at the Lyceum Theatre, London,

Giovanni Bottesini: photograph by William Friese-Greene, c1880

where he was musical director for the season. On 24 December 1871 he was in Cairo to direct the first performance of *Aida*, which was being given at the Teatro Kediviale in honour of the opening of the Suez Canal. 1879 saw the production of his opera *Ero e Leandro* (libretto by Arrigo Boito, who had intended it for his own use). Critics who thought *Ero e Leandro* a 'charming work' were less impressed by *La regina di Nepal* which followed at Turin in 1880. The opera, they said, did not meet 'with anything like an enthusiastic reception'. It was not so much the music as the libretto that caused disappointment. The last of his many visits to England was in 1887, when his *Garden of Olivet* was given at the Norwich Festival. On 20 January 1889, after a proposal by Verdi, he was nominated director of the Parma Conservatory, where he died barely six months later.

Remarkable though Bottesini was as a musical director, it is for his contribution to the technique of the double bass that he is best remembered. He extended the range of the instrument beyond its recognized compass, and even today his many double bass compositions are seldom performed on account of their great difficulty.

RODNEY SLATFORD

Bottini [née Motroni Andreozzi], **Marianna** (*b* Lucca, 7 Nov 1802; *d* Lucca, 25 Jan 1858). Italian composer and harp teacher. Her parents were the nobleman Sebastiano Motroni Andreozzi and his wife Eleonora Flekestein. She studied the piano and counterpoint with Domenico Quilici. In 1820 she was admitted to the Accademia Filarmonica in Bologna as 'Maestra compositrice onoraria' on account of a *Stabat mater* and a *Messa da Requiem* written in 1819 in memory of her mother. In 1823 she married Lorenzo Bottini, a marquis and prominent figure in Luccan political life. Most of her output dates from her early years, from the ages of 13 to 20. It includes arias, duets, *romanze* and other pieces composed for the refined salons of the Luccan nobility, and contrapuntal sacred works. She was the only woman to provide compositions for the traditional Luccan festival in honour of St Cecilia in 1822, 1825, 1828, 1832, 1834 and 1840.

WORKS
all unpublished; MSS in I-Li

Op: Elena e Gerardo (2), 1822, unperf.
Cants.: In sacri cantici, 3vv, wind insts, bc, 1819; Briseide (C. Moscheni), 3vv, chorus, orch, 1820; Cantiamo, cantiamo, 5vv, orch

MARIA SABRINA LA PUSATA

Botto (Vallarino), Carlos (*b* Viña del Mar, 4 Nov 1923). Chilean composer. He studied the piano and composition at the National Conservatory of the University of Chile in Santiago and then with Dallapiccola in New York. From 1952 he taught the piano and theory at the National Conservatory, whose director he eventually became. He was appointed a composition teacher at the Catholic University (1969). Several of his works have won important prizes, including numerous awards at festivals of Chilean music. In 1996 he was awarded a National Arts Prize.

Botto shows a preference for chamber music, including solo piano. His compositional style is personal and eclectic, avoiding the extremes of the avant garde and sustained by a solid compositional technique. His piano music shows a high degree of idiomatic writing for the instrument combined with a strong sense of expression. Most of his compositions have been performed and appear regularly in concert programmes.

WORKS
(*selective list*)

VOCAL

Choral: 3 canciones (J. Guzmán Cruchaga), op.20, 1965–6; Canciones (anon., A. Machado, C. Botto, Guzmán Cruchaga, E. de la Cerda), op.32, children's chorus, 1979

Solo vocal: 7 cantos al amor y la muerte (Chinese poems), op.8, T, str qt, 1956; 4 cantares quechuas, op.11, 1v, pf, 1959; Poemas de amor y soledad (J. Joyce), op.12, S, pf, 1959–62; Academias del jardin (P. de Medina), op.16, S, pf, 1962; Raquel (R. Blaustein), op.34, Bar, fl, ob, hp, 1984; Tiempo (G. Mistral), op.43, A, cl, vc, pf, 1993–4

INÉS GRANDELA

Bottrigari, Ercole (*b* Bologna, 24 Aug 1531; *d* Sant'Alberto, nr Bologna, 30 Sept 1612). Italian scholar, mathematician, architect, music theorist, composer and poet. The illegitimate son of Giovanni Battista Bottrigari, a wealthy Bolognese aristocrat, and Cornelia (alias Caterina) de' Chiari of Brescia, he was legitimized on 16 August 1538 and then raised in his father's house at Sant'Alberto, near Bologna. On 7 March 1542 Bottrigari was selected by the Bolognese senate as one of a group of 12 young aristocrats deputed to welcome the new Cardinal Legate, Gasparo Contarini, to the city. Evidently Bottrigari distinguished himself in the recitation of poetry and orations on this occasion; he was duly rewarded by Contarini who invested him with the titles of Knight of the Holy See and Lateran during a solemn pontifical mass in Bologna Cathedral on 9 April 1542. As a young man he studied classical languages with Francesco Lucchino of Trent, perspective and architecture with Giacomo Ranuzzi and mathematical sciences with Nicolo Simo, professor of astronomy at Bologna University. Bottrigari also studied music with Bartolomeo Spontone with whom he remained in close contact for many years; their friendship is acknowledged by Spontone in the dedications to both his *Il primo libro di madrigali a quattro voci* (Venice, 1558), and *Libro terzo de madrigali a cinque voci* (Venice, 1583). In 1546 Bottrigari, supported by his father, established a private press in the centre of Bologna, probably modelled on the 'Tipografia bocchiana' loosely connected to the Accademia Hermatena. Just nine editions are known to have been printed there, all quite short and in small formats; their extreme scarcity probably reflects short press-runs.

In May or June 1551 Bottrigari began his political career when he was elected a member of the Consiglio degli Anziani in Bologna, and at the end of that same year he married a wealthy Bolognese, Lucrezia Usberti (*d* 1591). In 1576, as a result of a legal dispute over his wife's inheritance, Bottrigari fled to Ferrara where he remained for the next 11 years. During this time, as can be seen from his most important music treatise, *Il Desiderio, overo de' concerti di varii strumenti musicali*, he became acquainted with the rich musical life at the court of Alfonso II d'Este, and also came to know a number of poets and intellectuals including Tasso who addressed three sonnets to him. Following his return to Bologna, some time after 12 October 1586, Bottrigari

Ercole Bottrigari: engraving from 'Il Melone' (Ferrara, 1602)

moved to the family house at Sant'Alberto. There he established himself as a private scholar, surrounded by his books and manuscripts and in contact with like-minded scholars (including Zarlino) in other parts of Italy. During these years he became an intimate friend of the Bolognese musician and scholar Annibale Melone who eventually moved into Bottrigari's house where he acted as an amanuensis and was able to consult Bottrigari's writings and translations of ancient theory, which were still unpublished. The first edition of *Il desiderio* was published under the pseudonym Alemanno Benelli (an anagram of Anniballe Meloni) in an attempt to strengthen Melone's application for the post of *maestro di cappella* at S Petronio in Bologna; it was only after Melone's death (in April 1598), that the treatise was finally published under Bottrigari's name.

Bottrigari was essentially a humanist in the mould of Glarean, Mei and Zarlino; like them his interest in music was just one consequence of a consuming interest in the classical past, an interest characterized by his fondness for the dialogue form in his treatises, and by his preoccupation with Greek mathematics, astronomy and music theory. Bottrigari's first publication about music, *Il Patricio* (1593), takes issue with Francesco Patrizi's explanation of the Aristoxenian division of the tetrachord. In the following year *Il Desiderio* appeared. Cast, like *Il Patricio*, in the form of a dialogue, it is rich in information about contemporary musical instruments and paints a vivid portrait of musical life at the Estense court in Ferrara during the last decades of the 16th century. *Il Melone, discorso armonico . . . et il Melone secondo* is concerned with speculative theory and includes a long account of the Greek genera and the first published transcription of a Greek musical text. It also attacks Gandolfo Sigonio's *Discorso sopra i madrigali* and takes up the cause of modern composers and theorists, in particular Nicola Vicentino. One important work which remained in manuscript, the *Mascara, overo della fabbrica de' teatri* (1598), is a detailed discussion of the history and physical structure of theatres, and a valuable source of information about Renaissance practice. Bottrigari's surviving papers and manuscripts remain in Bologna, divided between *I-Bu* (MS 326) and *I-Bc* (MSS B43–B46). A small group of books from his library (in *I-Bc*) include his copies of Vicentino and Zarlino, with autograph marginal glosses and annotations; these show a familiarity with the writings of ancient authors including Boethius, Ptolemy and Euclid.

Although he had played a wide range of instruments since the age of 11, Bottrigari never considered himself to be a practical musician or composer in any significant way. One of his three madrigals for five voices, 'Come il candido pie per l'erba fresca' was, according to the *Trimerone*, plagiarized by Philippe de Monte in his madrigal 'Amor, che sol i cor leggiadri invesca', published in 1582. A four-voice madrigal, 'Il canter novo' (which appears in *Il Melone*) experiments with chromatic writing. Bottrigari's poems are scattered throughout various printed and manuscript collections of the time; he also wrote a comedy, *Il mercatante*, and introduced, together with Bartolomeo Spontone's son Ciro, the 11-syllable line into Italian poetry (see *Il Bottrigaro*).

WRITINGS

IAIN FENLON

Botzen. Danish family of organ builders. Johan Petersen Botzen (*c*1641–1719) and his younger brother, Peter Petersen Botzen (*c*1661–1711), were sons of the organ builder Peter Karstensen Botz. They were also organists, the latter in the church of Our Lady, Copenhagen, where the brothers built a marvellous instrument during the years 1686–90. Between 1696 and 1699 they built another big instrument in the church of Our Saviour, Copenhagen. The sumptuous Baroque façade of this instrument survives; its gold-decorated front pipes (restored in 1965) offer a rare example of the sound of a 17th-century Danish organ. The family is discussed in N. Friis: *Orgelbygning i Danmark* (Copenhagen, 1949, 2/1971).

OLE OLESEN

Bouasse, Henri (Pierre Maxime) (*b* Paris, 16 Nov 1866; *d* Toulouse, 15 Nov 1953). French physicist and acoustician. He studied physics at the Sorbonne (1883) and at the Ecole Normale Supérieure (1885–8). After teaching at the Collège de France and the Lycée at Agen, in 1892

Bouasse joined the staff of the University of Toulouse and obtained his doctorate in mathematics. In 1897 he gained the degree of doctorate in physical sciences and was appointed to the physics chair at Toulouse, where he remained for the rest of his academic career. Retiring in 1937, he continued to work in his laboratory until two years before his death. His research interests ranged widely and he made many discoveries of great importance to musical acoustics. In particular, his studies of woodwind and brass instruments provided the essential foundation for the modern understanding of how sound is generated in these instruments. Bouasse's work has been unjustly neglected outside France, partly because he published little in conventional journals. Instead, he wove his own theories and experiments into a 45-volume library of textbooks on classical physics, the *Bibliothèque scientifique de l'ingénieur et du physicien*, which includes seven volumes on acoustics. The last of these, published posthumously in 1962, contains a personal memoir of Bouasse by G.F. Herrenden Harker.

MURRAY CAMPBELL

Boubers, Jean-Louis de. *See* DE BOUBERS, JEAN-LOUIS.

Boubert (*fl c*1460). Franco-Flemish composer. He is known only from an added ascription in the Nivelle de la Chaussée chansonnier (*F-Pn* Rés.Vmc57) above the three-voice rondeau *L'omme enragé* (also in *Dm* 517; ed. in Perkins, 200–01). He was castigated by Tinctoris (CSM, xxii/2a, 1978, p.49) for using the sign of major prolation to signify augmentation, which must refer to a lost work, probably a mass. The composer may have been Jean Boubert, succentor of St Donatian, Bruges, from 1452 to 1461; about 1461 a Hans Boubay, perhaps the same man, joined the chapel of Frederick III, King of the Romans. Alternatively, he may have been Johannes Bouvart of Maastricht (a nephew of Constans Breuwe), who joined the Burgundian court chapel in 1454 as a *sommelier*, becoming a *clerc* in 1465. *L'omme enragé* is most remarkable for illustrating its text, describing someone who has lost his mind, by tonal means: while the chanson generally demonstrates the 'Lydian' mode on F, it ends with a cadence on A.

JEFFREY DEAN

Boublil, Alain. French lyricist. *See under* SCHÖNBERG, CLAUDE-MICHEL.

Boucan. *See* CORDIER, JACQUES.

Bouchard, Linda (*b* Val-d'Or, PQ, 21 May 1957). French-Canadian composer andconductor. She studied composition with Henry Brant at Bennington College, Vermont (BA 1979), and pursued graduate studies at the Manhattan School (MMus 1982). During the period 1985–90 she was the assistant conductor of the Children's Free Opera, New York, as well as the conductor of several new music ensembles, including Essential Music, the New Music Consort, New York New Music Ensemble and her own group, Abandon. Upon her return to Canada she was appointed composer-in-residence for the National Arts Centre Orchestra, Ottawa (1992–5). She has taught regularly at the Banff Centre for the Arts.

Bouchard's primary compositional interests are timbre, structure and spatialization. The specific position of the performers is of the utmost importance in large-scale works such as *Triskelion* (1982), *Revelling of Men* (1983) and *Oracles* (1996). Experimentations with form and the use of a wide variety of contrasting materials led her to the development of 'flexible structures', compositional plans that produce a kind of aleatory music. Works such as *Pourtinade* (1983), *Muskoday* (1988) and *Ressac* (1991) use 'flexible structures' by leaving the specific order in which sections are played up to the performers or the conductor.

SOPHIE GALAISE

Bouché (Fr.). A term used in horn music to specify hand-stopping; it affects the tone of the instrument and the pitch. It is sometimes denoted by '+', and it is counter-manded by 'ouvert' or 'o'. *See* HORN, §3(ii).

Bouche fermée (Fr.). Wordless singing with the mouth closed. *See* BOCCA CHIUSA.

Boucher, Alexandre-Jean (*b* Paris, 11 April 1778; *d* Paris, 29 Dec 1861). French violinist and composer. His father was a musician in Louis XV's Mousquetaires Gris. As a child Alexandre-Jean performed in salons and was presented at court, and is said to have performed a concerto by Giornovichi at the Concert Spirituel. He studied with Subrin de Sainte-Marie, Gaviniès and Guillaume Navoigille, and attended Mme de Mortaigne's Lycée des Arts. During the Revolution Boucher took part in the storming of the Bastille, and in February 1790 he joined the Garde Nationale. He played in the orchestra of the Théâtre du Palais (1792), and subsequently in that of the Théâtre Feydeau.

Compromised by the events of 13 Vendémiaire (5 October 1795), Boucher went to Spain, where he was presented to Charles IV, played in the royal orchestra, and was advised by Boccherini. Returning to Paris, he performed for private music societies, where opinion was divided on his talents, and gave his first public concert at the Théâtre Olympique on 22 March 1804. In 1806 he married the harpist Céleste Gallyot, with whom he toured. On 4 April 1806 he performed at Angelica Catalani's first concert in Paris, where his mannerisms and banter caused Spohr to write, 'Boucher was an exceptional violinist, but also a great charlatan'. In 1808 or 1811 he was in Marseilles, and in 1813 in Berne; in 1814 he performed in London with Bernhard Romberg. He was in Paris during the Hundred Days, when his physical resemblance to Napoleon caused some misunderstandings.

Criticized for his performance of a Viotti concerto on 5 December 1816 at the Théâtre des Italiens, Boucher replied: 'I consecrated the adagio to the stricter sort of connoisseurs, but in the cadenzas I wished to show that the passage of ten years has not yet extinguished the ardour I possessed at twenty-five, and I knew in advance that this decision was bound to bring down on me accusations that I was incorrigible'.

Between 1819 and 1825 Boucher and his wife toured Belgium, Austria (in 1822, meeting the young Liszt and Beethoven, who dedicated the seven-bar *Kleines Stück* WoO34 for two violins to him), Germany (where he met Mendelssohn and performed with Weber) and Russia. In the 1840s he played in the string quartets of Charles Javault and Antoine Bessems; according to the Baron de Trémont, Boucher overloaded quartets with 'disfiguring ornamentation'.

Boucher retired to Orléans in 1858. His final concert in Paris was at the Salle Pleyel on 3 May 1859. His works (some manuscripts in *F-Pc*) include two violin concertos ('Mon caprice en mi', 1810; 'L'Orage', *c*1844), a Grand duo concertant for two violins (1839) and a *Serment napoléonien* (1853).

HERVÉ AUDÉON

Boucherie, Jean-Joseph (*d* Brussels, 4 May 1776). Flemish bookseller and music printer. He was the principal music seller in Brussels from 1745 to 1770. As the official printer for the Théâtre de la Monnaie he printed librettos for *opéras-comiques* and *comédies mêlées d'ariettes* performed there by composers such as Duni, Monsigny and Philidor, some with a musical supplement. His publications were covered at first by a privilege of impression and sale (1757–66) which applied only to works that had not yet been staged at Brussels, and then by another which allowed Boucherie to print and sell all theatre works. Under this later privilege, he forged Parisian editions (such as *Toinon et Toinette* by Gossec, with the false address 'Paris, Veuve Duchesne') and was involved in the production of two engraved editions of the works of C.-J. van Helmont. Boucherie was the Brussels distributor for Benoit Andrez of Liège, as well as of a large number of essentially Parisian editions of instrumental music, opera librettos and music journals.

MARIE CORNAZ

Boucheron, Raimondo (*b* Turin, 15 March 1800; *d* Milan, 28 Feb 1876). Italian composer and theorist. As a composer he was largely self-taught, his musical interest having been discouraged by his father who died in 1817. After a period in Turin, where he was befriended by Bernardo Ottani, he became a music teacher in Milan and in 1822 went to Voghera as music director and conductor at the Teatro Civico (according to his pupil Edoardo Perelli he was also *maestro di cappella* at the church there). In 1829 he became *maestro di cappella* at Vigevano Cathedral and in 1842 applied for the same post, then vacant, at Milan Cathedral. He received the Milan appointment only in 1847, after having in 1844 become *maestro* at Casale Monferrato Cathedral, and remained there until his death.

Boucheron composed two operas (*Ettore Fieramosca* and *Le nozze al castello*) and some farces, none of them

performed. Three of his songs and an organ fantasia were published by Ricordi, and four symphonies are in the Milan Cathedral archives. His *Inno per le cinque giornate*, to a text by Pasquale Contini, was well known during the period of the struggle against Austria. His main output was church music, a large amount of which in all genres is in the cathedral archives of Voghera and, especially, Milan. In this music Boucheron held to a Classical ideal, avoiding the two extremes of the Palestrina style and the 19th-century operatic. He was generally considered a skilled composer (in 1869 he was invited to contribute to the abortive Requiem organized by Verdi in memory of Rossini), but he was also criticized for a lack of inspiration and originality. Pougin, in the supplement to Fétis, described his music as being of 'une banalité désespérante'. Fétis himself was slightly kinder to his treatise on aesthetics, *Filosofia della musica o estetica applicata a quest'arte* (Milan, 1842, 2/1875): 'Although the author ... has neither the profound insight nor the wide knowledge necessary for such a work, one finds in it perceptions that are not without justness'. This work attempts to reassert the concept of the imitation of nature as the basis of music, starting from the premise that 'all the other arts [except architecture] draw their power and importance from the analogy that they have with the phenomena of life'. Boucheron also published a harmony treatise, *La scienza dell'armonia spiegata dai rapporti dell'arte coll'umana natura* (Milan, 1856), some *Esercizi d'armonia* (Milan, 1871) and solfeggios. At his death he was at work on a counterpoint treatise. He was a member of the academies of Bologna, Rome and Florence.

DENNIS LIBBY/EMANUELE SENICI

Boucon, Anne Jeanne (*b* Paris, 1708; *d* Paris, 4 Feb 1780). French harpsichordist, wife of JEAN-JOSEPH CASSANÉA DE MONDONVILLE.

Boucourechliev, André (*b* Sofia, 28 July 1925; *d* Paris, 13 Nov 1997). French composer and musicologist of Bulgarian birth. In 1946 he entered the Sofia Conservatory to study the piano with P. Pelischek. A French Government bursary enabled him to move to Paris in 1949, where he studied at the Ecole Normale de Musique with Reine Gianoli (piano) and Georges Dandelot (harmony); he also took private lessons in counterpoint with Andrée Vaurabourg-Honegger. After obtaining his concert diploma in 1951, he taught the piano for eight years at the Ecole Normale de Musique. While pursuing a career as a pianist, he attended the Darmstadt summer courses, and started to compose in 1954, though most of these early works have been withdrawn. Boucourechliev's first work to attract attention was *Musique à trois* (1957), played, as was his Piano Sonata (1959), at one of the Domaine Musical concerts. He then worked with Berio and Maderna at the Studio di Fonologia Musicale in Milan (1957–8), where he composed *Texte I*, a 5-minute work featuring elements of spontaneous performer choice involving pitch and dynamics, and rhythmic aperiodicity. The slightly shorter *Texte II*, composed at the GRM studio in Paris in 1959, introduces an aleatory element in that the two tapes start independently of each other.

During a 6-month spell in the USA (1963–4), Boucourechliev became acquainted with the work of American avant-garde figures such as Robert Rauschenberg, Merce Cunningham, Cage and Earle Brown. Wary of Cage's use of chance, he found greater affinity with the open forms of Brown's works (cf. *Available forms*, 1962) in which chance is rejected in favour of choice. Boucourechliev saw especially the link between serialism and what Umberto Eco in *Opera aperta* calls the 'poetics of indeterminacy', serialism being a particular, determinate case in an indeterminate universe.

These ideas of openness, and the opportunities they afford for performers and (to an extent) audiences to participate in the form-building process, came to fruition in the now classic *Archipels* (1967–71), a series of five works which established the composer's reputation. The scores consist of large sheets, on which the musical structures constituting the work are laid out like an archipelago on a naval chart. The performer navigates freely from one 'island' to another, each being 'open' in that certain elements of it are determined only at the moment of performance. In later works, Boucourechliev developed this idea replacing 'islands' with 'seamarks' (*Amers*, 1972–3, in which the elements are laid out in the form of a compass rose), or with 'constellations' and 'satellites', as in *Six Etudes d'après Piranèse* (1975) and *Orion I* (1979).

Most of Boucourechliev's works since 1977 incorporate 'archipelagos' into an otherwise fully notated structure. *Ombres* (1970) is an especially powerful homage to Beethoven which incorporates fragments of the latter's string quartets, and in the extraordinary *Miroir II* (1990) Boucourechliev shows he has no fear of the simplest of intervals and of relatively straightforward counterpoint. The erstwhile pianist comes to the fore in the tempestuous fireworks of the Piano Concerto or the joyous exuberance of *Orion III*, while the works that include the soprano voice reveal Boucourechliev's particularly intense lyricism (*Lit de neige*, 1984; *Le miroir*, 1987) and his fine sense of dramatic tension, as in *Grodek* (1963, rev. 1969) and the opera *Le nom d'Oedipe* (1977).

Boucourechliev's activity as a thinker and writer has always gone hand in hand with his practice as a composer. He contributed music criticism and many articles to such journals as the *Nouvelle revue française*, *Réforme* and *Preuves*, the most significant of which have been collected in *Dire la musique* (1995). He also published important studies of Beethoven, Schumann, Stravinsky and Chopin, as well as a fundamental text on musical language, *Le langage musical* (1993). His teaching activities included a period as assistant to Olivier Messiaen at the Paris Conservatoire (1974–6), and seven years teaching musicology at the University of Aix-en-Provence (1977–84). He was subsequently guest professor at the Ecole Normale Supérieure in Paris for seminars on contemporary music

(1986–7). He was a producer for Radio France and the author of television programmes. His awards included the Grand Prix Musical de la Ville de Paris (1976) and the Grand Prix National de la Musique (1984). He was also made Commandeur des Artes et des Lettres and, in 1994, was admitted to the Légion d'Honneur.

Bouffons, Les (Fr.: 'comedians'). 15th- and 16th-century costumed dancers who performed the MORESCA or MATACHIN. *See also* QUERELLE DES BOUFFONS.

Bouffons, Querelle des. *See* QUERELLE DES BOUFFONS.

Boughton, Rutland (*b* Aylesbury, 23 Jan 1878; *d* London, 25 Jan 1960). English composer and writer. He was educated at Aylesbury Grammar School (although musically self-taught) and apprenticed in 1892 to a London concert agency. His early compositions, while immature and derivative, drew sympathetic interest, and a fund was raised to pay for a brief period of study under Stanford and Walford Davies at the RCM. He endured great poverty after he left, but gradually he made his way as a composer. He married in 1903. In 1905 Granville Bantock offered him a teaching post at the Midland Institute School of Music, Birmingham, where he remained until 1911, working as a singing teacher, conductor and composer of choral and orchestral music. Socialism, of the William Morris variety, and the principles of Wagnerian music drama now combined to play a crucial part in his development. Together with the poet Reginald Buckley he declared his aims in a booklet entitled *Music Drama of the Future* (1911). He left Birmingham in the same year, driven out by the gossip surrounding his relationship with the artist Christina Walshe. After a further period of hack-work in London, Boughton and his two collaborators (Buckley and Walshe) announced plans for a festival, to take place at Glastonbury in 1913. His aims were to create a commune of artists, living and working together; to compose music drama along Wagnerian lines, but with a specifically English choral bias (he coined the term 'choral drama'); and to centre his work on a cycle of Arthurian dramas, of which the first, *The Birth of Arthur*, had already been written.

Gossip again confounded his plans, but in 1914 he was able to mount the first Glastonbury Festival. It had as its main event the first performance of *The Immortal Hour*. The practical difficulties of financing and operating a series of festivals soon modified Boughton's schemes. Wagnerian grandeur gave way to something much simpler, practical and individual (folksong being the purifying musical influence). The Glastonbury Assembly Rooms did duty as a theatre, with a grand piano for orchestra. Friends and pupils, local and imported, amateur and professional, did everything else. Miraculously the venture prospered, and, save for a brief interruption during Boughton's military service, festivals were given several times each year until 1926. The festivals included some 350 staged performances (including productions of six full-scale operas by Boughton himself and the revival of relatively unknown works by Gluck, Purcell, Blow, Matthew Locke and others), together with more than 100 chamber concerts. From 1920 the Glastonbury Players made regular tours, and in 1924 the Glastonbury Festival Players introduced Laurence Housman and his cycle of *Little Plays of St Francis*. The entire venture was concluded in July 1927, partly as a result of Boughton's extramarital adventures (he was now married to his third and last wife) and partly because he had involved the company in active political support of the 1926 General Strike. However, by this time he was famous. Barry Jackson staged *The Immortal Hour* at his Birmingham Repertory Theatre in 1921, and in London in the following year. The work received 216 consecutive performances, a revival of 160 performances in 1923, and further successful revivals in 1926 and 1932. In 1924 *Alkestis* was produced at Covent Garden.

With the collapse of plans at Glastonbury, Boughton moved to a small farm in Gloucestershire. Two more festivals were held – at Stroud (1934) and at Bath (1935) – but their success was limited. Boughton retired from public activities and spent his time in farming, writing and composing, eventually completing the Arthurian cycle in 1945. He remained politically active, as a member of the Communist Party (1926–9, 1945–56), and often incorporated his ideas in books on music (*Bach*, 1930; *The Reality of Music*, 1934) and the many articles he contributed to *The Sackbut*. He was granted a civil list pension in 1937.

Only Boughton's early music can be called Wagnerian. From *The Immortal Hour* onwards he married a strong vein of simple melody, much influenced by folksong, to a quasi-symphonic orchestral style and a bold use of the

chorus, derived partly from oratorio and partly from the operas of Gluck. Though his musical ideas are striking and apt, they tend to resist effective symphonic development and so those works that are simpler in style (*Bethlehem*, for example) are more successful. Nevertheless, his capacity to develop his ideas grew and in *The Queen of Cornwall* came near to mastery. Boughton's harmonic vocabulary, like his melodic style, remained conservative. The harmony is particularly simple in *Alkestis*, which was intended partly as a protest against the merely fashionable use of dissonance. His handling of the orchestra is at all times imaginative and shows a practical concern for an effect. In this respect the published vocal scores of his operas reveal little. *Bethlehem* and *The Immortal Hour*, however, are available in full score. Though his elaborate use of the chorus can sometimes impede the dramatic flow, it can also lend his operas an uncommon degree of dignity.

Boughton's operatic shortcomings are most apparent where he wrote his own texts (as in the Arthurian cycle). Passages of effective theatre are nullified by passages that are irredeemably static, and made to appear all the more inadequate by painful lapses of literary taste. The Arthurian cycle has never been performed as a whole. Composed between 1908 and 1945 it is not surprising that it fails to hang together as a unity. The largely irrelevant central episode, *The Lily Maid*, stands out as a moving story clothed in exceptionally fine music. Paradoxically, for all his political didacticism, it was only when Boughton was concerned with a human drama with which he could identify personally that his considerable, and highly individual, operatic skills sprang to life.

The formation of the Rutland Boughton Music Trust (1977) has led to a series of recordings on Hyperion, including *The Immortal Hour*, *Bethlehem*, the *Third Symphony*, Oboe Concerto no.1, Flute Concerto, Concerto for String Orchestra and string quartets nos.1 and 2. These have radically changed for the better the received image of his music and relative importance.

WORKS
(*selective list*)

STAGE

first performed at Glastonbury, Assembly Rooms, unless otherwise stated

Eolf (op, 3, Boughton), 1901–3, unorchd, unperf.
The Chapel in Lyonesse (dramatic scene, Boughton, after W. Morris), 1904; Aug 1914 [later used in Galahad]
The Birth of Arthur [Uther and Igraine] (choral drama, 2, R. Buckley and Boughton), 1908–9; 16 Aug 1920 [no.1 of the Arthurian cycle]
The Immortal Hour (music drama, 2, after F. Macleod), 1912–13; 26 Aug 1914, vs (London, 1920)
Bethlehem (choral drama, 2, Boughton, after Coventry Nativity Play and trad. carols), 1915; Street, Crispin Hall, 28 Dec 1915, vs (London, 1920)
The Round Table (music drama, prol., 3, Buckley and Boughton), 1915–16; 14 Aug 1916 [no.2 of the Arthurian cycle]
Agincourt (dramatic scene, after W. Shakespeare: *Henry V*), 1918; 26 Aug 1924 (London, 1926)
The Moon Maiden (choral dance, 1, after Jap. nō play, trans. M. Stopes), 1918; 23 April 1919 (London, 1926)
Alkestis (music drama, 2, Boughton, after G. Murray's trans. of Euripides), 1920–22; 26 Aug 1922 (London, 1923)
The Seraphic Vision (dramatic scene, L. Housman), 20 Aug 1924
The Queen of Cornwall (music drama, 2, Boughton, after T. Hardy), 1923–4; 21 Aug 1924 (London, 1926)
The Ever Young (music drama, 5 scenes, Boughton), 1928–9; Bath, Pavilion, 9 Sept 1935
The Lily Maid (music drama, 3, Boughton), 1933–4; Stroud, Church Room, 10 Sept 1934 [no.3 of the Arthurian cycle]
Galahad (music drama, 4 scenes, Boughton), 1943–4; unperf. [no.4 of the Arthurian cycle, scene ii consists of The Chapel in Lyonesse]
Avalon (music drama, 2, Boughton), 1944–5; unperf. [no.5 of the Arthurian cycle]
2 ballets; incidental music for 16 Little Plays of St Francis (L. Housman)

ORCHESTRAL

Sym. no.1 'Oliver Cromwell', 1904; Sym. no.2 'Deirdre', 1927; Conc., c, ob, str, 1936; Conc., g, ob, str, 1936; Conc., fl, str, 1937; Conc., str orch, 1937; Sym. no.3, b, 1937; Conc., tpt, str, 1943; Reunion Variations, 1945
Also 4 sym. poems, 4 ovs.

CHAMBER AND INSTRUMENTAL

Celtic Prelude, vn, vc, pf, 1917; Sonata, vn, pf, 1921; Str Qt no.1, A, 1923; Str Qt no.2, F, 1923; Trio, fl, ob, pf, 1925; Ob Qt no.1, 1930; Str Trio, 1944; Ob Qt no.2, 1945; Pf Trio, 1948; Sonata, vc, pf, 1948

CHORAL

The Skeleton in Armour (H. Longfellow), chorus, orch, 1898; The Invincible Armada (Bulwer-Lytton, after F. von Schiller), chorus, orch, 1901; Midnight (E. Carpenter), chorus, orch, 1907; The City (H.B. Binns), SATB, 1909
6 Spiritual Songs, SATB, 1910; 6 Celtic Choruses, SATB, 1914
The Cloud (P.B. Shelley), SSA, pf, 1923; Pioneers (W. Whitman), 4vv, orch, 1925; Child of Earth (Binns), 4vv, unacc., 1927
Also 8 large-scale works for chorus, orch; *c*30 partsongs

MICHAEL HURD

Bouhy, Jacques(-Joseph-André) (*b* Pepinster, 18 June 1848; *d* Paris, 29 Jan 1929). Belgian baritone and singing teacher. He studied at the Conservatoire Royal in Liège and in Paris, where he made his début at the Opéra in

1871 as Méphistophélès in *Faust*. At the Opéra-Comique, where he was first heard as Mozart's Figaro (1872), he created the title role of Massenet's *Don César de Bazan* the same year, sang Hoël in *Le pardon de Ploërmel* (1874) and Escamillo at the première of *Carmen* (3 March 1875). At the Théâtre-Lyrique he took part in Massé's *Paul et Virginie* (1876) and Salvayre's *Le bravo* (1877), both first performances. Returning to the Opéra (1878–9), he sang Alphonse (*La favorite*), Thomas' Hamlet and Don Giovanni. In 1880 at St Petersburg he sang Méphistophélès in Gounod's *Faust* and the title role in Boito's *Mefistofele*, and in 1882 he appeared at Covent Garden in *Faust* and *Carmen*. After some years in the USA, where he founded and directed the National Conservatory of Music in New York, he returned to Paris to sing the High Priest in the first staged performance there of Saint-Saëns's *Samson et Dalila* (Eden-Théâtre, 1890). From 1904 to 1907 he was again in the USA, and later he taught singing in Paris. His voice was praised by Massenet early in the singer's career, and his rendering of the Toreador's Song always evoked the warmest applause, even at the first, unsuccessful, performance of *Carmen*.

ELIZABETH FORBES

Bouilly, Jean-Nicolas (*b* La Coudraye, nr Tours, 23/24 Jan 1763; *d* Paris, 25 April 1842). French librettist. He was born shortly after his father's death, but was lovingly raised by his mother and his stepfather, a lawyer and professor of natural philosophy. Though aware of the boy's talent for writing, the stepfather recommended law and Bouilly was duly presented at the bar of the Paris Parlément in 1787. The outbreak of the Revolution caused him to return to Tours, where he practised law and began to write theatre pieces. His first libretto, *Pierre le Grand*, found favour with the administration of the Opéra-Comique and with Mme Dugazon, a leading singer, who helped persuade Grétry to set it. Though the work had a successful première, its royalist sentiments later caused its banishment from the stage. Bouilly became engaged to Grétry's daughter, Antoinette, but she died of tuberculosis before the wedding could take place.

At the period of the Terror, Bouilly returned to Tours, where he became head of the Military Commission. In the course of his duties he was involved in the supposedly true incidents that formed the bases of his best-known librettos, *Léonore, ou L'amour conjugal* (set by Gaveaux, later transformed into Beethoven's Fidelio) and *Les deux journées* (Cherubini). In 1795 he returned to Paris, where he worked for the Committee of Public Instruction but left after three years to devote himself to writing. He began to branch out from *opéra comique*, producing several plays and vaudevilles (most successful was *Fanchon la vielleuse*, 1801, a collaboration with Joseph Pain). Two collections of moral tales for children were often reprinted, and his memoirs, *Mes récapitulations*, provide an interesting if idealized picture of his life and times.

Sedaine recognized in Bouilly a kindred spirit and referred to the younger man as his successor. Indeed *Pierre le Grand*, Bouilly's first libretto, is already marked by the kind of dramatic truth and realism that made Sedaine the leading 18th-century French librettist. The cast presents a cross-section of society, characterized not only by their actions and costumes but also by their manners of speaking. Bouilly's writing is always clear in its moral purpose and sentimental enough to have earned him the title *poète lachrymal*. Pierre teaches that a king need not have riches to be happy, while *Léonore* is a tale of virtue rewarded and *Les deux journées*a picture of the simple goodness of working people. Bouilly could also produce delightful comedy, as *Une folie* demonstrates, and his qualities were sought out by leading composers. Though his manner of *sensibilité*went out of style by the second decade of the 19th century, he was nevertheless respected as a skilled writer and a sure dramatic craftsman.

WORKS

Pierre le Grand (oc), Grétry, 1790; *La famille américaine* (oc), Dalayrac, 1796; *Le jeune Henri* (oc), Méhul, 1797; *La mort de Turenne* (pièce historique, with J. V. A. Cuvellier), G. J. KARIN PENDLE (text), K. M. KNITTEL (work-list)

Bouissou, Sylvie (*b* Noisy-le-Sec, Seine-St-Denis, 8 July 1956). French musicologist. She received her musical training at the Versailles Conservatory (1974–81) and then at the Paris Conservatoire (1980–86), where she studied analysis, the history of music, and musicology. Concurrently, she studied music, and later musicology, with Jean Mongrédien at the University of Paris IV, gaining the doctorate in 1986 with a thesis on Rameau's *Les Boréades*. From 1985 to 1987 she held an Académie de France research scholarship at the Villa Medici, Rome, and in 1987 was appointed to teach at Tours University. In 1988 she became a researcher at the CNRS and in 1996 director of the Institut de Recherche sur le Patrimoine Musical en France.

Bouissou's chief area of research is French Baroque opera, particularly the works of Rameau. Her role in French musicology, however, goes further by virtue of two major enterprises she has undertaken. In 1991 she founded the Société Jean-Philippe Rameau, whose main aim is to publish Rameau's *Opera omnia* (work began on the projected 38 volumes in 1996), and in 1993 she initiated plans for *Musica gallica*, a collection of critical

Lili Boulanger

editions of French musical heritage, becoming its director in the same year. The originality of this series is that it brings together a number of public institutions and private patrons, thus playing a fundamental role in music publishing of a scholarly nature in France.

Boul, John [Jan]. *See* BULL, JOHN.

Boulanger, (Marie-Juliette Olga) Lili (*b* Paris, 21 Aug 1893; *d* Mézy, 15 March 1918). French composer. She grew up in a musical household, with both parents (Raïssa Mischetzky and Ernest Boulanger) and her sister Nadia trained or active as composers and performers. Her immense talent was recognized at the age of two, and she received a musical education from early childhood on. In 1895 she fell ill with bronchial pneumonia, after which her immune system was severely weakened. For the rest of her life she was almost constantly ill, with either passing infections or outbreaks of the chronic condition of intestinal tuberculosis which led to her death in 1918. Her frail health conditioned her life, through the need of constant care, and her musical career, as she had to rely on private composition and instrumental tuition rather than a full musical education at the Conservatoire. In December 1909, after her sister gave up her attempts to win the Prix de Rome, she decided to compete for the prize (her father Ernest Boulanger had won it in 1835). She prepared for the competition studying privately with Georges Caussade and, from January 1912, with Paul Vidal when she entered his composition class at the Conservatoire. After an unsuccessful first attempt in the 1912 competition, she won the Prix de Rome in 1913 with the cantata *Faust et Hélène*. Her success made the international headlines, as she was the first woman to win the prize for music. As a result, she was able to sign a contract with Ricordi that offered her an annual income in return for the right of first refusal on publication of her compositions.

Boulanger's first sojourn in the Villa Medici in Rome was cut short by the outbreak of World War I. In Rome she finished several compositions, including the song cycle *Clairières dans le ciel*. On her return to Paris she founded the Comité Franco-Américain du Conservatoire National, an organization which offered material and moral support to musicians fighting in the war. In 1916 she again spent several months in Rome, working on her five-act opera *La princesse Maleine*, the *Vieille prière bouddhique* and

her large-scale settings of Psalms cxxix and cxxx. She had to return home because of a rapid deterioration in her health. In the final two years of her life she concentrated her energies on trying to finish compositions begun earlier, in particular *La princesse Maleine*. In February and March 1918 she dictated to her sister her last composition, *Pie Jesu* for soprano, string quartet, harp and organ. She was buried in Montmartre cemetery.

Boulanger's choice and setting of texts shows her concern with social and political issues of her time. The outbreak of World War I is reflected in her choice of *La princesse Maleine* (a fairy tale with war as its central theme) and in the texts of her choral compositions: Psalms xxiv, cxxix and cxxx, and the prayer for peace, *Vieille prière bouddhique* (the eclectic mix reflects her fervent but open-minded Catholicism). Her text-setting followed earlier models of clear prosody as developed by Massenet, Fauré and Debussy. But whereas here and in terms of musical form she relied on such models, her quest for harmonic and instrumental colour encouraged innovative experiments, which are also reflected in her sketches. In her final works, in particular the *Pie Jesu*, Boulanger began to explore polytonality. Her imaginative use of orchestral colours, as at the beginning of her setting of Psalm 129 with its dissonant organ rumble from which the melodic line emerges, was later to influence composers such as Honegger in his *Jeanne d'Arc au bûcher* (1934–5).

WORKS

STAGE

La princesse Maleine (op, 5, M. Maeterlinck and T. Ricordi), 1911–18, unfinished

VOCAL

Choral: Ps cxxix 'Ils m'ont assez opprimé', Bar, male chorus, orch, 1910–16; Ps cxxx 'Du fond de l'abîme', A, T, chorus, org, orch, 1910–17; Les sirènes (C. Grandmougin), Mez, chorus, pf, 1911; Sous bois (P. Gille), chorus, orch, 1911; Soleils de Septembre, chorus, pf, 1911–12, inc.; Renouveau (A. Silvestre), chorus, 4 solo vv, pf/orch, 1911–13; Hymne au soleil (C. Delavigne), A, chorus, pf/orch, 1912; Le soir, chorus, pf/orch, 1912; Soir d'été, chorus, pf, 1912, inc.; La source (C. Leconte de Lisle), chorus, orch, 1912; La tempête (Pendant la tempête) (T. Gautier), chorus, pf, 1912; Pour les funérailles d'un soldat (A. de Musset), Bar, chorus, orch, 1912–13; Soir sur la plaine (A. Samain), S, T, chorus, orch, 1913; Vieille prière bouddhique (Buddhist prayer from *Visuddhimagga*, trans. S. Karpelès), T, chorus, orch, 1914–17; Ps xxiv 'La terre appartient à l'Eternel', T, chorus, org, orch, 1916

Other vocal: Maïa (cant., F. Beisser), S, T, B, pf, 1911; Reflets (M. Maeterlinck), 1v, pf/orch, 1911; Frédégonde (cant., C. Morel), S, T, B, pf, 1911–12, inc.; Attente (Maeterlinck), 1v, pf, 1912; Le retour (G. Delaquys), 1v, pf, 1912 [orig. version: La nef légère, chorus, pf, 1912]; 2 vocal fugues, 4vv: 1912, 1913; Faust et Hélène (cant., E. Adenis, after J.W. von Goethe), Mez, T, Bar, orch, 1913; Clairières dans le ciel (F. Jammes), cycle of 13 songs, T, pf, 1913–14 [nos. 1, 5–7, 10–13 orchd, 1915–16]; Dans l'immense tristesse (B. Galéron de Calone), 1v, pf, 1916; Pie Jesu, S, str qt, hp, org, 1918

INSTRUMENTAL

Valse, E, pf, 1905–6, inc.; Nocturne, fl/vn, pf/orch, 1911 [orig. Pièce courte]; Prélude, B, pf, 1911; Prélude, D♭, pf, 1911; Morceau de piano: thème et variations, pf, 1911–14; Cortège, (vn/fl, pf)/pf, 1914; D'un jardin clair, pf, 1914; D'un vieux jardin, pf, 1914; D'un matin de printemps, (vn/fl, pf)/orch, 1917–18; D'un soir triste, (str trio/vc, pf)/orch, 1917–18

LOST OR DESTROYED WORKS

La lettre de mort (E. Manuel), 1v, pf, 1906; Pss cxxxi, cxxxvii, solo vv, orch, 1907; Ave Maria, 1v, org, 1908; Apocalypse, solo vv, chorus, orch, 1909, inc.; 1 Corinthians xiii, chorus, orch, 1909; 5 études, pf, 1909; Pss i, cxix, chorus, orch, 1909; 3 études, pf, 1911; 2 études, pf 4 hands, 1912; Sonate, vn, pf, 1912–16; Alyssa (cant.), S, T, B, orch, 1913; Pièce, vc, pf, 1914; Pièce, ob, pf, 1914; Pièce, tpt, small orch, 1915; Poème symphonique, orch, 1915–16, inc.; Marche funèbre, small orch, 1916; Marche gaie, small orch, 1916; Sicilienne, small orch, 1916; Les pauvres (E. Verhaeren), 1v, pf, inc.; Ps cxxvi, chorus, orch, incl.

ANNEGRET FAUSER (work-list with ROBERT ORLEDGE)

Boulanger, (Juliette) Nadia (*b* Paris, 16 Sept 1887; *d* Paris, 22 Oct 1979). French teacher, conductor and composer, sister of Lili Boulanger. Her father, Ernest Boulanger (1815–1900), was a composer (winner of the Prix de Rome in 1836) and singing teacher at the Paris Conservatoire; her mother, of Russian origin, had been one of his students. Nadia Boulanger entered the Paris Conservatoire at the age of ten, studying harmony with Paul Vidal and composition with Widor and Fauré; she also studied the organ privately with Vierne and Guilmant. She first came to public attention in 1908, when she wrote an instrumental fugue in a preliminary round for the Prix de Rome, rather than the vocal fugue required, resulting in a scandal. She progressed to the final round, however, and was placed second with her cantata *La sirène*.

Boulanger was promoted as a concert pianist and organist by the virtuoso pianist Raoul Pugno; from 1904 until his death in 1914, they often appeared on the same platform. They also collaborated as composers on a song cycle, *Les heures claires* (1909), and a four-act opera, *La ville morte*, to a libretto by D'Annunzio. A complete vocal score of the opera and the orchestration of Acts 1 and 3 survive, and the work was to have been staged in 1914, though due to Pugno's death and the events leading up to World War I, it was never performed. Boulanger's works

as a solo composer include over 30 songs, chamber music and a *Fantaisie variée* (1912) for piano and orchestra, written for Pugno. Her musical language is often highly chromatic (though always tonally based), and Debussy's influence is apparent in her fondness for modally-inflected melodic lines and parallel chordal progressions.

Boulanger stopped composing in the early 1920s. She was greatly affected by the premature death of her sister Lili, whom she considered to be more gifted than herself, and throughout her life, Boulanger assiduously promoted her sister's music. It is likely that her lack of confidence in her own ability as a creative artist and her self-critical attitude (the *Fantaisie variée* bears signs of extensive revision and is not performable in its present state) led her to concentrate on teaching. Nadia Boulanger is remembered as one of the foremost composition teachers of the 20th century and one of the first professional female conductors. She taught privately from the age of 16 until shortly before her death; her first pupils included her sister, who studied fugue with her in the summer of 1911.

Boulanger's first official post was as a teacher of piano and piano accompaniment at the Conservatoire Femina-Musica in Paris (1907). Later she was one of the first staff members of the Ecole Normale de Musique, where she taught harmony, counterpoint, music history, analysis, organ and composition (1920–39), and keyboard harmony (from 1957). She was a founder member of the American Conservatory at Fontainebleau in 1921, becoming its director in 1948. She was also professor of piano accompaniment at the Paris Conservatoire (1946–57). She was renowned as a charismatic lecturer and penetrating analyst.

Boulanger was also an important figure in American musical life in the 20th century. She toured the country as an organist in 1925, giving the première of Copland's

Nadia Boulanger

Symphony for organ and orchestra, and lived there during World War II, conducting the Boston SO, Philadelphia Orchestra and New York PO and teaching at Wellesley College, Radcliffe College and the Juilliard School. After the war, she often returned to the United States for lecture tours. Her American students at Fontainebleau, or at her Wednesday afternoon classes in her Paris home, included Bernstein, Carter, Copland, Harris and Virgil Thomson. Although Boulanger made her conducting début in 1912, directing her own music, it was not until 1934 that she made her first public appearance as a conductor in Paris. In 1936 she became the first woman to conduct the LPO. She often promoted the music of her sister and pupils, and had a particular fondness for Stravinsky's works, conducting the première of his *Dumbarton Oaks* in Washington (1938). In 1936, she founded a vocal ensemble (featuring both professional and amateur performers) whose repertory ranged from 16th-century French music to works by contemporary composers. They recorded madrigals by Monteverdi in 1937 with Boulanger at the piano, a disc which was the most comprehensive survey of his music then on record. Their other recordings included Brahms's *Liebeslieder* waltzes, accompanied by Boulanger and one of her young protégés, Dinu Lipatti.

Boulanger was named *maître de chapelle* to Prince Pierre of Monaco (an honorary post) in the late 1940s, remaining in this post during Prince Rainier's reign; she was also president of the Prince Pierre composition competition, and frequently appeared as an adjudicator for international piano competitions. Despite increasing deafness and failing sight, she continued working almost until the end of her life. Among many honours and decorations, Boulanger received honorary doctorates from Oxford and Harvard, and an honorary fellowship of the Royal College of Music, she was a member of the American Academy of Arts and Sciences and a Grand Officier de la Légion d'Honneur, and she was presented with the Order of St Charles of Monaco and the Order of the Crown of Belgium.

WORKS
(selective list)

Vocal: Allons voir sur le lac d'argent (A. Silvestre), 2vv, pf, 1905; Ecoutez la chanson bien douce (P. Verlaine), 1v, orch, 1905; Les sirènes (C. Grandmougin), female chorus, orch, 1905; A l'aube (Silvestre), chorus, orch, 1906; A l'hirondelle (A. Sully Prudhomme), chorus, orch, 1908; La sirène (E. Adenis/Desveaux), 3vv, orch, 1908; Dnégouchka (G. Delaquys), 3vv/orch, 1909

Over 30 songs for 1v, pf, incl.: Extase (V. Hugo), 1901; Désepérance (P. Verlaine), 1902; Cantique de soeur Béatrice (M. Maeterlinck), 1909; Une douceur splendide et sombre (A. Samain), 1909; Larme solitaire (H. Heine), 1909; Une aube affaiblie (Verlaine), 1909; Prière (Bataille), 1909; Soir d'hiver (N. Boulanger), 1915; Au bord de la nuit, Chanson, Le couteau, Doute, L'échange (C. Mauclair), 1922; J'ai frappé (R. de Marquein), 1922

Chbr and solo inst: 3 pièces, org, 1911, arr. vc, pf; 3 pièces, pf, 1914; Pièce sur des airs populaires flamands, org, 1917; Vers la vie nouvelle, pf, 1917

Orch: Allegro, 1905; Fantaisie variée, pf, orch, 1912

With Raoul Pugno: Les heures claires (E. Verhaeren), 8 songs, 1v, pf, 1909; La ville morte (op, 4, G. d'Annunzio), 1910–13

CAROLINE POTTER

Boulez, Pierre (*b* Montbrison, Loire, 26 March 1925). French composer and conductor. Resolute imagination, force of will and ruthless combativeness secured him, as a young man, a position at the head of the Parisian musical avant garde. His predecessors, in his view, had not been radical enough; music awaited a combination of serialism with the rhythmic irregularity opened up by Stravinsky and Messiaen. This call for a renewed modernism was widely heard and widely followed during the 1950s, but its appeal gradually weakened thereafter, and in the same measure his creativity waned. He began to be more active as a conductor, at first specializing in 20th-century music, but then, in the 1970s, covering a large and general repertory. Towards the end of that decade he turned his attention to an electro-acoustic music studio built for him in Paris, where he hoped to resume the effort to create a new musical language on a rational basis. After a brief hiatus, though, conducting became again his principal means of expressing his independence and clarity of vision.

1. Compositional career. 2. Conducting. 3. Compositional style.

1. COMPOSITIONAL CAREER. As a boy Boulez divided his attention between music and mathematics. He sang in the choir of his Catholic school at St Etienne, he enjoyed playing the piano; but his early aptitude for mathematics marked him out – at least in the eyes of his father, a steel industrialist – for a career in engineering. On leaving school in 1941, he spent a year attending a course in higher mathematics at Lyons with a view to gaining admission to the Ecole Polytechnique in Paris. During that year he made what progress he could with music, cultivating his proficiency as a pianist and acquiring a grounding in theory.

It was the latter which stood him in good stead when he moved to Paris in 1942 and, against his father's wishes, opted for the Paris Conservatoire rather than the Ecole Polytechnique; he had failed the pianists' entrance examination. After three years he took a *premier prix* in harmony, having attended Messiaen's famous harmony class. Along with some of his contemporaries in Messiaen's class, he took exception to the hidebound curriculum of the Conservatoire and looked beyond its walls for instruction in counterpoint. This he studied privately with Andrée Vaurabourg, the wife of Arthur Honegger.

1. Pierre Boulez, 1979

It was in Messiaen's class that Boulez, respected as well as encouraged by his teacher, first gave proof of exceptional abilities as a music analyst. Quick to detect genuine originality of craftsmanship, he equally quickly lost patience with music whose renown rested on anything less substantial. He viewed composition as a form of aesthetic research and demanded that it be conducted on stringently scientific (that is, logical) lines; in this light, the cult of personal stylistic development – a hangover from Romanticism – counted for nothing. Infected by a common zeal, Boulez and a number of his fellow pupils demonstrated their protest vocally at performances of works whose modernity they considered a facile and arbitrary disguise; not even the personal reputation of Stravinsky was sacrosanct, and many a lesser one was mercilessly deflated.

His own aesthetic researches at the time had led him to 'a very clear awareness of the necessity for atonality'. When Schoenberg's pupil Leibowitz began to introduce dodecaphonic music to the French public, Boulez readily applied to him for instruction in serial techniques. Within a year his earliest published compositions (*Notations*, the Flute Sonatina, the First Piano Sonata, *Le visage nuptial*) had taken shape; his inventive energies had taken the route suggested by Schoenberg's Wind Quintet op.26 (which he had heard in 1945) and by the later works of Webern. Again, Boulez was subsequently to write: 'Any musician who has not felt ... the necessity of the dodecaphonic language is OF NO USE ('Eventuellement ...', 1952, in Boulez, 1966)

On the recommendation of Honegger, Boulez was appointed musical director of the new Compagnie Renaud-Barrault in 1946. He thus laid the solid foundations of his career as a conductor with performances of theatre music, including specially composed scores by Auric, Poulenc and Honegger himself. (Roger Desormière, from whom he received guidance, could be considered his one 'teacher' of conducting.) Boulez was in charge of Milhaud's music for Claudel's *Christophe Colomb* when the company's production of the play was recorded on disc, and in 1955, the penultimate year of his association with the company, Boulez himself wrote the incidental music for their production of the *Oresteia* at the Bordeaux Festival.

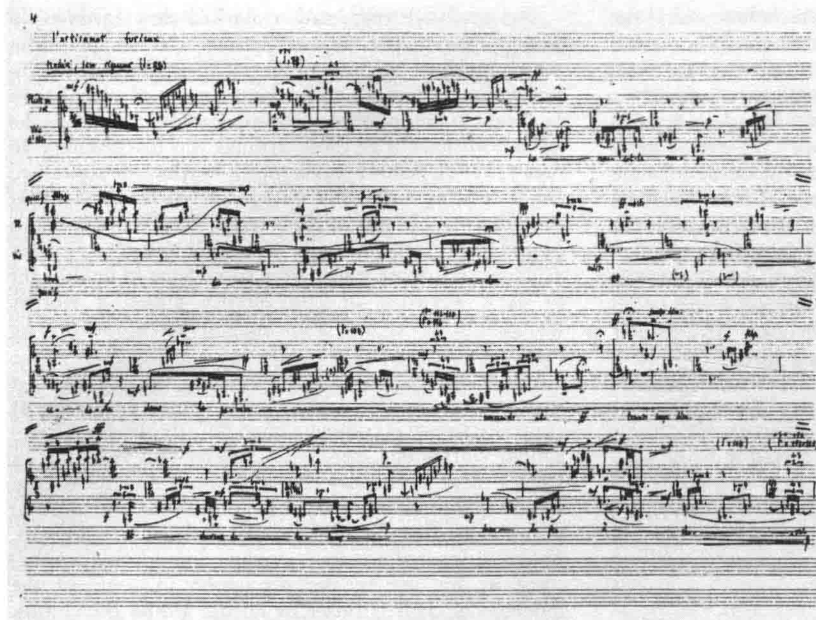
The first works that made Boulez's reputation as a composer were those that came after his début pieces: the Second Piano Sonata and *Le soleil des eaux*. The latter, first given as a cantata in Paris in July 1950, grew out of some incidental music Boulez wrote for a radio production of Char's work of the same name, broadcast in April 1948. The music of the original version, reworked, became 'Complainte du lézard amoureux', and Boulez added to this a second movement, 'La sorgue'. The scoring of the cantata, both impressionistically delicate and violent, has a hallucinatory clarity which accords well with Boulez's surrealist intentions.

In contrast with the one-movement Sonatina and the two-movement First Sonata, Boulez's Second Sonata is a monumental work in four movements. Avowedly modelled on Beethoven, its movements follow a sufficiently Classical pattern for the many facets of Boulez's style to be systematically deployed. The work's reputation grew less from relatively obscure early performances by Yvette Grimaud and Yvonne Loriod than from circulation of the score, which was published in 1950. This composition, more than any other, first spread Boulez's fame abroad: its first performance in Darmstadt (by Loriod in 1952) was one of the most eagerly awaited musical events of the postwar years, and through the advocacy of Tudor it reached the ears of the American avant garde.

Immediately afterwards came the *Livre pour quatuor*, which foreshadows much of the later development of Boulez's musical thinking. The work is in the form of a collection of movements, and it is left to the later development of Boulez's musical thinking. The work is in the form of a collection of movements, and it is left to the performers to select which will be given at any one performance. Thus the *Livre* anticipates those works of the late 1950s in which the performer is allowed to choose his own path through the music. Its immediate significance, however, was as a pointer towards the technique of 'total serialization'. Stimulated by the last works of Webern and by Messiaen's *Quatre études de rythme* (1949–50), Boulez sought to develop a technique whereby the principles of serialism could be made to govern the timbre, duration and intensity of each sound, as well as its pitch. Some of the movements of the *Livre pour quatuor* may be considered as first sketches towards such a technique.

By 1951 Boulez had arrived at a stage where he could commit his first essays in the new technique to paper – and to magnetic tape. The resources of the studio for *musique concrète* run by Schaeffer under the auspices of French radio enabled Boulez to compose two *Etudes* in which the precise organization of timbres, durations and intensities could remain immune from the hazards of human performance. These hazards proved to be a real stumbling-block in *Polyphonie X* for 18 soloists (1950–51), which was composed for and performed at the 1951 Donaueschingen Festival. The last, and most successful, of Boulez's essays in total serialization was *Structures I* for two pianos (1951–2). Organization of timbres was here replaced by that of 'modes of attack', and the treatment of durations in particular became more flexible in the last two of the work's three sections. The first section was performed at a Paris concert in 1952 by Messiaen and the composer.

At the same time Boulez completed a first revision of his early cantata, *Le visage nuptial*. Originally written for two vocal soloists and a chamber ensemble, the work was reorchestrated for very much larger forces including a women's chorus. Densely orchestrated and richly polyphonic, the work reaches towards lyrical paroxysm and its style shares certain features with both Messiaen and the Expressionism of Berg. In two of its five movements (each a setting of a poem by Char) Boulez freely used quarter-tones (though he expunged these from his revision of 1986–9). It was not until December 1957 that the five-movement version was given its first performance, under the composer's direction, in Cologne.



The next five years saw a marked slowing down in Boulez's production as a composer. It was a period in which much of his musical thinking found expression in articles on technique and aesthetics, many of which are to be found in the collection *Relevés d'apprenti*. Perhaps the most notorious of all these writings was his 'obituary' in *Score* (1952) 'Schönberg est mort', in which he continued his protest against what he considered the inadequate working-out of musical discoveries. But this was also a period during which Boulez won wide and even popular acclaim for a work which very soon came to be thought of as a keystone of 20th-century music, a worthy companion to *The Rite of Spring* and *Pierrot Lunaire*: *Le marteau sans maître* (1953–5).

Unlike Boulez's earlier settings of Char's poetry, *Le marteau sans maître* is scored for a small ensemble; its contralto soloist is complemented only by alto flute, xylorimba, vibraphone, percussion, guitar and viola (fig.2). Char's three poems are embedded in a nine-movement structure of interlacing settings and related instrumental movements. Recalling the cellular style of late Webern, Boulez cultivated a certain rhythmic monotony, emphasized by his use of the percussion in some of the movements. This is offset by abrupt tempo transitions, passages of broadly improvisatory melodic style, and – not least of all – the fascination of exotic instrumental colouring, underlining the basically static conception of the work.

In 1954, supported by the Compagnie Renaud-Barrault and by the patronage of Suzanne Tézenas, Boulez was able to found the Domaine Musical series of concerts. New works were given carefully prepared performances in programmes which included only those works of the past thought to be of special relevance to contemporary music. These 'composers's concerts' found an enthusiastic following in Paris, and set a pattern which has since been widely and successfully imitated. The Domaine Musical gave European premières of works by Stravinsky, Messiaen and many younger composers of different nationalities. Its concerts became a regular feature of Parisian musical life, and in 1967 Boulez was succeeded as musical director by Amy.

Following the success of *Le marteau sans maître*, Boulez began to be in considerable demand as a teacher of composition. He taught at Darmstadt annually from 1954–6 and four times again between 1960 and 1965; he was also professor of composition at the Basle Musik-Akademie (1960–63), a visiting lecturer at Harvard University (1963) and an active private teacher. It was at Darmstadt that he gave the series of lectures which were to become *Penser la musique aujourd'hui*. The book outlines in systematic fashion the developments of serial technique which followed Boulez's preoccupation with total serialization; in particular, it relates to the group of works (the Third Piano Sonata, *Poésie pour pouvoir*, *Doubles*, *Structures II*, *Pli selon pli*) he composed between 1957 and 1962.

By now the broadening of his serial techniques had led Boulez to an interest in the possibilities of open form. At one level, individual works were increasingly to be seen as parts of a greater whole, a 'work in progress', to be taken up again and reworked as the larger entity came to assume its own shape. The two *Improvisations sur Mallarmé* for soprano and percussion ensemble (1957) in this way became parts of *Pli selon pli* (1957–62), which

2. Autograph manuscript of the opening of 'L'artisanat furieux' from the 1954 version of Boulez's 'Le marteau sans maître'

then underwent intermittent change during a period of 30 years; an early version of its opening section, *Don*, gave rise to *Eclat* (1965), another continuing project; and *Doubles*, commissioned by the Lamoureux Orchestra for performance in 1958, was later expanded as *Figures–Doubles–Prismes* (1963), which is also in principle unfinished. But more far-reaching was the freedom Boulez now tended to give the performer. There are, for example, passages in *Improvisation sur Mallarmé II* that are marked 'senza tempo', leaving the soloist and conductor free to judge durations for themselves.

In the Third Sonata the performer has considerably more freedom of choice. Within certain limits, the order of the work's five movements may be freely selected; within movements themselves, the performer is offered a number of alternative routes, and must choose which passages to perform and which to omit. However, the composer's planned scheme of options represents a much firmer control over the work's identity than is to be found in such aleatory music as Stockhausen's *Klavierstück XI*. Only two of the sonata's movements have so far been published, the remainder having been withdrawn into the category of 'work in progress'. Completed works of the period include *Poésie pour pouvoir* for orchestra and tape, and *Structures II* for two pianos. The former, based on a text by Michaux, continues the spatial exploitation of orchestral sound which Stockhausen inaugurated with his *Gruppen*. *Structures II* (1956–61) complemented the studies in serialism of 1951–2 with examples of a more developed and freer serial technique.

The extent of Boulez's new freedom is perhaps most amply demonstrated in *Pli selon pli*, a work for soprano and large orchestra in five movements, sub-titled 'portrait de Mallarmé'. Extended passages in which the registers of notes remain fixed make for a new simplicity of style, particularly in the vocal writing of the three *Improvisations* which form the work's central core. The density of instrumental textures varies from the use of the full orchestra in the outer movements to the delicate chamber ensemble which accompanies the second *Improvisation*. The frequently ornate vocal style of the work does not preclude a somewhat expressionistic treatment of Mallarmé's text, but Boulez's real homage to the poet lies deeper, in the formal correspondences between his music and Mallarmé's poetic syntax.

Eclat for 15 instruments (1965) heralded a group of compositions in which Boulez turned his attention to variously constituted chamber ensembles of moderate size. This work, featuring an important solo piano part among the nine non-sustaining instruments of its original version, finally grew into *Eclat/Multiples* for orchestra. In *cummings ist der Dichter* for 16 solo voices and 24 instruments (1970, rev. 1986), Boulez invented a new type of chamber cantata; more concise than *Pli selon pli*, the work is another portrait of a poet, and is again built around a central 'improvisatory' section in which sustained notes alternate with violent vocal ejaculations.

The possibilities of open forms continued to exercise his imagination. In *Domaines*, for clarinet alone or with 21 instruments (1961–8), as in *Poésie pour pouvoir* and *Figures–Doubles–Prismes*, Boulez emphasized the role of spatial location in the distribution of the ensemble; the solo clarinettist moves among the work's six instrumental groups. The freedom given to the performers in determining the work's form is allotted alternately to the soloist and to the ensemble, under the leadership of the conductor. The original plan (1971) for '. . . *explosante-fixe* . . .' sets out a wide range of possible forms for selection by the players involved, whose number and instruments Boulez does not prescribe. He returned in 1968 to his 'work in progress' then of longest standing, the *Livre pour quatuor* he had embarked on 20 years previously; he prepared a new version (*Livre pour cordes*) for full string orchestra of two of its movements which, in a further revision in 1988, were to become one.

The recomposition of older pieces became a major part of Boulez's creative life. *Le soleil des eaux* had already been revised in 1965; a version of *Notations* for enormous orchestra was begun in 1978; and in the 1980s several works were rethought, from *Le visage nuptial* through *Pli*

selon pli to *cummings ist der Dichter*. Boulez – who has spoken also of amending *Polyphonie X*, *Poésie pour pouvoir* and *Domaines*, and has started at least the last of these tasks – felt that his growing experience allowed him to improve or extend what he had written in his twenties and thirties, but he was also committed to an aesthetics of proliferation, to a belief that, within the centreless universe of serialism, musical ideas held limitless potential for development. Hence the difficulty, too, of bringing pieces to a conclusion: major works that seem destined to remain unfinished include the Third Piano Sonata, *Figures–Doubles–Prismes*, *Eclat/Multiples*, '. . . *explosante-fixe* . . .' and *Répons*, of which the last was designed to exploit the possibilities of digital sound manipulation that were being developed at Boulez's research facility, the Institut de Recherche et Coordination Acoustique-/Musique, which started to come into operation towards the end of the 1970s.

Proliferation is important also to the textures and forms of Boulez's later works, most of which are based either on the '. . . *explosante-fixe* . . .' kit (a group including the orchestral *Rituel*, which is unusual for this composer in its monumental conception, in having been instantly completed and in having resisted change) or on a sequence of harmonies derived from a musical spelling of Paul Sacher's surname (*Messagesquisse, Répons*, the *Dérive* series).

More ambiguous is Boulez's commitment to the electronic medium. His hopes for IRCAM, expressed in manifestos, were that it would be a meeting-place for scientists, composers and performers, a laboratory in which the musical adventure of the 20th century could at last be continued – not the sophisticated electro-acoustic music studio it quickly became. If, nevertheless, he took advantage of what he had, and created *Répons* partly to show off IRCAM's digital machinery for storing and transforming sounds in live performance, the electronic aspect here is perhaps less central than the opposition that had generated *Eclat/Multiples*, between tuned percussion (six soloists, amplified and altered) and a chamber orchestra of wind and strings (untransformed). *Dialogue de l'ombre double* (1982–5), a recomposition of *Domaines*, shows a far more integrated use of electronic voice-change, applied to a solo clarinet, and the development of '...*explosante-fixe*...' into a concerto for MIDI flute (1991–3) does the same, within music characteristically caught between thrill and desperation. But the works of this period that show most inventiveness and control in terms of timbre are the extensions for large orchestra of the piano *Notations* (1945), from which Boulez had come to date his career as a composer.

2. Conducting. Boulez's conducting career began with the Domaine Musical concerts, where he conducted many new works by young composers as well as his own *Le marteau sans maître*. In 1957, at the invitation of Scherchen, he conducted the first performance of *Le visage nuptial* in Cologne; during the next year, he not only conducted the première of *Doubles* in Paris, but participated with Rosbaud and the Grosses Orchester der SWF in the first performance of *Poésie pour pouvoir*. He was again invited to conduct the same orchestra when an early version of *Pli selon pli* was introduced in Cologne in 1960; meanwhile, he had become a guest conductor with the orchestra, and had taken up residence in Baden-Baden, partly as a gesture of revolt against French musical conservatism. (The German spa town remained his principal home for 20 years, until he returned to Paris to take charge of IRCAM and assume a position at the Collège de France.) Although always primarily concerned with the performance of 20th-century music, and notably that of Debussy, Stravinsky, Webern and Messiaen, he extended his repertory during this time to include a number of earlier works (by Haydn, Beethoven, Schubert and others) with which he felt a special affinity.

After some years of alienation from the official musical world in Paris, Boulez returned there triumphantly in 1963 to conduct the first Paris Opéra production of *Wozzeck*. Very quickly he came to be in demand for a wide variety of occasions in many different countries. In 1964 he conducted a special concert performance of *Hippolyte et Aricie* for the Rameau bicentenary celebrations in Paris, in 1965 he was at the Edinburgh Festival to conduct *Pli selon pli* and in 1966 he was entrusted with *Parsifal* at the Bayreuth Festival. In 1967 he became a guest conductor with the Cleveland Orchestra, with whom he made a number of recordings, and four years later he was appointed principal conductor of both the BBC SO and the New York PO. He relinquished these posts in 1974 and 1977 respectively. In 1976 he conducted the *Ring* at Bayreuth, in Patrice Chéreau's controversial production, and in 1979 at the Paris Opéra he had charge of the first production of Berg's *Lulu* in complete form. After this he reduced his conducting commitments drastically, but by the 1990s he was performing and recording frequently again, mostly in his favourite 20th-century repertory, but with some new acquisitions (Bruckner, Strauss).

Boulez's performances are primarily noted for their analytical clarity of sound: every note, even in complex scores, makes its point as a contribution to the whole. This proved an invaluable feature of Boulez's pioneering performances of new music, even though at first they were often hampered by some aridity in orchestral sonority. Given superior orchestras, the freshness of his approach gave particularly successful results in his performances of Debussy's scores, presenting a stark contrast with a long-standing tradition of impressionist cloudiness. A certain deliberacy of forward propulsion, admirably suited to many of the modern scores he performs (*The Rite of Spring*, for instance), can at other times impede the flow or overload the beat: the sensitivity of his musical ear is widely and justly renowned; the suppleness of his 'muscle' is less likely to claim such regard. He brings a composer's insight to the shaping of structure and form, and imagination to his interpretation of a work's aesthetic. This insight and imagination is also displayed in his verbal introductions to many of the works he performs, for he has continued, both in the concert hall and through the mass media, to be a most active propagandist and spokesman for the music of the 20th century.

3. Compositional style. Boulez's famous phrase about 'organized delirium' ('Son et verbe', 1958, in *Relevés d'apprenti*, 1966) is a most useful starting-point for examining his style and aesthetics. 'Delirium' situates the music's essential poetics: it points to the post-Expressionist colouring of individualist subjectivism in which the humanism of Boulez's music has its deepest roots; and it directs the listener's attention to the unique inflections of the composer's voice. 'Organization', on the other hand, speaks of the effort to exteriorize expression in universal

Ex.1

terms: it indicates the nature of the Platonic model to which Boulez relates his work, and instructs one to seek out the logic in its workings. Composers of Boulez's generation have commonly seen the inseparability of style and logic as a criterion of musical excellence; and it is within such terms as theirs that critical analysis of Boulez's music has most often been conducted.

With rare exceptions (notably in the Third Piano Sonata), Boulez's music displays its firmest foundations in linear, melodic thinking. In adopting and imaginatively developing the principles of Schoenbergian serialism in his organization of pitches, Boulez rapidly evolved a melodic manner of wide-ranging flexibility. The freedom with which he uses every possible tempered melodic interval is restrained only by a recurrent tendency of these intervals to fall into 'characteristic' aggregations, somewhat in the manner of Webern. This gives rise to melodic 'cells', which can be used in an overtly thematic manner, as in the early sonatas and in the Sonatina, whose form is modelled on that of Schoenberg's *Kammersymphonie* op.9, and from which the following examples are taken. Ex.1 shows a principal theme of the work and some of its later appearances. The figure *x*, taken from a characteristic opening flourish (ex.2), is later used, together with its

Ex.2

inversion (*x′*), retrograde (*x″*) and retrograde inversion (*x‴*) forms, as the basis of an extended development section (ex.3). The use of repeated notes in this example anticipates their appearance in the first movement of the Second Piano Sonata, where they help to articulate the motivic content.

In the works with orchestra of the late 1940s, instrumental overlapping tends to create a more obvious continuity of melodic line and there is correspondingly less emphasis on chiselled melodic-rhythmic cells. Even in those works of 1951–2 where Boulez was applying a technique of total serialization, there is not the marked discontinuity of horizontal line which characterizes the 'point' (isolated note) composition of Stockhausen's contemporary works (e.g. *Punkte* for orchestra). Melodic passages are given to individual instruments in *Polyphonie X*; indeed, in the first piece of *Structures I*, the use of constant dynamic levels and modes of attack does much to emphasize the continuous conception of each polyphonic strand. (The wide leaps in register between notes do not affect this fundamental continuity: they had been part of Boulez's melodic thinking for the piano since the time of the First Piano Sonata, as that work's second movement clearly shows.)

The broader serial thinking of subsequent years produced a distinctly more improvisatory melodic style – sometimes highly embellished, sometimes circling round a central note or group of notes. As an example of this, the writing for solo clarinet in *Domaines* is interesting – often a single note is decorated in a manner suggesting, in Boulez's own phrase, 'a polyphony which remains latent' (*Boulez on Music Today*, p.137). The opening of *Improvisation sur Mallarmé I* (ex.4) demonstrates the effect of a fixed 'constellation' of registers in melodic writing of this kind. Another, more incidental, feature of certain works of this period is the use of preponderant intervals, usually by means of a careful shaping of the registral scheme in an appropriate way; thus, much of *Le marteau sans maître* shows a preponderance of minor 3rds (see ex.5), and *Improvisation sur Mallarmé II* is likewise marked by major 9ths.

The fixing in register of a field of pitches over a comparatively long stretch of music is a rather sporadic phenomenon in Boulez, though he continues to resort to this technique in '. . . *explosante-fixe* . . .'. The static, decorative effect to which it gives rise is particularly evident in certain passages of Boulez's writing for the piano (in *Structures II* and *Eclat*, for instance); and in *Don*, the opening section of *Pli selon pli*, it notably draws the attention from the pitch structure to details of instrumental timbre. By contrast, Boulez went to the other extreme in his early works. Here he consistently avoided fixity of register by maintaining a steady flow of transpositions, even in the slower passages of orchestral writing occurring in *Le visage nuptial* and *Le soleil des eaux*. Sometimes, indeed, the flow is so fast as blatantly to contravene the Schoenbergian guiding principle of octave avoidance (see exx.1*d* and 3).

Boulez's polyphonic thinking, unlike Webern's, is allied to a harmonic style of some density which has its roots not only in Schoenberg but in Messiaen too. This is evident in Boulez's richly sounding vertical aggregates and instrumental voicing, in his cluster effects, in his treatment of the extreme registers of the piano, and in his occasional use of organum-like parallel chord movement (see ex.1*d*; more complex examples are to be found in later works such as *Eclat*). Less obvious, although no less effective than parallel homophonic movement, are those passages dominated by preponderant harmonic intervals. The third movement of the Second Piano Sonata is haunted by major 2nds; and the character of *Le marteau sans maître* owes much to the deployment, both melodically and harmonically, of 3rds and 6ths (ex.5).

This example demonstrates one of the methods most commonly used by the serialists in their attempts to bring about a fusion between horizontal and vertical pitch structures. The melodic line in ex.5*a* contains a full range of intervals, yet for the most part it is developed from the sort of chordal spacing suggested in ex.5*b*, which is exclusively occupied with the minor 3rd and its inversion. (In the transcription of this example, certain details are omitted, notably the part for percussion.) It should be noted, however, that this type of fusion leaves the typical melodic and harmonic textures unaltered. The harmonic writing here is obstinately in four parts; and only the slight hint of 'latent polyphony' in the vocal line shows Boulez moving towards the textural fusion which marks the Third Piano Sonata.

The procedures Boulez came to use in order to produce suitably mobile pitch structures from serial premises are described in *Penser la musique aujourd'hui*. In the example he gives there, a melodic series is broken up into polyphonic segments (one- to three-part writing), each of which is thickened by 'multiplication' – that is, by transposing the same interval or chord onto each of its notes. (For example, if the segment F–G–B is multiplied by the interval C–E♭, the result is F(–A♭)–G(–B♭)–B(–D), i.e. F–G–A♭–B–B♭–D.) It is this technique of multiplication that represents the true 'diagonal' between melody and harmony. It is possible that Boulez had been consciously seeking this path from the very start; rapid flourishes using equal durational values (e.g. ex.2) frequently appear in the early works and may have been conceived, if naively so, as a fusion between vertical and horizontal writing. But it is only the later technique that represents a truly serial approach to textural density, offering a solution which had eluded Boulez at the time of his research into the possibilities of total serialization.

A way into the serialization of rhythm came from the arithmetical series of durational values in Messiaen's *Mode de valeurs et d'intensités*. Boulez favoured the same approach (see *Structures Ia*), and his subsequent conception of musical time owes much to it. However, the 'global' organization of time and the performance of rhythms within time require greater differentiation than the exclusive use of such durational series offers. In *Structures Ib*, Boulez introduced regular subdivisions of the larger temporal units, and soon (see 'Eventuellement . . .', 1952) he was finding ways of incorporating a flexibility of rhythmical movement commensurate with that of his early works.

Ex.5

(a) Third movt

Modéré sans rigueur (♩ = 52)

La rou - lot - te rou - ge au bord du clou etc

(b) Second movt

Plus rapide, irrégulier et heurté (♩ = 120, ♪. = 80)

XYLORIMBA

VIOLA (con sord.)

etc

These works were firmly founded on a form of cellular rhythmic motivicism which derived from the practice of Messiaen. Small rhythmic groups could be varied and developed by using simple procedures of permutation, augmentation, diminution, extension and elision; in this way, a very small number of rhythmic ideas could engender enough rhythmic forms to sustain an extended composition. There are some simple examples of this in the Sonatina. The values marked *x′* in ex.1*b* are a regular diminution of the first three notes of ex.1*a*; and the first four values of ex.1*b* appear in a reversed form in ex.3 (*x* and *x′*; retrograde in *x″* and *x‴*). As a means of articulating the thematic content of sonata forms, the technique has many advantages, and it corresponds admirably to the use of recurrent pitch aggregates.

A similar correspondence can be found in nonthematic music, where passages of varying rhythmic regularity can be set off against highly regular or highly irregular passages; this parallels the musical characterization that can be achieved by the control of pitch structures. The extreme regularity of the subdivisions in *Structures Ib* continues to represent one type of characterization, as, for example, in *Domaines* (see the writing for trombones in their 'Miroir' section). The harmonic example of *Le marteau sans maître* (ex.5*b*) shows how regularity of values can link up with motivic thinking. Irregular durations are generally formed by introducing 'irrational' subdivisions (a technique Boulez took over from Varèse and Jolivet) or by adding fractional values in the manner of Messiaen (ex.1 contains simple instances of both techniques). From the first, these rhythmic techniques were an important factor in the suppleness of Boulez's melodic style, especially in his writing for the voice. Ex.5*a* is a typical example of the masterly way in which he welds together rational and irrational, regular and irregular elements.

In many of his works, Boulez's approach to problems of musical form has been guided by a poetic text. In *Le visage nuptial* the relationship between text and musical form is particularly transparent: it is a curiosity of the final version of this work that, for all the vast orchestral resources Boulez could call upon, there are amazingly few bars of vocal inactivity. The text very closely determines the form of the music, even when (as in the fourth movement, 'Evadné') it is merely declaimed relentlessly in unpitched semiquavers. *Le soleil des eaux* shows a marked advance on this, and its instrumental interludes and wordless vocalise anticipate the commentary movements in *Le marteau sans maître*. In the later vocal works, the texts become 'sources of irrigation', the 'centre and absence' of the musical conceptions Boulez builds around them ('Poésie – centre et absence – musique', 1963, in Boulez, 1981). They continue to suggest forms, without dominating them.

The instrumental forms preferred by Boulez in the late 1940s are only superficially affiliated with the neo-classical movement. Sonata forms provided the merest skeleton, a pretext for thematic presentation and development at a time when Boulez's serial language was superbly equipped to follow those lines. His later forms are both more freely conceived and more sectional. Serial organization on a broad scale stimulates the invention of forms whose constituent parts are related only to one another, rather than to a pre-existing model. It also provides general criteria for linking structures in a number of alternative ways, thus clearing the way for the open forms Boulez used in, for example, the Third Piano Sonata and *Domaines*. In the Sonata the five movements, or 'formants', can be played in a number of different orders, always grouped round the central 'Constellation'; the order and choice of sections within formants is similarly variable. In *Domaines* there are 12 sections to be played through in two groups of six, the order being chosen once by the soloist, once by the conductor.

To have gained a perspective in which serialism implies, and even logically entails such freedom, is one of the triumphs of Boulez's imagination. Yet the earlier works are far too convincing in themselves to be dismissed as preparatory exercises. Some critics have shown concern at the vast difference in character between early Boulez and post-1952 Boulez. The 'musical scientist' may indeed have satisfied his thirst for a system; but, so long as that system remains an open one, he is still free to go on making discoveries.

WORKS

VOCAL–ORCHESTRAL

Le soleil des eaux (R. Char), S, T, B, chbr orch, 1950 [after incid music], Joachim, Mollet, Peyron, Orchestre National, cond. Desormière, Paris, 18 July 1950, unpubd; rev. S, T, B, STB, orch, 1958, Nendick, Krebs, Rehfuss, Hesse Radio Chorus and SO, cond. Bour, Darmstadt, 9 Sept 1958; rev. S, SATB, orch, 1965, Gayer, Berlin Philharmonic Choir and PO, cond. Boulez, Berlin, 4 Oct 1965

Le visage nuptial (Char), S, A, female chorus, orch, 1951–2 [after chbr work], Steingruber, Bornemann, Cologne Radio Chorus and SO, cond. Boulez, Cologne, 4 Dec 1957; rev. 1986–9, Bryn-Julson, Laurence, BBC Singers, BBC SO, cond. Boulez, London, 25 Jan 1988 [inc.], same perfs., Metz, 16 Nov 1989 [complete], unpubd

Pli selon pli (S. Mallarmé), S, orch, 1957–62:

1 Don, S, pf, 1960; Rogner, Bergmann, Cologne, 13 June 1960 [first perf. of Pli selon pli], unpubd; new version, S, orch, 1960–62, Rogner, SWF SO, cond. Boulez, Amsterdam, 5 July 1962; rev. 1989–90, Tuomela, Finnish RSO, Eötvös, Helsinki, 18 April 1990, unpubd

2 Improvisation sur Mallarmé I: Le vierge, le vivace et le bel aujourd'hui, S, hp, tubular bells, vib, 4 perc, 1957; Hollweg, members of NDR SO, cond. Rosbaud, Hamburg, 13 Jan 1958; arr. S, orch, 1962, Rogner, SWF SO, cond. Boulez, Donaueschingen, 20 Oct 1962

3 Improvisation sur Mallarmé II: Une dentelle s'abolit, S, cel, hp, pf, tubular bells, vib, 4 perc, 1957; Hollweg, members of NDR SO, cond. Rosbaud, Hamburg, 13 Jan 1958

4 Improvisation sur Mallarmé III: A la nue accablante tu, S, orch, 1959; Rogner, SWF SO, cond. Rosbaud, Donaueschingen, 10 June 1959; rev. 1983–4, Bryn-Julson, BBC SO, cond. Boulez, London, 23 Feb 1984; both versions unpubd

5 Tombeau: S, orch, 1959; Rogner, Domaine Musical Ens, cond. Boulez, Donaueschingen, 17 Oct 1959, unpubd; rev. version, Rogner, SWF SO, cond. Boulez, Cologne, 13 June 1960

cummings ist der Dichter, 16 solo vv/mixed chorus, chbr orch, 1970; Schola Cantorum Stuttgart, Stuttgart RSO, cond. Boulez, Gottwald, Ulm, 19 Sept 1970; rev. 1986, Stockholm Chamber Choir, Ensemble InterContemporain, cond. Boulez, Strasbourg, 23 Sept 1986

ORCHESTRAL

full

Symphonie concertante, pf, orch, 1947, lost 1954

Doubles, orch, 1957–8; Lamoureux Orch, cond. Boulez, Paris, 16 March 1958; extended as Figures–Doubles–Prismes, orch, 1963, SWF SO, cond. Boulez, Basle, 10 Jan 1964; further extended, 1968, Residentie Orch, cond. Boulez, The Hague, 3 March 1968; all versions unpubd

Poésie pour pouvoir (H. Michaux), 5-track tape, 3 orch groups, 1958; SWF SO, conds. Rosbaud, Boulez, Donaueschingen, 19 Oct 1958; unpubd

Livre pour cordes, Ia, Ib, str, 1968; Ia, New Philharmonia, cond. Boulez, London, 1 Dec 1968; with Ib, same perfs., Brighton, 8 Dec

1968; rev. in 1 mvt 1988, BBC SO, cond. Boulez, London, 17 Jan 1989
Rituel: in memoriam Bruno Maderna, orch, 1974–5 [related to '...explosante-fixe...'], BBC SO, cond. Boulez, London, 2 April 1975
Notations, 1978– [developed from pf pieces]; I–IV, Paris Orch, cond. Barenboim, Paris, 18 June 1980; VII, Chicago SO, cond. Barenboim, Chicago, 14 Jan 1999, unpubd

chamber

Notations, 11 nos., 1946, unpubd [arr. of pf pieces]
Polyphonie X, 18 insts, 1950–51; SWF SO, cond. Rosbaud, Donaueschingen, 6 Oct 1951; unpubd, withdrawn
Domaines, cl, 21 insts in 6 groups, 1961–8; Boeykens, RTB SO, cond. Boulez, Brussels, 20 Dec 1968; unpubd except for cl pt performable as cl solo
Eclat, 9 perc, 6 insts, 1965 [related to original Don and Strophes]; members of Los Angeles PO, cond. Boulez, Los Angeles, 26 March 1965; extended as Eclat/Multiples, 9 perc, orch, 1970, BBC SO, cond. Boulez, London, 21 Oct 1970, inc., unpubd
Répons, 2 pf, hp, vib, glock, cimb, orch, elecs, 1980–84; Ensemble InterContemporain, IRCAM technicians, cond. Boulez, Donaueschingen, 18 Oct 1981; extended version, same perfs., London, 6 Sept 1982; further extended version, Turin, 22 Sept 1984; all versions unpubd
'...explosante-fixe...', version for MIDI fl, orch, elecs, 1991–3, Valade, Ensemble InterContemporain, cond. Robertson, Turin, 13 Sept 1993 [Transitoire VII]; Valade, Ensemble InterContemporain, cond. Boulez, New York, 11 Nov 1993 [Transitoire VII, Transitoire V, Originel]; both versions unpubd

UNACCOMPANIED CHORAL

Oubli signal lapidé (A. Gatti), 12 solo vv, 1952; Ensemble Vocal Marcel Couraud, Cologne, 3 Oct 1952; unpubd; material used in cummings ist der Dichter

CHAMBER AND SOLO INSTRUMENTAL

vocal

Le visage nuptial (Char), S, A, 2 ondes martenot, pf, perc, 1946 [2 movts]; Paris, 1947, unpubd
Le marteau sans maître (Char), A, a fl, gui, vib, xylorimba, perc, va, 1953–5; Plate, members of SWF SO, cond. Rosbaud, Baden-Baden, 18 June 1955

3–11 instruments

Quartet, 4 ondes martenot, 1945–6; unpubd
3 essais, perc, 1950, unpubd
Livre pour quatuor, str qt, 1948–9: Ia, Ib, II, IIIa, IIIb, IIIc, IV (unpubd), V, VI; Ia, Ib, II, Marschner Qt, Donaueschingen, 15 Oct 1955; V, VI, Hamann Qt, Darmstadt, 9 Sept 1961; IIIa, IIIb, IIIc, Parrenin Qt, Darmstadt, 8 July 1962
Pour le Dr Kalmus, fl, cl, va, vc, pf, 1969, private perf., London, 16 May 1969, unpubd
'...explosante-fixe...', version for fl, cl, tpt, London Sinfonietta, London, 17 June 1972; version for fl, cl, tpt, hp, vib, vn, va, vc, elecs, New York PO, New York, 5 Jan 1973; rev., BBC SO, Rome, dir. Boulez, 13 May 1973; rev., Musique Vivante, dir. Masson, La Rochelle, 6 July 1974; all versions unpubd
Messagesquisse, solo vc, 6 vc, 1976; Claret, members of the jury of the Rostropovich Competition, La Rochelle, 3 July 1977
Dérive I, fl, cl, pf, vib, vn, vc, 1984; London Sinfonietta, cond. Knussen, London, 31 Jan 1985; related to Répons
Mémoriale, fl, 8 insts, 1985 [after fl pt of 1972–4 '...explosante-fixe...'], Cherrier, Ensemble InterContemporain, cond. Boulez, Paris, 29 Nov 1985; rev. in 1991–3 version of '...explosante-fixe...'
Initiale, brass, 1987, Houston, 4 June 1987; extended, 1992, members of Chicago SO, cond. Boulez, Chicago, 20 Nov 1992; both versions unpubd
Dérive II, 11 insts, 1988–93; Ensemble InterContemporain, cond. Boulez, Milan, 21 June 1990; rev. version, same perfs., London, 7 Feb 1993; both versions unpubd
sur Incises, solo pf, 2 pf, 3 hp, 2 vib, mar, 1995–8 [after pf work Incises], Vassilakis, Ensemble InterContemporain, cond. Boulez, Basle, 27 April 1996; extended, 1998, Vassilakis, Ensemble InterContemporain, cond. Robertson, Edinburgh, 30 Aug 1998; both versions unpubd

1–2 instruments

Sonatina, fl, pf, 1946; private perf., Boterdael, Mercenier, Brussels, 1947; first public perf., Gazzelloni, Tudor, Darmstadt, 1956
Domaines, cl, 1961–8; Deinzer, Ulm, 20 Sept 1968
Dialogue de l'ombre double, cl, elecs, 1982–5 [after Domaines]; Damiens, Florence, 28 Oct 1985; version for bn, elecs, 1995, Gallois, Paris, 3 Nov 1995
'...explosante-fixe...', version for vib, elecs, 1986, Forestier, Basle, 2 Sept 1986
Anthèmes, vn, 1991 [after vn pt of 1972–4 '...explosante-fixe...'], Arditti, Vienna, 18 Nov 1991; Anthèmes II, vn, elecs, 1997, Hae Sun Kang, Donaueschingen, 19 Oct 1997

PIANO

Nocturne, pf, 1944–5, unpubd
Prelude, Toccata and Scherzo, pf, 1944–5, unpubd
3 psalmodies, pf, 1945; Grimaud, Paris, 1945; unpubd
Theme and Variations, pf left hand, 1945, unpubd
Notations, 12 pieces, pf, 1945; Grimaud, Paris, 1945; orch versions, 1946, 1978–
Sonata no.1, 1946; Grimaud, Paris, 1946
Sonata no.2, 1947–8; Grimaud, Paris, 29 April 1950
Structures, livre I, 2 pf, 1951–2; Messiaen, Boulez, Paris, 4 May 1952 [Ia only]; Grimaud, Loriod, Cologne, 13 Nov 1953 [complete]
Sonata no.3: Antiphonie, Trope, Constellation (also retrograde version Constellation-Miroir), Strophe, Séquence, 1955–7; Boulez, Darmstadt, 26 Sept 1957; rev. 1963; unpubd except for Sigle (fragment of Antiphonie), Trope and Constellation-Miroir
Structures, livre II, 2 pf, 1956–61; Loriod, Boulez, Donaueschingen, 21 Oct 1961
Incises, pf, 1994; Umberto Micheli Piano Competition, Milan, 21 Oct 1994

TAPE

2 Etudes, tape, 1951–2

INCIDENTAL MUSIC

Le soleil des eaux (radio play, Char), S, orch, 1948; ORTF, April 1948, unpubd
Orestie (stage play, Aeschylus, trans. A. Obey), 1955; Renaud-Barrault Company, cond. Boulez, Bordeaux, 1955; unpubd
Symphonie mécanique (film, dir. J. Mitry), tape, 1955
Le crépuscule de Yang Koueï-fei (radio play, L. Fauré), 1957; Paris, RTF, 5 July 1957; unpubd; related to Improvisations sur Mallarmé I–II
Mon Faust (stage play, P. Valéry), 1962, unpubd
Ainsi parla Zarathoustra (stage play, J.-L. Barrault, after F. Nietzsche), v, inst ens, 1974; Renaud-Barrault Company, Paris, Oct 1974; unpubd

PLANS AND PROJECTS

Un coup de dès (Mallarmé), chorus, orch, 1950, unpubd
Strophes, fl, insts, 1957, inc., unpubd, related to Orestie
Marges, perc ens, 1962–4, sketches only, unpubd
'...explosante-fixe...', compositional plan, 1971; various realizations listed above
Also op projects with J. Genet, 1960s and H. Müller, 1980s

JUVENILIA

1942–3: songs (C. Baudelaire, R.M. Rilke); Berceuse, vn, pf

EDITIONS AND ARRANGEMENTS

Chansons de Bilitis, reconstruction of cel part for work by Debussy, ?1954
Frontispice, after Ravel, small orch, 1987
ed. with M. Chimènes: C. *Debussy: Jeux*, Oeuvres complètes, v/8 (Paris, 1988)

MSS (incl. unpubd works) in *CH-Bps*

Principal publishers: Universal (most works), Amphion (works of 1946), Heugel (works of 1946–9)

WRITINGS

most of the composer's articles, essays and lectures have been published in volume form; only uncollected items are listed separately

Musikdenken heute (Mainz, 1963/*R*; Fr. orig., Paris, 1964/*R*, as *Penser la musique aujourd'hui*; Eng. trans., 1971, as *Boulez on Music Today*)
Relevés d'apprenti (Paris, 1966; Eng. trans., 1968, as *Notes of an Apprenticeship* and, 1991, as *Stocktakings from an Apprenticeship*)

'Technology and the Composer', *Times Literary Supplement* (6 May 1977)
'Through Schoenberg to the Future', *Journal of the Arnold Schoenberg Institute*, (1976–7), 121–5

G.W. HOPKINS/PAUL GRIFFITHS

Bouliane, Denys (*b* Grand-Mère, Quebec, 8 May 1955). French Canadian composer and conductor. He studied at the Université Laval (BMus 1977, MMus 1979), where his composition teachers included Jacques Hétu, Alain Gagnon and José Evangelista. While a student he served as programme director of the Association de Musique Actuelle de Québec and participated in many radio programmes on contemporary music. Grants from the Quebec and Canadian governments enabled him to pursue further study at the Darmstadt summer courses (1980), in Kagel's Neue Musik Theater class at the Cologne Musikhochschule (1980) and with Ligeti at the Hamburg Musikhochschule (1980–85). From 1980 to 1994 Bouliane lived primarily in Cologne, where he worked as a sound technician for the Ensemble Köln, and founded and directed the contemporary music ensemble Serie B. He has served as composer-in-residence of the Quebec SO (1992–5) and the Philharmonic Orchestra of Heidelberg (1995–6). In 1995 he was appointed professor of composition at McGill University, Montreal, where he conducts the McGill Contemporary Music Ensemble. He founded the Rencontres de Musique Nouvelle at the Domaine Forget, Charlevoix in 1995 and co-founded the Quebec festival Musiques au Présent in 1998.

Bouliane writes in a postmodern style. His music has been described by Peter Niklas Wilson as 'music of magical realism, a game of critical virtuosity, written in the wake of Jorge-Luis Borges, Italo Calvino and Boris Vian'. Compositions such as *Le cactus rieur et la demoiselle qui souffrait d'une soif insatiable* (1986) transform traditional formal models into illusive, mystical creations. His numerous honours include the Förderpreis for music of the city of Cologne (1985), the Jules-Léger prize for chamber music (1987; for *A propos . . . et le baron perché?*), first prize in the WDR's Forum Junger Komponisten (1989) and the Serge Garant prize of the Emile-Nelligan Foundation (1991). In 1999 he was named Personality of the Year by the Prix Opus Gala of the Quebec Music Council.

WORKS

(*selective list*)

Orch: 12 tiroirs de demi-vérités pour alléger votre descente, pf, orch, 1981–2, rev. 1984; Une foire imaginée, 4 solo perc, orch, 1982, rev.; Le cactus rieur et la demoiselle qui souffrait d'une soif insatiable, 1986; Conc. for Orch (Variations without a Theme), 1988–95; Entre chien et loup, ob, str, 1994–6; Passacaglia ohne Thema, 1995; Pf Conc., 1995–7; Trbn Conc., 1997

SOPHIE GALAISE

Boult, Sir **Adrian (Cedric)** (*b* Chester, 8 April 1889; *d* London, 22 Feb 1983). English conductor. He was educated at Westminster School and Christ Church, Oxford, where he took the DMus degree in 1914, and where the main influence on him was Hugh Allen. He studied at the Leipzig Conservatory, 1912–13, and had the opportunity to observe Nikisch at work. In 1914 he joined the music staff at Covent Garden, and during the war he gave concerts at Liverpool. In 1918 Holst asked him to conduct the first performance of *The Planets*, at a privately organized concert in Queen's Hall, London. In 1919 he joined the teaching staff of the RCM (where he remained until 1930), and was chief conductor for the autumn season of Diaghilev's Ballet Russe. Operatic experience embraced performances with the British National Opera Company (including *Parsifal*), a further spell in 1926 at Covent Garden as assistant musical director, and chamber opera in Bristol, Birmingham and London. From 1928 to 1931 he was musical director of the Bach Choir. In 1923 he conducted the first season of children's

concerts organized by Robert Mayer. Further participation in these was prevented by his appointment as conductor of the Birmingham Festival Choral Society, and subsequently as musical director of the City of Birmingham Orchestra (1924–30).

In 1930 Boult was appointed music director for the BBC and asked to form a new orchestra. He secured the best players and for the next decade largely met his goal of setting the standard for English orchestras. He became permanent conductor at the end of the first season and visiting conductors like Toscanini and Walter were impressed with his training of the orchestra. He took the BBC SO to Europe in 1936 (where they were especially well received in Vienna), 1937 and 1947. He became an international figure, visiting Vienna (1933), Boston and Salzburg (1935), New York (NBC SO 1938, New York PO during the World's Fair, 1939), Chicago (1939) and Amsterdam (1945). He was associate conductor of the Proms from 1942 to 1950. After reaching the official retirement age in April 1949, he was finally forced to retire from the BBC in 1950 after making 1536 broadcasts. The LPO immediately made him music director (1950–57) and together they toured West Germany in 1951 and the Soviet Union in 1956. In 1957 he went into nominal retirement, continuing to make guest appearances at home, in Europe and in the USA, and occasionally taking charge of the Royal Opera House Orchestra for Royal Ballet performances of *Job* or *Enigma Variations*. He became musical director of the CBSO again in 1959–60 and returned to the RCM to teach from 1962 to 1966. In the late 1960s Boult began re-recording the Elgar symphonies and the complete Vaughan Williams symphonies for EMI. His premières, performances and previous recordings of Vaughan Williams were already highly regarded, but his last cycle became the definitive one for many years. He continued recording with *Job*, the *Enigma Variations*, the Elgar oratorios, Wagner excerpts, an acclaimed Brahms cycle and Schubert's Ninth Symphony. He was almost 90 when he made his final public appearance and his final recording (of music by Parry) in 1978.

Of the leading British conductors of his time, Boult was the least sensational but not the least remarkable. He made no attempt to cultivate a public image. He was neither oracle, orator nor professional wit, but he expressed himself with trenchancy, and his gentlemanly self-control was occasionally ruffled by storms of anger. He was a keen observer of other conductors: Nikisch impressed him, less as an interpreter than for his rehearsal methods, his concentration on essentials without fatiguing the players, his conjuring of the essence of the music with the point of his stick. Boult was the most considerate and unselfish of colleagues. 'He is so generous, so *integer*, that one feels it must almost be a limitation of his interpretative range' (Andrew Porter). His creed was one of service to the composer, and he performed countless scores simply because he was asked and they deserved to be heard. In spite of a well-deserved reputation for reliability, there were nights when the physical impact of his conducting was low, and there was little beyond faithfulness to the notes. There were others when precise, sensitive stick technique, loyalty to the composer, selflessness and ability to see the music as a whole, produced results equally satisfying in the classics and the British music he understood so well. In his BBC days he introduced much new music to London, with concert performances of Berg's *Wozzeck* (1934) and Busoni's *Doktor Faust* (1937), and works by Bartók, Stravinsky, Schoenberg, Webern and American composers. The British composer found in Boult a steady, unprejudiced champion. By giving not just premières but repeat performances of works by Elgar, Vaughan Williams, Bax, Walton, Holst, Delius, Tippett and others, he nutured a healthy and sophisticated musical culture in Britain. He wrote two valuable handbooks on conducting, and his principles of conducting technique were the subject of a 27-minute film, *Point of the Stick*, made in 1971. He was knighted in 1937, was awarded the Royal Philharmonic Society gold medal in 1944 and the Harvard Medal (with Vaughan Williams) in 1956, and became president of the Royal Scottish Academy of Music in 1959. He was made a Companion of Honour in 1969.

RONALD CRICHTON/JOSÉ BOWEN

Boulton [née Craytor], **Laura** (*b* Conneaut, OH, 1899; *d* Bathesda, MD, 16 Oct 1980). American ethnomusicologist. After studying singing at Western Reserve University, she took the degree at Denison University and gained the doctorate at the University of Chicago. From 1929 to 1979 she participated in 40 expeditions in which she recorded music of the peoples of Africa, South America,

Alaska, Eastern Europe and the South Pacific; her travels were sponsored by various institutions, including the American Museum of Natural History, the University of Chicago and the Carnegie Institute. She taught at the University of Chicago (1931–3) and the University of California (1946–9), was a founder-member of the Society for Ethnomusicology and was director of the Laura Boulton Collection of Traditional and Liturgical Music at Columbia University (1967–72) and the Laura Boulton Collection of World Music and Musical Instruments at Arizona State University (1972–7). She produced documentary films for the National Film Board of Canada and a number of recordings of traditional music for Folkways, and her writings include *The Music Hunter: the Autobiography of a Career* (New York, 1969) and *Musical Instruments of World Cultures* (New York, 1972).

Her instrument collection is housed in Mathers Museum at Indiana University, and her recordings and correspondence are located at the same university in the Archives of Traditional Music.

PAULA MORGAN/FRANK GUNDERSON

Bour, Ernest (*b* Thionville, 20 April 1913). French conductor. Son of an organist who founded and conducted amateur choirs and orchestras, he studied classics at the University of Strasbourg, and the piano, the organ and theory at the Strasbourg Conservatoire. There he also studied conducting with Fritz Münch and from 1933 to 1934 was a pupil of Hermann Scherchen. He made his débuts as a chorus master for Geneva radio and Strasbourg radio. After a year teaching the piano at the conservatoire, he was appointed conductor of the Orchestre de Mulhouse in 1941 and director of the conservatoire there in 1945. He was a regular guest conductor for Radio Paris as well as at the festivals of Strasbourg and Aix-en-Provence, and toured Belgium, Switzerland, Italy, Spain and Germany. In 1950 he went back to Strasbourg, where he became conductor of the Orchestre Philharmonique and, in 1955, of the Strasbourg Opera, together with Fritz Adam. From 1964 to 1979 he was principal conductor of the SWF SO in Baden-Baden, and from 1976 to 1987 permanent guest conductor of the Netherlands Radio Chamber Orchestra.

Bour's career and musical personality were marked by his interest in contemporary music. As early as 1934 he worked with the composer Fritz Adam to organize chamber concerts of contemporary music in Strasbourg. Later, he conducted the French premières of foreign 20th-century works, including Hindemith's *Mathis der Maler*, Bartók's *Bluebeard's Castle* and Stravinsky's *The Rake's Progress*, and many world premières, among them works by Ligeti, Górecki (Symphony no.3, 1977), Bussotti, Ferneyhough, Reimann, Rihm and Xenakis. Bour owed his success in this field to his precision and sense of organization, which, while limiting his gestures to simple and terse signs, enabled him to grasp the most complex scores. Notable among his many recordings are a classic performance of Ravel's *L'enfant et les sortilèges* and choral and orchestral works by Ligeti.

CHRISTIANE SPIETH-WEISSENBACHER/R

Bourbon. French and later Spanish family of rulers and patrons of music. The Vendôme branch of the family – descended from Louis le Boiteux, for whom the Bourbon duchy was created in 1327 – acquired the Kingdom of Navarre through marriage in 1548 and the French crown in 1589, following the extinction of the Valois at the death of Henri III. In addition to the throne of France, it obtained the crowns of Spain and the Two Sicilies in the period following 1700, as well as the duchies of Luxembourg, Parma, Plaisance, and Guastalla. Henri IV, who secured the throne in 1594, employed a number of distinguished musicians, including Du Caurroy and Guédron. His marriage in Florence in 1600 to Maria de' Medici was celebrated with a number of musical works, among them Peri's *Euridice* and Caccini's *Il rapimento di Cefalo*. His son, LOUIS XIII, was a more active patron of music and indeed a composer himself. He encouraged Formé and shared a taste for court airs with his brother, Gaston d'Orléans, who had hired Moulinié. Italian composers, who had already won fame in France under the regency of Maria de' Medici, were called on even more extensively under the regency of Anne of Austria, and the works of Sacrati, Luigi Rossi and Cavalli were performed in Paris. Of all the Bourbons it was LOUIS XIV, a guitarist and excellent dancer, who had the most direct influence on the music of his time. As an absolute monarch he ensured a state-controlled music policy and in 1664 the *Plaisirs de l'ile enchantée* set the tone for a period of intense musical activity. Pierre Robert, Henry Du Mont and J.-B. Lully secured the services of well-known poets Benserade, Perrin and Quinault and contributed to the establishment of the *grand motet* and the *tragédie en musique*. Louis's desire to establish a national style also led to the creation in 1672 of the Académie de Musique. Sacred music in the royal chapel was reorganized in the 1680s around François Couperin and Lalande.

The descendants of Louis XIV proved equally enthusiastic about music. The Grand Dauphin, who frequently attended the Académie de Musique, was a discriminating lover of music and opera, and an excellent dancer. He possessed his own musical establishment, which was directed during the 1680s by M.-A. Charpentier, and passed on his love of music to his children, particularly the Duke of Anjou, who later became Philip V of Spain. Louis's illegitimate children were also true music-lovers: the Princess of Conti (Marie-Anne) was the student of J.-H. d'Anglebert and of François Couperin; the Duke of Maine (Louis Auguste de Bourbon) was the protector of Couperin and organizer of the *Grandes Nuits* of Sceaux; while the Count of Toulouse (Louis Alexandre de Bourbon) studied with Couperin. During the Regency, Paris experienced an intense musical life thanks to the influence of Philippe of Orléans, who was a student of Loulié and Charpentier, and himself a composer. Louis XV, by contrast, was not particularly attracted to music. He became more involved in it after his marriage to Marie Leczińska, whose concerts were organized by Destouches and Collin de Blamont, and he encouraged the musical education of his children, particularly his daughters, all of whom were musicians. Louis XV was more interested in architecture, and he deserves particular credit for his unconditional support of Gabriel in the construction of his opera house in Versailles, which was inaugurated in May 1770. His reign was nevertheless marked by financial worries, as is attested by the edict of 1761 by which *Musique de la chambre* and *Musique de la chapelle* were merged.

Although Louis XVI had no particular interest in music, he encouraged his wife's tastes, especially that for comic opera. It was for Marie-Antoinette that he built the Little Trianon theatre, where she organized musical spectacles in which she sometimes participated. A former student of Gluck, Marie-Antoinette played the harp, which she had learnt under P.-J. Hinner and Coelestin Hochbrucker.

Bourbons also held the Spanish throne almost uninterruptedly from 1701 until the later 19th century. Philip V immediately hired Henry Desmarets, probably because he longed to reproduce the musical atmosphere he had known at the court of Louis XIV. Philip was particularly fond of Italian music, as was his son Ferdinand VI; it was at their court that Farinelli and Domenico Scarlatti gained distinction. From 1748 Philip V also reigned over the Duchy of Parma where he encouraged artistic activity, especially music. It was during his reign that C.I. Frugoni and Tommaso Traetta undertook to reform opera at Parma. Among the Bourbons of Naples, Charles de Bourbon built the San Carlo theatre, which was inaugurated in 1737 by the performance of Sarro's *Achille in Sciro* and Ferdinand I, back in Naples after the troubles of the Napoleonic period, created a new Academy of Music and Ballet. Until their removal in 1860–61, the Bourbons of Parma and Naples attracted and retained the most illustrious artists and encouraged the flourishing of a rich and varied musical life.

FRANK DOBBINS/ANNE-MADELEINE GOULET

Bourbon, Nicolaus. *See* BORBONIUS, NICOLAUS.

Bourdelot [Bonnet-Bourdelot, Bonnet]. French family of physicians and music historians.

(1) Pierre Bourdelot [Michon] (*b* Sens, 2 Feb 1610; *d* Paris, 9 Feb 1685). Son of the surgeon Maximilien Michon, he was placed under the guardianship of his uncle Jean Bourdelot, whose name he took. He studied medicine in Paris. In 1634, he entered the service of the Duke of Noailles, whom he followed to Rome. On returning to France in 1638, he worked for the Duke of Condé. From 1639 to 1642 he wrote three dissertations on medicine which enabled him to qualify as a doctor. After a period of service with the Queen of Sweden, he returned to France and entered the abbey at Massay. An enthusiastic amateur of the fine arts, Bourdelot gathered about him a coterie of artists, musicians and literati. With his nephew, Pierre Bonnet-Bourdelot, he began to compile material for books dealing with the history of music and of dance.

(2) Pierre Bonnet-Bourdelot (*b* Paris, 1654; *d* Sèvres, 20 Dec 1708). Nephew of (1) Pierre Bourdelot. He also studied medicine in Paris and was awarded a diploma in 1676. In 1694 he was appointed physician to Louis XIV. He inherited his uncle's library and manuscripts and succeeded in completing the history of music, but it remained unpublished at his death.

(3) Jacques Bonnet (*b* Paris, 1644; *d* Paris, 1723). Brother of (2) Pierre Bonnet-Bourdelot. He was treasurer of the hunt and adviser to the king. In 1691 he was 'receiver and payer of wages to the officers of parliament in Paris'. As Jacques Bonnet-Bourdelot, he published *L'Histoire de la musique et de ses effets* in Paris in 1715. The work is a compilation of texts written by all three members of the family; the role of collation may be attributed to Jacques, who inherited the documents of his brother and uncle. (2) Pierre Bonnet-Bourdelot wrote most of the text, (1) Pierre Bourdelot wrote several sections (notably on Hebrew music), and Jacques updated some of the information and added a chapter for the 1725 edition. Concentrating on the collection of documents rather than on their organization, the work covers such diverse subjects as Chinese music, Persian music, and the sensitivity that animals have for music. Ancient music occupies a third of the space and there is a comparison of Italian and French music. A sensitive ear for language ('One can say that Italian music resembles a pleasing Coquette') and a sharp eye for observation (notably in the chapters dealing with *fêtes*) compensate for the lack of depth. The *Histoire de la musique* was reprinted several times, and in Amsterdam (1721, 1725, 1726) and The Hague and Frankfurt (1743) it included without acknowledgment Le Cerf de la Viéville's treatise *Comparaison de la musique italienne et de la musique française*. In 1723 Jacques Bonnet published a *Histoire générale de la danse sacrée et profane*.

Bourdeney Manuscript [*F-Pn* Rés.Vma.851]. *See* SOURCES, MS, §IX, 9 and SOURCES OF INSTRUMENTAL ENSEMBLE MUSIC TO 1630, §2.

Bourdin, Roger (*b* Levallois, 14 June 1900; *d* Paris, 14 Sept 1973). French baritone. After studying at the Paris Conservatoire with André Gresse and Jacques Isnardon, he made his début at the Opéra-Comique as Lescaut in *Manon* (1922) and sang there regularly until the mid-1960s in a wide range of roles, creating parts in operas by Pierné, Ibert and Marcel Bertrand. His début at the Opéra, as Mârouf, was in 1942, and he created the title role of Milhaud's *Bolivar* there in 1950. His only appearance at Covent Garden was as Pelléas to the Mélisande of Maggie Teyte in 1930. He was a notable French interpreter of non-French parts, including Beckmesser, Scarpia and Mozart's Figaro. He sang Athanaël to the Thaïs of his wife, the soprano Geori Boué, at the Opéra during the 1940s. His voice was a warm, mellifluous, typically French baritone, as can be heard on his many recordings.

ALAN BLYTH

Bourdon (i) (Fr.). (1) A term analogous to the English 'burden' and used of the lowest drone on the hurdy-gurdy and also of the free vibrating strings of the larger lutes and bowed instruments like the *lira da braccio*.

(2) On a guitar with courses, a bourdon (Sp. *bordón*) is the lower and thicker of the two strings of a course.

(3) A term applied to the lowest partial (or 'hum note') of tower bells.

(4) *See under* ORGAN STOP.

Bourdon (ii). A term used by Besseler in an attempt to explain the invention of the term FAUXBOURDON (*c*1425–30). He posited a special use of 'bourdon', by then established in French usage as meaning a drone bass, a low note or organ pipe, and in English as the lowest voice in a three-part composition. Besseler isolated a group of low contratenor parts by Du Fay and others, many of which were written on a six-line staff and apparently composed for instrumental performance, and argued that the word 'bourdon' referred either to contratenors such as these or to the parts of a lower voice that functioned as a bass. A 'faux' (false) bourdon was therefore so designated because it was a contratenor which throughout its course lay above the tenor.

No contemporary evidence has yet been found to support this special usage and, if Besseler was right, it is surprising that such words as 'bourdon', 'burdo' or 'bordunans' are not found among the many new terms coined during the 15th century to describe the *contratenor bassus*. Although most later writers have not accepted Besseler's hypothesis, his ingenious analyses established several important lines of new inquiry and retain an independent value.

BRIAN TROWELL

Bourgault-Ducoudray, Louis (Albert) (*b* Nantes, 2 Feb 1840; *d* Vernouillet, Yvelines, 4 July 1910). French scholar and composer. He was a nephew of Billault, the famous minister of the Second Empire, and prepared for a career in law, but entered Ambroise Thomas' class at the Conservatoire in 1859, a year after his comic opera *L'atelier de Prague* had been performed in Nantes. He won the Prix de Rome in 1862 with his cantata *Louise de Mézières*, and during his subsequent visit to Italy developed an interest in both the music of Palestrina's time and folk music. In 1868 he moved from Nantes to Paris and shortly thereafter founded the Société Bourgault-Ducoudray, an amateur choral group which performed the works of Lassus, Palestrina, Janequin, Bach and Handel among others. He was also one of the founders of the Société Nationale de Musique. In 1874 he travelled to Greece to study ancient and popular Greek music; this journey resulted in several writings and the publication of collections of Greek folksongs, harmonized by himself. He subsequently became interested in the music of Brittany, collecting folksongs from local singers in a published collection and harmonizing them with sensitivity, adding a copious description of his methods, the modal structure of the music and its performance practice. From 1878 he taught music history at the Conservatoire, where he introduced his students to the music of Rimsky-Korsakov and Musorgsky as early as 1880 and offered a course on Russian music in 1903. He was named an Officier of the Légion d'Honneur in 1888.

Bourgault-Ducoudray's many interests led to a wide range of activities. His compositions, produced at a steady rate, include cantatas, numerous songs, orchestral works and five operas, some of which reflect his study of folk music. His *Dans la lande: esquisse d'après nature* for piano combines folk dance and folksong with a more adventurous piano style than is found in the transcriptions, while the *Rhapsodie cambodgienne* for large orchestra incorporates Cambodian melodies. His folksong collections, in which he tended to use modal harmonizations, are classics of their kind and helped to stimulate interest in folk music in France. His operas show considerable skill: *La conjuration des fleurs* is through-composed and contains many delightful effects; *Thamara* reflects the composer's oriental interests, and uses Eastern modality; *Myrdhin*, his other full-length opera, is an Arthurian epic.

Bourgault-Ducoudray's writings have been more influential than his music; his books, which cover topics from Greek modes to Schubert, demonstrate a higher level of scholarship than was common among 19th-century French writers on music. His interests also extended to modern symphonies and operas, and he enthusiastically supported many contemporary composers. The first Paris performances of two of Balakirev's works owed much to Bourgault-Ducoudray's support. It is possible that his interests in chant, Russian music, oriental music and the theories of Rousseau regarding recitative may have influenced Debussy, who studied with Bourgault-Ducoudray at the Conservatoire. His philosophy is well expressed in a lecture he delivered at the Paris Universal Exhibition in 1878:

> No element of expression existing in a tune of any kind, however ancient, however remote in origin, must be banished from our musical idiom. All modes, old or new, European or exotic, insofar as they are capable of serving an expressive purpose, must be admitted by us and used by composers. I believe that the polyphonic principle may be applied to all kinds of scales. Our two modes, the major and the minor, have been so thoroughly exploited that we should welcome all elements of expression by which the musical idiom may be rejuvenated.

His ideas for broadening musical expression were important in the modern revival of French music and prepared the way for Bordes, d'Indy and the new school of 'regional' composers – Ladmirault, Huré, Ropartz, Canteloube and Séverac. His pupil Maurice Emmanuel regarded his own *Histoire de la langue musicale* (Paris, 1911) as an extension of Bourgault-Ducoudray's work, and dedicated it to his teacher.

WORKS

printed works published in Paris unless otherwise indicated

STAGE

Adieu Jeanette (pastorale, T. Botrel), 2 solo vv, n.d.

L'atelier de Prague (oc, 1, G. Derrien), Nantes, Graslin, Oct 1858, vs (1859)

La conjuration des fleurs (petit drame satirique, 2 scenes), solo vv, female chorus, orch/pf, Paris, Salle Herz, 27 Jan 1883, vs (1883)

Michel Colomb (oc, 1, L. Gallet, E. Bonnemère), Brussels, Turkish Embassy, 7 May 1887

Anne de Bretagne (op, 4, composer), 1888; Nantes, Société Musicale Concordia, Dec 1892

Thamara (op, 4 scenes, Gallet), Paris, Opéra, 28 Dec 1891, vs (1892); rev. version Opéra, 23 Jan 1907

Le songe de Vasco de Gama (scene, S. Arnaud) (1898)

Myrdhin (op, 4, Arnaud), 1905; Nantes, Graslin, 28 March 1912 (1919)

VOCAL

Choral: Louise de Mézières (E. Monnais), cant., 1862; Françoise d'Amboise, cant., 1866 (1898); Stabat mater (G. Benedetti), solo vv, chorus, vc/db, harp, trbn, org, 1868 (1874); Dieu notre divin père, cantique, chorus, pf/harmonium (1872); Symphonie religieuse 'Vivus resurgit Christus', 5vv (1878); Chants d'éducation et de récréation, 8 songs, female (1883); Le psaume de la vie (after Longfellow), male 4vv (1884); Jean de Paris, cant., male 4vv (1894); Hymne à la Patrie, orat; Jeanne Hachette, cant.; others

Songs: 3 mélodies (Musset) (1869); 30 mélodies populaires de Grèce et d'orient (trans. M.A. de Lauzières), harmonized (1876); 30 mélodies populaires de Basse-Bretagne (trans. F. Coppée), harmonized (Paris and Brussels, 1885); 6 mélodies (1885); Les chansons de France, harmonized (Paris, 1907–13); 14 mélodies celtiques (écossaises, irlandaises, galloises), harmonized (trans. Mme C. Chevillard) (1909); Mélodies du pays de Galles et d'Ecosse (1909); 18 mélodies (n.d.); La chanson de la Bretagne, 7 songs (n.d.); others, incl. pedagogical works, 1v, 2vv, 3vv, pf

Recitatives (A. Silvestre) in E.N. Méhul: Joseph (1899)

INSTRUMENTAL

Orch: Fantaisie, c (1874); L'enterrement d'Ophélie, marche funèbre, after Shakespeare (1877); Rhapsodie cambodgienne, sym. poem (1882), arr. pf by C. Chevillard (n.d.); Suite

Chamber: Sous les saules, vn/vc/cl, pf (1881); Sur les lagunes, vn, pf (1881); Anisykhia (Inquiétude), oriental melody transcr. vn, pf (1881); mélodies, vn, pf (1883) Abergavenny: suite de thèmes populaires gallois, fl, str qt (*c*1900); Les bergers à la crèche, eng hn, pf (1913); Berceuse, vc, pf (n.d.); Fantaisie, bn, pf (n.d.); others

Org: Adagio (1884)

Pf: Le carnaval d'Athènes, Greek dances, pf 4 hands (1881), orchd (1881); Fumées, suite (1888); Air de danse dans le style ancien (1900); Berceuse tendre (1905); Dans la lande: esquisse d'après nature, in suppl. to *L'Illustration*, no.3343 (1907); 3 pièces (n.d.); gavottes, minuets etc.

ELAINE BRODY/R. LANGHAM SMITH

Bourgeois, Derek (David) (*b* Kingston upon Thames, 16 Oct 1941). English composer. He attended Magdalene College, Cambridge (1959–63), where his teachers included Leppard, Willcocks and Dart, and studied composition with Howells and conducting with Boult at the RCM (1963–5). While at Cambridge, the acclaimed première of his Symphony no.1 (under Willcocks) brought him to public notice. Initially assistant director of music at Cranleigh School, he took the DMus at Cambridge and was appointed lecturer in music at Bristol University in 1971. He has conducted the Sun Life Band, served as chairman of the Composers' Guild of Great Britain, and from 1984 to 1993 was musical director of the National Youth Orchestra of Great Britain; in 1988 he founded the National Youth Chamber Orchestra. He was appointed artistic director of the Bristol Philharmonia in 1990 and director of music at St Paul's Girls' School, London, in 1994. Of his considerable output, best known are his outstanding brass and wind band pieces and his works for schools.

His style, strongly influenced by Britten, Walton, Strauss and Shostakovich, is accessible, full of atmosphere and often cast on a large canvas. His eclectic idiom is broadly tonal yet infused at times with biting dissonance and chromaticism; he is fond of bold gestures and brilliant, sometimes opulent orchestration. Among his many successful television and film scores are those for *Barchester Chronicles* (1981) and *Mansfield Park* (1983), two popular BBC productions.

WORKS
(*selective list*)

Stage: Rumpelstiltskin (op, 2, D. Selwyn), op.43, 1974; A Portrait of Miranda (musical, 2, E. Dryden and D. Taylor), op.135, 1993; Christmas on the Underground (op), op.150, girls' vv, orch, 1996

Choral: Jabberwocky (L. Carol), op.18, Bar, chorus, orch, 1963; The Pied Piper of Hamelin (R. Browning), op.28, S/Tr, SSA, pf duet, perc, 1968; Triumphal March (T.S. Eliot), op.59, T, chorus, orch, 1978; Cant. Gastronomica (W. Cowper, A. Pope and others) op.63, Mez, chorus, orch, 1979; Kubla Khan (S.T. Coleridge), op.95, S, T, chorus, brass band, orch, 1985; Armada (H. Newbolt, A. Tennyson and others), op.104, Mez, chorus, orch, 1987

Syms.: no.1, op.10, 1961; no.2, op.27, 1968; no.3, op.57, 1977; no.4 'A Wine Symphony', op.58, 1978; no.5, op.68, 1980; no.6 'A Cotswold Symphony', op.109, 1988; no.7 'The First Two Thousand Years', op.158, T, chorus, orch, 1999

MALCOLM MILLER

Bourgeois [Bourgeoy, Bourgeoys, Bourgoys, Bourjois], **Loys** [Loïs, Louis] (*b* Paris, *c*1510–15; *d* 1559). French composer and theorist. He is chiefly remembered for his contribution to the monophonic Calvinist Psalter in which he supervised, with others (including Guillaume Franc

and Pierre Davantes), the adaptation of popular chansons and old Latin hymns as well as composing new melodies for the new metrical French translations of Clément Marot and Théodore de Bèze. He also published harmonizations of these psalm melodies in simple syllabic homophony for four voices and rather more elaborate versions for four voices or instruments. As the author of *Le droict chemin de musique* he adapted the traditional solmization system by giving the letter names of each note a new definition consistently following the soft–natural–hard hexachord order: thus C *sol fa ut* became C *sol ut fa*, G *sol re ut* became *re sol ut* etc.

1. Life. Bourgeois first appears as the composer of three four-voice chansons, published in Lyons by Moderne (RISM 1539[20]). On 14 July 1545 his name appears in the records of the Geneva council as a singer paid 60 florins a year to perform the new psalms and to teach the choristers at St Pierre. From December 1545 he was paid 40 florins to fulfil similar functions at the church of St Gervais, and thus received the full annual salary of 100 florins that had been accorded to his predecessor Guillaume Franc in 1543–4. In April 1546, in collaboration with the city's preachers, he drew up a table announcing the psalms to be sung each Sunday, which was to be printed and posted on the church doors. In 1547 the Beringen brothers of Lyons published two collections of Bourgeois' four-voice settings of Marot's psalms. In the same year he married, and on 24 May was granted Genevan citizenship; until November 1549 he lived in a house, provided by the city, which served as a choir school attached to St Pierre.

In April 1550 the council rewarded Bourgeois for a 'certaine feuille pour apprendre à chanter', and in May Calvin authorized him to print a short music treatise at his own expense. On 5 September 1550 he was granted two months' leave, but he was back in Geneva by the following January, requesting remuneration for 'improving the psalm tunes': these improvements may have been reflected in the 83 psalms translated by Marot (49) and Bèze (34) printed with melodies in Geneva by Jean Crespin in 1551 and reissued every year until 1554. At all events on 3 December 1551 Bourgeois was imprisoned for having, without a licence, 'changed the tunes of some printed psalms', an action troubling those who had learnt the old tunes that had already been printed. He was released the following day after Calvin's personal intercession, but the controversy continued: the council complained further that the faithful were disorientated by the new melodies, and ordered Crespin to burn the prefatory epistle to the reader in which Bourgeois claimed that not to sing was commination. In July 1552 a minister from Lausanne warned the Geneva council that his town might not accept Bourgeois' changes to the tunes of the old psalms by Marot or his settings of the more recent psalm translations of Bèze. The frustrated composer had also suffered from financial difficulties through the reductions in salaries from May 1551 paid to Genevan functionaries, and after being granted three months' leave in August 1552, to visit Lyons and Paris to publish his psalm settings, he did not return but requested a further eight-week extension. The council refused and terminated his employment. In May 1553 Bourgeois' wife was paid five florins to join her husband in Lyons where, the following year, Beringen printed a revised and augmented edition of Bourgeois' first book of four-voice psalms. Around the same time the composer wrote a scathing attack on the ignorance of the publisher and musician Simon Gorlier, invoking the names of Layolle, Jambe de Fer, Roussel and other *maîtres de chapelle* to support his contention that it was advantageous to a good musician to study mathematics. In 1557 he was described as 'maître musicien' living in Lyons, but by May 1560 he had moved to Paris and his daughter Suzanne was baptized in the Catholic church of St Côme. Two months earlier Nicolas Du Chemin had printed *Si je vivois deux cens mille ans* (RISM 1560[3a]), the first secular chanson by Bourgeois to appear in over 20 years.

2. Works. The popularity of Bourgeois' psalm settings persisted after his death, for Antoine Du Verdier (*La bibliothèque d'Antoine Du Verdier*, Lyons, 1585, p.792) mentioned *Quatre-vingt-trois psaulmes de David* (Paris, 1561). This volume, printed by Antoine Le Clerc, is now lost but was probably a revised version of the Lyons edition of 1554, expanded to include five-, six- and eight-voice pieces. Du Verdier explained that the psalm melody was in the tenor so that the amateur singer could join in at the unison or octave while the other parts were more elaborate, a scheme that epitomizes Bourgeois' role as a popularizing pedagogue, attempting to reconcile professional (and Catholic) polyphony with congregational (and Calvinist) monody. The meeting-point was homophony, illustrated by the 50 four-voice psalm settings 'à voix de contrepoinct égal consonante au verbe', published in Lyons by the Beringen brothers in 1547. The book's dedicatory epistle faithfully echoes Calvin's attitude to music, expressing disdain for 'dissolute chansons'; yet it attempted to justify polyphony, or at least the addition of note-against-note harmony. The epistle also explains, somewhat apologetically, that a second volume is freer: this refers to *Le premier livre des pseaulmes … en diversité de musique*, also published by the Beringens in 1547. Of the 24 settings only three use the simple homophonic method of retaining the cantus firmus unaltered; 13 introduce paraphrase or parody techniques and eight completely abandon the orthodox Genevan melodies.

As *maître des enfants* at Geneva, Bourgeois had to train choristers to lead congregational singing rather than to entertain a silent audience. However, his missionary zeal for music proved stronger than that for Calvinism and his *Le droict chemin* (Geneva and Lyons, 1550) was the first didactic manual in French on singing and sight-reading. Though indebted to Glarean, Gaffurius, Sebald Heyden, Frosch, Listenius, Ornithoparchus and others, the book showed considerable simplification in theory and practice, introduced the concept of solfège and abandoned the archaic Guidonian hand. It contains clear explanations and demonstrations of *tactus*, proportion, syncopation and even of the convention later known as *notes inégales*.

The Protestant administration in Switzerland did not generally favour instrumental music, mainly because of its 'lascivious' connection with dancing and secular entertainment. But Bourgeois was eager to establish its acceptability and insisted that the psalms of 1547, 1554 and 1561 were most suitable for instruments; moreover, according to the preface of *Le droict chemin*, he intended to write a book on instrumental performance.

Bourgeois' early chansons comprise a courtly *épigramme*, *Si par faveur*, set in the manner of Sermisy, an erotic anecdote, *Ung soir bien tard*, in the more animated syllabic style of Janequin and a curiously late and extended

example of a complete *rondeau cinquain*, *Ce moys de may*, with the entire text (including *rentrements*) underlaid. Here, as in many of the psalms, he showed a conservative predilection for modal harmony, but a freer and more adventurous attitude in his rhythm and in his preference for superius melodies over tenor ones.

Bourgeois' precise contribution to the compilation, revision and composition of the orthodox melodies of the Huguenot Psalter (which evolved between 1539 and 1562) is difficult to assess, but documentary evidence in Genevan archives underlines his creative involvement in the 1551 version, now lost.

WORKS

VOCAL

[50] Pseaulmes de David ... à voix de contrepoinct égal consonante au verbe, 4vv (Lyons, 1547); 37 ed. K.P. Bernet Kempers, *37 Psalmen ... van Loys Bourgeois* (Delft, 1937)

Le premier livre des [24] pseaulmes ... en diversité de musique, 4vv (Lyons, 1547); ed. in SMd, iii (1960)

Pseaulmes LXXXIII de David, 4vv (Lyons, 1554) [rev. of 1547 edn]

Quatre-vingt-trois psaulmes de David ... dont le basse contre tient le sujet, 4–6, 8vv (Paris, 1561), lost [?rev. and enlarged version of 1554 edn]; cited in A. Du Verdier, *La bibliothèque d'Antoine Du Verdier* (Lyons, 1585), and *FétisB*

4 chansons, 4vv, 1539[20], 1560[3a]; 3 ed. in SCC, xxvi (1993)

FRANK DOBBINS

Bourgeois, Martin. Franco-Flemish chaplain and music scribe. He was active at the courts of Margaret of Austria, Philip the Fair and Emperor Charles V from 1498 to 1514. *See* ALAMIRE, PIERRE.

Bourgeois, Thomas-Louis [Joseph] (*b* Fontaine-L'Evêque, 24 Oct 1676; *d* Paris, Jan 1750 or 1751). French composer and singer. His name first appears as a composer in 1701 when two volumes of *Pièces en trio* were published in Paris by Ballard. He is next heard of as *maître de musique* at Strasbourg Cathedral where he worked from 1703 to 1706. According to the title-page of his ballet *Les plaisirs de la paix* (1715) he at some time held a similar position at Toul. From 1708 to 1711 he sang at the Paris Opéra; La Borde spoke highly of his countertenor voice. Bourgeois' last major appointment was as *surintendant de la musique* to the Duke of Bourbon in whose service he worked from 1715 to 1721, after which he seems to have led a professional life that took him from one provincial city to another, including Lille, Lyons, Poitiers and Dijon, and also to Belgium and the Netherlands. His last years are obscure and he died in poverty.

Bourgeois contributed significantly to the 18th-century French cantata. His first works in this genre appeared only a few years after those of Morin and Bernier. Research has revealed that he wrote many more cantatas and *cantatilles* than have been ascribed to him. Of his 40 such works only 19 appear to be extant; they attest a fine lyrical gift and sensitive imagination, and a range of moods from gentle pastoralism to energy and considerable power. His *Le berger fidèle* from his first book of cantatas (1708) is perhaps his most characteristic work. His cantatas may be taken as representing his most important contribution to the music of his day.

He also wrote ballets and divertissements, two of which, *Les amours déguisés* and *Les plaisirs de la paix*, were performed at the Paris Opéra. Bourgeois contributed to the Duchess of Maine's celebrated entertainments known as Les nuits de Sceaux with his divertissement *Le comte de Gabalis* (1714), and collaborated with Jacques Aubert in *Diane*, performed at court in 1721. Some of his divertissements were written and performed in the provinces where he worked, but few have survived.

WORKS

printed works published in Paris

Cants.: bk 1, Borée, Le berger fidèle, Hippomène, Ariane, Les Sirènes, Céphale et Aurore (1708); bk 2, Zéphire et Flore, Psiché, Phèdre et Hipolitte, L'Amour et Psiché (1718)

Cantates françoises anacréontiques ou musique de chambre: La lyre d'Anacréon, Tirranique, L'enfant de Vénus (after 1715)

Separate cants. and cantatilles: Règne amour sur mon âme (1713), L'époux imprudent (1721, *F-Pn*), L'Amour médecin (*c*1740), L'Amour prisonnier de la beauté (before 1742), L'Amour peintre (1744), Diane et Endimion (1744), L'Amour musicien (1744); for a list of 21 cants. no longer extant see Tunley

Stage works: Les amours déguisés (opéra-ballet, prol, 3, L. Fuzelier), Paris, Opéra, 22 Aug 1713 (1713); Le comte de Gabalis et les peuples élémentaires (divertissement, 2, P.-F.G. de Beauchamps), Sceaux, Château de Sceaux, Oct 1714; Les plaisirs de la paix (opéra-ballet, prol, 3, A. Menesson), Paris, Opéra, 29 April 1715 (1715); Diane (divertissement, A. Danchet), Chantilly, 8 Sept 1721 (1721) [vocal music only], sym. by J. Aubert; Les peines et les plaisirs de l'amour, 1730 (ballet-héroïque, prol, 3, P. de Morand), unperf.; L'idylle de Rambouillet (divertissement) (1735)

Other works: Pièces en trio (1701); 1 bk of airs (*c*1705), lost; separate airs in Ballard's Recueils (1706, 1707, 1713); 2 motets à grand choeur, lost; Le Clerc's retrospective catalogue (1742) lists a Trio pour les musettes et vielles, 1re Suite [? = Pièces en trio, 1701]

DAVID TUNLEY

Bourgois [Burgois] (*fl c*1440). Composer, possibly French. His works, known only from the Trent codices, comprise two rondeaux, *Quant je remire* and *Fortune qui mains* (both ed. in DTÖ, xxii, Jg.xi, 1904/*R*, pp.72–4) and a Gloria *Spiritus et alme* (ed. in DTÖ, lxi, Jg.xxxi, 1924/*R*, p.67). The Gloria, paraphrasing the melody in Mass IX, is preceded in *I-TRmp* 88 by a Kyrie *de beata virgine* also using a melody from Mass IX. Whether this conjunction represents a scribe's attempt to pair liturgically related works or to put together two works by one composer cannot be determined. Most of the trope text in the Gloria appears in all three voices, whereas the remaining text is set only under the top voice. This procedure is also found in Glorias by Du Fay and Ciconia. The trope is further

distinguished by the use of three high voices marked 'pueri'. Two phrases of the text are set for these high voices combined with a tenor or contratenor.

Quant je remire is for three voices with only the top voice texted, and uses imitation at beginnings of phrases. *Fortune qui mains* has five written parts and can be performed by two combinations of three voices or by four voices.

TOM R. WARD/DAVID FALLOWS

Bourgoys [Bourjois], **Loys.** *See* BOURGEOIS, LOYS.

Bourgue, Maurice (*b* Avignon, 6 June 1939). French oboist. After receiving a *premier prix* at the Paris Conservatoire in 1958 and winning first prizes at competitions in Birmingham, Prague and Budapest, he was appointed solo oboist in the Orchestre de Paris, a position he held until 1979. As well as playing in the orchestra, Bourgue founded a wind octet with other members of the Orchestre de Paris. In 1979 he joined the staff of the Paris Conservatoire, teaching alongside Pierre Pierlot, and in 1993 was appointed to the faculty of the Geneva Conservatoire. His numerous solo recordings include Albinoni concertos, Vaughan Williams's Oboe Concerto and discs of 20th-century French oboe music. Bourgue has played frequently with Heinz Holliger, with whom he has made recordings of Zelenka and Handel trio sonatas. He also plays much contemporary music, and gave the premières of Berio's *Chemins IV* and Ligeti's Double Concerto. In recent years Bourgue has begun to develop a parallel career as a conductor.

GEOFFREY BURGESS

Bourguignon (*fl* 1533–40). French or Franco-Flemish composer. Records from Lille show that a certain François Bourguignon, countertenor (*haute-contre*), travelled from Flanders to Madrid in 1542 to join the imperial chapel of Charles V. Whether this is the same person as the composer Bourguignon is not known. All of Bourguignon's compositions, four chansons and a Latin motet, appeared in Attaingnant's prints in Paris between 1533 and 1539; one of the chansons was reprinted by Moderne in Lyons in 1540. All four chansons are courtly quatrains set in the 'Parisian' manner of Sermisy and Sandrin.

WORKS

all for 4 voices

Regina caeli, 1535[4]; ed. in *Treize livres de motets parus chez Pierre Attaingnant en 1534 et 1535*, xii (Paris, 1963)

Asseurez-vous de mon cueur, 1539[15-16], *D-Mbs* Mus.ms.1508; Continuer je veulx ma fermeté, 1538[14]; O desloialle dame, Chansons musicales à quatre parties (Paris, 1533); Or n'ay-je plus crainte d'estre surpris, 1538[12]

SAMUEL F. POGUE/FRANK DOBBINS

Bourguignon, Francis de (*b* Saint-Gilles, Brussels, 29 May 1890; *d* Brussels, 11 April 1961). Belgian composer, pianist and critic. He studied at the Brussels Conservatory, where in 1908 he won a first prize for piano in De Greef's class. Wounded in World War I, he was evacuated to England and then moved to Australia, where he became Melba's accompanist. After several international tours he settled in Brussels in 1925. He abandoned his career as a virtuoso pianist to study composition with Gilson and joined the 'Synthétistes' group. At the same time he launched into music criticism, giving proof of a caustic wit. Until 1955 he taught harmony (assistant professor 1939, professor 1943) and counterpoint (from 1949) at the Brussels Conservatory. A fluent composer, he began with works describing his memories of travel. He attempted to renew the symphonic poem by choosing modern subjects, as in *Le jazz vainqueur*, op.33. After 1937 he composed in a neo-classical style, often writing fugally, though retaining the lyrical quality of his music.

WORKS

(selective list)

Dramatic: La mort d'Orphée (ballet), op.29, 1928; Congo (radio play), op.46, 1936; Le mauvais pari (chbr op, 1, R. Avermaete, after a Renaissance farce), 1937; Floris l'incomparable (op comique, 1, F. Waldner), op.110, 1959; film music

Orch: Sym., op.42, 1934; Suite, op.67, va, orch, 1940; Conc. grosso, op.82, 1944; Vn Conc., op.86, 1947; Récitatif et ronde, op.94, tpt, orch, 1951; Pf Conc., op.89, 1949; 2 pf concertinos, other concertante pieces, 11 sym. poems/suites

Chbr: Pf Trio, op.37, 1929; Str Trio, op.49, 1936; Ob Qnt, op.100, 1952; 2 str qts; many other pieces

12 pf pieces, *c*30 songs, orat and other choral music

Principal publishers: Buyst, CeBeDeM, Durand, Eschig, Sénart

MSS in *B-Bcdm*

HENRI VANHULST

Bourke, Sonny. *See* SUN RA.

Bourligueux, Guy (*b* Metz, 15 Nov 1935). French musicologist. He studied at the universities of Rennes (1954–9) and Poitiers (1959–60), taking his licence ès-lettres (1956), Diplôme d'Etudes Supérieures in Spanish language and literature (1957) and agrégation (1960). He taught at the Lycée Henri IV in Paris (1963–5) before joining the scientific section of the Casa de Velázquez at Madrid (1965–8). Then, after a year as junior lecturer at the Sorbonne, he was appointed lecturer in Spanish language and literature at the University of Nantes (1969), where he was also appointed lecturer in the history of music and musicology in 1971. He was appointed lecturer in the history of music at Nantes conservatory (1972) and at the Institute of European Studies there (1973). From 1975 he was a corresponding member of the Real Academia de Bellas Artes de S Fernando in Madrid. In 1977 he was named an honorary scientific collaborator at the Instituto Español de Musicología (Consejo Superior de Investigaciones Científicas, Barcelona).

Bourligueux's literary interests centre on the Spanish golden age, and most of his musicological publications concern various aspects of religious music in Spain and France (particularly in the towns of Vannes and Rennes): organs, church choirs, composers, organists and choirmasters. He has contributed to the major music dictionaries.

CHRISTIANE SPIETH-WEISSENBACHER/JEAN GRIBENSKI

Bournemouth. Town in Dorset on the south-west coast of England. In 1893, Dan Godfrey, under contract to Bournemouth Corporation, began a season of concerts with a band of 30 wind players. A winter engagement followed, when 25 players doubling on other instruments interspersed classical with lighter music. The weekly symphony concerts which continue today began two years later. In 1896 Godfrey became permanent musical director of an augmented orchestra, and the following year the Corporation took over the orchestra, which became the Bournemouth Municipal Orchestra; Godfrey also became manager of the Winter Gardens and intermingled variety acts with the concert repertory. He championed British music, performing 842 works by British composers, 160 of whom conducted, including Elgar, German, Mackenzie, Stanford and Parry. He pioneered performances of new music and gave the first English performances of Lalo's Cello Concerto, the ballet music from Borodin's *Prince Igor*, and Tchaikovsky's first and second symphonies.

From the beginning the expenditure on the orchestra met with opposition, but Godfrey worked hard and successfully towards its continuance. In 1911 he formed the Bournemouth Municipal Choir (now the Bournemouth Symphony Chorus), which still performs regularly with the orchestra. At the 1923 Easter Festival 157 works were given in 34 concerts, and of the 93 British composers represented, 22 conducted their own works. In 1927 a concert was devoted entirely to works by British women composers. In 1929 the Bournemouth Municipal Orchestra moved to the newly built Pavilion, where it provided music for stage shows and gave open-air bandstand concerts as well as weekly symphony concerts.

In 1934 Richard Austin became director of the orchestra, by which time its reputation had been increased by broadcasting; the Corporation drastically cut the number of musicians in 1940 and Austin resigned. The remaining players, under Montague Birch, continued giving concerts at the Pavilion. Meanwhile a new orchestra, the Wessex Philharmonic, was established; it performed under Reginald Goodall and many eminent visiting conductors.

Rudolf Schwarz was appointed in 1947 to conduct a new Bournemouth Municipal Orchestra of 60 players, who returned to a rebuilt Winter Gardens and continued performing British music and new works. Charles Groves continued this policy when he took over in 1951. Constantin Silvestri, conductor from 1961 until his death in 1969, established an international reputation for the orchestra. George Hurst was artistic adviser until Paavo Berglund was appointed permanent conductor in 1972, taking the orchestra on tours to easterm Europe and Asia. He was followed by Uri Segal (1980) and Rudolf Barshay (1982). Andrew Litton, appointed in 1987, took the orchestra on a centenary tour to the USA in 1994; Yakov Kreizberg became principal conductor in 1995.

By 1954, financial pressures had forced the Corporation to give up control of the orchestra. With the support of the Arts Council and local authorities in the south and west, it became the Bournemouth SO, managed by the Western Orchestral Society (from 1991 Bournemouth Orchestras). A pattern of regional touring was established.

A chamber orchestra of about 35 players, the Bournemouth Sinfonietta, was formed in 1968, mainly to perform in smaller venues where there was no concert hall. The first conductor was Kenneth Montgomery, followed by

Maurice Gendron, Ronald Thomas, Norman Del Mar, Roger Norrington, Tamás Vásáry and Alexander Polianichko. In 1995 the Sinfonietta ceased to be a salaried orchestra; it was dissolved in 2000. The home base of the Bournemouth orchestras moved from Bournemouth to a new Arts Centre in Poole in 1985 and an enterprising educational programme was undertaken.

The organist and composer Percy Whitlock was appointed municipal organist at the Pavilion in 1932; he gave frequent recitals and broadcasts on the four-manual Compton organ until his early death. Since 1913 the town has had a specialist music library controlled by Dorset County Council.

BETTY MATTHEWS

Bournonville. French family of musicians.

(1) **Jean de Bournonville** (*b* Noyon, ?*c*1585; *d* Paris, 27 May 1632). Composer. The date of his birth shown here is that given by Fétis and repeated by Gomart, but it is not corroborated. He was director of music at the choir school of the collegiate church at Saint Quentin in 1612, when he published his *Octo cantica*. He seems to have sought a similar post at Cambrai in 1613, when he offered the cathedral chapter there a bound volume of his masses; it is now lost, although it may have been a first edition of the *Missae tredecim*. A Latin poem in praise of him, printed in that collection in 1619, tells us that he had received the first prize at the 'puys de musique' held at Rouen, Evreux and Abbeville, and on the title-page he is described as 'maître de musique' to the choirboys of Amiens Cathedral; Fétis states that he had left Saint Quentin in 1618 and had served briefly in a similar capacity at Abbeville before moving to Amiens in 1619. At the end of 1631 he was appointed director of the choir school of the Ste Chapelle, and on 3 January 1632 he was installed there 'in the lower stalls on the right hand side, not being a priest'. That he, as a layman, was appointed to such a post was a tribute to his standing as a composer, but within five months he was dead. His contemporaries praised his gentle behaviour as much as his talents as a musician, and more than ten years after his death Gantez cited him as an example. His pupils included his son Valentin and Aux-Cousteaux.

Bournonville composed principally *a cappella* church music to Latin texts for liturgical use – masses, psalms, hymns, antiphons to the Virgin, *Magnificat* settings and motets – but he also, in the *Cinquante quatrains*, published settings of French moral adages. He was an excellent contrapuntist and handled imitative writing with ease, even elegance, notably in his masses and in the *Cinquante quatrains*: his counterpoint is lively and spontaneous, and his melodic lines, which are generally syllabic, are very like those found in chansons, especially Janequin's. The masses in *Missae tredecim* are sometimes based on a Gregorian cantus firmus (*Ave maris stella*, *Ave Maria*, *Heu mihi*, *In nomine Jesu*), and sometimes on the melody of a chanson (*Le rossignol*, *Dessus le marché d'Arras*, and even *La guerre françoise*, which was inspired by *La bataille de Marignan* by Janequin): the latter procedure clearly infringed the recent decrees of the Council of Trent. In the psalms and *Magnificat* settings which are in fauxbourdon style, the music for a given work is used for every verse, the note values being adapted to the quantities of the Latin text in accordance with the then new ideas of the humanists.

WORKS

8 cantica virginis matris, qua vulgo Magnificat dicuntur, cum hymnis communibus pene totius anni ... Vesperae secundum ritum romanus, 4, 5vv (Paris, 1612; enlarged 2/1625)
Missa ad imitationem moduli 'Ave maris stella', 4vv (Paris, 1618)
Missae tredecim, quarum ultima pro defunctis, 4–6vv: ad libitum, 'Ave Maria', 'Ave maris stella', 'Heu mihi', septimi toni, 4vv; in cantu peregrinorum S Jacobi, 'In nomine Jesu', 'Le rossignol', 'Nunc dimittis', 5vv; 'Ad nutum', 'Dessus le marché d'Arras', 'La guerre françoise', pro defunctis, 6vv (Douai, 1619)
50 quatrains du sieur de Pybrac, 2–4vv (Paris, 1622)
2 masses, 'Par un matin d'été', 'Sappi, madonna', 4vv; 3 masses, 'J'ay senti les doux maux', Luscinia, 'Narcisse', 5vv: lost, cited in *FétisB*

(2) **Valentin de Bournonville** (*b* ?Saint Quentin, *c*1610; *d* ? Paris or Chartres, Dec 1663 or later). Composer, son of (1) Jean de Bournonville. He was a priest and from 1653 canon of St Jean-le-Rond, Paris. He received his musical education at the choir school of Amiens Cathedral under his father's direction and remained there when his father left, eventually for Paris at the end of 1631. He was appointed to his father's former post of *maître de musique* to the choirboys at Amiens Cathedral in 1634, when Aux-Cousteaux, who had succeeded his father, in turn left for the Ste Chapelle. On 27 August 1646 he succeeded François Cosset in a similar position at Notre Dame, Paris, and he remained there until 20 March 1653; Jean Cathala deputized for him when he was absent. From Paris he went to Chartres, where he directed the cathedral choir school from 28 April 1653 to 1662, but he was back at Notre Dame from October to 1 December 1663, when he was replaced, perhaps because he had died. According to La Borde, several masses by Bournonville were printed in Paris by Ballard in 1646, and indeed two four-part masses, *Salve regina* and *Videant amici*, which were listed in a catalogue of Ballard's for 1707, survive at the Petit Séminaire de Quebec (ed. E. Schwandt in *Complete Works, Valentin de Bournonville*, Victoria, BC, 1981). Lost works include *Missa ... ad majorem Dei gloriam*, which is listed in a catalogue of Ballard's at the back of the mass *Laudate pueri* by Pierre Hugard (1744), and some unspecified sacred works bought by Rouen Cathedral choir school in 1657.

(3) **Jacques de Bournonville** (*b* ?Amiens, *c*1675; *d* ?Paris, after 1753). Harpsichordist, teacher and composer, grandson or great-grandson of (1) Jean de Bournonville. He was a pupil of Nicolas Bernier, who was highly esteemed as a teacher of the harpsichord and accompaniment, and according to La Borde he himself became 'the best master of accompaniment of his time'. Moreover during his lifetime his reputation as a teacher of harpsichord accompaniment was equal to that of Rameau. He was even called 'the famous Bournonville'. In 1711 he published a collection of motets for one and two voices and continuo, some with other instruments too: they are

in the concertante style (one of the motets is also in a manuscript at *F-Pn*). This book was to have been followed by a second, but it seems never to have appeared. In addition it is thought that he composed two four-part masses about 1720.

Bournonville, Auguste (Antoine) (*b* Copenhagen, 21 Aug 1805; *d* Copenhagen, 30 Nov 1879). Danish dancer and choreographer. *See* BALLET, §2(ii).

Bourrée [bourée] (Fr.; It. *borea*; Eng. boree, borry). A French folk dance, court dance and instrumental form, which flourished from the mid-17th century until the mid-18th. The word was generally 'bourée' in French; the preferred current spelling may in fact be of German origin. As a folkdance it had many varieties, and dances called bourrée are still known in various parts of France; in Berry, Languedoc, Bourbonnais and Cantal the bourrée is a duple-metre dance, while in Limousin and the Auvergne it is commonly in triple metre. Many historians, including Rousseau (1768), believed that the bourrée originated in the Auvergne as the characteristic BRANLE of that region, but others have suggested that Italian and Spanish influences played a part in its development. It is not certain if there is a specific relationship between the duple French folkdance and the court bourrée.

Specific information on the bourrée as a court dance is available only for the 18th century, whence at least 32 choreographies entitled bourrée, bourée, boree or 'bouree time' are extant, both for social dancing and for theatrical use (see Little and Marsh). The bourrée was a fast duple-metre courtship dance, with a mood described variously as 'gay' (Rousseau, *Dictionaire de musique*, 1768) and 'content and self-composed' (Mattheson, *Der vollkommene Kapellmeister*, 1739).

The step pattern common to all bourrées, which also occurred in other French court dances, was the *pas de bourrée*. It consisted of a *demi-coupé* (a *plié* followed by an *élevé* on to the foot making the next step), a plain step, and a small gentle leap. These three steps occurred with the first three crotchets of a bar, whether in the duple metre of a bourrée or the triple metre of a sarabande, where the *pas de bourrée* was also used. If the small leap was replaced by a plain step, the pattern resulting was called a *fleuret*. The *pas de bourrée* preceded the *fleuret* historically, and is somewhat more difficult to execute; by the early 18th century, however, the two steps seem to have been used interchangeably, according to the dancer's ability. The bourrée as a social dance was a mixture of *fleurets*, *pas de bourrées*, leaps, hops and the *tems de courante* (a gesture consisting of a bend, rise and slide; *see* COURANTE) at places of repose. Ex.1 shows the

I = plain step
J = jetté [leap]
g = glissé [slide]

opening phrase of the *Bourrée d'Achille* (Little and Marsh, no.1480), a popular ball dance from 1700 which was actually part of a suite of three dances (bourrée–minuet–bourrée) from the Prologue to the Lully-Collasse opera *Achille et Polyxène* (1687). Each of the first two bars contains a *pas de bourrée*, the third has a hop and two plain steps, and the fourth a *tems de courante*. Thus the rhythmic shape of the phrase is that of three active bars followed by a point of arrival at the beginning of the fourth bar and a subsequent relaxation of effort. A complete bourrée consisted of two strains, each containing one or more four- or eight-bar phrases with a rhythmic shape as described. Each dance, however, had a separate choreography with a unique mixture of the possible steps.

Some form of the bourrée was danced at French court festivals by natives of the Auvergne as early as the mid-16th century. It was eventually also used, probably in a more refined form, in the *ballet de cour*. The Philidor Collection contains a 'Bourrée d'Avignon' (i, 51–2) which was probably a dance accompaniment, and the *Ballet de la delivrance de Renaud* (1617) also contains a bourrée for dancing. Collections of *airs de cour* such as *L'élite des airs de cour* (1608) and *Le recueil des plus belles chansons* (1615) include texts for sung bourrées, showing the growing popularity of the dance's characteristic rhythms. Under Louis XIV the bourrée came into fashion both as a social dance at balls and as a theatrical dance. Lully included bourrées in many of his ballets and operas, such as *Les amours déguisés* (1664), *La naissance de Vénus* (1665) and *Phaëton* (1683), and he composed one for the dancing-lesson scene in Act 1 of Molière's *Le bourgeois gentilhomme* (1670). Later French composers for the stage, including Charpentier, Destouches, Campra and Rameau, continued to use bourrées in dancing-scenes and occasionally in overtures.

As stylized dance music, the Baroque bourrée was characterized by duple metre (a time signature of 2 or ¢) with an upbeat of a crotchet, a moderate to fast tempo (minim = *c*80–92) and phrases built out of four-bar units with a point of arrival at the beginning of the fourth bar (seventh minim). A performance style in which quavers were *inégales* (stepwise-moving passages of quavers unmixed with other values to be played unevenly over a steady beat) is thought to have been common for the bourrée, particularly in France. These characteristics also apply to the RIGAUDON, and indeed Quantz virtually

Ex.2 J.-B. Lully: *Le bourgeois gentilhomme*, Act I (dancing-lesson)

[Bourée]

equated the dances, but the two types can be distinguished because the rigaudon was slightly more vigorous and tended to have more angular melodies than the bourrée. Moreover, 18th-century writers (Rousseau, Mattheson etc.) consistently mentioned a crotchet–minim syncopation used to emphasize the third or seventh beat of a phrase as characteristic of the bourrée, a trait which would easily distinguish a bourrée from a rigaudon. Ex.2, Lully's bourrée for *Le bourgeois gentilhomme*, shows the characteristic syncopation, phrase structure and homophonic texture.

Ex.3 Gottlieb Muffat: *Componimenti musicali* (1690)

Bourrée

The stylized bourrée flourished as an instrumental form from the early 17th century. Praetorius's *Terpsichore* (1612) included a few examples, all with quite simple phrasing and a homophonic texture. The Kassel Manuscript (ed. J. Ecorcheville, *Vingt suites d'orchestre*, 1906/*R*) also contains a number of bourrées, often placed as the second dance in a suite. As the order of dances in a suite became conventionalized into the familiar allemande–courante–sarabande group (*see* SUITE, §5), the bourrée continued to be included fairly often, coming after the sarabande with other less serious dances like the minuet and the gavotte. In that position it was included in orchestral suites by J.C.F. Fischer, Johann Krieger, Georg Muffat and J.S. Bach. Three of Bach's orchestral suites include pairs of bourrées, in which the first is to be repeated ('bourrée da capo') after the second is played, a common treatment of the so-called popular dances in the suite. Other bourrées occur in his English and French suites for keyboard, in two of the solo suites for cello, and in the Partita for solo flute (see Little and Jenne). Handel's *Water Music* includes a bourrée that hardly seems at all stylized.

Baroque keyboard versions of the bourrée often took liberties with the original simplicity of the dance form. Such composers as Lebègue, D'Anglebert, Purcell, Gottlieb Muffat, Bach and Domenico Scarlatti wrote bourrées, many highly ornamented with some idiomatic display of keyboard technique. Yet even those like ex.3 (from Muffat's *Componimenti musicali*, 1690) which show no trace of the bourrée's characteristic crotchet–minim syncopation retain a fairly simple homophonic texture and a clear phrase structure based on four-bar units. Bourrée style persisted well into the late 18th century, as the opening movement of Mozart's G minor Symphony well illustrates. In the 19th and 20th centuries some composers wrote pieces entitled bourrée, apparently as a reference to the French folkdances rather than to the Baroque court dance and instrumental form: Chabrier's *Bourrée fantasque*, in its fast duple metre and strict adherence to four-bar phrases, suggests that the composer may have sought to evoke the court bourrée; the movement labelled 'bourrée' in Roussel's *Suite pour piano* op.14, however, a rapid triple-metre dance with asymmetrical phrases, bears no resemblance to the Baroque form.

MEREDITH ELLIS LITTLE

Bousset, Jean-Baptiste (Drouard) de [du] (*b* Asnières, nr Dijon, 1662; *d* Paris, 3 Oct 1725). French composer and singer. After studies with Jacques Fargeonnel, *maître de musique* at the Ste Chapelle in Dijon, he moved to Paris in the early 1690s. Some time before 1700 he became

maître de musique to the Académie Française, with the main duty of composing and conducting a motet each year for the feast of St Louis (25 August), celebrated with a mass held in the chapel of the Louvre. By 1702 he was *maître de musique* also to the Académie des Sciences and the Académie des Inscriptions, who celebrated the feast of St Louis jointly in the church of the Oratoire. For his work for the *académies* Bousset received a royal pension of 600 livres tournois, of which half was reimbursement for monies paid to the musicians he had engaged.

Little of Bousset's sacred output has survived, however, and his main achievements lay elsewhere. About 1692 he emerged as the leading composer of *airs sérieux et à boire* of his generation. According to Laborde 'his manner of singing was so delightful that he made a large fortune in Paris, singing *airs* which no-one composed better than he did'. In the dedication of his last collection of *Airs nouveaux* (1725) to the Duchess of Orléans, the composer wrote that the taste of the 'greatest princesses' of France had shaped his Muse, and that their support had ensured his continuing reputation. Most of the 875 *airs sérieux et à boire* Bousset published during his composing life of 35 years are for one or two voices with continuo. Titon Du Tillet (*Le Parnasse François*, 1732) commented with justice upon Bousset's true expression of the words, his noble, natural and pleasing melody, and his variety, astonishing given the size of his output.

Bousset followed tradition in keeping mainly to binary form, and his rhetorical approach to text setting shows the influence of both Lully and Lambert. He made use of *double* technique not only to provide a written-out variation for the whole of a second verse in 46 *airs* composed between 1690 and 1716, but also throughout his career, to vary repeats of single phrases of text, often combining it imaginatively with techniques of melodic development assimilated from late 17th-century Italian practice. Other italianate features found in his work are chromaticism and sequential writing. Bousset was among the first Frenchmen to experiment with the ritornello principle as a means of unifying an *air* (1696), and he preceded Campra by two years as the first cantata composer in France to juxtapose French-style recitative with da capo form in *airs* (1706). His three *Eglogues* (two of which were published singly as well as in collections) are novel attempts to group solo songs and duets into quasi-dramatic scenas; book 5 of the *Airs nouveaux* includes a cantata, *L'impatience amoureuse*.

The notion that Bousset was the son-in-law of Christophe Ballard (who printed all his music issued up to 1701), put forth by Papillon in 1742 and repeated in many later accounts of his life, is unfounded: in 1695 Bousset married Marie Marguerite de Séqueville, whose sister was the wife of Chirstophe Ballard's brother Pierre.

WORKS

Airs sérieux et à boire, 37 bks (Paris, 1690–99)

GREER GARDEN

Bousset, René Drouard [Drouart] **de** (*b* Paris, 11 Dec 1703; *d* Paris, 19 May 1760). French composer and organist, son of JEAN-BAPTISTE DE BOUSSET. He received his professional training from Nicolas Bernier and the organist Calvière. On his father's death he was nominated, as was customary, for his father's position as *maître de musique* at the Académies des Sciences et des Inscriptions. In 1740 he was appointed organist at St André-des-Arts. Of a highly impressionable nature, he was gradually drawn towards an extreme religious sect, the Convulsionists. According to P.L. Boisgelou (*Catalogue des livres de la Bibliothèque du Roi*, MS, 1803, *F-Pn*) Bousset died of paralysis, which took over after he had played the organ at Notre Dame for the consecration of Cardinal de Rohan. It is significant that he was one of the very few French composers who wrote cantatas on religious texts. The cantatas *Judith* and *Le naufrage du Pharaon* (in book 1) are fine works in a dramatic and descriptive style, whereas the *Odes* are in a lighter, more graceful style.

WORKS

2 bks of airs sérieux et à boire (Paris, 1731)
2 bks of cantates spirituelles (Paris, 1735, 1740)
6 concertos en trio pour les vieles et musettes, qui se peuvent jouer sur les flûtes traversières et à-bec, hautbois et violon (Paris, 1736)
8 odes de Rousseau tirées de psaumes (Paris, 1740, 1744)

Boutade (Fr.: 'jest', 'whim'). A term variously applied in the 17th and 18th centuries to a lively choreographed dance, a capricious poem, an improvisatory solo for viol and a short fantasia for solo keyboard. Pierre Richelet attributed its invention to Jacques Cordier, a dancing-master during the reign of Louis XIII (1601–43), and explained that, as a dance, the boutade was so called 'because it began in a somewhat abrupt, lively and startling manner' (*Nouveau dictionnaire françois*, 1719). The correspondence of Vincent Voiture (*Les oeuvres de Monsieur Voiture*, 1734) reveals that the boutade was a popular social dance around the middle of the 17th century. As an improvisatory movement in a suite of instrumental dances, the boutade was cultivated by French viol players of the late 17th and early 18th centuries. Examples by Marin Marais, Jaques Morel, Jean-Féry Rebel and Louis de Caix d'Hervelois almost invariably avoid binary-repeat structure and consist of dance rhythms and sequential passages of block chords that may have been elaborated in improvisatory figuration.

Such pieces correspond to Mattheson's definition of the boutade as a composition or improvisation 'bound to nothing but the imagination' (*Das neu-eröffnete Orchestre*, 1713). In the 18th century the term was occasionally applied to a type of keyboard fantasia. The earliest example is found in Mattheson's *Pièces de clavecin* (ninth suite, first movement, London, 1714); its minor key, dissonances, improvisatory broken-chord texture and extreme brevity exemplify the composer's description of the genre as 'an impetuous movement; a caprice; a rapid, sudden idea' (*Das beschützte Orchestre*, 1717). Gigue-like triplet quavers in quadruple metre point to a continued connection with dance, while the affection of the piece is aptly characterized by Richelet's definition of the boutade as a 'fit of rage'. Since the term 'fantasia' was increasingly employed in the later 18th century for all forms of improvisatory keyboard piece, boutades, so called, are rarely met. Nonetheless, the term persisted as late as Türk's *Clavierschule* (1789) and Koch's *Musicalisches Lexikon* (1802) and could be applied to such aphoristic, *moto perpetuo* works as C.P.E. Bach's Fantasia in D minor (H195, 1765–6).

MATTHEW HEAD

Bouteiller, Jean le. *See* LE BOUTEILLER, JEAN.

Bouteiller, Louis (*b* Moncé-en-Belin, nr Le Mans, bap. 3 Feb 1648; *d* Le Mans, 7 Feb 1725). French composer and church musician, not related to Pierre Bouteiller. He became *maître de musique* at Le Mans Cathedral in 1663 after winning several competitions. In 1672 he won motet competitions at Angers and Rouen, and in 1673 and 1678 at Caen. By virtue of his reputation he was nominated to succeed the deceased Jean Gilles at St Etienne, Toulouse, in 1705, but he refused the position and remained in Le Mans for the rest of his life. He apparently composed a great many motets; at his death an inventory of them was made and placed in the treasury of the cathedral, but both the inventory and the works are now lost. The Brossard collection in the Bibliothèque Nationale contains the motet *Ad te, Domine, clamabo*, for soloists, three choirs and orchestra, which Bouteiller entered in the Versailles royal chapel competition of 1683. It is devoid of melismas and polyphonic sophistication and resembles the homophonic passages in Lully's motets. Two *airs* attributed to 'Bouteiller le cadet' in a *Recueil d'airs* (Paris, 1705) may also be by him. A letter from him is in the Bibliothèque Nationale.

Bouteiller [Bouteillier, Boutellier], **Pierre** (*b* c1655; *d* after March 1717). French composer and church musician, not related to Louis Bouteiller. He served as *maître de musique* at Troyes Cathedral from 1687 to 1694 and again from 1697 to 1698. During the interim he served the cathedral at Châlons-sur-Marne. His last years were probably spent in Paris, where in 1698 he was mentioned as a '*maistre joueur* of the viol and other instruments'. In 1704 the Parisian coopers had a *Te Deum* by him performed in the church of St Leu and St Gilles. Bouteiller's extant works, all sacred, are not in the style of the Versailles *grand motet*, the most popular sacred form of the time, but are short pieces for one to five voices. They are in a highly imitative polyphonic style with continuo and without concertato effects.

Several secular songs in publications by Ballard and Neaulme are attributed to 'Bouteiller *l'aîné*', but there is nothing to indicate that these are by Pierre Bouteiller.

Bouteillophone (Fr.) [musical bottles] (Ger. *Flaschenspiel*; It. *suono di bottiglia*). A series of tuned bottles sounding in the high treble register. The pitch is governed in the first instance by the size or thickness of the bottle and adjusted by adding water as required. The bottles, which are usually suspended (by the neck) in a frame, are arranged according to the required scale, or hung in two rows in keyboard fashion. They are struck with small hard beaters such as those used on the orchestral glockenspiel or xylophone.

The bouteillophone is used in Satie's ballet *Parade* (1917) and Honegger's *Le dit des jeux du monde* (1918), and occasionally in later compositions. Kolberg has three octaves available (*c″–c″″*).

JAMES BLADES/JAMES HOLLAND

Boutelou [Bouteloup], **Antoine** (*b* c1665, *d* 4 March 1740). French *haute-contre* singer. The son of Jean Boutelou (*d* 13 May 1709), an *ordinaire* of the *Académie royale de musique*, he was *ordinaire de la musique de la chapelle* from 1707 and *chantre de roi*. He also sang in many stage works at Court under both Louis XIV and Louis XV, including Lalande's *Les folies de Cardenio* (1720) and Lalande and Destouches's *Les Élémens* of 1721 (in the roles of Arion and Le Vertumne) and in comic roles in works such as *Le bourgeois gentilhomme* of Molière and Lully (Fontainebleau, 1707 and Versailles, 1729). Despite notoriety for his dissolute lifestyle, his abilities as a comic actor-singer made him one of Louis XIV's favourite performers. (*BenoitMC*)

LIONEL SAWKINS

Boutmy. Flemish family of organists, harpsichordists and composers.

(1) **Josse** [Charles Joseph Judocus, Joos] **Boutmy** (*b* Ghent, 1 Feb 1697; *d* Brussels, 27 Nov 1779). Organist,

harpsichordist and composer. Both his father and grandfather were organists at Ghent churches, and his brother, Jacques (Judocus) Adrien Boutmy (1683–1719), was the organist at the collegiate church of St Michel and Ste Gudule, Brussels. Josse Boutmy arrived in Brussels before 1720, gaining citizenship there in 1729. He served the Prince of Thurn and Taxis from 1736, and from 1744 to 1777 he was the organist at the Brussels court chapel. He was also the harpsichord teacher of the Princess of Arenberg and of 'tous les jeunes Seigneurs et Dames de la Cour' of Charles of Lorraine, brother-in-law of Empress Maria Theresa and governor-general of the southern Netherlands. Married twice, he had 16 children. He left a *Livre de raison* (still extant), in which he recorded significant family events from 1721 to 1759 but did not mention his music.

Boutmy is best known for his three books of harpsichord music. French influence is apparent in the first, which contains two suites comprising character-pieces (*L'Agnès*, *La fanfarinette*, *La brillante*, *L'obstinée*), personal tributes (*La Dandrieux*, *La Saumis*) and stylized movements such as overtures, allemandes, courantes, menuettes, and gigues; the music adheres closely to the later French tradition of Dandrieu, Rameau and Duphly in both harmonic language and extensive ornamentation, particularly the *port de voix* and *coulé*. He was, however, a cosmopolitan composer and frequently interspersed movements in the Italian style as well as airs and miscellaneous movements containing sequential passage-work and harmonic writing that indicates familiarity with the keyboard music of Handel. The second and third books are more dramatic, retaining the structure of the suite but having a greater number of descriptive or character titles. Some pieces are in sonata form, though rudimentary; in the third book influence of Domenico Scarlatti is evident as well as an attempt at the newer *galant* style.

WORKS

Vocal: cantata, *c*1749

Hpd: Première livre de pièces (Paris, 1738); Second livre de pièces (Paris, *c*1740–44); Troisième livre de pièces (Brussels, *c*1750) [parts of 1st and 3rd bks ed. in MMBel, v (1943)]

(2) Guillaume Boutmy (*b* Brussels, 15 June 1723; *d* Brussels, 22 Jan 1791). Organist, harpsichordist and composer, son of (1) Josse Boutmy. He spent his entire life in Brussels where, like his father, he worked for the Prince of Thurn and Taxis; from 1752 he served as a postal official and organ builder and restorer, and from 1760 to 1776 he taught the organ and harpsichord at the court. It was probably during this period that he composed his only known works, six harpsichord sonatas, published in Brussels and Liège.

Boutmy's sonatas reflect Italian influence, having three movements and using only tempo indications for titles. Some use a sonata form which is frequently ternary but not elaborate. Certain *galant* characteristics in these works may have resulted from Boutmy's visits to Regensburg, an important relay station in the prince's postal network. His music owes something to Scarlatti, whose influence, together with a French flavour, may have been transmitted through his father.

(3) Jean (Baptiste) Joseph Boutmy (*b* Brussels, 29 April 1725; *d* Kleve, after 1799). Organist, harpsichordist, pianist and composer, son of (1) Josse Boutmy. By 1746 he was teaching the harpsichord in Metz, but returned to the Austrian Netherlands in 1755 and taught in Ghent. In 1757 he became the organist at the Ghent cathedral of St Baaf (St Bavo). He travelled to Paris in 1759 but returned to Ghent shortly after. Boutmy moved to The Hague in 1764 to serve as organist for the Portuguese ambassador; six years later he departed for Kleve, where he served as resident pianist and directed his own orchestra.

Boutmy's compositions include six divertissements for harpsichord with optional violin accompaniment, and six harpsichord concertos. The divertissements were written for his pupils, perhaps while he was in The Hague, and are in the style of the Italian sonata. They all have three movements: the slow middle movements display the mannerisms of the *galant* style and the finales take the form of a minuet and trio, or rondo. The clear, melodic keyboard writing limits the independence of the violin part. The idiomatic language of the concertos reflects his position as a court pianist in that they are better suited to the new instrument. They display a simple, pre-Classical sonata form with symmetrical themes and development passages built on sequences. The finales are rondos or minuets, and are written in a precise, graceful idiom somewhat lacking in invention. The style is more elaborate than that of the divertissements, but even the cadenzas, which are mostly written out, do not require great virtuosity. Boutmy also published a *Traité abrégé de la basse continue* (The Hague, 1769/1770), which appeared in a bilingual French/Dutch edition and clearly illustrates a synthesis of the French late-baroque continuo tradition with the freer italianate style.

(4) Laurent François Boutmy de Katzmann (*b* Brussels, 19 June 1756; *d* Brussels, 3 Nov 1838). Organist, harpsichordist, pianist and composer, son of (1) Josse Boutmy (sometimes incorrectly known as Antoine Laurent François). He studied music with his father, who attempted unsuccessfully to arrange for Laurent François to succeed him as organist at the court chapel. He went to Rotterdam in 1779 but returned to Brussels in 1783. From 1789 to 1793 he was in Ermonenville, France; because of the Revolution he left for London, where he taught the harpsichord and the piano. Later he moved to Holland and became Princess Marianne's piano teacher. King William awarded him a pension which was, however, withdrawn when Belgium declared its independence in 1830.

Boutmy's compositions are light and skilfully handled, but lack originality. The keyboard pieces are better suited to the piano than the harpsichord. His book *Principes généraux de musique* shows the influence of Grétry and is described by Fétis as 'obscure in ideas and even more obscure in style'.

WORKS

Vocal: Le naufrage, lyric scene, chorus, orch, 1806, *B-Bc*; 3 ballads, 1v, harp acc.; Armide, ou Les statues (opera, 4, J.F. Marmontel), *B-Br*

SUZANNE CLERCX-LEJEUNE/LEWIS REECE BARATZ

Boutry, Innocent (*b* before 1637; *d* after 1667). French composer. He was *maitre de musique* at Tours Cathedral, 1657–61, at Notre Dame, Paris, from August 1662 to October 1663, and at Le Mans Cathedral by 1664. He left the cathedral in 1671 for the church of St Pierre in Le Mans, where he remained until 1680. He is last heard of in 1688 as a prebendary at St Calais. Boutry was a prize-winner at *puys* held in Le Mans in 1657 and Evreux in 1666. However, his only known work is the four-part mass *Speciosa facta es*, published in Paris by Robert Ballard in 1661 (ed. L. Gautier, Versailles, 1996). A Ballard catalogue lists another four-part mass, *Magnus et mirabilis*, which seems not to have survived. *Speciosa facta es* is a perfect example of 'modernised counterpoint, imbued with tonality, appropriate for the polyphonic religious liturgy of the mid-century' (Launay).

JEAN-CHARLES LÉON

Boutry, Roger (*b* Paris, 27 Feb 1932). French composer, pianist and conductor. At the age of 11 he entered the Paris Conservatoire, where he studied until 1954, his teachers including Tony Aubin, Jean Doyen and Nadia Boulanger. He showed outstanding ability in many disciplines, and was awarded eight *premiers prix*, including those for piano, conducting, fugue and composition, the latter awarded in 1954 for his *Rapsodie* for piano and 16 wind instruments. The same year he won the Prix de Rome for his cantata *On ne badine pas avec l'amour*. During the 1950s he embarked on a career as a pianist, studying with Marguérite Long (1955–8). He has toured widely as both pianist and conductor in Europe, the United States, Australia, Japan and the former USSR. He was appointed professor of harmony at the Paris Conservatoire in 1962 and has published a didactic study of harmony. His many pedagogical works include virtuoso studies for trumpet, trombone, horn and harp, and studies in atonal composition for bassoon. He has contributed much to the brass and woodwind repertory, including concertos and various pieces for ensemble, wind and military band. Following composition of the *Marche solenelle* for the Grenoble Winter Olympic Games in 1968 and the official anthem for the Confédération Musicale de France, he was appointed musical director of the Garde républicaine in 1973 where, as a colonel, he remained until 1996. His music avoids serial techniques, and is notable for its expressive melodies and colouristic textures.

WORKS
(*selective list*)

Ballet: Chaka, 1966
Orch: Pf Conc., 1955; Ouverture pour Don, 1955; Reflets sur Rome, 1956; Sérénade, sax, orch, 1957; Passacaille et danse profane, 1958; Conc. for Orch, 1964; Tubaroque, conc., tuba, orch, 1966; Fantasia, trbn, orch, 1985

CAROLINE RAE

Bouts (Fr. *échancrures*; Ger. *Bugel*; It. *fasce*). The curves of the outline or RIBS of a bowed string instrument, particularly of the violin and viol families. The bouts are usually divided into three sections: outward curving upper bouts, inward curving middle or 'C' bouts, and lower bouts, also outward curving. The concave middle bouts provide the narrow waist necessary for the free passage of the bow across the outermost strings, and give the distinctive hourglass shape of most bowed instruments. In the violin family the bouts are joined by outward pointing corners (for illustration *see* VIOLIN, fig.4). The bouts of the viol family usually meet at obtuse angles, but the upper or lower bouts are not always distinguished from the middle bouts, and may vary in appearance, sometimes having complex lobed or festooned shapes (*see* VIOL, fig.1). Attempts were made in the early 19th century by Felix Savart and François Chanot in Paris to design a violin without corners (*see* VIOLIN, §I, 5); Savart's instrument was trapezoidal (straight sides – without bouts), and Chanot's of guitar shape (bouts with no corners). Measurements given to describe string instruments are in all cases taken from the widest point across the upper and lower bouts, and the narrowest point of the middle bouts.

JOHN DILWORTH

Bouvard, François (*b* Lyons, *c*1683; *d* Paris, 2 March 1760). French composer, teacher and opera singer. The main source of information about him is the Parfaict brothers' *Dictionnaire des théâtres*, which states that Bouvard entered the Opéra at a very young age to sing soprano parts, with a 'voice of such a range that its like had never been heard'. After his voice broke, when he

was about 16, he spent a couple of years in Rome. He was back in Paris by February 1701, where his first (Italian) *air* appeared in a collection published by Ballard. In 1702, thanks to the patronage of M. de Francine, the Académie Royale de Musique performed his first opera, *Médus*, with great success, but in 1706 *Cassandre*, composed in collaboration with Bertin de La Doué, was a failure. Throughout the years 1701–11 Bouvard regularly published *airs* in Ballard's collections, initially *airs sérieux* or *airs italiens*, and from 1706 onwards *airs à boire*, which became one of his specialities. These publications suddenly ceased in 1711, and we have no trace of the musician from that date until 1723. A remark in Boisgelou's *Table biographique* suggests that he spent a long time abroad, mainly in Italy. A second Italian sojourn would explain why his death certificate (in the Archives de la Seine, fonds Bégis) names him as 'knight' and 'count of St John Lateran' and why two of his cantatas, *L'énigme* and *L'époux indifférent*, as well as his last *air* (1756), are signed 'Bouvard, *chevalier romain*'. It has been suggested that there were two Bouvards, one of them a count of St John Lateran, composer of the violin sonatas, and the other an ordinary *maître de musique*, responsible for the other works, but inferences to be drawn from the publications themselves contradict this. In 1723 Bouvard published in Paris his *Premier livre de sonates à violon seule et la basse continue*, and after that date he seems to have concentrated on his activities as a teacher and freelance composer, with considerable success to judge from the number of editions and some of their dedications. In 1742 he dedicated his sixth collection of *airs* to Madame la Présidente Fraguier, thanking her for his appointment as her sons' music teacher, and one of his last cantatas, *L'énigme*, was dedicated to Madame de Pompadour. After 1750 his activities as a composer seem to have been greatly reduced, and he died in Paris poor and forgotten.

Bouvard's large body of work is notable for its diversity and the sudden breaks in his composing activity. His career at the Opéra, beginning brilliantly with *Médus* in 1702, came to an end in 1706 with the failure of *Cassandre*, and his first book of violin sonatas was never followed by a second. He did, however, continue to write stage music in the form of divertissements for the aristocracy and the court, and these works are evidence of his high reputation, in particular *L'école de Mars*, written in 1738 probably as the result of a royal commission. The *Idylle spirituelle sur la naissance de N[otre] S[eigneur] J[ésus] C[hrist]* (1734) was highly praised in the *Mercure de France*, but it is difficult to form any idea of these stage works today, since the music is lost. Bouvard's sacred music was confined to 11 motets of no great originality. The titles of 32 cantatas and *cantatilles* are known, but only 12 survive complete. Some acquired a certain celebrity in their time, among them the expressive and dramatic *Le retour de tendresse*. The *airs* divide naturally into three categories: the *airs à boire* are the most numerous, written for one or two voices and often concluding with long melismas on words associated with drinking; the *airs sérieux* the most diverse group, include the *airs sérieux* proper (as well as *musettes* and *ariettes*), celebrating love in a pastoral context, and others (brunettes, vaudevilles, *chansonettes* and *chansons gauloises*) of a more popular character, including also *airs paysans* (settings of dialect texts) and several *chansons à danser* (gavottes and minuets); and the *airs italiens*, with instrumental accompaniment and vocal writing inspired by opera and cantata, were intended for a more cultivated public. After his early operas Bouvard stood apart from the major musical genres, and also from the musical disputes, of his time, and for this reason he is an interesting representative of French musical society in the first half of the 18th century.

ROBERT FAJON

Bouville, Jean. *See* BULL, JOHN.

Bouzignac, Guillaume (*b* ?Saint-Nazaire-d'Aude, nr Narbonne, *c*1587; *d* after 1642). French composer. He contributed substantially to the repertory of sacred music during the reign of Louis XIII, and in so doing helped to free the provincial French style from royal conservatism by incorporating Italian and Spanish styles.

1. LIFE. The Bouzignac family had lived in Saint-Nazaire-d'Aude since at least 1536, some of its members being consuls and provosts of the seigneurial district. Guillaume Bouzignac studied at the cathedral of St Just in Narbonne shortly before Etienne Moulinié was there. In 1604, at the end of his apprenticeship, he probably became *sous-maître* of Narbonne, having been appointed to a benefice in the cathedral. The motet *O mors, ero mors tua*, with which he completed his studies, was composed 'at the age of 17'. As his financial situation was not good, he left the Languedoc area and became a chorister and *sous-maître* of Angoulême Cathedral after spending some time in the service of the royal provost, Gabriel de La Charlonye, in Angoulême. In 1634 the provost praised him highly in an exchange of correspondence with Mersenne.

Bouzignac left the Charente in 1608 to return to his native heath and (thanks to his younger brother Antoine) to pay off the debts he had contracted earlier. His real career as a musician travelling from one choir school to another began in 1609, when he signed his admission to the collegiate church of St André, Grenoble, as *maître de musique*. Attracted by other ventures, he stayed in the Dauphiné for only three months, and then seems to have left France entirely. He does not reappear until 1624, when he was appointed *maître de musique* of Bourges Cathedral. Possibly he went to Italy and came into contact there with concertante music for double chorus, and with the *scènes sacrées* that preceded the rise of oratorio. Or perhaps he made short visits to different parts of France in search of an ever more desirable post before leaving for Spain, where musicians were beginning to introduce innovations. There is nothing to support either hypothesis, but in 1624, by virtue of the edicts of the council of 1584, Bouzignac was ordained priest in Bourges. Taking advantage of various periods of leave granted him as a special favour, he went to Paris in 1625 'on business' and, despite finding favour with the canons, left the Berry in 1626. Three years later he was appointed *maître de musique* at the cathedral of Notre Dame, Rodez, but in 1632 he resigned, and nothing further is known of him until 1643, when he was described as '*maître des enfants de choeur* and an expert in the art of music' at Clermont-Ferrand Cathedral.

Bouzignac is not mentioned in any subsequent archival document, but in 1643 Annibal Gantez praised him, as Mersenne had done some seven years earlier in his *Harmonie universelle* (Paris, 1636–7, iii, bk 7). In 1665 Jacques Le Clerc, sub-prior of the church of La Trinité in Vendôme, mentioned a composition by Bouzignac in a theoretical compilation entitled *Méthode facile et accomplie pour apprendre le chant de l'Église sans l'aide d'aucune gamme* (*F-Pn* manuscrits français 19103, f.101). The chapter in question deals with the accentuation of the spoken language and its musical transcription as follows: 'In a single trio by the sieur Bouzignac, master of the choir school at Clermont in the Auvergne, containing only six little lines, I will show that syllables which are short when spoken are made long here in over 20 places'. The wording suggests that Bouzignac was still alive at the time.

Despite strong presumptions, largely supported by his paraliturgical works (in which he did not hesitate to introduce references to topical and newsworthy events), there is nothing to provide definite confirmation that Bouzignac went to the Atlantic coast in 1628 (although the taking of La Rochelle is explicitly described in *Cantate Domino, omnis Francia*), that he served Henri, Duke of Montmorency, the governor of Languedoc (as would seem to be shown by the words 'pax pro principi Henrico' quoted in the Tours version of *Dum silentium*, or that he was at Carcassonne during the episcopate of Vital de l'Estang (as suggested by the words 'pax pro inclito Vitali' added to the end of the same work in the Paris version). However, we cannot ignore the fact that such dedicatory apostrophes were current coin at the time, a tribute paid to a local patron, whether religious or secular. Thus the 'Bernardinus' in *Jesu propitius esto* may have been addressed to Bernardin de Corneilhan, Bishop of Rodez from 1614 to 1648, a period into which Bouzignac's stay at Rodez fell. It seems even more likely that he was in Tours in summer 1641, when the city was organizing celebrations of the transfer of the relics of the 3rd-century bishop St Martin from Cluny Abbey. Several sacred works by Bouzignac refer to this ceremony (*Praesulum chorus*; *Cantate Domino, o Turonenses*; *Gloriosa dicta sunt de te, ecclesia Turonensis*), suggesting that Bouzignac was *maître de musique* in Tours, but there is no documentary evidence to support the hypothesis. The same must be said of Bouzignac's links with Paris. The fact that two of his compositions were in the repertory of Notre-Dame-des-Victoires does not prove that he himself was attached to any parish in the capital.

2. WORKS. 136 works make up the catalogue of Bouzignac's compositions today. Consisting mainly of sacred Latin works, they also include four secular pieces in a style which combines the severity of 16th-century writing with the imitative, madrigalesque manner of the Italian school, the whole being coloured by the popular *air de cour*. The works survive principally in two manuscript collections, one in Tours (*F-TOm* 168), the other in the Brossard collection of the Bibliothèque Nationale, Paris (Rés Vma 571). To these must be added two motets also in the Bibliothèque Nationale, *Ego vox clamantis* and *Assumpta est Maria*.

Only 11 works can be definitely authenticated as Bouzignac's; they include the chansons *Quel espoir de guarir* and *Que doulce est la violence* with which he won a *puy de musique*. To these should perhaps be added the six-part *Ignis vibrante lumine*, attributed to him by Brossard. However, stylistic comparison between several works that appear in both the Tours and the main Paris

collections led Launay to identify 125 further works as almost certainly by Bouzignac.

Bouzignac's sacred pieces juxtapose, in an original and skilful manner, episodes inspired by the scriptures and topical events, allowing us to date his works as a whole to the period between 1628 (the taking of La Rochelle) and 1641 (the ceremonies devoted to St Martin at Tours), or later if we agree that Bouzignac died during the reign of Louis XIV. There was, however, a didactic purpose behind the way that contemporary events were projected onto the biblical narratives. Bouzignac's sacred works were undoubtedly intended to educate the congregation. Using simple means (perhaps thought up by some unknown writer), such as the telling in brief of a Christian story (the Nativity, the Presentation in the Temple, the Passion etc.), the paraphrasing of divine words or the creation of free texts likely to arouse emotion and feeling among the assembled flock, Bouzignac acted as a teacher of the uneducated masses in the same way as did the builders of cathedrals or the sculptors of medieval capitals.

Bouzignac's paraliturgical works can be divided according to their texts into three main genres, deriving from the old motet. One of these is the dialogue, descended from the Venetian practice of *cori spezzati*, which consists exclusively of verbal and musical exchanges within a choir or between choirs. Then there is the *scène sacrée*, a precursor of the oratorio in the manner of Carissimi; this adopts the idea of exchanges found in the dialogue but allots particular roles, expressed in direct speech, to different voices, distinguishing between soloists (*soliloquentes*) and the crowd (*turba*) as interpreter of the passions, often with a narrator (*historicus*) as well. Finally there is the motet proper, which Bouzignac used for intimate reflection – a polyphonic essay without choral dialogues and portrayal of characters, and with no place for *soliloquentes*.

Bouzignac's originality is dazzling in the music of these paraliturgical works, which are not an integral part of the Office but might serve as *sorties* at the end of a ceremony, to add solemnity to an occasion such as a wedding or a funeral and, more probably still, to drive home a preacher's sermon, particularly during Holy Week, in those parts of France where religious observance was close to Spanish practice. Bouzignac made repeated use of melodic or rhythmic formulae (as a code tacitly understood by everyone) to arouse sentiments or conjure up images: descending chromaticism for grief; trochees or rapid choral exchanges to simulate joy; empty bars to convey the silence of night (ex.1).

Sometimes the musical discourse comes close to verbal language (ex.2). Bouzignac was also quick to follow Du Caurroy and Formé in their use of a double chorus, in the interests not so much of acoustic splendour as of dramatic

Ex.1 *Dum silentium*

Dum si - len - ti - um, si - len - ti - um

Dum si - len - ti - um, si - len - ti - um

Ex. 2 *Duas habes nativitates*

Ex.3 *Ecce homo*

CHOIR: Cru - ci - fi - ge, cru - ci - fi - ge

SOLO: Ec - ce ho - mo

CHOIR: Cru - ci - fi - ge, cru - ci - fi - ge

verisimilitude in the play of question and answer. His taste for Manichaeism is shown in the way a homophonic double chorus might take over from a melismatic or simply declaimed solo passage (ex.3), and he gave free rein to his imagination when he grouped his voices into two masses of sound in the Venetian manner, sometimes carrying on the discourse in semichoruses in order to fragment the vocal forces into a constellation of tessituras. Bouzignac rarely used counterpoint (except to express the idea of searching or affliction, as in *Vulnerasti cor meum*), preferring to reserve it for sections treated as *couplets* within homophonic choruses.

Bouzignac's art is purely vocal (without the aid of any theatrical artifice), but he made his musical resource serve the cause of the drama, never allowing it to be merely a redundant addition to the text. Although the compositions attributed to him in the four manuscript collections mentioned above rarely stipulate the use of basso continuo, there is little doubt that it was employed, not only because the practice was by then firmly established but also, and principally, because the works often include long solo passages which must have called for continuo support.

The majority of Bouzignac's works belong to paraliturgical genres to some extent influenced by Monteverdi's *seconda pratica*; but three masses, two mass sections (a Christe eleison and a Credo) and a setting of the Lamentations of Jeremiah exemplify the composer's engagement also with music intended to adorn the Office of the Church. In these works the music is often more severe and rigid, employing a note-against-note style and betraying the conservative stranglehold that prevailed in all parts of France when liturgical tradition took precedence over paraliturgical endeavours. Only in the latter sphere could freedom of expression be exercised.

MARTIAL LEROUX

Bouzouki. Greek long-necked lute, also found in Ireland. The 19th-century *bouzouki* was indistinguishable from the Turkish *bozuk* with its carved wood or carvel-built bowl resonator, movable gut frets and wooden tuning-pegs. By the end of the 20th century it was exclusively carvel-built with fixed metal frets and metal machine tuning-heads. The instrument has three or four double courses of metal strings tuned *e–b–e'* and *d–g–b–e'* respectively and is played with a plectrum. The version with four courses of strings has developed since World War II.

During the first half of the 20th century the *bouzouki* and its smaller relations the *tzouras* and *baglamas* were used principally for virtuoso improvisation and for accompanying the REBETIKA (songs associated with an urban low-life milieu). Their strong associations with the criminal underworld and hashish smoking led to official disapproval and even persecution of the instrumentalists. During the 1930s, however, the *bouzouki*, aided partly by the release of commercial recordings, began to reach a wider audience.

The earlier practice of improvisation was derived from the Turkish modal system (*makam*) and the melodic repertory drew extensively on the traditional music of Asia Minor, but since the 1940s Western musical influence has become more marked: Western major and minor scales have displaced the oriental *makam* as the framework for composition. The traditional *bouzouki* with three courses is unsuitable for playing chords (the bass strings are mostly struck open to provide a drone), while the *bouzouki* with four courses has widened the possibility of introducing Western-style chords. Both types of *bouzouki* are now played; the traditional performance style is maintained by some veteran musicians and has been taken up by some younger exponents.

The *bouzouki* has become the Greek urban instrument *par excellence* and is played throughout the Greek-speaking world. Greek composers trained in Western music, such as Mikis Theodorakis and Manos Hadjidakis, have used the *bouzouki* in their works, drawing on the old repertory of the instrument for melodic and rhythmic inspiration.

In the late 1960s the *bouzouki* was adopted by traditional musicians such as Johnny Moynihan and Donal Lunny who were involved in the folk revival in Ireland. Ballad bands such as Sweeney's Men and Planxty were among the first groups to use the instrument in Irish music, initially to accompany traditional and contemporary folksong and later to provide a chordal accompaniment for traditional Irish dance music. The construction of the instrument was modified in this rapid acquisition; the Irish *bouzouki* has a shorter neck than its Greek counterpart and a flat back rather than a rounded one. A variety of tunings have been used, the most popular being *g–d'–a'–d''*. The *bouzouki* has become one of the most important instruments used to accompany Irish traditional music.

R. CONWAY MORRIS (with SANDRA JOYCE, NIALL KEEGAN)

Bovell, Dennis [Blackbeard] (*b* St Peter, Barbados, 1953). English reggae guitarist, bandleader and producer. He grew up in London where in the early 1970s he co-founded Matumbi, one of the first reggae groups in Britain, and also ran the Jah Sufferer sound system. Although he recorded with such rock and punk bands as the Pop Group and the Slits, his true strength was dub music which he recorded under the name Blackbeard (*Strictly Dub Wize*, Tempus, 1978). *Brain Damage* (Fontana, 1981), released under his own name, provides an overview of Bovell's creative production, with its shrieks, deep echo effects and syncopated hi-hats. In 1979 Matumbi recorded *Point of View* which placed traditional reggae toasting in a big band setting. Bovell is perhaps best known for his collaborations, in the studio and on tour, with the political dub poet Linton Kwesi Johnson. Among their best work is *Dread Beat an' Blood* (Virgin, 1977), *LKJ in Dub* (Island, 1980), *In Concert with the Dub Band* (Shanadine, 1985), and *More Time* (LKJ Records, 1999). Bovell has remained active as a producer, writer and bandleader.

ROGER STEFFENS

Bovicelli, Giovanni Battista (*b* Assisi; *fl* 1592–4). Italian music theorist and singer. He is known only as the author of *Regole, passaggi di musica, madrigali et motetti passeggiati* (Venice, 1594/*R*). His skill as a composer and improviser of ornamental *passaggi* was attested by Damiano Scarabelli, vice-*maestro di cappella* at Milan Cathedral, in the dedication of his *Liber primus motectorum* (Venice, 1592). Bovicelli's treatise is a valuable source of information on improvised vocal ornamentation and virtuoso singing in Italy in the early Baroque period. The book follows the usual format for such manuals; it gives lists of common diminutions of melodic intervals and passages, followed by versions of the soprano lines of several well-known motets, madrigals and *falsibordoni*, showing how the ornaments were to be applied. The composers represented in the treatise are Palestrina, Rore, Victoria and Claudio Correggio. Their works are so heavily embellished that the lines of the original compositions are at times difficult to detect. In his *Nuove musiche* (Florence, 1601/2), Caccini sought to reform this extravagantly ornamented style and sanctioned only one

of Bovicelli's figures – the *accento*; nevertheless, many early 17th-century sacred and secular monodies incorporated the type of elaborate passage-work advocated by Bovicelli, and the improvisation of ornaments in performance undoubtedly continued.

The first section of the treatise deals with the resetting of the text in the ornamented version. In a passage of fast notes of the same value there should be no syllable change until there is a change to longer notes, and the same is true for trills and similar rapid passages; a repeated note should have a syllable change. In a passage of varied note values the syllables may be changed at any time, provided the short and long syllables are properly set. Bovicelli stressed that ornaments should be appropriate to the voice and included suggestions about vocal articulation. In scale passages of demisemiquavers each note should be articulated separately, but a pair of demisemiquavers in a passage of semiquavers should not be articulated but passed over smoothly. He also discussed the treatment of melodic leaps in different situations; although he considered a series of leaps to be more instrumental than vocal in style, he maintained that they would sound well if the upper notes were taken lightly. In these and other instructions, and in a final exhortation on proper breathing in ornamented singing, there is evidence of the new virtuoso style of singing that was to dominate the Baroque cantata and opera.

ALICE LAWSON ABER-COUNT

Bovy-Lysberg [Lysberg], **Charles Samuel** (*b* Geneva, 1 May 1821; *d* Geneva, 14 Feb 1873). Swiss pianist and composer. Son of Antoine Bovy, a well-known engraver, he received his first musical training in his native town. In 1835 he went to Paris, where he became a pupil of Chopin. He also studied composition under Marmontel and met Liszt, who encouraged both his composing and playing and secured a publisher (Richault) for Bovy-Lysberg's op.1, a set of waltzes for piano entitled *Suissesses*. He soon became a renowned piano teacher, but after the February Revolution in 1848 returned to Geneva, where he taught the piano at the conservatory (1848–9, 1870–73). In 1848 he married Alice Fazy (niece of the revolutionary Genevan statesman James Fazy), and the following year they settled at her castle at Dardagny, near Geneva. There and in neighbouring musical centres he gave frequent recitals, sometimes playing his own works; he also organized an annual series of concerts in Geneva. His compositions, which number more than 160, are mostly short, often brilliant piano pieces in various styles, which achieved great popularity in the salons of Geneva; many of them were published in Leipzig. He also wrote a comic opera *La fille du carillonneur*, which was performed with some success in Geneva in 1854, and a cantata *Les Alpes*, composed in 1860 to a text by A. Richard.

F.R. BOSONNET

Bow (Fr. *archet*; Ger. *Streichbogen*; It. *arco*). A flexible stick of wood or a tube (bamboo) held under tension by a string or strings, usually of horsehair, used to draw sound from a string instrument.

I. History of the bow. II. Bowing. III. Non-Western instruments.

I. History of the bow

1. Origins. 2. The bow in Europe to *c*1625. 3. *c*1625–*c*1800. 4. The Tourte bow. 5. Double-bass bows. 6. The 'Bach' bow.

1. ORIGINS. The use of the bow can be traced back to the 10th century, when the bow was known throughout Islam and in the Byzantine empire. No evidence has been found either in the parts of Europe not then under Byzantine or Arab rule, or in eastern and south-eastern Asia, of string instruments which were bowed before the year 1000. Theories of a north European or Indian origin for the bow have proved groundless. The bow is frequently mentioned in 10th-century literature and is clearly depicted in a number of illustrations. The majority of references in Arabic literature come from important scholars and competent authorities on music, such as Al-Fārābī, Ibn Sīnā, Ibn Zayla and Ibn Khaldūn. In connection with the classification of chordophones 'whose strings are made to sound by rubbing them with other strings [*awtār*] or a string-like fabric', these writers mentioned instruments 'whose notes can be prolonged [*mumtadd*] and combined [*muttaṣil*] at will'.

The available sources indicate that bowing originated in central Asia. At the time, rods for plucking, beating or rubbing the strings were used as well as the bow to produce sound from chordophones. The hypothesis of the central Asian origin of the bow is supported by a mural in the palace of the governor of Khuttal at Hulbuk (now Kurbanshaid, south Tajikistan). Among other subjects, it shows women playing musical instruments, among them a bowed string instrument (fig.1). Since this palace was destroyed in the 11th century, and the mural was whitewashed over at the end of the 10th, the painting must date from the 10th century at the latest. Several 10th- and 11th-century Byzantine illustrations show string

1. Drawing of a detail from a mural depicting women playing musical instruments, late 9th century or early 10th, from the governor's palace, Hulbuk (now Kurbanshaid, south Tajikistan)

instruments – with the strings attached to a transverse string-holder and arranged in a fan formation, with lateral pegs being used in conjunction with extremely long bows.

2. The bow in Europe to *c*1625. The bow was first introduced into Europe in the 11th century via Islamic Spain and Byzantium. The earliest occidental references to it are in miniatures from northern Spain and Catalonia, dating from the first half of the 11th century. By 1100 the bow was used throughout western Europe. The oldest bow that has been preserved, although only in a fragmentary state, dates from the middle of the 11th century. It was found during excavations at Christchurch Place in Dublin, together with the tuning pegs of a string instrument. The wooden stick, broken off at the handle end, is 57 cm long and shows the bow to have been convex. It runs in a slight curve from the break and is distinctly bent towards the tip, where there is a notch. The horsehair stringing would have been fixed to the stick at the notch with a knot.

The bow in the early centuries, up to about 1600, had certain characteristics common to all specimens, notwithstanding the great variety of forms. Bows were always convex, like drawn hunting-bows. The hair, which was horsehair or a 'string-like material', was strung on a shaft of elastic wood or bamboo, bent in an arc. The bowstick was much weaker than on modern bows, so the hair gripped the strings less firmly. The hair was affixed directly to the stick, not to an adjustable nut which would have permitted alterations to the tension. Iconographic sources have yielded a great variety of bow shapes from around the end of the 10th century, ranging from the large, strongly arched, almost semicircular bow, held in the middle of the stick as in fig.2, to the flat bow, hardly curved at all, with its hair almost touching the wood (fig.3). The curve of some bows described a uniform arc;

2. Strongly arched bow, held at the centre: detail of illumination from a Mozarabic MS of the commentary on the Apocalypse by Beatus of Liébana, c920–30 (E-Mn MS de Beato, Vit.14–1, f.127r)

3. Long flat bow held by a boy playing a ?rebec: detail of a relief on a Byzantine casket, ivory, 10th century or early 11th (Museo Nazionale del Bargello, Florence)

4. Strongly arched bow with half the stick serving as a handle: miniature from a Mozarabic MS of the commentary on the Apocalypse by Beatus of Liébana, from Silos, Castile, 1091–1109 (GB-Lbl Add.11695, f.86r)

others were sharply curved at one end but otherwise fairly straight. There were also bows whose stick extended well beyond the end of the hair; this projection served as a handle and in early specimens was often exactly the same length as the part used for bowing (fig.4). In some illustrations the hair of the bow is apparently no more than about 20 to 30 cm long, allowing only very short bowing movements, while in others the bow has a total length of more than twice that of the instrument and is manipulated chiefly with the arm at full stretch.

The pictorial sources thus demonstrate that many different types of bow were tried out in the 10th and 11th centuries; this experimentation suggests that the bow was then at an early stage of its development, lacking forerunners. It was not until the late Middle Ages that uniform types gradually evolved, between 50 and 80 cm long and moderately curved. Where there was no projecting handle the player held not only the stick but also the end of the hair, and was therefore able to vary the tension of the bow while playing by pressing the hair with the fingers. In order to keep the hair and the stick apart on the flat type of bow, various forms of (non-adjustable) nut were introduced from the 13th century onwards: a natural bifurcation of the wood could be exploited, one of the branches being cut down to a stump; or the player could insert a piece of wood or a finger between the hair and the stick, a method illustrated as early as the 11th century.

Until the 14th century the bow was generally held in the clenched fist, which made for a powerful stroke and greater pressure on the strings but precluded a loose wrist and therefore elasticity at the change of stroke. Illustrations of the bow being held with the fingertips occur as isolated instances at first, and become more frequent only in the late Middle Ages (fig.5). There is a distinction to be made between the grip at some point along the stick and that at the very end of the stick: the former is found principally with the strongly arched semicircular bow; but the latter, ensuring to a certain degree the evenness of stroke essential when the instrument has more than one string, gradually prevailed in Europe as the less arched bow came into general use. Almost without exception the instrument was held in the left hand and the bow in the right, as is usual today. Certain norms developed at an early date in the method of holding the instrument and in the technique of bowing. When the player held the instrument slanting upwards or sideways from the body the bow was held in an overhand grip, but when the instrument was supported on the knee (*a gamba*), the

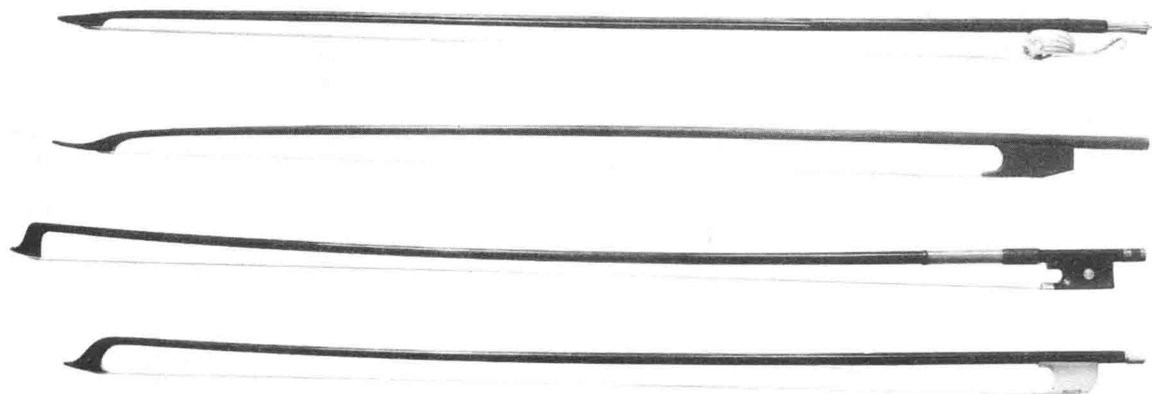
5. Bow held with the fingertips by an angel playing a fiddle: detail from a panel of an Aragonese reliquary retable from the monastery of Piedra, 1390 (Real Academia de la Historia, Madrid)

6. Musicians with (left) a rebec, holding the bow with an overhand grip, and (right) a viol with the bow held with an underhand grip: detail of a miniature from the Hunterian Psalter, English, c1170 (GB-Gu Hunter 229, f.21v)

bow was held in an underhand grip (fig.6; *see also* VIOL, fig.10). A common exception to this rule was that when the bow was strongly curved it was often held overhand, even if the instrument was supported on the knee. Occasionally, when the instrument was held with the strings almost vertical, the underhand grip was also found, principally in 10th- to 12th-century Byzantine illustrations.

Research has shown that the spread of bowing in Europe can be linked with the widespread medieval convention of bourdon accompaniment or with parallel organum or very early forms of medieval polyphony. The construction of the medieval fiddle with its bridge meant that the bow generally produced sound from more than one string at a time; the bourdon strings accompanying the melody created a drone background. The principle behind the sound production of the fiddle and that of the hurdy-gurdy was thus the same in the early phases. Only with the further evolution of bowing technique did the separate sounding of individual strings and the differentiation of angles in the bow's movement gradually develop. The polyphonic playing of string instruments was, however, still widespread during the Renaissance, at least on the *lira da braccio*, contributing to the development of chordal polyphony; this kind of playing required bows with a relatively wide gap between the hair and stick, a characteristic of both types of bow illustrated in the 15th and 16th centuries (i.e. the bow with strongly curved stick and the type with a flatter arc and a nut).

3. *c*1625–*c*1800. By about 1625 players began to require weightier bows for crisper articulation, increased volume, and a more complex sound. Iconographic sources indicate that until then the hair was attached at the point as it still is in traditional bows of many cultures: it was slipped through a hole or slit, then knotted and wrapped, as shown in Guido Reni's *St Cecilia Playing the Violin* of 1606 (fig.7). Probably about 1625, the point was thickened into a 'pike' head, the hair knotted and curled inside a rectangular (or later, trapezoidal) mortise cut in the head, secured by looping over a snugly fitting wooden plug (fig.8).



At this time, bows were generally constructed of tropical hardwoods; the few extant 17th-century bows are all made of snakewood (specklewood, letterwood; Lat. *piratinera guianensis*), a remarkably dense, strong and beautiful material. Ebony and ironwood bows from the 18th century are extant, but although these woods are dense, their elasticity necessitates exaggerated thicknesses and weights to strengthen them; they seem to have been reserved for the appropriately heavier bows intended for use on large instruments.

17th-century iconography reveals an aesthetic preference for matching the lengths of bows with their instruments. Representations of bows for violone, cello and bass viol seem substantially longer than later examples, although with actual bows adherence to the aesthetic was limited by practicality. *Braccio* instruments and their bows, however, were often conveniently matched, as in Peter Lely's *Man Playing a Violin* (late 1640s) and a *vanitas* by Pieter Claesz (*c*1597–1660; fig.9). A rare late 17th-century violin bow is 58 cm in total length; another extant short bow, of a later date, is just over 64 cm in length, roughly the outer limit for this type of violin bow (Powerhouse Museum, Museum of Applied Arts and Sciences, Sydney, Australia). Hawkins, in his *General History* of 1776, observed that the 'sonata' bow as late as 1720 was about 24 inches (61 cm) in total length, the 'common bow' even shorter. While it is impossible to generalize about the weights of short bows, extant examples weigh between 37 and 42 grams.

The hair was attached at the shank of the stick with a second mortise, and a removable frog (nut) separating the stick from the hair was fitted to a depression carved in the stick and held in place by hair tension. Although it precluded fine adjustments of hair tension, this method

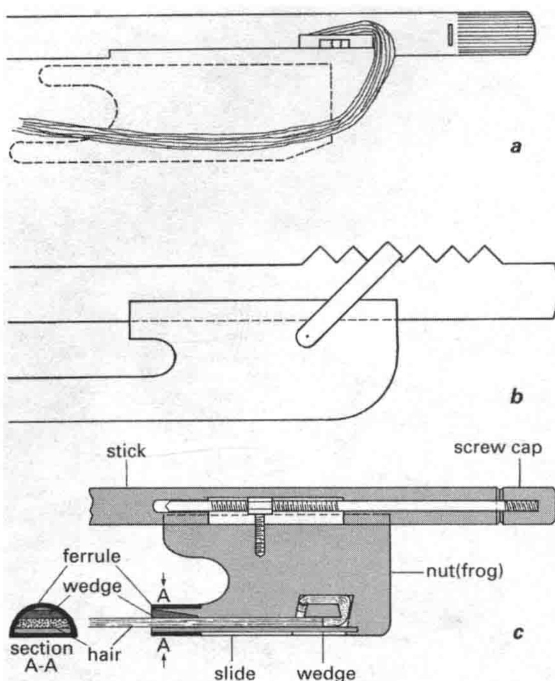
7. 17th-century pre-'pike'-head bow (hair knotted through stick and wrapped): 'St Cecilia Playing the Violin' by Guido Reni, 1606 (Norton Simon Museum, Pasadena, CA)

8. (a) Bow with 'pike' head and movable frog by ?Antonio Stradivari, c1700; (b) 'swan-bill' head long bow of snakewood, reeded grip, with original 'clip-in' frog of plumwood stamped 'LS', probably English, length 71·7 cm, c1725; (c) modern 'hatchet' head bow of pernambuco and closed-channel screw-frog by François Tourte, length 75 cm, c1790; (d) 'battle-axe' head 'Cramer'-type transitional bow of pernambuco, with carved open-channel screw-frog of ivory, length 71·1 cm, c1775

nevertheless seemed perfectly adequate; some adjustment could be made by placing slips of paper or other material between hair and frog. Early experiments with tension-regulating devices, such as the dentated *crémaillère*, where the frog is attached by a metal loop to a small ratchet affixed along the top of the stick (see fig.11*b* below) seem not to have generated much interest until much later. (The date of 1694 on the eyelet-and-screw frog of a well-known bow formerly in the Hill collection in London is spurious.) On the few surviving 17th-century bows that retain their original frogs, the hair channel measures as much as 8 mm.

To circumvent perceived lack of responsiveness in the upper portion of a pike-head bow, where the distance between the hair and the stick was small, the stick was often heated and bent (or perhaps carved) slightly outward in its uppermost few centimetres. The resulting increased distance between hair and stick made the bow very flexible and responsive throughout its length, lending weight to the advice in Bartolomeo Bismantova's *Compendio musicale* (1677–9) that ornaments are best played with separate bowstrokes at the tip of the bow. In any case, with the frog 'clipped' in place under playing tension, 17th-century bows appear somewhat convex.

9. Matching lengths of 17th-century violin and pike-head clip-in bow: 'vanitas' still-life by Pieter Claesz, mid-17th century (Germanisches Nationalmuseum, Nuremberg)

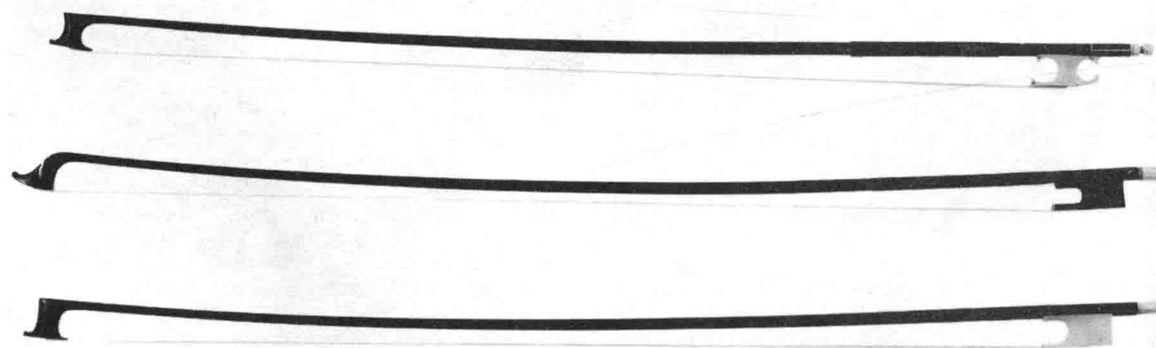


10. Short bow in the 18th century: 'Sultan Giving a Concert to his Mistress' by Carle Vanloo, c1737 (Wallace Collection, London)

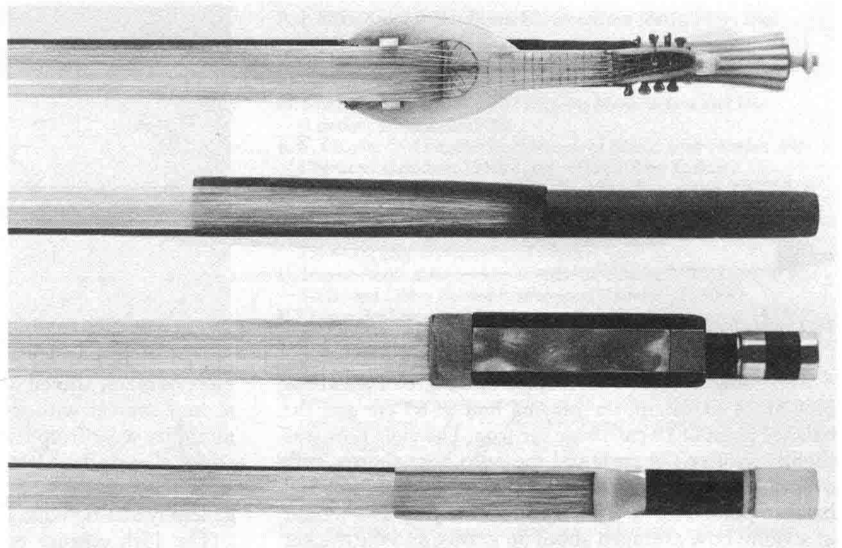
Performers were evidently satisfied with the short violin bow well into the 18th century. However, about 1720, reportedly at the instigation of Tartini, Italian luthiers developed a substantially longer violin bow, between 69 and 72 cm in total length and generally weighing between 45 and 56 grams. In another modification later credited to Tartini as well, the mild convexity near the tip was replaced by a slightly more elevated head, frequently resulting in a distinct 'swan-bill' profile, while the stick remained straight; however, Tartini's long bow, although straight, has a small, somewhat elevated pike head rather than a 'swan-bill' (Conservatorio di Musica Giuseppe Tartini, Trieste). The new bows were known as 'long bows', sometimes as 'Tartini bows'. Under playing tension, long bows still always appear slightly convex; moreover, many 18th-century long bows were still built with low pike heads, or even swan-bill heads, that retain the convex 'hump' at the upper end of the stick. Not infrequently the shank of the stick was reeded – that is, carved with up to 24 shallow, narrow flutes – either for better grip, or for decoration. The bow in fig.8*b*, probably of English provenance, *c*1725, is 71·7 cm long and weighs 54·5 grams; its original 'clip-in' frog is intact, and the grip area and end of the stick are reeded.

Long bows did not supplant the short bows. G.B. Somis (1686–1763), a disciple of Corelli (1653–1713), continued to use a short bow; and P.A. Locatelli (1695–1764), arguably the most brilliant virtuoso of the 18th century, was reported by English observer Benjamin Tate in 1741 to be adamant in his preference for the short bow, perhaps because its greater ease of handling and quicker response complemented his fiery performance style. The slight sagging of the long bow on initial string contact suited the prevailing 18th-century italianate cantabile style and continuous on-string passagework, but not certain types of crisp articulation.

In an effort to reduce their mass without a compromise in strength, long bows, not infrequently, had their upper two thirds fluted; a number of fluted 18th-century examples are extant. Many of these show few signs of use, their preservation possibly due to their craftsmanship or costly materials rather than their playing characteristics. Indeed, the prevailing perception of bows as accessories meant that most ordinary, if well-playing, short and long bows were ultimately discarded, while aesthetically pleasing long bows survived without regard for their musical efficacy. Fluted bows never seem to appear in iconographical sources; perhaps their reduced mass also reduced their richness of sound or stability, diminishing their attractiveness to professional players. Indeed, short bows, invariably unfluted, had achieved increased strength and reduced mass with a stick that was slightly higher than wide; it was carved with an oval cross-section in its verticle axis.



11. Three methods of tightening the bow hair: (a) clip-in or slot-notch frog; (b) crémaillère; (c) screw mechanism of the modern frog



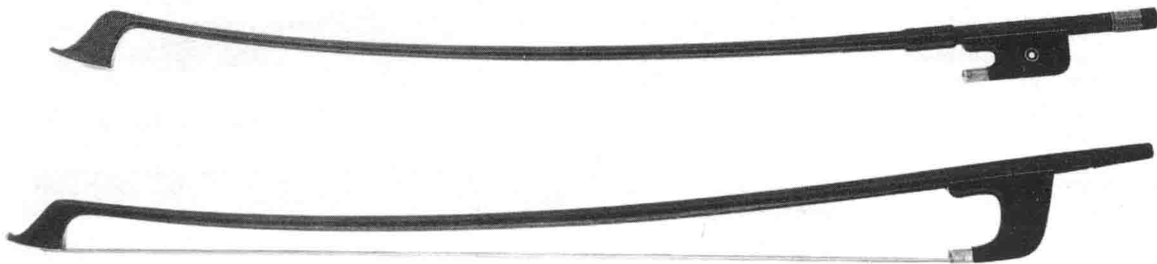
The short bow continued in common use until at least 1750. Catalogues of mid-18th-century luthiers still include them, and many 18th-century paintings show them in use, among them Carle Vanloo's *Sultan Giving a Concert to his Mistress* (fig.10; *c*1737) and Hogarth's *Enraged Musician* (1741), whose principal figure was identified by Charles Burney as the virtuoso violinist Pietro Castrucci. Still, the long bow eventually did replace the short bow, at least for most soloists: J.-M. Leclair performed with a long bow; so did F.M. Veracini, as illustrated on the frontispiece of his *Sonate accademiche* of 1744. The aesthetic of matching instrument and bow lengths was abandoned: bows for viola, cello and bass viol were now shorter than those for violin.

While the 'clip-in' frog was still adequate for most players, some evidently felt that the increased hair span of the long bow made it more sensitive to changes in humidity and that it required a means of implementing minute hair-tension adjustments. The screw-adjustable frog and eyelet, with the hair inserted into a mortise cut in the frog's hair channel rather than the stick itself, probably made its appearance about 1740. However, most long bows, and even the transitional/classical types that began to appear by about 1760, were still built with clip-in frogs for several decades: two bows owned by Tartini (Conservatorio di Musica Giuseppe Tartini, Trieste), one long bow and one transitional type have such frogs. Small adjustments of hair tension were apparently not deemed critical enough for most mid-18th-century players to consider the added expense of the screw frog. Moreover, early eyelets may not have been reliable, their few threads stripping after modest use. As is the case with short bows, the frogs on many extant long bows have wider hair channels than was once assumed: 8·5 mm is not unusual. Probably during the third quarter of the 18th century, a number of clip-in long bows were re-cut to accept screw frogs. A well-known example is the elaborate pandurina-shaped frog, probably of French provenance, *c*1770, on an anonymous fluted long bow, *c*1740 (Music Department, University of California, Berkeley). This bow was erroneously dated *c*1700 and attributed to Antonio Stradivari; its stick, probably of ironwood, was formerly thought to be pernambuco.

The long bow persisted until the end of the 18th century, overlapping with the transitional/classical bows. Transitional bows continued the long bow's pattern of development in further raising the head, creating 'hatchet' or 'battle-axe' profiles, and not infrequently, a modified swan-bill head that was foreshortened and extremely high; a number of fluted transitional bows with the latter are extant (fig.12*b*). The stick was heated and bent strongly inwards to counter the extended distance between stick and hair, and to add spring and resistance. One occasionally encounters incurved high-headed transitional bows built with the old convex 'hump' near the head, for added flexibility in that area. Many transitional models are shorter than the long bows, usually lighter, despite thicker graduations, and frequently have narrower hair widths (compare figs.13*b* and *c* below), although as the century progressed they became longer and heavier with wider hair channels. Pernambuco and, less commonly, ironwood were generally used for these thicker concave sticks rather than snakewood: pernambuco

12. Three screw-frog transitional bow designs, c1775 (Ashmolean Museum, Oxford): (a) bow stamped 'Forster', with 'battle-axe' head; (b) bow attributed to Louis Tourte (Tourte père), with raised, foreshortened modified 'swan-bill' head and fluted stick; (c) bow attributed to Edward – but possibly John – Dodd, stamped DODD, with 'battle-axe' head

13. Comparison between the hair widths of the bows in fig.8: (a) ?Stradivari, c1700; (b) clip-in frog, c1725; (c) F. Tourte, c1790; (d) 'Cramer' type, c1775



because it is lighter, ironwood because it is less stiff. The elasticity of these materials could be circumvented by the inward *cambre*, and pernambuco was also less expensive than snakewood.

In his *Méthode pour le violon* (*c*1798), the Parisian violinist Michel Woldemar (1750–1818) presented four accurate illustrations tracing the history of the bow: short ('Corelli'), long ('Tartini'), transitional ('Cramer') and Tourte ('Viotti'). Reputed to own bows of each type, Woldemar claimed that the model associated with the virtuoso Wilhelm Cramer, active in London during the 1770s and 80s, was 'adopted in his [Cramer's] time by a majority of artists and amateurs'. With mirrored peak and throat on its 'battle-axe' head, and a delicate ivory frog of typical French design, similarly hollowed on both sides (fig.8*d*), the 'Cramer' bow is one of many extant variations by builders working in Paris and London, the two centres of bowmaking: in Paris, Duchaine, Tourte (*père*) bows stamped 'Tourte L.', and 'Meauchand', among them; in London, Edward, John and James Dodd, Thomas Smith, and others. Few bows of the period were stamped, those stamps that exist were as likely to identify firms for which the maker worked, especially in Britain, such as 'Banks', 'Betts', 'Forster', 'Longman & Broderip' and 'Norris & Barnes'.

The bounced bowstrokes in music of the Mannheim school, Haydn, Mozart and their contemporaries seem to have been responsible for the introduction of springy transitional bows, which performed these effects more naturally than long bows. Interestingly, a transitional bow of about 1770, attributed to Tourte *père*, is yet another ascribed to Tartini's ownership; if he was indeed its owner, he acquired it at the end of his life. However, it is the long bows, which smoothly sink into the string, that are better suited to what Hubert Le Blanc, in his *Défense de la basse de viole* of 1740 recognized as the Italian violinist's 'endless stream of seamless bow changes'. A pen-and-wash drawing (*c*1800), shows G.B. Viotti, widely – if anecdotally – considered the early champion of the new François Tourte bow, holding what appears to be a long bow with a swan-bill head. Many surviving long bows had inward *cambre* added at a later date, presumably to facilitate bouncing strokes, but they ultimately fell into disuse with the radical changes in musical style in the late 18th century. With the late 20th-century interest in period-instrument performing practice, surviving long bows have been widely copied, although usually constructed with an inward curve that regrettably masks their genuine responses and strengths.

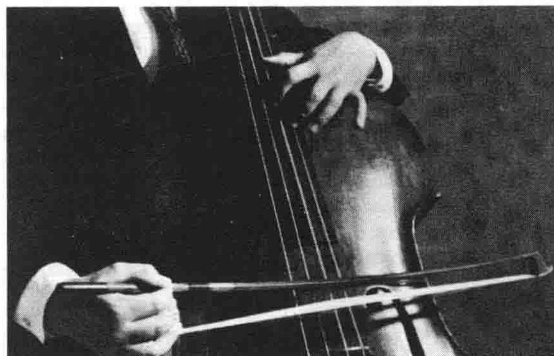
The model of François Tourte originating in the 1780s, is, at 74 or 75 cm, 2 to 4 cm longer than either long bows or many transitional bows. With even stronger graduations and *cambre*, and a closed frog with slides and a metal ferrule (figs.11*c* and 13*c*), it is, at 56 to 60 grams, slightly heavier than some of the long bows; the 'hatchet' head is similar to transitional models, but without mirrored peak and throat. Although this model eventually eclipsed all previous types, various transitional designs were made well into the 19th century throughout Europe, notably by the many members of the Dodd family in England. Cost was generally the motivation: frogs with mother-of-pearl slides and silver ferrules are more expensive to produce than plain open-channel ones. A Bégas lithograph of *c*1820 clearly shows Paganini using a transitional bow of the Edward Dodd type, with a 'battle-axe' type head.

4. The Tourte bow. About 1785 François Tourte (1747–1835) succeeded in producing in Paris a bow so remarkably satisfactory (see fig.8*c*) that it became the model in his own time and, with a few changes of detail, has continued as such. The superiority of Tourte's bows was acclaimed by Louis Spohr (*Violin-Schule*, 1833), who spoke of 'the trifling weight with sufficient elasticity of stick', of 'the beautiful and uniform bending, by which the nearest approach to the hair is exactly in the middle between the head and the frog' and of 'the extremely accurate and neat workmanship'. In effect Tourte combined the significant innovations of the transitional bows – including the concave bowstick and the higher, more massive head – in a final form that joined supreme playing qualities to incomparable grace. Although a legend in his own lifetime, he never stamped his bows; in a few cases he inscribed his name, age and the date on a piece of paper inserted in the slot holding the frog.

14. Double-bass bows: (a) French or Bottesini bow; (b) German or Simandl bow (private collections)

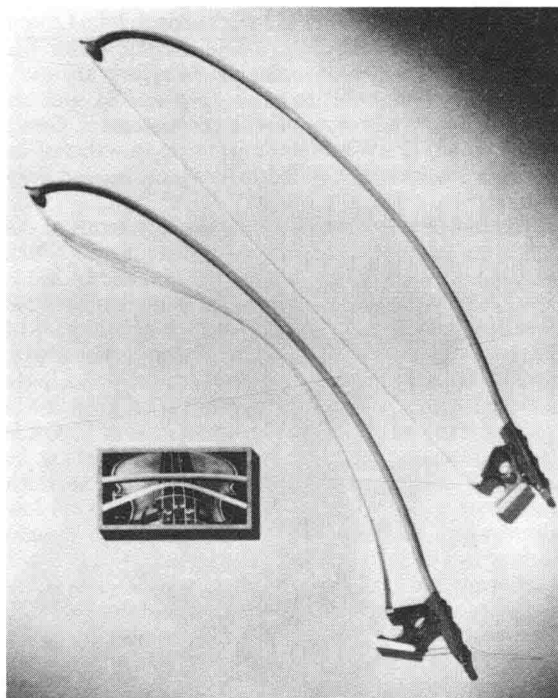
According to Fétis, Tourte fixed the length of the violin bow at 74 to 75 cm, the playing hair at 65 cm and the balance point at 19 cm above the frog. The viola bow was slightly shorter (74 cm); and the cello bow shorter still: overall length 72 to 73 cm, playing hair 60 to 62 cm and balance point 17·5 to 18 cm above the frog. The weight of a violin bow averaged about 56 grams, and the thicker viola and cello bows weighed correspondingly more. Tourte's bowsticks, invariably of pernambuco wood and finished as round or octagonal, tapered slightly from frog to head, being slimmer at the head end (for a mathematical formulation see Fétis, pp.125ff). He achieved the concave curvature by heating the stick completely through and then bending it while hot, rather than by cutting at once to the desired bend. The band of hair was widened to about 1 cm and comprised 150 to 200 hairs from white horses. To prevent it from bunching into a round mass, Tourte (according to Fétis, at Viotti's suggestion) spread the hair into a uniform ribbon by means of a ferrule, generally of silver; he covered the surface from the ferrule to the end of the frog with a mother-of-pearl slide (Fr. *recouvrement*). Although claimed as Tourte's innovation, the ferrule and slide had probably been introduced earlier. (The details of the modern frog and its mechanical action of tightening the hair are shown in fig.11*c*, from which may be noted the rectangular form of the frog – generally made of ebony – and the squared-off screw button.)

Tourte selected a hatchet form of head, facing it with a protective plate, generally of ivory. The 'hatchet' head was heavier than the earlier 'pike's' head or even than most transitional designs; balance was restored at the frog end by the extra weight of the metal ferrule and by the added weights of the inlay ('eye') of the frog (fig.8*c*), the back-plates and the screw button. Even so, the balance of the Tourte bow was farther towards the centre of the bow than in earlier examples. Tourte and his followers also adorned their best bows by using such precious materials as tortoiseshell for the frogs, gold for the ferrule, back-plate and screw button, and occasionally mother-of-pearl for the face of the head.



John Dodd (1752–1839), Tourte's contemporary in London, was likely aware of the pioneering work of the Tourte family. He may have perfected the bow about the same time as François Tourte, arriving at very similar solutions. Dodd's bows, however, are not of such uniformly high quality, and many of them are slightly shorter. To judge by the text and the bows illustrated in Baillot, Viotti may have used a Dodd bow about 2·5 cm shorter than the Tourte model.

Only one later addition to the Tourte bow proved of functional importance: the underslide (Fr. *coulisse*), a piece of metal affixed to the part of the frog that comes in sliding contact with the bowstick, its purpose being to minimize wear from friction and to reinforce the delicate edges. Tourte had left this surface of the wooden frog without protection; the invention of the underslide is generally attributed to François Lupot (1774–1837).



The 19th century produced a vast number of distinguished bowmakers; among the most celebrated were Dominique Peccatte, F.N. Voirin, Lupot, Maire, Pageot, Persois, Henry and Simon in Paris, and the Dodd and Tubbs families in London. In Germany Ludwig Bausch attained sufficient fame to be called the 'German Tourte'.

Both Peccatte and Voirin worked at first for J.-B. Vuillaume, the most celebrated French violin maker and dealer of the early 19th century. Many of the early bows of Peccatte and Voirin (among others) were stamped with the name of Vuillaume, who while not a bowmaker himself spent much time studying Tourte's work so that he was able to direct the work of his own makers. Vuillaume also invented new models, such as his hollow-steel and self-hairing bows, neither of which proved of lasting importance. Bowmakers after Tourte (such as Peccatte, Henry, Persois and Maire), while otherwise generally adhering to the Tourte model, tended to make the bowstick about 1 cm longer, and aimed at 60 grams as the ideal weight.

5. Double-bass bows. The double-bass bow is sometimes constructed like a modern cello bow and sometimes like a combination of cello and viol bow. The cello-type bow, played 'overhand', is called the 'French' or 'Bottesini' bow (after a renowned player). It has the concave curvature, modern frog and 'hatchet' head of the cello bow, although the stick is thicker, heavier, somewhat shorter and more sharply curved inwards (fig.14*a*).

15. Simandl bow grip as used on the double bass

16. Modern 'Bach' bow, made by Knud Verstergaard, Viby, Denmark

The other type of bow is called the 'German' or 'Simandl' bow (after a famous Viennese teacher; fig.14*b*). A combination of the French bow and the early viol-type bow (the 'Dragonetti', now obsolete), the 'Simandl' uses the modern 'hatchet' head and the incurve of the French bow but with a greater space between hair and stick at the frog, which is also somewhat different. The 'Simandl' bow and its predecessor the 'Dragonetti' were never played underhand like the early viol, but were grasped endways, almost like a saw, the palm enclosing the frog so that the two middle fingers went round the frog parallel to the stick, the little finger below the slide, the forefinger below the stick, and the thumb resting above and exerting pressure on the stick (fig.15).

The French and German double-bass bows were both introduced relatively late in the 19th century.

6. THE 'BACH' BOW. In the 20th century a so-called Bach bow was created to play the Bach solo violin sonatas and partitas 'precisely as written'. This goal was based on the misconception that the chords in these works were intended to be sustained as written. The existence of a highly arched bow on which the hair could be loosened and tightened was postulated by Arnold Schering and Albert Schweitzer at the beginning of the century and such a bow was built by Rolf Schröder in 1933. It is of very high arch, as much as 10 cm separating the bowstick and the hair at the highest point. By a mechanical lever, worked by the thumb, the player can tighten the hair at will to play on individual strings and loosen it to encompass all the strings, thus sustaining multiple stops continuously (fig.16).

II. Bowing

1. Distinctive aspects of bowing before Tourte. 2. Bowstrokes to *c*1780: (i) Preliminary definitions (ii) The rule of the down-bow (iii) Bowing inflections (iv) Special bowings: problems of terminology and notation (v) Use of slurs (vi) Tremolo (vii) Staccato bowings (viii) *Ondulé, ondeggiando, bariolage* (ix) Arpeggiando, batterie (x) Mixed bowings (xi) Multiple stops, chords and special effects. 3. Bowstrokes after *c*1780: (i) Down-bow and up-bow (ii) The legato slur (iii) Portato (iv) *Détaché* (v) *Martelé* (vi) *Staccato* (vii) *Sautillé* (viii) *Spiccato* (ix) *Ricochet*, *jeté*, flying staccato, *staccato volante*, flying *spiccato* (x) Tremolo (xi) Multiple stops (xii) Special effects.

1. Distinctive aspects of bowing before Tourte. Although the violin bow changed markedly between about 1600 and the second half of the 18th century, there are two features common to all bows from this period which have a direct impact on the way they are used and consequently on the sounds they produce. First, the distance between bow hair and stick is less at the point than at the heel. It follows from this that such bows have a lighter head than late 18th-century models, a balance point which is closer to the player's hand, and a convex stick – or at least one which is predominantly so. (Many early 18th-century bows have quite complex curves.) Secondly, no pre-Tourte bow has a ferrule (that is, the band of metal – usually silver – which clamps the hair as it passes out from the frog).

The first of these features means that the tendency for up-bows to be lighter than down-bows is considerably more marked on early bows than on a Tourte-style bow. (As we shall see, it is one of the achievements of late 18th-century bow design that it becomes a relatively simple matter for players to disguise the difference between up- and down-bows.) The second feature, the absence of a ferrule, means that there is nothing to hold the ribbon of hair flat if pressure is exerted at the heel while the bow is held at a slight tilt. This makes it unsuitable for modern-style *martelé* (see §II, 3(v) below).

To put this in a more positive way, early bows serve an expressive ideal which places great value on an articulate and inflected bowing style. The concepts on the one hand of a seamless legato with inaudible bow changes and on the other of a sudden attack with an initial hard 'consonant' seem to have no place in 17th- and 18th-century music.

Ways of holding the bow are described in a number of sources. In the early Baroque period, the thumb was placed on the hair at or near the frog. The change to placing the thumb on the underside of the stick was initiated by the Italians. In France, the thumb-on-hair method persisted into the 18th century; it is the grip described by Montéclair (1711–12). Not until Corrette's *L'école d'Orphée* (1738) is the thumb-on-stick grip offered as an alternative (and it is still identified as an Italian practice). According to Roger North, Nicola Matteis persuaded the English 'out of that awkwardness'; yet in 1693, 20 years after Matteis's arrival, John Lenton (1693) advocated holding the bow 'half under the nut [i.e. the frog], half under the hair from the nut'. The Italian bow hold may not have seemed such an obvious improvement to all who encountered it. Georg Falck (1688) describes the French grip in terms of its positive qualities, saying that it produces a good deep stroke.

The Italian grip is carefully discussed in terms of the subtleties of tone production by Geminiani (1751), Leopold Mozart (1756), Herrando (1756) and L'abbé *le fils* (1761). What they describe is very different from the prevalent modern bowing style. All insist that the parts of the body closest to the bowstick are the most active; flexible wrist and finger movements are vital, then a freely moving lower arm and, finally, an upper arm which will become involved only in the broadest strokes. L'abbé *le fils* comments on the flexibility of the fingers which, he says, 'will naturally make imperceptible movements which contribute a great deal to the beauty of sound'. A low elbow which allows the weight of the arm to be brought to bear in a relaxed way is fairly consistently advocated in Baroque and Classical treatises. Lenton advises players to 'hold not up your Elbow, more than necessity requires'. The most precise statement about elbow position comes from Herrando who also stresses the role of the wrist, and lower-arm movement:

> The right arm is raised naturally, the elbow separated from the body about the distance between the extended thumb and forefinger, without movement from the elbow up, for the movement must come from the elbow forward with freedom of the wrist and evenness in the bow.

Mozart, too, warns against a right arm that is held too high, and, like Herrando, refers his readers to the engravings in his treatise; the contrast in elbow positions between the 'good' and 'bad' pictures is marked (fig.17).

The bow could be held some distance from the frog. Corrette claims that the Italians 'hold it three-quarters of the way down the stick'. Berlin (1744) says: 'imagine that the length of the bow is divided into three parts, and put your hand in the middle of the first part'. Geminiani advises players to use the whole bow 'from the Point to that Part of it under, and even beyond the Fingers', implying that the hand is not at the frog. Corrette, Herrando and L'abbé *le fils* all recommend tipping the bow slightly towards the fingerboard, but Mozart, typically concerned with achieving greater strength of tone, disapproves of this. For the same reason, he (and L'abbé *le fils*) advocate having the second or middle joint of the index finger (rather than the first joint) on the stick.

2. Bowstrokes to *c*1780.

(i) Preliminary definitions. On instruments of the violin family, 'down-bow' (Ger. *Abstrich*; Fr. *tirer*; It. [*arcata*] *in giù*, *tirare*) refers to the action of pulling the bow downwards so that the point of contact moves from the frog towards the tip, whereas in an 'up-bow' (Ger. *Aufstrich*; Fr. *pousser*; It. [*arcata*] *in su*, *spingere*) the player pushes the bow upwards from the tip towards the frog. The down-bow is more heavily weighted than the up-bow, partly because of the downward force of gravity and partly because of the weight exerted on the bow stick by holding it from above by the hand in a palm-down position. The natural weight of the arm is also a factor.

17. Correct (left) and incorrect (right) positions for the right elbow: engravings from Leopold Mozart's 'Versuch einer gründlichen Violinschule' (Augsburg, 1756)

From the late 18th century to the late 20th, violinists have toiled to equate the aural effect of down-bow and up-bow when it is musically desirable to do so, but the natural difference in emphasis favours the use of a down-bow for an accented beat (or part of beat) and up-bow for unaccented ones. This distinction was embodied in the fundamental 'rule of the down-bow' formulated by the Italians in the late 16th century (see below).

These distinctions apply to all members of the violin family. The basic cello strokes, though still called down- and up-bow might more accurately be described as 'out-bow' (away from the player) and 'in-bow' (towards the player). While gravity contributes less to the strength of the down-bow on the cello than it does on the violin or viola, the overhand grip nevertheless ensures that the application of weight to the string is much more direct at the start of a down-bow (when the hand at the heel of the bow is directly above the string) than at the start of an up-bow.

The viol bow is held underhand (*see* VIOL, fig.10); the in-stroke and out-stroke are nearly equalized with respect to gravity and pressure. Viol players nevertheless consider the push (in-bow) stroke somewhat more naturally weighted than the pull (out-bow). Thus the principles of viol bowing run exactly counter to those of the violin family. This is recognized in the earliest treatises to consider both families of instruments, and writers on viol playing from the late 16th century to the mid-18th give rules designed to produce push strokes (up-bows) in metrically stressed positions. (The viol's underhand grip was used by a number of cellists in the 17th and 18th centuries.)

(ii) The rule of the down-bow. The earliest explanations of how to organize bowing enshrine the basic principle later to become known as the 'rule of the down-bow' – that strong beats should be played on down-bows. Riccardo Rognoni (1592) gave a few rules in the introduction to his treatise on diminution. His son Francesco developed these in his *Selva de varii passaggi* (1620). They and Gasparo Zanetti (1645) insist on placing down-bows on strong beats.

The rule of the down-bow dominates French bowing in the 17th century. It is neatly summarized by Mersenne in 1636, and it forms the basis for Lully's bowing principles which were so meticulously documented by Georg Muffat (1698). The most distinctive of the Lullists' ways of achieving a down-bow at the beginning of each bar is the use of a down-up-down/down bowing sequence in slow triple time as an alternative to the more facile down-up-up/down (to divide – *craquer* – the up-bow is possible at all but the very fastest of tempos). Muffat, in describing how Lully bowed a minuet, contrasts the strict adherence of the French to the down-bow principle with the Italians' greater willingness to use alternate bows in triple time (ex.1*a*). According to Muffat, only fast courantes, gigues and canaries might be played by the French with continuously alternating bows. Of the rapid ornamental notes found so often at the end of a beat in the opening section of a French overture, Muffat says only that they can be bowed separately, or slurred 'for greater sweetness'. His brief example throws the whole question back on to the performers' taste (ex.1*b*). The 'Rules' which make so much sense of this Versailles-court dance-orientated style, are corroborated by other writers, notably Montéclair (1711–12) and Dupont (1713). Dupont, described on the

title page of his treatise as 'Maître de Musique et de Danse', stands in a tradition of violinist-dancing masters which goes back to the origins of the instrument.

Bow management in the later 18th century might be summarized as a very free interpretation of the rule of down-bow with various writers stressing that players needed to develop the ability to make up-bows sound strong when needed. Since Geminiani and Quantz both make this point, it clearly precedes (or at least goes hand in hand with) the development of a more substantial head to the bow.

(iii) Bowing inflections. It seems that in the pre-Tourte era many players were concerned as violinists are today with producing a good strong tone throughout the length of the bow. Bremner (1777, see Zaslaw, 1979, p.46) passes on an old (but plausible?) anecdote about Corelli's demands:

I have been informed that Corelli judged no performer fit to play in his band, who could not, with one stroke of the bow, give a steady and powerful sound, like that of an organ, from two strings at once, and continue it for ten seconds.

The ability to play a long, even stroke was, according to Muffat, one which transcended national boundaries: 'all the finest masters, regardless of their nationality, agree with each other that the longer, steadier, sweeter, and more even the bow-stroke is, the finer it is considered'. Montéclair, too, claimed that 'it is essential first of all to get used to playing up-and down-bows evenly from one end of the bow to the other without making the string produce an ugly sound'. His words are echoed by Corrette (1738), Geminiani (1751) and Mozart (1756).

In this period, however, a basic element in producing a strong sound was to make the string speak without a percussive consonant at the beginning of the note. According to Mozart:

Every note, even the strongest attack, has a small, even barely audible, softness at the beginning of the stroke; for it would otherwise be no note but only an unpleasant and unintelligible noise. This same softness must be heard also at the end of each stroke.

The point is reinforced by Tartini (1771):

To draw a beautiful tone from the instrument, place the bow on the strings gently at first and then increase the pressure. If the full pressure is applied immediately, a harsh scraping sound will result.

As late as 1791 Galeazzi was giving similar advice about the basic bowstroke:

In guiding the bow across the strings, one must place it lightly at the very beginning of the stroke, gradually adding weight until the middle, and then again releasing the weight until the tip, in such a way that the volume of tone must be least at the ends of the bow and maximum in the middle. This rule must be inviolably observed not only in long notes and notes of like length but also proportionately in shorter notes.

Interestingly this advice is retained in the 1817 second edition of his treatise, after the Tourte bow had gained widespread acceptance.

It is clear that the bow, to a much greater extent than in modern playing, became the primary source of expressive inflection. (This was true for viol as well as violin playing: Christopher Simpson (1659) talks about gracing 'by the bow' and Loulié (1700, see Cohen, 1966) describes the *enflé* or swell – a device indicated in Marais scores by the letter *e*.) The malleable quality of a violin's sound is compared by Le Blanc (1740) with (among other things) clay on a potter's wheel. Roger North also has some fine images for bowing of a kind which he says the Italians brought to perfection:

Ex.1 Muffat: *Florilegium secundum* (1698)

Learn to fill and soften a sound as shades in needlework, in sensation so as to be like also a gust of wind, which begins with a soft air and fills by degrees to a strength as makes all bend, and then softens again into a temper and so vanish. And after this to superinduce a gentle slow wavering, not into a trill, upon the swelling the note.

Geminiani (1751) calls this kind of dynamically modulated bowing 'one of the principal Beauties of the Violin'.

There are a few more specific indications of how inflected bowing might be used. Matthew Locke's storm music for *The Tempest* contains the directions 'lowder by degrees' and 'soft and slow by degrees'. Piani (*Sonate* op.1, 1712), and Veracini (*Sonate accademiche* op.2, 1744) have prefaces explaining the use of signs for a swell, a diminuendo and a combination of the two. The swell sign features in Geminiani's violin treatise, and in the earlier volumes *A Treatise of Good Taste* (London, 1749) and *Rules for Playing in a True Taste* (London, *c*1748). These signs were taken up and used by other French and English composers. Geminiani's pupils Festing and Avison made extensive and generally straightforward use of them. Avison, for example, uses combinations of these marks to show a natural phrasing off at cadences (ex.2). Sometimes the swell sign seems to require a rather unspecific interpretation, an expressive accent perhaps.

Ex.2 Avison: Concerto grosso op.4 no.1 (1755), end of 1st movt

J.-B. Cupis, in his celebrated Menuet (before 1742), uses large versions of these signs to indicate that the swell or diminuendo may be spread over several bars.

William Hayes, Professor of Music at Oxford, was contemptuous of Geminiani's habit of giving specific ornament and phrasing instructions to performers, claiming that he was 'paying his Brethren of the String but an ill Compliment'. The attitude that, at best, explicit markings are patronizing may help to explain why they are found in relatively few scores.

(iv) Special bowings: problems of terminology and notation. It has always been recognized that the violin's expressiveness is intimately connected with the way in

which the bow is used. The kind of bowing – whether sustained, gently articulated under a slur, detached but on the string, or lifted – will determine the expresssive character of a particular passage. An accepted vocabulary for describing a standard range of special bowings was not finally consolidated until well into the 19th century. Terminology for bowstrokes in the 18th and (more particularly) the 17th centuries was, to say the least, unstable. The point can be illustrated by sampling some of the ways in which staccato notes played in a single up- or down-bow have been described. Francesco Rognoni (1620) described this as 'il lireggiare affettuoso', Muffat (1698) as a *pétillement* ('crackling'), Piani (1712) as 'notes égales et articulées d'un même coup d'archet' (repeated verbatim by Corrette in 1738), Herrando (1756) as *picada* ('pricking or biting'), while L'abbé *le fils* (1761) called it a 'coup d'archet articulé', an expression applied by Bailleux (1779) to an ordinary detached stroke. Galeazzi describes it as 'note picchettate' and adds that many, believing that the technique was developed by Tartini, refer to 'note Tartiniate'. Cambini (1803) described it as *martellement* (a term which had already been used by L'abbé *le fils* and others for a mordent). This lack of agreement about terminology can in some cases make it quite difficult to know whether a type of bowing now identified by a 19th-century label was in fact part of earlier violinists' expressive armoury.

The other aspect of this problem is that, historically, notation for special bowings has never been able to reflect adequately the range of distinctions described or implied by violin treatises. The choice of dots, dashes, strokes, daggers and squiggles on their own or combined with slurs can suggest to modern eyes a more precise notational vocabulary than is in fact the case. When in 1954 the Gesellschaft für Musikforschung ran a musicological competition for essays which could establish the significance of wedges, strokes and dots in W.A. Mozart's works they fuelled a long-standing debate which, if nothing else, demonstrates the impossibility of giving consistent, universally-applicable answers to these questions. In the musical examples below it is often the case that the same notation could imply a range of different bowstrokes.

(v) Use of slurs. Slurs (to indicate that more than one note is to be played in a single bowstroke) are relatively few and far between in early violin music, though this may tell us more about the limitations of movable type as a way of printing music than about performing practice. Gabriele Usper in a contribution to his uncle Francesco Usper's *Compositione armoniche* op.3 (Venice, 1619) writes 'ligate' explaining his placing of groups of four notes under a slur. Rognoni (1620) uses the term 'Lireggiare' to describe the technique of playing two, three, or more notes in a single bow (emphasizing that in order to do this successfully the player must save bow and exert pressure with the wrist). Uccellini makes frequent use of slurs, some spanning quite long groups of demisemiquavers. By the end of the century, with bows about one and a half times as long as those being used in the 1620s, players were taking sweeps of notes into a single bow. We see this captured on the engraved plates of the Roger edition of Corelli's *Sonatas* op.5 (1710), for example. Burney tells us, too, that Pietro Castrucci came in for a certain amount of ridicule for advertising in 1731 that, in one of his own solos, he would execute '*twenty-four* notes with one bow' (*BurneyH*, ii, 770).

(vi) Tremolo. Before the end of the 18th century the term *tremolo* is ambiguous. (It is, for example, one of the terms used for vibrato.) *Tremolo* is never used in the Baroque period to indicate a rapid reiteration of a single note with individual bowstrokes. Monteverdi does, of course, describe a measured version of this as a crucial device for projecting a sense of agitation in the *stile concitato*. But *tremolo* itself refers usually to the pulsing of the same note in a single bowstroke. It is used in this way by Gabriele Usper (1619) and Tarquinio Merula (*Canzoni da suonare à tre*, 1639). The name derives, it seems, from the resemblance of this effect to an organ TREMULANT. Marini's sonata 'La Foscarina' (1617) calls for a tremolo with the bow in the violin parts at the same time as the basso continuo player is instructed to engage the tremulant stop (ex.3). Farina has a 'tremulo' section in *Capriccio Stravagante* (1627) with a foreword directing the player to use a pulsating bow hand to imitate an organ tremulant (in the *basso* part 'Der tremulant' is given as a translation of 'Il tremulo'). Andreas Hammerschmidt's *Musicalischer Andachten dritter Theil* (1662) contains the direction 'play four notes in one stroke with your bow (like the tremulants in an organ)'. The last piece in J.J. Walther's *Hortulus chelicus* (1688), includes a section in which the violin imitates an 'Organo Tremolante' by pulsing double-stopped minims in a single bow. Roger North talks about dividing long notes into shorter ones in the same bow 'as in the Italians *tremolo*' and he too likens the effect to 'the shaking stop of an organ'. Brossard (2/1705) states categorically that the device is intended to imitate the tremulant stop on the organ. Bailleux (1779) calls this 'balancement' and, noting the Italians call it 'tremolo', says that it produces the effect of an organ tremulant.

Ex.3 Marini: Sonata 'La Foscarina' op.1 (1617)

CANTO PRIMO — tremolo con l'arco
CANTO SECONDO — tremolo con l'arco
BASSO — tremolo col strumento
BASSO PRINCIPALE — metti il tremolo

Sometimes the device has a programmatic function – most famously in the winter scenes of Lully's *Isis* (1677) and Purcell's *King Arthur* (1691) (ex.4). Another 'orchestral' example of the device occurs in Cesti's *Il pomo d'oro* (Act 4 scene iv). Most often it is simply intended as a kind of bowed vibrato. It is one possible explanation for the markings 'con affetti', 'affetti' or 'affetto' which appear above long notes in sonatas by Marini, Buonamente and Scarani, especially in situations where faster movement in other voices seems to rule out improvised embellishment. Right at the end of the 18th century Galeazzi expressed a preference for this kind of tremolo over left-hand vibrato as a way of being expressive. (Incidentally, he used the term 'tremolo' for both devices.)

Ex.4 Purcell: *King Arthur* (1691), Act 3, Chorus of the Cold People

The device was not restricted to the violin family. Francesco Rognoni (1620) wrote enthusiastically of the viol being played 'con bella archata accentata, con i suoi tremoli' ('with fine accented bowing, with its *tremoli*). Christopher Simpson (1659), however, had some reservations: 'Some also affect a Shake or Tremble with the Bow, like the Shaking-Stop of an Organ, but the frequent use thereof is not (in my opinion) much commendable'.

(vii) Staccato bowings. The term *staccato* is the past-participle of *staccare*, itself a shortened form of *distaccare* 'to detach'. It was used twice by Johann Walther in his *Scherzi da Violino solo* (1676) in contexts that imply short separated strokes. Brossard (2/1705) defined staccato as 'approximately the same thing as *spiccato*, that is to say that on all bowed instruments the bowstrokes should be dry and very detached or with each note separated from the others without being drawn out'. He gave *Picqué* and *Pointé* as French synonyms (*see* PIQUER and POINTER). (Note that he associates *staccato* particularly with bowed instruments; *tronco*, on the other hand, is a word which he says applies equally to voices and instruments.) At about the same time Roger North described '*Stoccata* or stabb' as 'a peculiar art of the hand upon instruments of the bow'. He recommended it especially as a way of producing expressive contrasts, citing the example of Matteis who 'used this manner to set off a rage, and then repentance; for after a violent *stoccata*, he entered at once with the bipedalian [i.e. 2′ long] bow, as speaking no less in a passion, but of the contrary temper'. Interestingly, although the Matteis *Ayres* abound in quite complex slurred bowings, there are no explicit detached-bowing staccato markings and just one group of ten semiquavers slurred with dots. Leopold Mozart defines *Stoccato* or *Staccato* as 'struck; signifying that the notes are to be well separated from each other, with short strokes, and without dragging the bow'.

Eventually, dots placed above or below the notehead became the accepted way of indicating staccato playing. But since dots of this kind were also a normal way of specifying *notes égales*, their presence in Baroque scores is somewhat ambiguous. One of the earliest examples of (apparently staccato) dots above noteheads appears in G.A. Pandolfi's *Sonate a violino solo* op.3 (1660). Two Bolognese publications, Pirro Albergati's *Pletro armonico* op.5 (1687) and Bartolomeo Bernardi's *Sonate da camera a trè* op.1 (1692) have 'spicco', a term which F.O. Manfredini (Concerti op.3, 1718) uses in conjunction with dots. Antonio Veracini uses short vertical strokes to indicate staccato in several sonatas of his op.1 (1692). Presumably, the separation of notes by rests in much 17th- and early 18th-century music is designed to achieve a staccato effect (as in the Vivace opening of Corelli's op.6 no.8 which is contrasted a few bars later with a Grave marked 'Arcate sostenuto e come stà'). Leopold Mozart uses the term *Abgestossen* (*see* ABSTOSSEN) when explaining the significance of little strokes written above or below the notes. The terms ABSETZEN (used by Quantz), AUFHEBEN (Löhlein and Reichardt) and *Erheben* (Leopold Mozart) imply a lifted off-the-string stroke.

A variety of slurred staccato bowings formed part of accomplished violinists' techniques well before 1750 even if, as we have seen (see §II, 2(iv) above), there was little agreement about what label to give these bowings. Complex staccato bowings seem to have been regarded as a particularly violinistic form of virtuosity: Rousseau (1687) remarks disdainfully that the *dessus de viole* is above such vulgar display: 'It is never necessary [on the *dessus*] to practise those passages called *Ricochets* which we endure so reluctantly in violin playing'.

Groups of demisemiquavers with both slurs and dots appear in J.J. Walther's *Hortulus chelicus* (1688; ex.5). Many virtuoso examples appear in 18th-century sonatas. Castrucci (op.2 no.10, 1734) has a group of 22 quavers with dots under a slur with the direction 'Tutti in un Arcata' (judging from the advertisement referred to above, virtuoso slurred bowings must have been a Castrucci speciality). In 1777 W.A. Mozart praised the playing of Ignaz Fränzl for its 'beautiful staccato, played with a single bowing, up or down'.

(viii) Ondulé, ondeggiando, bariolage. Walther uses the term *ondeggiando* (It: 'undulating') in his *Scherzi da violino solo* (1676) to describe a slurred oscillation between two strings. He had earlier called for the same effect (but without using the term) in *Hortulus chelicus* (1688). The sixth of Biber's 'Mystery Sonatas' (*c*1676) has an extended passage using this bowing which starts with alternating unisons (here facilitated by the scordatura tuning) – an effect which Baillot was later to call BARIOLAGE (ex.6). This is yet another instance of rather

Ex.5 Walther: *Hortulus chelicus* (1688), 6th suite

unstable terminology: Tartini and Löhlein use 'ondeggiamento' torefer to wavering of pitch in vibrato.

Ex.6 Biber: Mystery Sonata no.6 (*c*1676)

written

sounds

33

(ix) Arpeggiando, batterie. There are many instances in early violin music of arpeggiando bowings – and the term itself appears in various sources (meaning to arpeggiate chords using slurred bowings). Walther has 'arpeggiando con arcate sciolte' written above broken-chord figurations in his *Scherzi da violino solo*. Earlier in this volume he had used 'Harpeggiato' above what appear to be a continuation of a rather different kind of bowing pattern. There are many later examples. Vivaldi, in the Concerto in B minor from *L'estro armonico* op.3 (1712) has a Larghetto section in which all four solo violins are given different articulations and bowing patterns; the first violin is instructed to arpeggiate in demisemiquavers, the 2nd and 4th violins are given legato slurrings, while the 3rd violin is given a staccato pattern (ex.7).

Rousseau, in his *Dictionnaire de musique* (Paris, 1768), identifies a continuous arpeggio played with separate bows as a '*batterie*', and Corrette in *L'art de se perfectionner dans le violin* (Paris, 1782) provides several

models for translating notated chords into batteries. The Bach Chaconne from the Partita in D minor (BWV1004) provides obvious instances of chords which need to be treated in this way (ex.8).

(x) Mixed bowings. Several types of bowstroke might be combined in the execution of a particular passage. Ex.9, for instance, contains slurred staccatos, slurs within

Ex.9

etc

slurs, and the same pattern played both down-bow and up-bow. In addition, the bowing pattern creates a cross-rhythm since it consists of four quavers in 3/4.

(xi) Multiple stops, chords and special effects. Double stops (bowing several notes simultaneously) and chords feature in violin literature from early in the 17th century (*see* MULTIPLE STOPPING).

It is probable that violinists had discovered the expressive possibilities of effects like SUL TASTO or sulla tastiera (to bow, or occasionally pluck, near or over the fingerboard, resulting in an ethereal tone; *see also* FLAUTANDO, and §II, 3(xii) below) and SUL PONTICELLO (to bow close to the bridge of the instrument) long before they were formally described in any treatises (though it is interesting that Quantz warns against playing too close to the bridge without acknowledging the potential for this to be used as a special effect). Tobias Hume has the instruction 'drum this with the back of your bow' in *The First Part of Ayres* (London, 1605) – the first documented instance of COL LEGNO. Farina calls for this effect in *Capriccio Stravagante*. The novelty of such a device stands out in the way something which can now be invoked with a simple, conventional direction is here explained fully: 'Qui si batte con il legno del archetto sopra le corde' ('Here the wood of the bow is tapped on the strings').

3. BOWSTROKES AFTER *c*1780. This section is divided from the previous one by '*c*1780' as a rough chronological marker. The inference that the widespread use of bows having more features in common with the Tourte model (perfected in the mid-1780s) than with the 'Baroque' bows is a crucial step. This development was accompanied (and promoted) by a different ethos about the basic stroke (parallel to the changing concept of the 'ordinary' touch for keyboard players) and by an expansion of the range of special bowings. There was a movement away from a naturally articulated stroke towards a more legato style. The new ideal is stated very directly at the end of the 18th century by Galeazzi: 'in playing an adagio, the aim above all is to produce evenness, not just in the left hand but also in bowing, joining everything even more than seems possible . . . changing the bow as imperceptibly as possible demands considerable little skill'.

A case could be made for placing the turning point later than 1780. The Tourte bow took some time to gain universal acceptance (though in his edition of Leopold

Mozart's *Méthode* (Paris, *c*1804), Woldemar described it as 'the only one in use') and it is only in the treatises of the 19th century that we find a significantly different perspective on the management of bowstrokes.

In the period leading up to the development and acceptance of the Tourte bow, it is clear that there was considerable variety in the types of bow used by players. Leopold Mozart tries to accommodate this in his description of how to play up-bow staccato: 'The weight of a violin bow contributes much, as does also in no less degree its length or shortness. A heavier and longer bow must be used more lightly and retarded somewhat less; whereas a lighter and shorter bow must be pressed down more and retarded more'.

Despite the abundance of systematic instruction addressed to advanced players published in the 19th century, much ambiguity surrounds the notation of certain kinds of bowings. In particular, there is considerable inconsistency in the use of dots, strokes and horizontal lines in conjunction with slurs to indicate varying degrees of separation from *portato* to flying SPICCATO.

A low right elbow remained a distinctive feature of violin technique after 1800. It finds its most extraordinary expression in the recommendation by Campagnoli (1824) that players practise with a cord around their elbow linked to their clothing to prevent the elbow from rising too far away from the body. It can be seen in many 19th-century depictions of violinists such as the drawing of Joseph Joachim in fig.18.

(i) Down-bow and up-bow. Much greater freedom in ways of organizing bowing is obvious in 19th-century repertory and there is considerable emphasis on cultivating an up-bow which could be as forceful as a down-bow. Nevertheless, for ensemble playing the old 'rule of the down-bow' continued to provide a basis for uniformity. Spohr (1833) emphasized this: 'the orchestral player must conform strictly to the old rule which prescribes: take the strong beats in the bar with the down-bow, the weak beats with the up-bow, and thus begin every bar with a down-bow and end it with an up-bow'.

(ii) The legato slur. Possibly the most conspicuous musical characteristic of the Tourte bow is its ability to produce a seamless legato. A preference for this kind of bowing is evident in many early 19th-century treatises beginning with the *Méthode* produced by Baillot, Rode and Kreutzer for the Paris Conservatoire in 1803. Stowell (1985, p.197) has made the point that comparison of the original editions of Haydn quartets with early 19th-century editions indicates that the use of legato slurs was on the increase.

(iii) Portato (It.; Fr. *notes portées, louré*). This expressive re-articulation or pulsing of notes joined in a single bowstroke was described by Galeazzi as 'neither separate nor slurred, but almost dragged'. A similar stroke had earlier been described by Leopold Mozart though he does not use the term *portato*. Baillot emphasizes that *portato* achieves a kind of undulation of the sound (rather than separated notes). He gave two alternative methods of notating the effect: firstly, a wavy line (also used to indicate vibrato which Baillot considered a related device) and secondly, dots under a slur. (Brahms was later to criticize the ambiguity of this notation.) Later in the 19th century it became common to indicate *portato* with lines under a slur. Heinrich Dessauer's 1903 annotated edition of the Mendelssohn Violin Concerto in E minor uses both (ex.10).

There are other, less gentle, ways in which slurred notes can be articulated, such as *saccadé*, in which the second of the two notes under a slur is sharply accented. Described in detail by Baillot (1834), it is similar to what Spohr (1833) called 'the Viotti bowing'.

(iv) Détaché. The term *détaché* simply means 'separated' and it can be applied to any notes not linked by a slur. Baillot's comprehensive survey of *détaché* strokes subdivided them into muted *détaché* (such as the *grand détaché*

18. Joseph Joachim accompanied by Clara Schumann: drawing by Adolph Menzel, chalk, 1854

Ex.10 Mendelssohn: Violin Concerto in E minor op.64, 1st movt

and *martelé*) where stopping the bow on the string deadens the vibrations and thus creates a 'muted' accent, elastic *détaché* which covered off-the-string strokes, and dragged *détaché* (*détaché traîné*) where smooth bow changes leave no audible gap between each note.

(v) Martelé. The literal meaning of this term is 'hammered', referring to a percussive on-string stroke produced by an explosive release following heavy initial pressure ('pinching') on the string, and a subsequent stop of the arm (and tone) before next 'pinching'. The result is a sharp, biting *sforzando*-like attack and a rest between strokes. The early bow, with its comparatively gentle attack, cannot produce this stroke effectively. *Martelé* can be played in any region of the bow, but is best between middle and point. However, it cannot be executed in excess of a certain speed because of the preparation required for each stroke. *Martelé* may be indicated by dots or by arrow-head strokes as in ex.11.

Ex.11

(vi) Staccato. As noted in §II, 2(vii) above the term STACCATO literally means 'detached' and does not necessarily imply anything about whether this effect is achieved with separate or slurred bowings. In string playing from the late 18th century on, however, it was more generally applied to notes separated from each other in the same bowstroke, normally (or at least, more manageably) up-bow (see ex.12). Baillot classified this with the 'muted *détaché*' strokes.

Ex.12

(vii) Sautillé. This is a rapid detached stroke played in the middle of the bow so that the bow bounces of its own volition. *Sautillé* is indicated by dots (sometimes by arrow-headed strokes). Classified by Baillot as one of the 'elastic *détaché*' strokes.

(viii) Spiccato. Although this term was originally a synonym for *staccato* (see §II, 2(iv) above), by the early 19th century it was consistently used for a short off-the-string stroke, sometimes a synonym for *sautillé*.

(ix) Ricochet, jeté, flying staccato, staccato volante, flying spiccato. In this bowstroke the bow is thrown on the string, making contact in its upper half, so that it will bounce or 'ricochet' off the string from two to six or more times. These terms are rarely used as a direction, the bowing being implied by context and indicated, as in ex.13, by dots within a slur (like other forms of staccato).

Ex.13 Paganini: Caprice no.9

(x) Tremolo. The modern tremolo bowstroke is generally used in the orchestra but also (after the mid-19th century) in some chamber music and solo playing: the same note is reiterated very rapidly with very little bow at the point. The notation is as in ex.14.

Ex.14

(xi) Multiple stops. There is considerable variety in performing triple and quadruple stops: they can be spread (evenly, or in pairs of notes) or struck as a single chord in so far as the curve of the bridge allows. Obviously the latter is more possible for 3-note chords than for those involving all four strings. Baillot gives instructions for playing passages of triple stops. In the late 18th and early 19th centuries it seems that placing the bottom of a chord on the beat and then spreading it upwards was still favoured. That, at least, is the method described by Galeazzi. Spohr is the first person to describe the modern practice of breaking a chord in two with the upper notes coming on the beat.

Many passages notated as chords are intended to be arpeggiated in some way. This may be indicated through having the first in a series of chords spelled out as an arpeggiation or through an instruction such as *arpeggiando*. 19th-century writers stress the importance of finding interesting ways of arpeggiating – through varied bowing patterns, picking out the bass or the top of the chord, or bringing out a melody (*see also* MULTIPLE STOPPING.

(xii) Special effects. SUL PONTICELLO, bowing very close to the bridge to produce a glassy timbre, is called for by both Haydn and Boccherini but throughout the 19th century continued to be regarded as a special effect. Galeazzi mentions it as evidence of the 'ridiculous extremes' some players would go to for novelty. SUL TASTO, or bowing over the fingerboard, produces a softer, more diffuse sound. This device is mentioned by Galeazzi and described in detail by Baillot. Paganini called for it in the 24 Caprices specifically to imitate the flute (ex.15).

Ex.15 Paganini: Caprice no.9, Allegretto

Sulla tastiera imitando il Flauto..

Flautando or *flautato* is the flute-like sound produced by using very little weight with a fast bowstroke. The effect is made more pronounced by playing near the fingerboard.

III. Non-Western instruments

The variety of bows used throughout the world reflects the musical requirements of and sometimes the symbolism associated with the many different bowed instruments. A distinction may be made between bows where the hair is kept taut either by an adjustable frog mechanism (European-type frogs have recently been adopted for many Japanese and Chinese bow types) or by the tension inherent in the bending of the bowstick when the bow hair is attached, and those where the bow hair is normally slack but the player uses one or more fingers curled around the hair to control tension during play. Examples of the last type are used in playing the Indonesian *rebab* and the Japanese *kokyū*. Bow hair lasts longer when it is not permanently under tension; thus some bows are

19. Ching-hu (tube bowed lute); note that the hair of the bow is inserted between the two strings and is rosined on both sides

20. Rāvaṇhatthā (fiddle), Jodhpur, north-west India

shaped by carving, others by heating, and only tensioned when in use. Horsehair is usually the preferred material for bow hair, but in parts of Africa lengths of sisal suffice. 10th-century Chinese sources suggest that string instruments were sounded using a thin strip of bamboo (i.e. a friction stick) before horsehair was employed.

The length of the bow is related to musical needs. The non-melismatic and very rapid syllabic playing style of the Ganda *endingidi* (of Uganda) calls for an extremely short bow (about 18 cm), as do the brief, rhythmic but melismatic, phrases characteristic of the *masenqo*, played by the Ethiopian *azmari* (minstrels). The generally longer bows associated with Oriental traditions are obviously suited to longer melismatic phrases. The thickness of the bow is related to musical pitch (as in European usage). Heavy and therefore lower-pitched strings of instruments like the Rajasthani *rāvaṇhatthā* (fig.20) and the North African *ribāb* require more solidly-built bows. However, some thinner and therefore lighter bows are shaped so that there is adequate weight in the stick nearer the point of the bow (e.g. the Okinawan *kūchō* and Sundanese and Malaysian *rebabs*). In Kelantan, Malaysia, the elegant carving of the bow complements the rich decoration of the instrument and the costumes of the dancers and singers.

Other distinguishing features include the use of bells and other jingling devices attached to the bow to give a rhythmic accompaniment during play (e.g. the *rāvaṇhatthā* of Rajasthan and Gujarat and the Cretan *lira*). Bows may also be differentiated by the method of attaching the hair to the stick, which ranges from knotting directly onto the bowstick (notches are often carved in the stick to prevent slippage), knotting the hair after passing it through a hole in the stick, binding the hair onto an attachment cord, and using various types of frog.

Bowen, Eugene (Everett) (*b* Biloxi, MS, 30 July 1950). American composer and performer. After studies at the California Institute of the Arts with Budd, Subotnick, Leonard Stein and Mel Powell (1970–72), he taught electronic music at Moorpark (California) College from 1975 to 1980. His compositional style combines simplicity and lyricism with an understated use of electronics. He has collaborated with Budd and Daniel Lentz both in performance and on recordings such as Budd's *Abandoned Cities* and *Ambient 2: The Plateaux of Mirror*. Bowen's *Longbow Angels*, written for the double bass player Buell Neidlinger, took second place in a competition sponsored by the International Society of Bassists (1977). Bowen has been involved with folk and regional music; he has travelled extensively in Mexico and in 1971 was a lecturer on modern American music at the University of Guadalajara. His recording *Traditional Folk Music in Ventura County* (1977) employs both Mexican and Anglo performers. Mexican, African and North American folk musics have been significant in his work, particularly *The Vermilion Sea* (1994), which combines an American minimalism with the most advanced electronic and acoustic processes. Bowen has also composed music for film and collaborated with performance artists.

PETER GARLAND

Bowen [Bowin], **James** [Jemmy] (*b* c1682; *d* after 1701). English singer. Jemmy Bowen was 'the boy' who sang Purcell's 'Lucinda is bewitching fair' in *Abdelazer* in April 1695 at the reopening of Drury Lane Theatre. Purcell then gave him a series of demanding pieces in other stage works including *The Indian Queen*, *Timon of Athens*, *The Libertine*, *The Rival Sisters* and *Oroonoko*. Anthony Aston told of Purcell's defence of the boy against interfering advice on the ornamentation of a song: 'O let him alone ... he will grace it more naturally than you, or I, can teach him'. After Purcell's death Jeremiah Clarke, Daniel Purcell and Raphael Courteville (i) wrote for Bowen, notably duets with 'the girl' Letitia Cross. We last hear of him performing a Daniel Purcell song in Richard Steele's *The Funeral* (?December 1701). Roger North saw him as on a par with the star performers of the day, writing that amateur singers aspired 'to be Mr. Abell, Fideli, or Jemmy Bowen'.

OLIVE BALDWIN, THELMA WILSON

Bowen, (Edwin) York (*b* London, 22 Feb 1884; *d* London, 23 Nov 1961). English composer and pianist. Already a talented pianist at the the age of eight, he studied at the Blackheath Conservatoire, then won an Erard Scholarship to the RAM, where he studied piano and composition (1898–1905), winning all the piano and composition prizes. He taught at the Tobias Matthay Piano School and was appointed a professor at the RAM in 1909.

Thereafter he embarked on a career both as a pianist and as a composer. He performed regularly at the Queen's Hall and later at the Royal Albert Hall. His piano playing was recognized for its technical and artistic excellence. He formed duos with the viola player Tertis and the pianist Harry Isaacs. He could also play many orchestral instruments, a fact which contributed to the mastery of his orchestral writing. During World War I he played the horn in the band of the Scots Guards.

Bowen composed over 160 works, which show a blend of Romanticism and strong individuality. Several received their premières before 1914, and his Third Symphony (1951) and Fourth Piano Concerto (1929) were performed throughout his lifetime. He won the Sunday Express Prize for *March RAF* (1919), Chappell's Orchestral Suite Prize and the Hawkes and Co. Prize for *Intermezzo* (1920). Saint-Saëns thought him the finest of English composers, and Sorabji expressed his admiration for the piano writing of the 24 Preludes, op.102 (1938). He is commemorated by a York Bowen Prize at the RAM, and some recordings of his music have appeared on the Hyperion label.

MONICA WATSON

Bower, John Dykes. *See* DYKES BOWER, JOHN.

Bow harp. A term used (after the German *Bogenharfe*) particularly in the classification of African instruments for a form of 'arched harp' (*see* HARP, §I) where the strings are at one end attached to the resonator and at the other to an onbuilt curved neck. Some organologists have however proposed the term as applicable to a chordophone on which the strings are attached to either end of a curved, bow-shaped stick or neck, where the resonator is attached to the neck in a way sufficiently permanent to justify the term 'harp' (as opposed to a MUSICAL BOW with attached resonator); it has been applied to ancient Indian harps (*see* VĪNĀ) and its modern survivors in Afghanistan and India.

Bowie [Jones], David (Robert) (*b* Brixton, London, 8 Jan 1947). English rock singer, songwriter and producer. His career has witnessed a large number of musical changes. His influence on a succession of styles and their attendant subcultures – glam and punk in the 1970s, new romanticism in the 1980s and Britpop in the 1990s – has made him arguably the most important British recording artist since the Beatles.

He began recording in the mid-1960s as Davy [Davie] Jones, heading a succession of short-lived rhythm and blues and mod groups. In 1966 he changed his name to Bowie in order to avoid confusion with Davey Jones of the Monkees. His early work, influenced by Anthony Newley, had little in common with the dominant rock styles of the day and was largely overlooked. In 1969, in the guise of a hippy singer-songwriter, he achieved his first hit with the single *Space Oddity* (Phillips), a tale of space-age alienation released to coincide with the recent Apollo moon-landing. His 1971 album, the rock-orientated *The Man who Sold the World* (Mercury), which fictionalized the schizophrenia that plagued his step-brother and many of his relatives, heralded a decade of remarkable creativity. *Hunky Dory* (RCA, 1971) was a more conventionally melodic work, with sweeping orchestral arrangements, piano and acoustic guitar. It contains many of Bowie's best-known songs, including *Life on Mars?*, a parody of Sinatra's performances of *My Way*, and *Changes*. However it was not until *The Rise and Fall of Ziggy Stardust and the Spiders from Mars* (RCA, 1972) that he achieved mainstream recognition. The first English pop star to declare openly his bisexuality, he set his fey vocals against the hard rock of his band, the Spiders From Mars. On stage, he developed the alter ego of Ziggy Stardust, a fictitious alien rocker dressed in Japanese Kabuki-style clothes (see illustration), and his

David Bowie as Ziggy Stardust

performances introduced a level of theatricality which was new to pop.

By 1973 Bowie was opening up his music to other influences, inluding avant-garde jazz on *Aladdin Sane* (RCA, 1973), while his most successful album in artistic terms, *Diamond Dogs* (RCA, 1974) – in part based on George Orwell's novel *1984* – incorporated disco, rhythm and blues and chanson. In the mid-1970s Bowie moved to the USA and achieved success with *Young Americans* (RCA, 1975) and *Station to Station* (RCA, 1976). These albums mixed contemporary American dance music with European melodic structures and helped to popularize black styles with the white mainstream. *Low* (RCA, 1977), *'Heroes'* (RCA, 1977) and *Lodger* (RCA, 1979), recorded with Brian Eno and co-produced by Tony Visconti, are Bowie's most innovatory albums. *Low* is particularly important in the history of pop; half electronic pop and half extended instrumental pieces which incorporate ambient and mood musics, this album democratized the synthesizer after the excess of progressive rock, paving the way for a wave of British bands such as Joy Division, Human League, the Eurythmics and Soft Cell.

Scary Monsters (and Supercreeps) (RCA, 1980) was outstanding and included the inventive work of the guitarist Robert Fripp (of King Crimson). Bowie's melodic genius is highlighted on songs such as *Ashes to Ashes*, which was the sequel to *Space Oddity* and possessed one of the finest pop videos. The pop album *Let's Dance*, (EMI, 1983) brought greater commercial success, but as Bowie attempted to appease his mainstream audience throughout the rest of the decade, his music lost its edge and several poor albums ensued. It was not until the mid-1990s that Bowie regained his inventive touch. Reunited with producer Brian Eno, on *Outside* (RCA, 1995) he almost completely abandoned conventional song structures on tracks such as the haunting *The Motel*, while 1997's innovatory album, *Earthling* (RCA), mixes grunge and drum and bass to good effect. The album *hours ...* (Virgin, 1999) was a return to a more conventionally melodic pop sensibility.

Despite his commercial success (eight number one albums and 23 top ten singles in the UK alone), Bowie remains something of a cult artist who opens up mainstream pop to avant-garde ideas. He also represents a British tradition of irony and artifice within popular music. By adopting a variety of alter egos (Ziggy Stardust, Aladdin Sane, and the Thin White Duke), Bowie destroyed the mythical status of the performer within pop, and showed that what the singer sang or how he or she looked was not neccessarily a true reflection of the performer's real identity. In addition to being an underrated singer (live Bowie has a powerful, open-throated singing style with plenty of vibrato and an avowedly English sound with none of the Americanisms adopted by Mick Jagger or Rod Stewart), he is a brilliant songwriter and talented musician, arranger and producer (he relaunched the careers of Iggy Pop and Lou Reed in the early 1970s). Bowie has also involved himself in extra-musical activities such as video, film, mime, theatre, writing, painting, sculpting and wallpaper design. In 1998 he set up Bowienet, becoming the first pop star to run his own website simultaneously as an internet service provider. His cultural significance has been enormous: he appealed to the sexually and emotionally dispossessed and the suburban intellectuals who saw in him the epitome of cool. In the 1990s artists such as Morrissey, Pulp, Blur and Suede in the UK and the Smashing Pumpkins, Nirvana, Nine Inch Nails and Madonna in the USA have cited Bowie as a major influence. Even the classical composer Philip Glass has written two symphonies for full orchestra (released on Point Music in 1993 and 1997 respectively) based on Bowie's *Low* and *'Heroes'* albums. In 1999 he was awarded an honorary doctorate in music from Berklee College of Music.

DAVID BUCKLEY

Bowin, James [Jemmy]. *See* BOWEN, JAMES.

Bowles, Michael (*b* Riverstown, Sligo, 30 Nov 1909). Irish radio producer, conductor and composer. He joined the Army School of Music in 1932 as an officer cadet under Brase. As part of his training he completed a degree in music at University College, Dublin, where he studied with Larchet and O'Dwyer. In 1940 he became the director of music and the principal conductor of the national broadcasting service. He expanded the station orchestra and instituted a series of public concerts for the ensemble; he also founded the Radio Éireann Concert Orchestra and the choral group, Cór Radio Éireann. Bowles resigned from his post in 1948, responding to pressure brought about by extensive expansions in broadcasting. He subsequently taught and conducted in New Zealand and the USA before returning to Ireland in 1970. His publications include a number of articles and a book, *The Art of Conducting* (New York, 1959). Sacred choral settings and songs number among his compositions.

JOSEPH J. RYAN

Bowles, Paul (*b* Jamaica, NY, 30 Dec 1910; *d* Tangier, Morocco, 18 Nov 1999). American composer and writer. As a young man he studied with Copland in New York, Berlin and Paris. In 1931 they travelled to Morocco, where he completed his first chamber and solo piano works. He continued his studies with Nadia Boulanger, Roger Sessions, Virgil Thomson and Israel Citkowitz. Further travel to Guatemala, Mexico, Ceylon, southern India and the Sahara enabled him to explore indigenous musical styles which were to influence his own compositions. In 1937 he met the writer Jane Auer, whom he married the following year; together they travelled to Mexico, where he visited Silvestre Revueltas, whose compositional style had a considerable influence on his own.

Upon his return to New York, Bowles joined the musical milieu of Henry Brant, David Diamond, Citkowitz and other members of the League of Composers. Between 1936 and 1963 he wrote several ballet scores for the American Ballet Caravan and incidental theatre music for Orson Welles, John Houseman, William Saroyan and primarily Tennessee Williams. He also composed under the aegis of the Work Projects Administration and the Federal Theatre Project. In 1943, Leonard Bernstein conducted the première of the zarzuela *The Wind Remains*, choreographed and danced by Merce Cunningham, at the New York Museum of Modern Art. Several Latin-inspired orchestral works followed. Under the guidance of Virgil Thomson, Bowles began writing music criticism for the *New York Herald Tribune* (from 1942), covering jazz and folk, as well as art music; he also contributed articles on these topics to *Modern Music*.

Increasingly dissatisfied with his role as a composer of *Gebrauchsmusik*, Bowles left New York for Tangier in 1947. There he completed his first novel, *The Sheltering Sky* (London, 1949), the success of which encouraged him to become more active as a writer and translator. Despite his decision to leave the world of music and devote himself to prose, he composed one additional opera, *Yerma* (1948–55) for torch-singer Libby Holman, and continued to write songs throughout his life. His honours included a Guggenheim Fellowship (1941) and a Rockefeller grant (1959), which enabled him to pursue ethnomusicological research and record traditional music in Morocco. His collection now resides in the Archive for Folk culture at the Library of Congress.

Bowles's compositional style is witty, aphoristic and tuneful. He wrote almost exclusively in short forms that evoke, particularly in the solo piano works, American jazz and folk elements, Latin American dance rhythms and Spanish harmonies. His operas are constructed as series of separate songs, each of which is unfailingly idiomatic. His orchestral music, which tends to be at once concise and kaleidoscopic, employing collage-like juxtapositions, displays little thematic development. Despite his fame as a writer, Bowles always thought of himself primarily as a composer. Even though many of his compositions remained unpublished at the time of his death, his music enjoyed a renaissance during the final decade of his life, inspiring numerous recordings and performances.

WORKS

(*selective list*)

DRAMATIC

Stage: Yankee Clipper (ballet), 1936; Denmark Vesey (op, C.H. Ford), 1939; Pastorela (ballet), 1941; The Wind Remains (zarzuela, after F. García Lorca), 1941–3, New York, 1943; Colloque Sentimental (ballet), 1944; Yerma (op, after García Lorca), 1948–55

Incid music: Doctor Faustus (C. Marlowe), 1936; Horse Eats Hat (M. Labiche), 1936; My Heart's in the Highlands (W. Saroyan), 1939; Love's Old Sweet Song (Saroyan), 1940; Twelfth Night (W. Shakespeare), 1940; Watch on the Rhine (L. Hellman), 1941; South Pacific (D. Heyward and H. Rigby), 1943; 'Tis the Pity She's a Whore (J. Ford), 1943; Liberty Jones (P. Barry), 1944; Jacobowsky and the Colonel (F. Werfel), 1944; The Glass Menagerie (T. Williams), 1945; Summer and Smoke (Williams), 1948; In the Summer House (J. Bowles), 1953; Edwin Booth (M. IRENE HERRMANN

Bowlly, Al(bert Alick) (*b* Laurenço Marques [now Maputo], 7 Jan 1899; *d* London, 17 April 1941). British popular singer. His father was Greek, his mother was Lebanese. Bowlly was brought up in South Africa and joined Edgar Adeler's leading dance band in 1922, touring South Africa, Southern Rhodesia, East Africa and the Far East. He left Adeler in 1924 and took up a residency at Raffles Hotel, Singapore. In 1927 he went to Germany and made his first recording, Irving Berlin's *Blue Skies*. A prestigious engagement lasting one year followed at the Savoy Hotel, London, with the bandleader Fred Elizalde. He had a major break in 1930 when he joined a recording studio band led by Ray Noble, with whom he made the original versions of songs which have become standards. These, all by Noble, included *The Very Thought of You*, *Love is the Sweetest Thing*, *The Touch of your Lips* and *Goodnight Sweetheart*. In 1931 he joined Roy Fox's and subsequently Lew Stone's band at the newly opened Monseigneur restaurant in Piccadilly. This was Bowlly's most productive period, with recording, radio, theatre

dates and regular engagements at top society venues. In 1934 Bowlly went to New York. He was soon in the American recording studios and on the radio, and made a big impression as 'the new British singer' with Ray Noble's new band at the Rainbow Room. By the end of 1936, however, he had returned to England where he toured in variety and worked freelance with several major dance orchestras. At the outbreak of war he toured with vocalist Jimmy Mesene, recording Berlin's *When that Man is Dead and Gone* (1941), a song about Hitler, Bowlly's last record. Two weeks later he was killed in his London flat by the blast of a bomb.

Since Bowlly's death his reputation has grown, and he has been the subject of many radio tributes and one television tribute. His major legacy is his recorded output of more than 1100 titles issued on just over 600 78 r.p.m. discs, with the majority of titles reissued on LP and CD. They are still frequently heard on the radio, in shops and restaurants and as the background to films and plays. *Modern Style Singing (Crooning)* (London, 1934) was published under his name.

Bow lute. *See* PLURIARC.

Bowman, Euday L(ouis) (*b* Fort Worth, TX, 9 Nov 1887; *d* New York, 26 May 1949). American ragtime composer. He reportedly worked as an itinerant black pianist, beginning in 'Hell's Half Acre', the former bordello district of Fort Worth. Bowman commemorated four streets in this district with piano rags. In 1914 he published the *12th Street Rag* at his own expense, then sold it to the music publisher J.W. Jenkins' Sons in Kansas City, Missouri. Its theme-and-variations structure (unusual for ragtime) and use of a repeating three-note motif (sometimes called 'secondary rag') made the piece catchy and easy to play, and under the Jenkins imprint it became a major hit. Words were added, and it was issued in numerous arrangements, becoming an enduring standard among bandleaders, pianists, broadcasters, and the record-buying public. More than 120 versions were recorded on 78 r.p.m. records alone, and until the ragtime revival in the 1970s it ranked as the most popular rag of all time. Bowman recorded the piece in 1924 for Gennett and again in 1938 for ARC, but the recordings were never issued. Following Pee Wee Hunt's extraordinarily successful recording of the rag in 1948, Bowman tried to capitalize on its renewed popularity and issued his own recording of it, but he died soon after.

WORKS

(*selective list*)

all for piano

12th Street Rag (1914); Sixth Street Rag, 1914; Tenth Street Rag, 1914; Petticoat Lane (1915); Shamrock Rag (1916); Eleventh Street Rag (1917); Chromatic Chords, 1926

JOHN EDWARD HASSE

Bowman, Henry (*fl c*1669–85). English composer and music copyist. He seems to have lived and worked exclusively in Oxford, and was presumably related to the booksellers Francis and Thomas Bowman of the parish of St Mary the Virgin. His *Songs for 1 2 & 3 Voyces* (Oxford, 1677) was published by Thomas, though he apparently engraved the music himself. He was a prolific copyist, and compiled or contributed to at least 18 manuscripts (now in *GB-Lbl*, *Ob* and *Och*) between about 1669 and 1685, copying a range of Italian vocal music from Monteverdi to Carissimi and English vocal and instrumental music from Orlando Gibbons and Coprario to Blow and Purcell, as well as his own music. He does not seem to have been a professional musician; there is no evidence that he held a musical post in Oxford, and he described himself as 'Philo-Musicus' in his *Songs*. Nevertheless he wrote three suites for two violins and bass for a meeting of the Oxford Music School on 5 February 1674, and a concerted act song by him was prepared for performance in the Sheldonian Theatre on 10 July 1680. It was not performed then, but two other undated works of this type also seem to have been written for Oxford academic ceremonies.

The 1677 book went through four editions, though the music is competent rather than inspired. It was successful probably because it was engraved rather than type-set, and because Bowman had better literary taste than most Restoration composers: it includes settings of Thomas Carew, Abraham Cowley, Sir John Denham, Michael Drayton, Sir George Etherege, James Graham, Marquis of Montrose, Henry Noel, John Wilmot, Earl of Rochester, Thomas Stanley and Aurelian Townsend. It also broke new ground in that four of the 28 songs have short ritornellos for two violins and continuo; they have been the model for the symphony songs of Blow and Purcell. Apart from one song with four-part chorus (SSTB), they all require 3 voices (SSB), and this scoring is used in seven additional songs and four Italian motets in *GB-Lbl* Add. 30382 and other autograph manuscripts. The autographs also include two English devotional duets, a funeral anthem and a sacred dramatic dialogue. Like similar works by George Jeffreys, Locke and Blow, the religious music reflects the influence of the corpus of mid-17th century Italian music that circulated in Restoration Oxford. Bowman copied part of *GB-Och* Mus.1003, containing keyboard music by William Lawes, Blow, John Roberts, Christopher Gibbons and others, though it is not clear whether he composed any of the unascribed items.

WORKS

[28] Songs for 1 2 & 3 Voyces, 3–4vv, 2vn, b, bc (Oxford, 1677, 4/1683)

5 Lat. motets, 3vv, bc: Cantate Jehovah, *GB-Ob*; In te Domine speravi, *Lbl*, *Ob*, *Och*; Miserere mei Deus, *Lbl*, *Ob*, *Och*; Tribulare ego, *Lbl*, *Ob*; Usquequo Domine, *Lbl*, *Ob*

2 devotional songs, 2vv, bc, *Lbl*: Close thine eyes; Hark! how he groans

3 anthems, 5vv, bc: Sing unto the Lord O ye saints ('Funerall Anthem'), *Ctc*, *Lbl*; Wake sleeping ones ('A Dialogue between the Angel and the Soul at the Judgement Day'), *Lbl*; Give to the king thy judgements, inc., *Ctc*

7 songs, 3vv, bc, *Lbl*

3 act songs, *Ob*: My Lesbia, let us live and love, 3vv, 2vn, b, bc, 1680; Non usitata ac tenui ferar, 4vv, inc.; Stay, shepherd, stay [rev. of piece in *Songs*], 4vv, 2 vn, b, bc

While vulgar beauty, 1v, bc, inc., *Lbl*; How long wilt thou forget, 5vv, bc, *Och*: anon., attrib. Bowman
3 suites (g, a, D), 2 vn, b, bc, 1674, *Ob*
Kbd pieces, *Lbl*, *Och*: anon., attrib. Bowman

PETER HOLMAN

Bowman, James (Thomas) (*b* Oxford, 6 Nov 1941). English countertenor. He studied at Oxford University and made his stage début in 1967 at Aldeburgh as Britten's Oberon, a role he has sung at Covent Garden, Strasbourg, Sydney, with the WNO and at Glyndebourne, where he made his début in 1970 as Endymion in Cavalli's *Calisto*. He created the Priest-Confessor in Maxwell Davies's *Taverner* (1972), his Covent Garden début; the voice of Apollo in *Death in Venice* (1973, Aldeburgh Festival); Astron (with Anne Wilkens) in Tippett's *The Ice Break* (1977, Covent Garden); and sang Ridout's *Phaeton* for BBC Radio. Britten dedicated his fourth Canticle, *Journey of the Magi*, to him, Pears and Shirley-Quirk. Bowman is a noted Handelian, and for the Handel Opera Society sang Otho, Scipio, Xerxes and Justinian, as well as Polinesso (*Ariodante*) which he repeated at Geneva and Buxton. His other Handel roles include Julius Caesar (Barber Institute), Ptolemy (San Francisco and the ENO), Goffredo in *Rinaldo* (Reggio nell'Emilia and Paris) and Orlando (Scottish Opera). He has also sung many other Baroque roles, including Lidio in Cavalli's *Egisto* at Santa Fe, Ruggiero in Vivaldi's *Orlando furioso* at Verona and Dallas, Monteverdi's Otho at Spitalfields and Epaphus in Jommelli's *Fetonte* at La Scala. Bowman has been partly responsible for the present wide acceptance of the countertenor voice in modern and Baroque opera. He also sings often in oratorio and solo recitals, and is a specially fine interpreter of Elizabethan lute-songs. His voice is expressive and individual in timbre and he uses it to highly dramatic effect. His extensive recording career has included operatic roles ranging from Orlando and Julius Caesar to Britten's Oberon and voice of Apollo, lute-songs, choral works by Purcell, Bach and Handel, and songs by Britten.

ALAN BLYTH

Bowman, John (*b c*1660; *d* London, 23 March 1739). English bass and actor. He entered the Duke's Company as a boy and was a member of the Royal Private Musick from 1684. Cibber related that as a youth 'fam'd for his Voice' he sang before Charles II at Nell Gwynn's lodgings. He was a soloist in Purcell's court odes *Sound the Trumpet* (1687) and *Celebrate this Festival* (1693) and was Purcell's principal stage bass from 1680, when he sang as Atticus in *Theodosius* (a part he last played in 1733). He took the important acting and singing role of Grimbald in *King Arthur* (1691) and played Cardenio in *Don Quixote* (1694), with the famous mad song 'Let the dreadful engines'. As Lord Froth in William Congreve's *The Double Dealer* he sang 'Ancient Phyllis', and *Thesaurus Musicus* (RISM 1694[7]) states that he composed it. He remained on stage, acting his stock roles and singing a little, until a few months before his death, when the *London Magazine* described him as the oldest actor and singer in England, erroneously giving his age as 87.

In August 1692 he married Thomas Betterton's adopted daughter, Elizabeth Watson (*d* 1707), a popular actress and singer. Their son, 'young Bowman' (*fl* 1712–58), and Mrs Bowman (*fl* 1716–56), probably his wife, sang and acted on the London stage and in the provinces.

OLIVE BALDWIN, THELMA WILSON

Bowsher, John (Michael) (*b* London, 26 August 1933). English physicist and acoustician. He obtained a BSc in physics from Imperial College, London, later gaining the doctorate there with research into high-amplitude stress waves. After holding a research fellowship at the electronic music laboratory of the Canadian National Research Council in Ottawa, he worked for five years in the acoustics section of the UK National Physical Laboratory, where he carried out research on the psycho-acoustic perception of short duration and very low frequency sounds. In 1966 he was appointed to a lectureship in acoustics at the University of Surrey, where, in collaboration with colleagues in the US, Europe, Israel and Australia, he established a group which became noted for its research into the acoustics of wind instruments and their subjective assessment. He played a major part in the establishment there of the Tonmeister course in music and applied physics. An accomplished trombonist, his most notable research has been in the acoustics of brass instruments, where he supplemented and elucidated physical measurements by applying psychological testing procedures to the assessment of brass instrument tone quality. He developed a non-invasive technique which allows the bore of an instrument to be reconstructed by injecting acoustic pulses into one end and recording the reflections.

MURRAY CAMPBELL

Bowyer, Kevin (John) (*b* Little Wakering, Essex, 9 Jan 1961). English organist. He was a student at the RAM from 1979 to 1982, studying with Christopher Bowers-Broadbent, a champion of avant-garde organ music, and the harpsichordist Virginia Black. Then for two years he studied with the leading English organist David Sanger. During his student days he first demonstrated his powers in undertaking mammoth organ recital projects, when he played the complete organ symphonies of Widor, Vierne and Dupré. Bowyer's début recital was at the Royal Festival Hall, London, in 1984, the year following his success in winning the St Albans International Organ Festival competition. In 1990 he won no less than four competitions: Dublin, Odense, Paisley (joint winner) and Calgary. Gifted with a powerful intellect, he has given

convincing performances of highly demanding 20th-century works, including the epic First Symphony of Sorabji. He has also edited organ symphonies by Sorabji.

IAN CARSON

Boxberg, Christian Ludwig (*b* Sondershausen, 24 April 1670; *d* Görlitz, 1 Dec 1729). German composer and librettist. He studied at the Leipzig Thomasschule between 1682 and 1686, presumably receiving music instruction from the Kantor, Johann Schelle. In 1692 he accepted a position as organist in Grossenhain, north of Dresden, which he retained until 1702. However, his early career was centred on Leipzig where he was active as librettist, singer and opera composer. He was a student of Nikolaus A. Strungk, director of the Leipzig Opera, 1688–92, whose opera *Amyntas und Phyllis*, now lost, was completed after his death by Boxberg and given at Leipzig in 1700. Boxberg wrote at least five librettos for operas by Strungk and sang in performances of those works. He seems also to have been active at the court of Ansbach during 1697–8 where his most important operas (for which he also wrote librettos) were first performed: *Orion*, *Die verschwiegene Treue* and *Sardanapolus*. Only the last score is extant (*D-AN*). In 1702 he gave up his operatic career to become organist at the church of Sts Peter und Paul in Görlitz. He wrote a number of cantatas during this period (35 in *S-L*, 13 in *D-Dl*, 4 in *MÜG* and 3 in *LUC*), including both choral works and solo cantatas for soprano and trio sonata accompaniment.

Boyce [Boice, Boyes, Boys], **Thomas** (*fl* early 17th century; *d* ? Nov 1643). English composer. He took the BMus at Oxford in 1603; he may be the Thomas Boyce who was buried in Canterbury Cathedral on 3 Nov 1643. A Short or 'Whole' Service survives (*GB-Cp*, *DRc*, *GL*, *Lbl*, *Lcm* and *Ob*); the *Te Deum* from this service also survives in a Latin adaptation (*Cp*). A full anthem, *Give Sentence with me*, is listed in the indexes to *Lcm* 1049 and 1051, but the music itself is lost. The composer may be related to the William Boys, acting organist at Lincoln in 1597, whose three-part Paven is in the manuscript *Lcm* Add.1145, and John Boyce, of New College, composer of the full anthem *If ye love me* (*Och* and *US-NYp*).

PETER LE HURAY/JOHN MOREHEN

Boyce, William (*b* London, bap. 11 Sept 1711; *d* London, 7 Feb 1779). English composer, organist and editor. Though formerly best known for some of his anthems and his editing of *Cathedral Music* (1760–73), the significant contribution he made to instrumental music, song, secular choral and theatre music in England is now widely recognized.

1. Early career. 2. Middle years. 3. Later years. 4. Style and reputation.

1. EARLY CAREER. Boyce's family came from Warwickshire, where his grandfather was a farmer. His father, John, the youngest of five sons, came to London in 1691 to be apprenticed to a joiner. He settled in the City of London, as a joiner and cabinetmaker, and married Elizabeth Cordwell in 1703. They were living in Maiden Lane (now Skinners Lane) when William, the last of their four children, was born. In 1723 John Boyce was appointed resident beadle for the Joiners' Company, whose headquarters were situated close to his house. Joiners' Hall became William's home for the next 30 years or so.

According to Hawkins, who was acquainted with Boyce, it was William's father who became aware of his son's 'delight in musical sounds' while he was still in his infancy. Given the proximity of St Paul's Cathedral to the family house it was natural to seek a place in the music school, where he was admitted in about 1719. There he began his musical education under the Master of the Choristers, Charles King, and on entering the cathedral choir he came under the guidance of the organist, Maurice Greene, who was to become his lifelong mentor, advocate and friend. When his voice broke, in about 1727, he became an articled pupil of Greene for seven years; he continued to act as Greene's music copyist at least until 1736. Boyce also studied in the 1730s with J.C. Pepusch, who made a lasting impression on Boyce's outlook, nurturing his interest not only in the theory of music but also in early music, particularly that of the greatest English and Italian composers from the Renaissance onwards. Boyce's first professional engagements were as a harpsichord teacher in schools and as an organist of the Oxford Chapel (now St Peter's), Vere Street (1734), a post he relinquished on becoming organist of St Michael Cornhill, in 1736. These early steps in his career were achieved in spite of the onset of deafness during his studies with Greene.

Boyce's earliest compositions began to emerge in the early 1730s. A number of songs appeared in songsheet publications and periodicals, and four were included in George Bickham's highly regarded song collection, *The Musical Entertainer* (London, 1737). By 1736 more than a dozen anthems by Boyce were in the repertory of the Chapel Royal. The sacred cantata *David's Lamentation over Saul and Jonathan* is the first of his large-scale works whose early history is now well established. Its first performance took place in April 1736 at the Apollo Academy, which promoted a number of other important works by Boyce in the late 1730s, including the two St Cecilia odes, *The charms of harmony display* and *See famed Apollo and the nine*, the texts of which were

printed in *A Miscellany of Lyric Poems . . . performed in the Academy of Music* (London, 1740). It can be assumed that Boyce's first theatrical work, the masque *Peleus and Thetis*, was performed by 1740, since its libretto also appears in the *Miscellany*. No evidence has come to light, however, to support Hawkins's suggestion that an earlier first performance of *Peleus and Thetis* was undertaken in London by the Philharmonic Society.

Public recognition of Boyce's talents came with the first of his royal appointments as a Composer to the Chapel Royal, on the death of John Weldon in May 1736. His contract stipulated that he should also share some of the duties of the newly appointed second organist, Jonathan Martin. The close association with Greene continued here, for his former teacher was now the senior composer and organist of the chapel. From 1737 until at least 1756 Boyce conducted the Three Choirs Festival. In 1738 he undertook the first of a number of commitments to charitable organizations when he subscribed as a founder-member, alongside Handel, Greene, Festing and many other prominent musicians, to the Fund for the Support of Decay'd Musicians and their Families (later the Royal Society of Musicians).

By the end of the decade Boyce's reputation had reached Dublin. When his impressive St Cecilia ode *See famed Apollo* was performed by the Philharmonic Society of Dublin on 17 December 1740, *Faulkner's Dublin Journal* reported that it 'was allowed, by several of the best Judges here, to be one of the grandest Performances that hath been heard', a warmth of response to be exceeded in Dublin at this time only by that inspired by the première of Handel's *Messiah* in April 1742. Other works by Boyce given there during the early 1740s were the orchestral anthem *Blessed is he that considereth the sick*, commissioned for the benefit of Mercer's Hospital, *David's Lamentation*, the ode *Gentle lyre, begin the strain* and the serenata *Solomon*.

2. Middle years. It was through *Solomon* that Boyce achieved his first notable success as a composer in the early 1740s. Burney's assessment in 1789 that it was 'not only long and justly admired, as a pleasing and eloquent composition, but still affords great delight to the friends of English music whenever it is performed', though not as fulsome as some other accounts, confirms its reputation and its survival in the repertory until the end of the century. Significantly, in Thomas Hudson's later painting of the composer (Bodleian Library, Oxford), Boyce is depicted holding a copy of *Solomon*. Though outwardly a cantata-like work for two vocal soloists, chorus and orchestra with a text based on the biblical 'Song of Solomon', it was one of the few English works to be designated from the outset by the Italian term 'serenata'. The librettist, Edward Moore, was resident in Ireland during its composition, and he may well have envisaged a first performance there; however, it was first heard at the Apollo Academy in autumn 1742. While the *Dublin Journal* refers to a private performance by the Philharmonic Society of Dublin in 1744, evidence from the surviving manuscript sources of the work points to an earlier performance by the society. John Walsh's publication of *Solomon* on behalf of the composer early in 1743 was enthusiastically received. Unusually for a work of its kind, it was issued complete and in full score, thus facilitating the first public performances at Ruckholt House, Essex, in summer 1743 and later that year in London. Two further editions in score were published (1760 and *c*1790) and there were numerous publications of the most popular airs and duets throughout the 18th century.

In 1745, having established his public reputation, Boyce received a royal licence to print and publish his music, offering him protection, in principle if not always in practice, from unauthorized publication of his music for 14 years. This may explain why it was not until the 1760s that some of his most admired songs began to be adapted and introduced into various pasticcio productions in the theatres.

The publication of Boyce's *Twelve Sonatas for Two Violins and a Bass* in 1747 met with unprecedented success for a work of its kind. The first edition attracted 487 subscribers for 631 copies, and two further editions soon followed. These sonatas, in the direct line of descent from Corelli's classic models, were soon to be recognized as the most distinguished English contributions to the genre. They were, as Burney later observed, 'not only in constant use, as chamber Music, in private concerts, for which they were originally designed, but in theatres, as act-tunes, and public gardens, as favourite pieces, during many years'. As is implicit here, like many trio sonatas of their time, they were doubtless accommodated, through the insertion of soli–tutti markings, to performance by larger ensembles as quasi-concerti grossi. Later the same year Boyce brought out two collections of songs, duets and cantatas entitled *Lyra Britannica*, which eventually ran to six volumes (1747–59). The contents embrace simple strophic ballads and more sophisticated through-composed songs, many of them known to have been performed in the pleasure gardens, three items from Boyce's setting of Dryden's *Secular Masque* (*c*1746), vocal pieces composed for various plays produced by Garrick in the 1750s, and in each book except one an extended solo cantata.

In 1749 Boyce accepted an invitation to become organist at All Hallows the Great and the Less, the parish church of Joiners' Hall. It has been assumed that he married in about 1748 and moved from Joiners' Hall to Quality Court, Chancery Lane; however, while a number of details must remain speculative, it now seems that he may not have moved until after his father's death in November 1752, and that his marriage to Hannah Nixon at St Dunstan and All Saints, Stepney, did not take place until 9 June 1759. Whatever Hannah's relationship (if any) with the composer at the time, we know from Boyce's will that Hannah gave birth to her daughter Elizabeth in April 1749. His son William, subsequently to be active in London as a double bass player and singer, was born in March 1764.

A highlight of Boyce's career occurred at Cambridge on Saturday 1 July 1749, when his ceremonial ode *Here all thy active fires diffuse*, the text of which had been submitted by William Mason only ten days earlier, was performed at the Senate House on the installation of the Duke of Newcastle as Chancellor of the university. The next day his doctoral exercise, the orchestral anthem *O be joyful in God*, was performed at St Mary the Great. Following the ceremony on 3 July, when he received the degrees of bachelor and doctor of music, a two-day festival of his music was mounted during which *Peleus and Thetis*, the *Secular Masque*, the *Pythian Ode* (*Gentle lyre, begin the strain*) and *Solomon* were presented. These

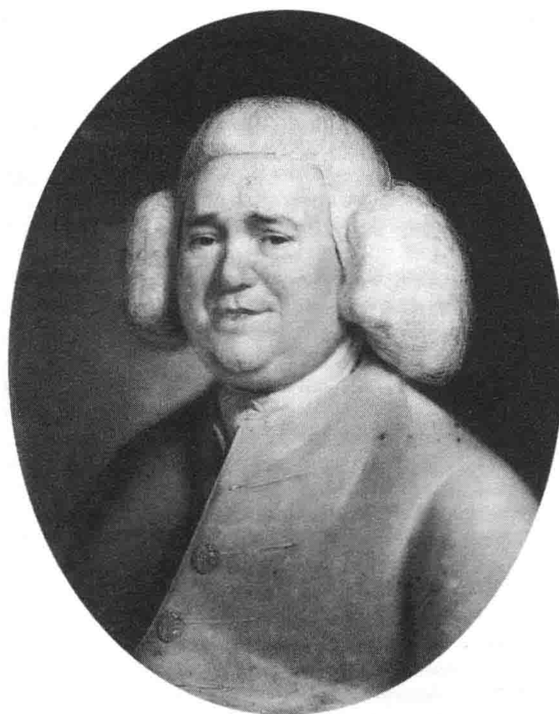
performances were given by a large contingent of leading musicians from London, probably at the instigation of Greene, who was professor of music at the university. In 1752 the two works written for Cambridge were printed for the composer in one volume, *O be joyful* thus becoming the only anthem by Boyce to be published in his lifetime.

In 1746 he received an isolated commission from John Rich to set the dirge in *Cymbeline* at Covent Garden, but it was David Garrick at Drury Lane who eventually provided him with the opportunity to make his mark in the theatre. Given the tensions between Garrick and Thomas Arne, it is not surprising that he turned to Boyce; Burney's observation that Arne and Boyce 'were frequently concurrent at the theatres and in each other's way' must refer to the situation in the early 1750s. Garrick initially invited Boyce to set a musical entertainment by Moses Mendez, *The Chaplet*. First performed in December 1749, this all-sung pastoral afterpiece, with its witty exploitation of the popular ballad style, was an immediate success and held its place in the repertory until the 1780s. A second Mendez-Boyce collaboration, *The Shepherd's Lottery* (1751), was clearly calculated to capture the same market, but enjoyed only short-lived popularity.

In autumn 1750 Boyce became involved in the long-standing rivalry between London's two patent theatres. Both houses announced productions of *Romeo and Juliet* to open on the same night. At Covent Garden an additional scene, 'the funeral procession of Juliet', was introduced into Act 5, for which Arne had composed a solemn dirge. Thus upstaged, Garrick responded by inserting a funeral scene in his own adaptation. Boyce's setting of the dirge 'Rise, rise, heart-breaking sighs', was heard at Drury Lane only three days later; but the heated public debate on the relative merits of these productions focussed on the acting of the eponymous hero and heroine rather than on the musical settings of the dirges. Boyce continued to provide music for Garrick from time to time throughout the 1750s. In December 1759 he contributed two songs to an innovative Garrick pantomime, *Harlequin's Invasion*, which turned out to be his farewell to the theatre. His setting of 'Heart of Oak', a topical song inspired by a series of British naval victories, captured the mood of its time perfectly, and subsequently established itself as a national song with which Boyce's name will always be associated.

On the death of Greene in December 1755, Boyce succeeded him as Master of the King's Musick. In addition to supervising the king's band, he was expected to set the birthday and New Year odes written by the poet laureate in honour of the king. Owing to Greene's ill-health Boyce had already composed the birthday ode in October 1755, but, probably as a consequence of political preoccupations at court, he was not formally sworn in until June 1757. Having for some years deputized for Greene as conductor of the annual charity concert held in April or May at St Paul's Cathedral in aid of the Sons of the Clergy, Boyce now took on this responsibility as well. His much admired orchestral anthem *Lord, thou hast been our refuge*, composed for this event in April 1755, and his earlier anthem for Dublin, *Blessed is he that considereth the sick* (with its title adroitly amended to refer to 'the poor' rather than 'the sick') were now featured regularly in these concerts, alongside various works by Handel. In June 1758, on the death of John Travers, he was also appointed to one of the posts of organist at the Chapel Royal.

Problems doubtless stemming from the multiplicity of Boyce's activities, perhaps exacerbated by increasing deafness, begin to emerge around this time in connection with his parish church duties. On 5 January 1758 the vestry minutes at All Hallows reveal discontent, ostensibly in relation to the deputy organist, upon whom Boyce must often have relied. Matters came to a head in March 1764 when Boyce himself was dismissed. Nevertheless, he remained at St Michael's until 1768, when churchwardens lodged a formal complaint that 'the playing of the organ did not give that satisfaction to the parish which they had a right to expect'. Boyce's reply on 7 April was taken as a letter of resignation. These events appear, however, as minor blemishes in an otherwise irreproachable career.



During his last years Greene had been planning to publish a collection of English anthems and services for use in cathedral worship. He was generously assisted by John Alcock (i), who passed on to him materials he had originally gathered for a similar scheme of his own. Greene clearly had confidence in Boyce's ability and willingness to bring these plans to fruition, for in his will he bequeathed his 'friend William Boyce . . . (he having promised not to publish any of *my* works) all my collection of music whether MSS or printed'. Boyce advertised his intention to complete Greene's work as early as September 1756. When *Cathedral Music* was eventually published (1760–73), it established a canon of English church music ranging from Tallis and Tye to Boyce's immediate predecessors Croft and Weldon. The preface identifies its primary purpose to preserve the music of past masters 'in its original purity', at the same time to make such music available in score as a replacement for the often faulty manuscript partbooks then generally in use. *Cathedral Music* retained its place in cathedral usage into the 20th century, and has been justly described as 'a landmark in the history of musicology, and a fitting monument to his industry and scholarly enterprise' (Johnstone, 1975).

Boyce's *Eight Symphonys* (1760) was a retrospective collection of orchestral overtures originally written for a variety of works dating from as early as 1739 to 1756. Apart from one independently conceived piece, the so-called Worcester Overture, written for the Three Choirs Festival, they are taken from four of the odes, two stage works and *Solomon*. The set presents the four works modelled on the more progressive Italian sinfonia first, followed by those based on the traditional French overture style. Boyce himself later issued a second set of orchestral works, *Twelve Overtures* (1770), which consists mainly of overtures to court odes composed between 1761 and 1768. These were not as well received as the *Eight Symphonys*. Cast in an essentially late Baroque idiom, they must have seemed old-fashioned as compared with the now-familiar continental symphonies in the early Classical style, in particular those of the fashionable German composers J.C. Bach and C.F. Abel, both active in London by this time.

Perhaps the climax of Boyce's public career came when, as the senior composer to the Chapel Royal, he was called upon to provide the music for the great ceremonies of state which took place in 1760–61. Had it not been for Handel's death in 1759, however, it seems unlikely that

he would have been granted these opportunities. As Greene had discovered in 1727, where the funeral of George I and the coronation of George II were concerned, and in 1737, when Queen Caroline died, the Georgian monarchy preferred, on the basis of an appointment effectively to the court rather than to the chapel in 1723, to rely on the genius of their illustrious compatriot for major state occasions. As it was, Boyce provided an imposing and deeply felt orchestral anthem, *The souls of the righteous*, for the funeral of George II on 11 November 1760, and a splendid setting of *The King shall rejoice* for the wedding of George III and Princess Charlotte of Mecklenburg on 8 September 1761. For the coronation on 22 September he composed eight anthems, ranging from the unpretentious, homophonic, *a cappella* anthem *I was glad*, sung as the queen entered Westminster Abbey, to four extensive orchestral anthems, including an invigorating double-choir setting of *My heart is inditing*. Boyce was clearly conscious of the earlier achievements of Handel in responding to these challenges, so much so that he declined to reset *Zadok the Priest* for the coronation service in deference to Handel's inimitable work.

3. LATER YEARS. Boyce continued to live at Quality Court in the city at least until 1763, when his address as one of the 'Masters and Professors of Music' was quoted in Mortimer's *London Universal Directory*. By March 1764 he and his family had moved to his final residence at 3 Kensington Gore, to the west of London. Though now in semi-retirement, he continued to fulfil his royal duties, including the composition of court odes, to produce anthems and accept the occasional commission and, above all, to prepare the second and third volumes of *Cathedral Music* for publication. He also took a keen interest in, and undoubtedly exerted an influence over, the development of the younger generation of English musicians. Among those that he taught or to whom he offered guidance were Jonathan Battishill, the brothers Samuel and Charles Wesley, Thomas Linley (ii), John Stafford Smith, who shared his antiquarian interests, and Marmaduke Overend, who corresponded with him in his last years on aspects of harmonic theory and acquired Boyce's treatise after his death.

William Boyce: portrait by John Russell, pastel on paper, 1776 (National Portrait Gallery, London)

The public response to Boyce's death was exceptional for an English musician. The immense personal and professional standing he had acquired was reflected in the impressive burial service organized in his honour, and attended by a large congregation, at St Paul's on 15 February 1779. The service, which included his anthem *If we believe that Jesus died*, was sung by the combined choirs of the cathedral, Westminster Abbey and the Chapel Royal. Boyce was interred in the crypt of St Paul's, where his epitaph can still be read.

Some reparation for the fact that, apart from *O be joyful* (1752), none of Boyce's anthems had been printed in his lifetime was made by Philip Hayes, who edited and published, on behalf of Boyce's widow, *Fifteen Anthems by Dr Boyce* (1780) and *A Collection of Anthems* (1790). Boyce's extensive music library was auctioned by Christie and Ansell (14–16 April 1779), but Hannah Boyce retained his manuscripts, of which many were later acquired by Philip Hayes for the Music School at Oxford (now in *GB-Ob*). Others were bought by private individuals and sometimes found their way into the libraries of music societies. A residue of manuscripts kept by the family were eventually sold, after the death of Boyce's son, by W.P. Musgrave (29–31 March 1824). In addition to the major collection of autograph manuscripts at the Bodleian, there are significant holdings at the Royal College of Music and the British Library.

4. STYLE AND REPUTATION. Boyce must be ranked as the most technically accomplished and versatile English composer of the 18th century, rivalled only by Thomas Arne. His output was uneven; at times his muse shone brightly, but when he was required to produce anthems as a matter of routine, or to set uninspiring panegyric texts as in the court odes, the outcome often tended to be dull. However, his professionalism is always apparent. In the course of his training under Greene, and as an inevitable consequence of the musical environment of London, he naturally absorbed the fundamentally italianate lingua franca of the late Baroque style. The influence of the compact, flowing lines of Corelli's contrapuntal idiom is most evident in the trio sonatas, but later developments as exemplified by Handel are reflected in the more flexible themes and varied textures of Boyce's fugal choruses. While he clearly set out to emulate Handel's grand manner in the orchestral anthems for George III's coronation, almost inevitably in view of the monarch's fervent enthusiasm for Handel's music, he generally maintained his independence from his great contemporary. As Burney put it, he 'neither pillaged nor servilely imitated him'. Boyce's absorption of the newer Italian symphonic style associated with the Milan school is manifest in the opening allegros of the first four symphonies of the 1760 set.

Boyce's harmonic language is essentially diatonic and deliberately constrained, reflecting his view that 'the skill of the artist is best shewn, not in departing from the

original key, but in keeping within it, and producing, by the interchanges of its own consonances, all that variety of harmony of which it may be capable'. Consequently, when Boyce was stimulated by a dramatic situation or a striking image in the text, his resort to chromatic harmony is all the more telling. The potency of his imaginative response to the exigencies of the text may be illustrated, for example, in the vividly evocative tenor air with bassoon obbligato 'Softly rise, O southern breeze' (*Solomon*), in the palpable dramatic tension of some of the ensembles in *Peleus and Thetis*, or in the remarkable scena for tenor soloist in the second part of the ode *See famed Apollo and the nine*.

The esteem in which Boyce held earlier English traditions, doubtless reinforced by his studies with Pepusch, may be seen in the occasional echoes of Purcell's style, for example in the duet 'Arise, my fair', from Part 3 of *Solomon*, where the evocation of winter recalls the 'frost scene' in Act 3 of *King Arthur*, or in the anthem, *O where shall wisdom be found?*, where more generalized Purcellian traits appear. He sometimes drew on much earlier models. The Gloria from the *Nunc dimittis* in the Short Service of Orlando Gibbons (a work Boyce was later to include in *Cathedral Music*), based on a two-part canon in the upper voices, is quoted and transformed by Boyce into a four-part canon setting the same text in the *Jubilate* of his Service in A. Boyce's Englishness may also be felt in those themes that seem to be inspired by the indigenous popular song tradition, or that convey a nautical or country dance character.

While Boyce may not have shared Arne's essentially lyrical genius, at his best he had 'a remarkable facility for writing fresh melodies, both apt to the feeling of the words and fitting their metre like a glove' (Colles, 1910). These qualities are evident, for example, in the earlier setting of the anthem *Turn thee unto me*, especially in the poignant central duet, and in the exuberant *O sing unto the Lord a new song*. The wide stylistic range embraced by Boyce's melodies may be seen on the one hand in the gracefully eloquent soprano air 'Tell me, lovely shepherd' from *Solomon*, and on the other in the simplicity and directness of expression of 'Heart of Oak' from *Harlequin's Invasion*.

Apart from the *Eight Symphonys*, Boyce's finest works, such as *Solomon*, *See famed Apollo and the nine*, the trio sonatas and some of the anthems, remain relatively little known. However, the distinctive qualities of his music were appreciated by Burney:

> There is an original and sterling merit in his productions, founded as much on the study of our own old masters, as on the best models of other countries, that gives to all his works a peculiar stamp and character of his own, for strength, clearness, and facility, without any mixture of styles, or extraneous and heterogeneous ornaments.

His personal attributes were equally well summed up by Hawkins:

> He was endowed with the qualities of truth, justice, and integrity, was mild and gentle in his deportment, above all resentment against such as envied his reputation, communicative of his knowledge, sedulous and punctual in the discharge of the duties of his several employments, particularly those that regarded the performance of divine service, and in every relation of life a worthy man.

His reputation in the 20th century has frequently suffered from a partial view. Ernest Walker (1907), for example, categorized him as 'a primarily ecclesiastical musician', though well aware of evidence to mitigate this view; moreover, even in his assessment of the anthems he regarded as among Boyce's best, he was inclined to be lukewarm or to damn with faint praise. In 1941 Fellowes, recognizing stylistic affinities with Purcell in Boyce, and confronted with the unquestionable disparity in quality between his commonplace anthems and the 'subtle artistry' of *O where shall wisdom be found?* or *I have surely built thee an house*, advanced the theory that such works might not be entirely the work of Boyce, but 'possibly adaptations of Restoration compositions'. No sources for Boyce's putative arrangements are cited, nor, indeed, have any been subsequently identified.

By this time, however, the early stages of the modern Boyce revival were under way, for Constant Lambert had already published his pioneering edition of *Eight Symphonys* (Oxford, 1928), which drew public attention for the first time to the qualities of Boyce's orchestral music. The preface describes these pieces as 'among the finest compositions of their time, not only in England but in Europe'. Some time later these views were reinforced by W.S. Newman (*NewmanSBE*), who, having surveyed Boyce's trio sonatas, concluded that 'today the almost total neglect of such a capable composer can only be a matter of astonishment'. Boyce's standing as a composer has been further enhanced by the advocacy of scholars such as Gerald Finzi, Stanley Sadie, Charles Cudworth and Roger Fiske. There has also been a steady growth in the quantity of music available in modern editions or facsimile reprints, and doctoral dissertations covering most aspects of Boyce's output have been undertaken. The Boyce bicentenary in 1979 was celebrated by broadcast performances of *Solomon* and *David's Lamentation*, and in 1982 the first modern performance of *See famed Apollo and the nine* was relayed by the BBC. Apart from the various anthems, songs and overtures by Boyce which have for some time been available in commerical recordings, *Solomon*, *The Secular Masque*, the *Twelve Sonatas for Two Violins and Bass*, and *Peleus and Thetis* along with a selection of smaller theatre pieces, have also recently become accessible on CD, while several different recordings of the now much admired and popular *Eight Symphonys* have been issued. Thus Boyce's contribution to music in 18th-century England is now widely recognized, and his status as 'a minor English master' (Westrup) may soon be fully acknowledged.

IAN BARTLETT (text), ROBERT J. BRUCE (work-list, bibliography)

Boyd, Anne (Elizabeth) (*b* Sydney, 18 April 1946). Australian composer. She studied at the NSW Conservatorium, with Sculthorpe at the University of Sydney (BA 1969), where she won the Frank Albert Prize, and, through the award of a Commonwealth Overseas Scholarship, with Mellers and Rands at York University, England (DPhil 1972). She was subsequently appointed lecturer in music at the University of Sussex. From 1977 to 1980 she lived at Pearl Beach, north of Sydney, devoting herself exclusively to composition. She has particular interests in the musical cultures of Asia and the Pacific, and in music education. In 1981 she was appointed reader and founding head of the music department at the University of Hong Kong, and in 1990 became professor of music at the University of Sydney. She holds the rare distinction for a foreigner of being admitted to the Hong Kong Composers' Guild and of lecturing on her own work at the Shanghai Conservatory. In 1996 she was appointed a member of the Order of Australia for her services to music as a composer and educator. Her compositional style is sparse, disciplined and cogent, placing contemporary techniques at the service of a personal and individual manner.

WORKS
(*selective list*)

Stage: As Far as Crawls the Toad (theatre piece), 5 young perc players, 1970, rev. 1972; The Rose Garden (theatre piece), Mez, chorus, ens, 1972; The Little Mermaid (children's op, 2, R. Lee, after H.C. Andersen), 1977–8; The Beginning of the Day (children's op, 3 scenes, 2 interludes), 1980

THÉRÈSE RADIC

Boyd, (Charles) Malcolm (*b* Cardiff, 24 May 1932). British musicologist. He studied music at Durham University (1950–53) where his teachers included Arthur Hutchings and A.E.F. Dickinson. After teaching music at Hemsworth Grammar School (1956–9), he became lecturer (later senior lecturer) at Cardiff College of Music and Drama (later the Welsh College of Music and Drama). From 1973 until his retirement in 1992 he was lecturer (later reader) in music at University College, Cardiff. Boyd's main areas of research are the music of J.S. Bach and Italian music of the early 18th century. His publications include standard studies of the life and works of Bach (1983) and Domenico Scarlatti (1986), and he has edited several cantatas by Alessandro Scarlatti (ICSC, xiii, 1986).

ROSEMARY WILLIAMSON

Boydell, Brian (*b* Dublin, 17 March 1917). Irish composer and musicologist. His early education at Rugby was followed by a period in Heidelberg pursuing general musical studies. He graduated with a first class degree in natural sciences from Clare College, Cambridge, in 1938 and began studies in composition with Hadley and Howells at the RCM (1938–9) and with Larchet at the Royal Irish Academy of Music, Dublin (1940–42). He took the BMus (1942) and DMus (1959) at Trinity College, University of Dublin. Boydell taught singing at the Royal Irish Academy of Music (1944–52) and held the chair of music at Trinity College (1962–82) where he was subsequently elected fellow emeritus. His musicological research during that time culminated in two important books on the music of 18th-century Dublin, *A Dublin Musical Calendar 1700–60* and *Rotunda Music in Eighteenth-Century Dublin*. He was also active as a conductor, directing the Dublin Orchestral Players (1942–67) and the Dowland Consort (1958–69), and as an adjudicator and frequent broadcaster. He served on the Irish Arts Council (1961–83), was a founder member of the Music Association of Ireland and his many awards include an honorary DMus from the National University of Ireland (1974), the Commendatore della Repubblica Italiana (1983), membership of Aosdána (Ireland's state-sponsored academy of creative artists) and an honorary fellowship of the Royal Irish Academy of Music (1990).

His eclectic influences include such diverse composers as Vaughan Williams, Bartók, Sibelius, Bloch, Berg, Stravinsky and Hindemith. In the 1940s he eschewed the prevalent 'Celtic Twilight' school of Irish Romanticism in order to develop a more progressive and personal style by integrating free octatonicism, modality and extended tonality into a coherent compositional language. This was to remain almost unchanged throughout his career, exemplified by the four works for string quartet composed between 1949 and 1991. Neo-classical techniques are evident too in his motivic and thematic treatment and his choice of genres and forms.

A lifelong pacifist, Boydell was inspired to compose the funereal *In memoriam Mahatma Gandhi* (1948) for orchestra after Gandhi's assassination. Other works which also demonstrate his command of orchestral techniques include the intensely expressive Violin Concerto (1953–4), the *Megalithic Ritual Dances* (1956), *Symphonic Inscapes* (1968) and *Masai Mara* (1988) which uses the tenor recorder in novel ways to recreate the atmosphere of the Kenyan national park of that name. As a singer himself, he was intimately acquainted with the potential of the human voice; this is reflected in his many vocal works, such as the settings of texts by Joyce and Yeats, the cantata *A Terrible Beauty is Born*, written for the 50th anniversary of the 1916 uprising, and the polysyllabic *Mouth Music for Ten Voices*, composed for the International Choral Festival in Cork in 1974. Boydell has also written incidental music for a number of Irish films and plays as well as occasional ceremonial pieces.

WORKS
(*selective list*)

Orch: In memoriam Mahatma Gandhi, 1948; Vn Conc., 1953; Elegy and Capriccio, cl, str, 1956; Megalithic Ritual Dances, 1956;

Symphonic Inscapes, 1968; Partita concertante, 1978; Masai Mara, 1988

GARETH COX

Boyden, David D(odge) (*b* Westport, CT, 10 Dec 1910; *d* Berkeley, 18 Sept 1986). American musicologist. He studied at Harvard (AB 1932, MA 1938) where he was especially influenced by Archibald T. Davison. From 1938 to 1975 he taught at the University of California, Berkeley, where he was assistant professor (1943–9), associate professor (1949–55) and full professor (1955–75); he also served as chairman of the music department (1955–61). He published three textbooks (including the widely used *An Introduction to Music*), but most of his work has been on the history of string instruments and string playing. His book *A History of Violin Playing from its Origins to 1761* is a major work of scholarship informed by practical experience as well as scholarly judgment. He was working on its sequel up to the time of his death. He was twice vice-president of the American Musicological Society (1954–6, 1960–62), a Fulbright Fellow at Oxford (1963) and three times the recipient of a Guggenheim Fellowship (1954, 1967 and 1970).

PHILIP BRETT

Boyd Neel Orchestra. London orchestra founded in 1932 by Boyd Neel. *See* LONDON, §VIII, 3 and especially NEEL, (LOUIS) BOYD.

Boyer, Charles-Georges (*d* after 1807). French music publisher. He was an *écuyer du Roi* when he married Marie-Rose-Jeanne Le Menu in February 1775. In January 1778 Boyer's wife went into partnership with her mother, Madame Le Menu, in their music publishing business under the name of 'A la Clé d'Or', in the rue du Roule in Paris. The firm had been founded by Christophe LE MENU in 1758. The partnership of the 'Dames Lemenu et Boyer' lasted until 1783. In May of that year, Boyer, who had bought his mother-in-law's interest in the firm on 21 January 1779, invested in the business himself. He set up shop at 83 rue Neuve des Petits Champs (between May 1783 and December 1784), then in the rue de Richelieu (or rue de la Loi) in the former café de Foy (between January 1785 and August 1796), and after 1785 he used the name 'A la Clé d'Or' for his own establishment. The catalogues he issued under his own name feature both new works and works previously published by Madame Le Menu. From a comparison of the Venier and Boyer catalogues, it would seem that Boyer bought the firm of Jean Baptiste Venier in 1784. Until August 1790 Boyer used the shop in the rue du Roule as a subsidiary outlet for his own publications. In 1796 he sold his business to the publisher Jean-Henri Naderman, who subsequently described himself as his successor.

The published repertory embraced everything then in fashion: symphonies, symphonies concertantes, concertos, chamber music, arrangements of *opéra-comique* overtures, *airs variés* and ariettas. Italian composers such as Boccherini, Cambini, Clementi, Lorenziti and Sarti featured side by side with composers from German-speaking countries such as Haydn, Vanhal, Rodolphe Kreutzer and Sterkel. French composers were in a minority on the list. Like many of his contemporaries, he also

published periodicals of music including *Journal de pièces de clavecin* (1784–94), *Journal d'ariettes choisies dans les meilleurs opéras* (1791–2) and *Les Variétés à la mode*. (*DEMF*, i; *JohanssonFMP*)

ANIK DEVRIÈS

Boyer, Jean (*b* before 1600; *d* Paris, before 16 May 1648). French composer and viol player. He composed airs for several *ballets de cour*: *Ballet des forgerons* (1617), *Ballet de M. de Nemours* (1618) and *Ballet de la folie* (1618). He dedicated his *Airs* (1621) to the Duchess of Nemours, whose husband helped develop the *ballet de cour*; perhaps Boyer was in the employ of the Nemours family. He may have been the Boyer who went to Savoy in 1628 with three other Parisian musicians to serve the court there; he is less likely to have been the Boyer who was director of music at the collegiate church of St Agricol at Avignon from 1626 to 1629. The latter Boyer, apparently Catholic, wrote an eight-part antiphonal Passion motet, *Ecce homo*, and another motet, *Crux fidelis*; and Jean, apparently Protestant, published a psalm and two prayers, as well as his many secular *airs*. On 29 January 1636 Jean Boyer succeeded Gabriel Caignet as viol player in the royal chamber, a position he maintained until his death. Some time after taking up the post he became secretary of the chamber and *ordinaire* of music of the king and queen. His instrument collection at the time of his death included lutes, theorbos and guitars as well as viols.

Boyer's early *airs* are rhythmically much more interesting than the later bawdy drinking- and dance-songs. The solo *airs* are accompanied by a simple lute part; the drinking-songs are for two voices (treble and bass), and the dance-songs are all monophonic. All the songs are strophic and syllabic.

WORKS

Airs à 4 parties (Paris, 1619)
Airs de Ian Boyer Parisien, mis en tablature de luth par luy mesme, 1v, lute (Paris, 1621), 19 airs, 2 dialogues, 1 psalm, 2 prayers; 2 airs ed. A. Verchaly, *Airs de cour pour voix et luth (1603–1643)* (Paris, 1961)
Recueil de chansons à boire et dancer, 1–2vv (Paris, 1636)
II. livre des chansons à danser et à boire, 1–2vv (Paris, 1642)
9 airs, 1v, lute, 1618[9]/R
40 airs, 1v, 1619[10], 1623[5], 1628[9]
8 airs, 1v, 1621[13] [sometimes wrongly listed as in 1620[10]]
12 sacred contrafacta, 1v, bc, 1632[3]

Airs by ?Boyer in 1617[9], 1626[11]

JOHN H. BARON

Boyer [Boyé], Pascal (*b* Tarascon, 20 Jan 1743; *d* Paris, 7 July 1794). French writer and composer. He succeeded Gauzenargues as *maître de chapelle* at Nîmes Cathedral from 1759 to 1765. After a visit to Italy, he spent the rest of his life in Paris writing, composing and teaching singing and the guitar. He apparently wrote much additional music to operas and ballets, at least one motet, and perhaps three trio sonatas, published by Gaveaux; but only a few airs in Cailhava's *comédie-ballet Les étrennes de l'amour* (1769) and guitar accompaniments to the collection *Suites des soirées de la Comédie italienne* (*c*1783) are extant. He is important principally for his writings, which show him to have been an intelligent polemicist with Encyclopaedist sympathies and a good theoretical grounding. Involved from the early 1780s in political journalism, he was arrested as a reactionary and died on the guillotine.

JULIAN RUSHTON

Boyes, Thomas. *See* BOYCE, THOMAS.

Boykan, Martin (*b* New York, 12 April 1931). American composer. He studied with Piston at Harvard University (BA 1951), and with Hindemith, first at the University of Zürich (1951–2) and then at Yale University (MM 1953). In 1953 he went to Vienna on a Fulbright scholarship, and in 1957 he joined the faculty of Brandeis University, where he was appointed professor in 1976. He has also lectured at Columbia University and Bar-Ilan University, Israel. His numerous grants and commissions include those from the Fromm Foundation, the Martha Baird Rockefeller Fund, the NEA, the MacDowelly Colony, the American Academy and National Institute of Arts and Letters.

Despite the tonal orientation of his principal teachers, Boykan's mature style is atonal and reflects the influences of Webern and the late music of Stravinsky, the respective subjects of his two most important articles ('"Neoclassicism" and the late Stravinsky', *PNM*, i/2, 1963, p.155, and 'The Webern Concerto Revisited', *Proceedings of the American Society of University Composers*, iii, 1970, p.74). His String Quartet no.1 (1967) is partly serial; his later works use 12-note techniques. A characteristically American feature of his music is the long line, which for him is rhythmically flexible and extends across a wide registral range. He favours long works for small ensembles; a notable exception is his Symphony for orchestra and solo baritone (1989).

STEVEN E. GILBERT

Boyko, Rostislav Grigor′yevich (*b* Leningrad [now St Petersburg], 1 Aug 1931). Russian composer. He studied at the Glinka Choral Capella in Leningrad (1939–44) and at the Moscow Choral School (1944–50). He graduated from the Moscow Conservatory (1957) as a choral conductor and composer, having studied with Khachaturyan and Vladimir Stepanov.

Among Boyko's 80 opuses, written largely before 1983, there are three symphonies, more than 100 choruses, many solo and choral songs. Most of his works have been published, many have been recorded. Boyko's compositions for children, including four operas, continue the tradition established by Lyadov, Grechaninov and Rebikov. Choral music is his most widely represented genre, combining the professionalism of a composer and chorus master. This is typified by a song style which relies on the European classical tradition and on folklore, with the subordination of individual means of expression to traditional musical conventions. The music is characterized by clarity of form, by elegant part-writing, a natural singing style, and by its expressiveness and memorability. Particularly successful are the choruses on verses by A.S. Pushkin (1978) and his romances and songs set to poems by Yesenin, Isaakian and Heine. Boyko is one of the first Russian composers to produce whole compositions based on melodies from around the world and from various parts of the former USSR. His choral arrangements, op.17, and the 32-song *Cycle of Children's Songs in the Style of Music of the Peoples of the World*, op.68, are notable in this respect.

WORKS

YURY IVANOVICH PAISOV

Boyle, George Frederick (*b* Sydney, 29 June 1886; *d* Philadelphia, 20 June 1948). Australian-American pianist, composer and teacher. He was first taught the piano by his mother and then, from 1901, by Sydney Moss. In the same year he made a concert tour of more than 280 towns and cities in Australia, Tasmania and New Zealand; further tours followed. From 1905 to 1910 he studied in Berlin with Busoni. During these years of intensive study he performed extensively throughout Europe and conducted orchestras in the UK. After he settled in the USA in 1910, such notable pianists as Mark Hambourg, Ernest Hutcheson and Backhaus continued to play his compositions in Europe. From 1910 until his death Boyle performed, taught and composed in America. He held positions at three major American conservatories: the Peabody Conservatory of Music in Baltimore, as head of the piano department (1910–22), the Curtis Institute (1922–4) and the Institute of Musical Art, soon renamed the Juilliard School of Music (1922–40). In addition, he was on the faculty of Chestnut Hill College (1944–8) and was coordinator of the Boyle Piano Studios in Philadelphia from 1926 until his death in 1948.

Boyle composed in a late Romantic style. The works of his early period (1902–10) are short, small-scale pieces, characterized by simple harmonies, rhythms and melodies. Many of them are dances in binary, ternary or rondo forms. The 1909 *Ballade* for piano anticipated his middle period (1910–22), in which forms become larger, and rhythms and harmonies more daring in the manner of Debussy and Ravel or the later Rachmaninoff. Rich, often non-functional harmony and striking pianistic effects such as tremolos, long trills, alternating octaves and fast repeated chords characterize such works as the Piano Concerto (1912), the Piano Sonata (1921) and the *Habanera* for piano. In Boyle's final period (1922–48), he returned to smaller forms, but now free-composed and with the advanced harmonies, chromatic melodies and more complex rhythms of the middle period compositions. He wrote many pedagogical pieces during these later years.

I.W. Peery: *George F. Boyle: Pianist, Teacher, Composer* (diss., Peabody Conservatory of Music, 1986)

IRENE WEISS PEERY

Boyle, Ina [Selina] (*b* Enniskerry, Co. Wicklow, 8 March 1889; *d* Enniskerry, 10 March 1967). Irish composer. As well as studying the violin and the cello, she took composition lessons with George Hewson and Charles Kitson in Dublin and, by correspondence, with her cousin Charles Wood. In 1920 her *Soldiers at Peace* was performed with great success and *The Magic Harp* received a Carnegie Award. The latter was published and performed in London, as were some partsongs and some orchestral and choral works. In 1928 she studied in London with Vaughan Williams; she continued to have occasional lessons with him until the late 1930s.

Although Vaughan Williams's influence can be heard in Boyle's music, her own musical personality, predominantly serious but with moments of wit and passion, is always evident. She drew her inspiration usually from poetry, and her particular affinity with Edith Sitwell's work is demonstrated in two of her finest works, *From the Darkness* and *Still Falls the Rain*. Her 15 *Gaelic Hymns* remain her most popular choral work. Of her orchestral compositions *Wild Geese* and the Overture are the most frequently performed, revealing an accomplished technique and skilful orchestration. Drama and wit are displayed through a quintessentially Irish voice. Boyle led a quiet, isolated life in Ireland and although she wrote prolifically, it was with little opportunity for performance.

WORKS
(*selective list*)

Stage: Virgilian Suite (ballet), 1930–31; The Dance of Death (masque for dancing, after H. Holbein woodcuts), 1935–6; The Vision of Er (mimed drama/ballet, after Plato: *Republic*), 1938–9; Maudlin of Paplewick (op, after B. Jonson: *The Sad Shepherd*), 1964–6

Orch: The Magic Harp, 1919; Colin Clout, 1921; Glencree (In the Wicklow Hills), sym., 1924–7; Psalm, vc, orch, 1927; The Dream of the Rood, sym., 1929–30; Overture, 1933/4; Vn Conc., 1935; Wild Geese, 1942

SARAH M. BURN

Boyleau [Boileau, Beaqua], **Simon** (*fl* Milan and Turin, *c*1544–after 1586). French composer. He is not to be identified with 'Boyleau' to whom a motet in the Medici Codex (*I-Fl* Magl.666) of 1518 is ascribed. In his first madrigal book (1546) he is called 'nobile francese', and in the dedication (to Marguerite of Savoy, daughter of François I) of a manuscript collection of madrigals he wrote 'esser anch'io di nation francese'. His origins are unknown, but he seems to have spent his career in northern Italy. His earliest works were published in the Veneto: the *Madrigali a quatro voci* (1546) was published at Padua, by Fabriano and Bindoni (probably on commission of Girolamo Scotto) and not in Milan as previously thought. Venetian influence is evident in the dedications to his *Motetta* of 1544 and the *Madrigali* of 1546; it appears from these dedications that he spent his First Italian years in Venice.

From 1551 to 1557 Boyleau was *maestro di cappella* of Milan Cathedral; he was replaced by Bartolomeo Torresani in January 1558. From at least the end of 1562 he was active, still in Milan, as *maestro* at S Maria presso S Celso, where he remained through at least January 1569. The works of these years were published in Milan and dedicated to figures in Lombardy. In this same period he assembled (and perhaps copied himself) the set of four-voice madrigals dedicated to Marguerite of Savoy. The collection includes settings of sonnets addressed to Marguerite and her husband, Duke Emanuele Filiberto, as well as an eight-section setting of a canzone by Sannazaro. The manuscript is undated but must come from between 1559, the date of the dedicatee's marriage, and her death in 1574.

In February 1572 Boyleau returned to Milan Cathedral as *coadiutor* to the titular *maestro*, Vincenzo Ruffo; he resumed his previous position of *maestro* a few months later when Ruffo left Milan for Pistoia. Boyleau's service as *maestro di cappella* continued until his final dismissal in March 1577. Perhaps thanks to his preceding rapport with the Savoy court, at the end of 1582 he joined the cappella of Turin Cathedral, where he became *maestro* in April of the following year. Dismissed at the end of 1585, he nevertheless remained some months in the city and in June 1586 was paid by Duke Carlo Emanuele I of Savoy for having instructed a page and for some music.

Boyleau's music is competent if unadventurous. The *Magnificat* settings, dedicated to Carlo Borromeo, are alternatim works of modest dimensions. The motets, conservative in character, were enough esteemed to be intabulated by the Spanish vihuelist Estaban Daza and to be included in anthologies by Berg and Neuber (RISM 1555[11], 1555[12], 1556[9]). His first madrigals represent the Venetian style of the 1530s and 40s. Subsequent collections show him to have been familiar with more recent trends, drawing on the new chromatic possibilities and experimenting with a counterpoint more rhythmically varied and complex. A section of Gesner's *Pandectae* (1548) mentions a treatise 'Simonis Boyleau Galli Musica' (now lost).

WORKS

SACRED VOCAL

Motetta ... nunquam hactenus impressa, 4vv (Venice, 1544)
Modulationes in Magnificat ad omnes tropos ... addito insuper concentu, vulgo falso bordon nominato, ad omnes tonos accomodato, 4–6vv (Milan, 1566)
1 mass, Salve Regina, 2 motets, 4vv, *I-Tn*, Ris Mus ii 4

JAMES HAAR, LUCIA MARCHI

Boy Monachus, Hugo (*fl c*1400). North Netherlandish composer. He was probably from Dordrecht, where the name occurred frequently at the time, though never as a monk's, and he may be the priest Hugh who was appointed as a singer to the court of Holland at The Hague in 1395. He left one three-voice Dutch song *Genade Venus, vrouwe tzart* in the fragments *NL-Lu* 2720 (ed. van Biezen and Gumbert). Only the cantus is complete. It follows the more complex ballade style of the late 14th century.

GILBERT REANEY

Boys, Thomas. *See* BOYCE, THOMAS.

Boyvin [Boivin] (*fl c*1540–50). French composer. 12 four-voice chansons published in collections in Paris by Attaingnant (RISM 1544^{7-8}, 1545^{12-13}, 1547^{19} and 1549^{20}) and a three-voice motet (*Levavi oculos meos*) printed by Le Roy & Ballard (1565^{2}) are ascribed to him. Fétis identified the composer with Jean Boyvin, a singer (*basse-taille*) in the chapel of the dauphin, Duke Henri of Orléans, in 1539; he might, however, be identified with Anthoine Boyvin who was organist to Henri in 1543. Most of the chansons use courtly decasyllabic *épigrammes* of eight or ten lines, and the musical settings faithfully reflect the poetic form with regular caesuras after the fourth syllable. Their style is generally suave and homophonic and akin to that of Sandrin. Two, *Je sens l'affection* and *Je cherche autant amour* (both ed. in SCC, ix, 1994), became favourites and were reprinted and intabulated for guitar and lute several times. Another, *Mort sans soleil* (ed. F. Lesure, *Anthologie de la chanson parisienne*, Monaco, 1953), sets Marot's translation of Petrarch's *Lasciato hai morte*, and represents one of the first complete sonnet settings in France.

FRANK DOBBINS

Boyvin, Jacques (*b* Paris, *c*1653; *d* Rouen, 30 June 1706). French organist and composer. He received his first schooling at the Hôpital des Quinze-Vingts, a Parisian institution for the blind (where his father was an inmate), and held the post of organist there from 1663 to 1674. In July 1674 he became organist at Notre Dame Cathedral, Rouen, after winning a competition in both performance and composition; he remained there until his death. Between 1686 and 1689 he oversaw the building there by Robert Clicquot of a magnificent organ to replace the previous instrument, destroyed by a storm in 1683. A letter of 1689 reflects his enthusiasm for the new instrument, with more than 40 ranks, four manuals and manual-to-pedal couplers. He also served at St Herbland from 1697 to 1702.

Each of Boyvin's books contains eight suites arranged according to the church modes. There are fewer individual pieces in book 2 than in book 1 (51 as against 69), but they tend to be longer and more elaborate. There are no liturgical designations. The music of both books is predominantly secular and colouristic, and exploits the registers of the new Clicquot instrument through such forms as the prelude or *plein jeu*, fugue, duo, trio, ornamented solo and dialogue. The Cymbale of the Echo organ made possible a *Pleins-jeux à trois choeurs* and Boyvin introduced other innovations in *Dessus de tierce en vitesse et accords*, *Concerts de flûte* and *Dialogues de récits*. The dialogues, which conclude most of the suites, are among the longest movements and are often multisectional. The preface to book 1 (translated by F. Douglass) includes a detailed discussion of registration, and the *Traité abrégé de l'accompagnement* contains interesting material on the realization of figured basses; it has been translated into several other languages.

ALMONTE HOWELL

Boyvin, Jean. A French singer. He was a singer in the chapel of the dauphin, Duke Henri of Orléans, in 1539; he was identified by Fétis with the French composer BOYVIN.

Božan, Jan Josef (*b* Frýdek, 1644; *d* Chroustovice, nr Chrudim, 1 July 1716). Czech priest and hymnologist. A priest of Chroustovice, he collected sacred songs over a long period. His hymnal, *Slaviček rajský na stromě života slávu tvorci svému prozpěvující* ('A nightingale of paradise, perched on The tree of life, singing glory to its creator'; Hradec Králové, 1719), which bears a dedication to Count František Antonín Sporck, was published posthumously with the count's support. It contains both old and new hymns from Bohemia and other lands, and with about 930 texts and 470 melodies is one of the larger Catholic collections of the period.

JOHN CLAPHAM

Bozay, Attila (*b* Balatonfűzfő, 11 Aug 1939; *d* Budapest, 14 Sept 1999). Hungarian composer. He studied at the Békéstarhos College of Music and graduated from the Liszt Academy, Budapest, as a pupil of Farkas in 1962. In the following year he taught harmony at the Szeged Conservatory; from 1963 to 1966 he worked in the music section of Hungarian radio. A UNESCO Scholarship took him to Paris for six months in 1967, and after his return to Hungary he devoted his time to composition. He became professor of instrumentation and composition at the Liszt Academy in 1979, also directing the Hungarian state concert agency (1990–93). He was awarded the Erkel Prize (1968, 1979), the Bartók-Pásztory Prize (1988) and the Kossuth Prize (1990). He first came to international notice when his String Quartet no.1 was performed at the 1967 International Rostrum of Composers and at the ISCM Festival of the same year.

His use of 12-note technique, the basis of all his music up to 1967, gave prominence to melodic writing, but his stay in Paris led him to a less rigorous serial practice, and to a preoccupation with clusters and timbre. In the 1970s his music was characterized by a combination of its strength of construction and the use of freely organized, aleatory techniques, as in the series of *Improvisations* (1972–8). Aleatoricism is particularly evident in his compositions for Hungarian zither and recorder, both of which he has played at international festivals. In the opera *Csongor és Tünde* (1979–84), which marks a decisive turning-point in his career, he used a 10+2-note system which has remained significant in his subsequent works. In the sonatas which follow the opera traditional forms are followed, and the classical elements that began to appear in the opera become more apparent. This classicism informs the orchestral works of the late 1980s and early 1990s, though his vocal music of the same period is freely expressive.

JÁNOS KÁRPÁTI/PÉTER HALÁSZ

Božič, Darijan (*b* Slavonski brod, 29 April 1933). Slovenian composer and conductor. He attended the Ljubljana Academy of Music, completing studies with Škerjanc (composition) in 1958 and with Švara (conducting) in 1961. He joined the Pro Musica Viva group of composers and in 1962 won the Prešern Award of the Ljubljana Academy. He was assistant conductor of the Slovenian National Theatre opera company in Ljubljana (1968–1970) and then artistic director of the Slovenian PO (1970–74). He was professor of composition at the Universities of Ljubljana and Maribor until 1995, when he was appointed artistic director of the Slovene National Opera. He was a founder of the Slovene Music Days festival (Ljubljana) in 1974 and the University of Maribor Jazz Centre in 1992.

Božič's music has been strongly influenced by jazz and a keen sense of musical drama. His early concertos for trumpet, trombone and saxophone and his *Sonatas in Cool* show clearly the jazz influence (similar to that on Tippett), and his use of extended tonality and traditional forms. From 1963 he adopted new methods, including a form of serial working and free rhythmic coordination, but with no loss of melodic interest. His frequent use of speakers is well illustrated by the collage tape work *Trije dnevi Ane Frank* ('Three Days in the Life of Anne Frank'), *Polineikes* and *Jago*, a musico-dramatic characterization derived from Shakespeare. Even in chamber works such as *Kriki* ('Screams') and *Collage sonore*, speakers are included in the ensemble.

The development of his dramatic interest into full-scale opera has been achieved by stages. *Ares-Eros* with its collage technique acted as a preparatory study for the opera *Lizistrata 75*, and various short Shakespeare-derived music dramas led him to set *King Lear* (Kralj Lear, 1985) and scenes from *Hamlet*, the title word reversed in *Telmah* (1989). Although Božič has made only modest use of electronic sounds, he frequently uses collage rather than *musique concrète* tape techniques, as in the bitterly ironical but magnificent reinterpretation of the funeral rite in his Requiem of 1969.

NIALL O'LOUGHLIN

Bozza, Eugène (*b* Nice, 4 April 1905; *d* Valenciennes, 28 Sept 1991). French composer and conductor. He studied with Büsser, Rabaud, Capet and Nadaud at the Paris Conservatoire where he won *premiers prix* for the violin (1924), conducting (1930) and composition (1934), and also the Prix de Rome with *La légende de Roukmâni* (1934). From 1938 to 1948 he conducted at the Opéra-Comique in Paris and in 1951 he was appointed director of the Ecole Nationale de Musique, Valenciennes, an appointment he held until his retirement in 1975. He was made a Chevalier of the Légion d'Honneur in 1956. Though his large-scale works have been successfully performed in France, his international reputation rests on his substantial output of chamber music for wind. This displays at a high level the qualities characteristic of mid-20th-century French chamber music: melodic fluency, elegance of structure and a consistently sensitive concern for instrumental capabilities.

WORKS
(*selective list*)

Dramatic: La légende de Roukmâni (fantaisie lyrique, 1, C. Orly), 3vv, orch, 1934, Paris, Institut de France, 30 June 1934; Léonidas (fresque antique, 2, G. de Teramond), RTF, 1947; Beppo ou Le mort dont personne ne voulait (opéra bouffe, 1, J. Bruyr), Lille, Opéra, 1963; La duchesse de Langeais (drame lyrique, F. Forté, after H. de Balzac), Lille, Opéra, 27 April 1967
Ballets: Fêtes romaines (de Teramond), Lille, 1939; Jeux de plage (Bruyr), Lille, 1945
Choral: La tentation de St Antoine (A. Machabey, after G. Flaubert), orat., 1948; Requiem, STB, 1950; Messe de Sa Sainteté Pie XII, 1955; La passion de Jésus (Forté), spkr, chorus, orch, 1963; Messe de requiem, chorus, orch, 1971

PAUL GRIFFITHS

Bozzi [Bozi, Bozio], **Paolo** (*b* Bovolone, nr Verona, *c*1550; *d* ?Venice, *c*1628). Italian composer and dramatist. His name first occurs in archival records in Verona from May to June 1574 and again a year later, with the ecclesiastic title 'Don', in the parish registers of S Maria in Organo, Verona; he probably received his early training in music there with Giammateo Asola. Between 7 February and 16 May 1584 he was assistant chaplain at S Biagio, Bovolone; he then moved to Mantua where he was *maestro di canto* at the ducal chapel of S Barbara from June 1584 to August 1587. By 1588 he was in Venice where he was retained by the patrician Pietro Pasqualigo in whose house he wrote the tragedy *Eutheria* (1588); he dedicated his *Canzonette* (1591) to Pasqualigo's eldest son, Vettor. The text of one of these, *Non mi doglio d'amore*, appears in Bozzi's pastorale *Fillino* (1597) where it is sung at the end of Act 3 by Fillino, Silvia and Filli. According to Bozzi's preface, the play had been performed six years earlier by the 'Confederati, e da Costanti Academici' in Verona.

After the death of Zarlino, Bozzi was elected a chaplain at S Severo, Venice, where he joined his former mentor and colleague Asola; his signature appears in the baptismal records between 4 July 1591 and 16 December 1627. In Venice he maintained close ties with the printer Amadino, for whom he edited the madrigal anthologies *Novelli ardori* (RISM 1588^{18}) and *Giardinetto di madrigali et canzonette* (1588^{19}), dedicated respectively to Duke Alfonso Gonzaga and Marco Verità; the latter, a member of the Accademia Filarmonica of Verona, was referred to by Bozzi as 'my patron and master' in the dedication to his tragedy *Cratisiclea* (1591). Both Bozzi's surviving books of madrigals were likewise dedicated to members of the academy, and in 1602 he sent a mass for 12 voices, now lost, to commemorate the anniversary of the founding of the academy; it was not performed until 1 May 1604, when Bozzi was rewarded with the gift of a necklace. Bozzi's sacred works comprise Vesper psalms in anthologies and two eight-voice motets in Asola's *Sacro sanctae Dei laudes* (1600^{3}), supplied with organ bass; he is also the author of several *sacre rappresentazioni* published in Venice.

DAVID NUTTER

B quadratum. *See* B MI and ACCIDENTAL, §1.

Brabant, Lambertus (*fl* *c*1430). Composer, presumably Franco-Flemish. His two known works are found only in *I-AO* 15: a Gloria (ascribed 'l. Brabant' in the index as well as over the music) and a Credo (ascribed 'lamberti brabant' in the index only); they are edited in Cobin. Both are for two voices in the same range (an unusual texture, *see* VIRILAS), and it is plain from their placing in the manuscript that the copyist viewed them as a pair (though the Gloria cadences on A, the Credo on G).

He may well be the Johannes Lamberti Brabant who was paid as a singer at Cambrai Cathedral from 1439–40 and a canon from 1442, who died in 1464–5 (Houdoy, 264, 391). The Johannes Lamberts who sang at St Donatian, Bruges, in 1461 is surely too late to be the composer; but it is marginally possible that he is to be identified with Jehan Lambert, dit de la Bassee, a singer in the Burgundian Court chapel paid from 1436 until the end of 1467 (on a list wrongly dated 1468 in Marix, p.260).

DAVID FALLOWS

Bračanin, Philip (*b* Kalgoorlie, 26 May 1942). Australian composer. After completing a BA in music and mathematics at the University of Western Australia (1962), he undertook research into the music of Seiber (MA, 1968) and Webern (PhD, 1970), at the same institution. In 1970 he was appointed lecturer at the University of Queensland, where he later became senior lecturer, then reader.

Bračanin's first compositions date from the early 1970s and arose through a desire to find more vital ways of teaching harmony and counterpoint. His Trombone Concerto (1977, rev. 1988) is now recognized as the first of his mature works; it launched him in the genre by which, through some dozen works, he has become best known. In 1994 he turned his attention to writing symphonies, of which by 1996 he had composed three. Bračanin's style represents a reaction against his own doctoral studies in atonality and serialism. His works of the 1980s and 90s feature both luscious late Romantic and elegant neo-classical textures. He has occasionally sought inspiration in the Dalmatian Croatian musical heritage of his forebears. Particularly distinctive is his flexible use of modal fragments, owing much to Seiber, and of slow-moving bass lines, which derive from Mahler and a variety of Slavonic influences. His concerto writing reveals two dominating mood types: mellow, sentimental, even melancholic in slow, middle movements; motoric and vibrantly colouristic in the faster, outer movements.

Bračanin's symphonies show an increasing integration of styles and mood types, the choral Symphony no.2 (1994) incorporating texts on the theme of time by Judith Wright and W.H. Auden.

MALCOLM GILLIES

Braccini, Luigi [Roberto] (*b* Florence, ?1755–6; *d* Florence, 1791). Italian composer. He was ten when he entered the monastery of SS Annunziata in Florence as a boarding student on 1 July 1766. Having returned home on 13 April 1771, he re-entered the monastery as a novice on 20 August 1772 and assumed the name Luigi. He took orders as deacon in December 1777, and on 2 January 1778 he was sent to the monastery of S Giuseppe in Bologna where he apparently studied with Padre Martini. There he was ordained a priest, and he returned to SS Annunziata on 28 June 1779 to take on the duties of *maestro di cappella*. He provided the church with a large quantity of well-written music in strict style, much of it *a cappella*, before returning to secular life on 9 September 1790 for reasons of health.

WORKS

Ave maris stella, 1780; Credo degli angioli, 2vv; 4 laudi spirituali; Miserere, 4vv, wind insts; Motetto, 6vv, per l'Elevasione, 1792; Responsi dei morti, 3vv; Vexilla, 3vv, insts, 1779: all *I-Fc*

JOHN WALTER HILL

Brace. The curved bracket that joins some or all of the staves of a system (*see* SYSTEM) at the left-hand end. In 17th- and 18th-century usage a brace was placed to the left of a complete system, even of orchestral music. Some 19th-century composers (e.g. Schubert and Brahms) used it thus in songs and other chamber music, but by then it was customary to mark off orchestral sections (woodwind, brass, strings) with separate braces. In the 20th century a straight bracket was normally used to distinguish orchestral sections, the brace being reserved for single instruments (piano, celesta, harp) or groups of similar instruments (horns, trombones, first and second violins, *divisi* cellos) using two or more staves. The brace is also used for the solo piano, harp etc. and for the manual staves of organ music.

RICHARD RASTALL

Bracegirdle, Anne (*b* Northampton, bap. 15 Nov 1671; *d* London, 12 Sept 1748). English actress and soprano. She was brought up in the family of Thomas Betterton and was London's leading actress from 1688 until her retirement in 1707. Her roles often included songs by John Eccles and verses in praise of her performance of his mad song 'I burn' in *Don Quixote* were set by both Purcell and Finger. Dryden described her singing with Doggett in *The Richmond Heiress* (1693) as 'wonderfully good' and Congreve wrote that she performed Venus in Eccles's setting of his *Judgment of Paris* (1701) 'to a miracle'. She was the second female lead in Giuseppe Fedeli's all-sung opera in the Italian style, *The Temple of Love* (1706). She is buried in the east cloisters of Westminster Abbey.

OLIVE BALDWIN, THELMA WILSON

Brachrogge, Hans (*fl* Copenhagen, 1602–38). Danish composer and singer. He is first heard of in 1602, when he was one of a group of Danish musicians sent by King Christian IV to Venice to study with Giovanni Gabrieli. After his return in 1604 he was in the charge of Melchior Borchgrevinck until in 1611 he was appointed a singer at court. In the same year he was sent with three others (Mogens Pedersøn, Jacob Ørn and Martinus Otto) to England, where for three years they served Queen Anne, the Danish king's sister. Brachrogge is known to have paid another visit to Italy in 1619 and to have been rewarded with a benefice from Roskilde Cathedral in 1621. He figures in the court accounts until 1638, after which nothing is heard of him. His only known music is *Madrigaletti a III voci, libro primo* (Copenhagen, 1619[13]), a set of 21 pieces, including two by Pedersøn (ed. in Dania sonans, ii, 1966). Brachrogge's works are attractive, eminently singable examples of Italianate canzonets, with slightly more serious overtones.

JOHN BERGSAGEL

Brack [Brakkher, Brachius], **Georg** [Jörg] (*fl* 1507–17). German composer. In 1507 he was court composer in Duke Ulrich of Württemberg's chapel in Stuttgart. At the same time he held the post of Kapellmeister, at least until Heinrich Finck joined the court chapel in 1510. Brack was apparently retained after the dissolution of the chapel on 11 June 1514, living at this period in a house in Stuttgart that the duke had given him. Probably during 1515 he was visited there by Ornithoparchus, who dedicated to him the second book of his *Musicae activae micrologus* (Leipzig, 1517). In the dedication he referred to Brack (who had given him advice) as 'Ducalis cantoriae Wirtenbergensis ductor primarius', praising him and ranking him with Obrecht, Josquin, Isaac and Finck. When the chapel was re-established in 1517 Siess was appointed Kapellmeister, so Brack may already have died.

Five four-voice German songs by Brack survive in printed anthologies, but they do not warrant Ornithoparchus's praise; hence it would appear that the main part of his work has been lost. *Ich rew und klag* enjoyed a wide circulation and was included in Jan z Lublina's tablature. It is remarkable for its good melody and elegant writing; the parallel movement of the individual voices in the manner of Hofhaimer and Finck is especially striking.

HANS-CHRISTIAN MÜLLER

Braconnier, Jean ['Lourdault'] (*d* shortly before 22 Jan 1512). French singer and composer. Several musicians were known by this sobriquet. Braconnier 'dit Lourdault' was a member of three important musical establishments of the late 15th and early 16th century. He entered the service of Duke René II of Lorraine no later than 1478, and was paid as a singer and canon of the ducal chapel of St Georges, Nancy, between 1485 and 1506. His service to René was not continuous, however, for in 1496 he was employed as a *ténoriste* in the chapel of Archduke Philip the Fair of Burgundy, whom he accompanied on his voyages to Spain in 1501 and 1506. By April 1507, after Philip's death, Braconnier had joined the entourage of King Louis XII of France, who then was campaigning in northern Italy. French and papal documents from 1510–12 identify Braconnier as a singer and chaplain of the French royal chapel. He obtained numerous ecclesiastical benefices both in France and in the Low Countries, and his date of death may be estimated from records pertaining to the benefices left vacant by his demise.

Braconnier was highly esteemed as a *basse-contre* singer during his lifetime. A lament on his death was written by the poet Guillaume Crétin (*Oeuvres poétiques de Guillaume Crétin*, Paris, 1932/*R*, ed. K. Chesney, 210–16) in which he is called 'maistre Jehan Braconnier, dit Lourdault, chantre'. Crétin's poem, which also mourns the death of the French composer Antoine de Févin, indicates that his nickname Lourdault ('clod') is derived from a chanson, undoubtedly the song *Lourdault, lourdault* surviving both in monophonic form and in a four-voice arrangement printed in Petrucci's *Canti B* (RISM 1502²), where it is attributed to Compère; it is ascribed in other sources to Ninot le Petit and Josquin.

The only known composition attributed to Braconnier is the chanson *Amours me trocte par la pancé*; it is found in *Canti B* ascribed to 'Lourdoys' and in the Strozzi chansonnier (*I-Fc* Basevi 2442) under the name 'Lourdault'. This piece exemplifies a type of chanson commonly known as a 'four-part arrangement'; it shows effective control of the simpler four-part chanson style popular about 1490–1510, alternating two- and three-part homophony with unadorned diatonic counterpoint of no great complexity.

Other musicians of the period with similar names are a singer Lourdiel, who was among the *petits vicaires* of Cambrai Cathedral in 1484 (according to Pirro); Jean Lourdel, who entered the Cappella Giulia in Rome in 1514 and is identifiable with the Zoanne Lordello in the service of Cardinal Ippolito I d'Este of Ferrara in 1516–17, and who, together with Willaert, accompanied Ippolito to Hungary in October 1517; and 'Iaco. Bracqueriers', whose motet *Cantemus Domino* is extant (in RISM 1555⁸).

LEWIS LOCKWOOD/JOHN T. BROBECK

Bracquet [Braquet], **Gilles** [Egidius] (*fl* 1551–9). Flemish composer and priest. He was employed by the town of Ypres as a priest and singing master; his name can be found in the town payrolls between 1551 and 1555. He received 12 livres as a Sunday school instructor and music teacher at St Maartens Cathedral. He also received payments for some masses and motets that he had composed, besides incidental gratuities in consideration of certain unspecified services. He is last mentioned in these accounts as *maître de chant* of St Maarten. He may also have worked in Aire-sur-la-Lys, the town celebrated in his motet *Aria precelsis urbs*. In 1559 he was employed as *maître de chant* at Notre Dame in Paris. One of his chansons in the Parisian style, *Venez, venez mon bel amy*, was intabulated for lute and published by Pierre Phalèse (i) (*Theatrum Musicum*, Leuven, 1563). Bracquet's works are extant only in anthologies.

WORKS

2 motets: 1556[4], *A-Wn*, *B-BRs*
7 chansons: 1556[17], 1556[18], 1557[9], 1557[12], *E-V*
1 Sp. song

JOSÉ QUITIN/HENRI VANHULST

Bradbury, William Batchelder (*b* York, ME, 6 Oct 1816; *d* Montclair, NJ, 7 Jan 1868). American church musician, composer, teacher and editor. He was born into a musical family with early opportunities to sing and to play various musical instruments. After his family moved to Boston in 1830 Bradbury studied music with Sumner Hill, attended Lowell Mason's Boston Academy of Music and sang in Mason's Boudoin Street Church Choir. During the 1830s he also gained experience as an organist and teacher, including 18 months as a teacher at singing schools in Machias, Maine. In 1840 Bradbury moved to New York, becoming music director of the First Baptist Church, Brooklyn. During 1841 he became music director of the Baptist Tabernacle of New York, began singing classes for children similar to those of Mason in Boston and published his first collection, *The Young Choir* (compiled with Thomas Hastings, with whom he also collaborated in four later collections). Annual festivals directed by Bradbury with as many as 1000 singing children led to the introduction of music in New York's public schools.

Bradbury spent two years (1847–9) in Europe, mostly in Leipzig, studying the piano with Wenzel, singing with Boehme, harmony with Hauptmann and composition with Moscheles. He wrote letters from Europe to the *New York Observer* and the *New York Evangelist*. Following his return to the USA Bradbury continued teaching music to children, composing and compiling numerous collections of music. His tune book *The Jubilee* (1858) reportedly sold over 200,000 copies. For Sunday schools Bradbury pioneered small collections with cheerful titles, such as *The Golden Chain* (1861) and *Fresh Laurels* (1868), whose sales were reported at 2,000,000 and 1,200,000 copies respectively. Bradbury's most popular Sunday school tune is his setting of *Jesus loves me*. He also composed music for such hymns as *Just as I am without one plea*, *Sweet hour of prayer* and *He leadeth me*, all of which remain in the repertory of most American evangelical churches. He composed several cantatas, the most popular which was *Esther* (1856). In 1854 Bradbury, his brother Edward G. Bradbury and a German piano maker formed the firm which became the Bradbury Piano Company. Bradbury's pianos received the endorsement of Theodore Thomas, William Mason, Gottschalk and others. Following Bradbury's death the firm was controlled by F.G. Smith and was later absorbed into the Knabe Piano Company.

WORKS

59 publications include at least 2 cants., 812 hymn tunes, 28 anthems, 10 motets, 9 glees, 78 secular songs, 5 qts, 10 patriotic choruses and songs, 13 sacred sentences, introits and responses

HARRY ESKEW

Brade, William [Wilhelm] (*b* 1560; *d* Hamburg, 26 Feb 1630). English string player and composer, active mainly in Germany and Denmark. He was about 30 when, like several other leading English instrumentalists of the time, he left his native country to earn his living in Germany. He was employed at the Brandenburg court until, from 3 November 1594 to 29 September 1596, he served in King Christian IV's court chapel in Copenhagen. He then returned to the Brandenburg court before undertaking another period of service at the Danish court, from 6 September 1599 to 24 February 1606; he visited Berlin in 1603. From 1606 to 1608 he was employed by the Brunswick court at Bückeburg. He also became known in Hamburg, for 16 dances by him appeared there in 1607 in an anthology published by the civic musicians Zacharias Füllsack and Christian Hildebrand, and he himself was a city musician at Hamburg from Easter 1608 to midsummer 1610. He then entered the service of Count Ernst III of Holstein-Schaumburg at Bückeburg, with an annual salary of 400 thalers and a clothing allowance. When he demanded an annual salary of 1000 thalers and threatened to return to Hamburg if he did not receive it, the count instructed his bailiff at Pinneberg, Holstein (in a letter of 16 April 1612), to advise the Hamburg authorities not to tolerate this 'mischievous, wanton fellow' in their city. Brade did, however, become a Hamburg musician again at Easter 1613, moreover as first violinist and thus leader of the entire body of instrumentalists. His annual salary of 52 thalers and six ells of clothing was no greater than that of the other players, but engagements to play for the sumptuous festivities of the well-to-do burghers were a source of considerable extra income. In the summer of 1615 he again left Hamburg and went first to Copenhagen. In 1618 he stayed at Halle, where he described himself as 'Kapellmeister by appointment to the Prince of Magdeburg'; and he held a similar appointment at Güstrow with the Duke of Mecklenburg. In 1619–20 he was in Berlin again, as court Kapellmeister to the Elector Johann Sigismund of Brandenburg, with an annual salary of 500 thalers, and from 23 August 1620 to 29 September 1622 he worked yet again at the Danish court. During this period he probably visited Gottorf, seat of Duke Friedrich III of Schleswig-Holstein. In 1622 he was appointed director of the Hofkapelle there and held the post until 1625. When the Thirty Years War spread to north-west Germany he took refuge in neutral Hamburg, where he spent his last years without holding any official post. When he died, eight funeral songs were published in his memory.

Brade was one of the most important and prolific composers working in Germany and Scandinavia in the early seventeenth century. He began by publishing elaborate five-part pavans and galliards in the English

idiom established by John Dowland, Peter Philips and others, though he experimented in his 1609 collection with suite-like sequences of pavan, galliard and courante or allemande, and included several italianate canzonas – the earliest by an Englishman. In the six-part 1614 collection he ostensibly returned to writing conventional pavan and galliard pairs, though most of them are dances in name only, and have the sharp contrasts of rhythm and character associated at the time with contrapuntal genres. The emphasis in the 1617 and 1621 collections is on functional dance music: the former contains a number of pieces derived from the repertory of English masque dances, while the latter mainly consists of light social dances in the French style, including settings of several popular courantes. Although he advertised his collections as being suitable for various types of instruments he increasingly used an energetic, homophonic idiom particularly suitable for violin consorts. His virtuosic 'coral', a set of divisions on a ground, is ostensibly the earliest solo violin piece by an Englishman, though it is only attributed to him in a late source, and part of it was published in 1684 attributed to the otherwise unknown 'Cornel[i]o Van Smelt'.

KURT STEPHENSON/PETER HOLMAN

Bradford. City in England. It is musically distinguished by a strong choral tradition and was an important centre of brass band activity. Its earlier prosperity was due to the wool trade and to rapid and varied development during the Industrial Revolution. In 1786 a three-manual organ by Donaldson of Newcastle upon Tyne was installed in the 15th-century parish church of St Peter as a necessary preliminary to performing Handel's oratorios. On 30 June 1802 Edward Miller of Doncaster conducted a festival of Handel's works in the church. Bradford singers as well as three instrumentalists took part in the first Yorkshire Musical Festival in 1823, by which time a large choral society – described as a 'Musical Friendly Society' – had been in existence for two years. This organization was formed from the choirs responsible for the performance of hymns and Handel choruses at Sunday School anniversaries. When various ameliorative factory acts were passed there was more opportunity for workers to participate in choral music, and by the mid-19th century choral music was flourishing; in addition to the (Old) Choral Society, formed from the Friendly Society in 1843, there were the Classical Harmonists, the Gentlemen's Glee Club, the Church Choral Society and a male-voice Choral Union. For Mendelssohn's *Elijah* singers were brought in from Leeds.

In 1815 Peter Wharton, a woollen manufacturer, formed a brass and reed band from among his employees. Five years later a group of players known by the old title of 'waits' was licensed to perform in Bradford. The John Foster & Son Black Dyke Mills Band, directly descended from Wharton's band, was formed in 1855; a century later it had become one of the best bands in the country. George Haddock, a skilled amateur violinist and collector of old instruments, was host to distinguished performers including J.D. Loder and Ole Bull at his country house, Newlay Hall. Later resident in Bradford, he participated in choral concerts, gave violin lessons and formed a string quartet that performed in the Mechanics' Institute and the old Exchange Buildings.

In 1846 wealthy German immigrants active in the wool trade and resident in Bradford (among them Delius's father, Julius) founded a Liedertafel similar to that already established in Manchester; its activity was short-lived, although it enjoyed a brief renascence in conjunction with the local Schiller-Verein under the direction of Emil Schlesinger. On 31 August 1853 the new St George's Hall (containing a fine Hill organ) was opened, filling the need for a building adequate for large-scale musical performances. The first significant Bradford music festival then took place, conducted by Costa, with a chorus of 220 and an orchestra of 85. Three years later there was a second festival, resulting in the formation of the Festival Choral Society; the first conductor was the chorus master William Jackson of Masham. The qualities of this chorus were so highly regarded that in 1858 they were invited to sing before the Royal Family at Buckingham Palace, and to participate in concerts at the Crystal Palace and St James's Hall. A year later the third and last Bradford music festival took place. The Festival Choir nevertheless continued to exist along with the Old Choral Society, and in 1860, supported by local instrumentalists, undertook a two-day Handel Festival in Durham Cathedral. Frederic Cliffe was accompanist to the Festival Choir from 1873 to 1876. With the advent of the 'prize singing' for glee singers, held in 1864 in the Temperance Hall, a competitive spirit was introduced into local choral activity. In 1875 a Glee Union and in 1882 a St Cecilia Society were founded. The feeling that large-scale performances were excellent in themselves gave rise to numerous oversized

choirs, none more so than the body estimated to have comprised 30,000 which, to the accompaniment of 5000 instrumentalists, took part in a ceremony in Peel Park in 1880. 500 Bradford singers were part of the chorus engaged for the Empire Exhibition at Wembley in 1925.

Concerts of a more general kind were organized by the Harmonic Society in 1818. Until the building of St George's Hall, concerts took place in the Court House, the Mechanics' Institute, or the hall of the Exchange Buildings (1828), where concerts of the short-lived Philharmonic Society (1831–7) were given. In 1847 an interest in chamber music was stimulated by the String Quartet Party, keenly promoted by the German community. However, as a result of the xenophobia rampant in 1914, the Germans were compelled to reduce their activity in local affairs, and Samuel Midgley, a local musician, took on the organization of chamber music concerts from 1911 until 1924. Six years later the Bradford Music Club, responsible for recitals in the Midland Hotel ballroom, was founded by Keith Douglas. Recitals take place from time to time in the university, and in 1976 a chamber orchestra, the Yorkshire Sinfonia, was formed under the violinist Manoug Parikian.

The opening of St George's Hall in 1853 raised hopes that there might be a significant provision of music for the poorer citizens. On 28 April 1858 the Bradford Amateur Musical Society, conducted by Schlesinger, gave a concert 'for the relief of the unemployed poor of Bradford'. The Hallé Orchestra from Manchester first played in Bradford in 1858 and its association with the town remained firm thereafter, to the disadvantage of those who attempted to establish an independent professional orchestra in Bradford (e.g. the failure of the Permanent Orchestra, originally formed from an earlier group of professional players that disbanded in 1892). When the Hallé Orchestra gave the first performance in Bradford of Delius's *Appalachia* in 1913, the *Musical Times* commented that 'it seemed a rather belated introduction of the composer to his native place'. Bradford, however, was well served when the Subscription Concerts were established in 1865; the committee included Julius Delius. In 1926 St George's Hall became a cinema and until its restoration and acquisition by the municipality in 1952–3 the Eastbrook Hall was used for concerts. Opera had a sporadic existence: companies from London visited the town in 1856 and 1861, and on 17 April 1876 the Carl Rosa Company gave the opening performance of the Prince's Theatre. On 6 February 1923 Beecham's British National Opera Company began its career with a performance of *Aida* in Bradford.

As a result of its cultivation in the early Sunday schools and in churches, music was given a prominent place in education. Religious music suitable for teaching purposes was available from publishers in other Yorkshire towns; Bradford contributed through the issue of *Lyra ecclesiastica* in 1844. Bradford was one of the first towns to provide elementary schools with pianos. In 1892 a national conference on the subject of school songs was held and in 1908 a syllabus for vocal music was issued by the education committee. 20 years later Charles Hooper, music adviser to the education committee, was promoting a wider view of school music by arranging for pupils in the city schools to have the opportunity for instrumental tuition. In 1919 St Peter's church was made the cathedral of a new diocese; Hooper became its organist in 1938. In 1966 the University of Bradford was founded; it supports a music fellowship. In partnership with the firm of J. Wood & Sons Ltd, the Bradford computing organ was developed there.

A week-long festival to honour the 50th anniversary of Delius's death was held in Bradford in May 1985, postponed from 1984 on account of the refurbishment of St George's Hall.

PERCY M. YOUNG

Brady, Tim(othy Wesley John) (*b* Montreal, 11 July 1956). Canadian composer and guitarist. He studied composition with Alan Crossman at Concordia University, Montreal (BFA 1978) and with W.T. McKinley at the New England Conservatory, Boston (MMus 1980), and guitar with Mick Goodrick in Boston (1978–80). Brady divided his early career in Toronto (1980–86) between composition and jazz performance; *Visions* (1984), recorded by the jazz cornet and flugelhorn player Kenny Wheeler with a string orchestra, signalled the convergence of these activities. Brady returned to Montreal in 1987 and in 1989 established his own chamber ensemble, Bradyworks, and began performing as a solo guitarist in electro-acoustic settings. In the latter capacity, which effectively supplanted his work in jazz, he has performed at new music and guitar events in Canada, the USA and Europe, and has recorded his six-movement *Strange Attractors* (1994–7) and several shorter pieces. His larger works attest to an inquisitive yet pragmatic mind. He has moved unapologetically between styles, from the free atonality of *Chamber Concerto* (1985) to the minimalism of *The Songline* (1989–91). Eventually he began to employ compositional techniques suggested simply by the material at hand (e.g. *Revolutionary Songs*, 1993–4).

MARK MILLER

Braein, Edvard Fliflet (*b* Kristiansund, 23 Aug 1924; *d* Oslo, 30 April 1976). Norwegian composer and conductor. His grandfather Christian Braein (1837–1912) was a composer and organist, and his father Edvard Braein (1887–1957) was an organist, composer, conductor and folk music collector: he published *Folkemusikk på Nordmöre* (Oslo, 1938). Braein studied the organ with Sandvold, harmony and counterpoint with Steenberg and composition with Cleve at the Oslo Conservatory (1942–5); he also had composition and conducting lessons with Brustad and Grüner-Hegge, and he was a composition pupil of Rivier at the Paris Conservatoire (1950–51). His music may be characterized as humorous, gay and tuneful.

PETER ANDREAS KJELDSBERG

Braeunich [Braeunig], **Johann Michael.** *See* BREUNICH, JOHANN MICHAEL.

Braga, (Antônio) Francisco (*b* Rio de Janeiro, 15 April 1868; *d* Rio de Janeiro, 14 March 1945). Brazilian composer. After attending the Asilo dos Meninos Desvalidos he studied the clarinet, harmony, counterpoint and fugue at the Imperial Conservatory. He came to the attention of the provisional republican government in 1889, when he entered a competition for a new national anthem. Although the piece finally adopted was that of Leopoldo Miguéz, Braga was awarded a scholarship for further study in Europe. He studied composition at the Paris Conservatoire (1890–94) with Massenet (an influence on the works he wrote at this time) and published several salon pieces in Paris. In 1896 he settled in Germany, becoming a Wagnerian in attitude and technique. It was in Germany that he wrote the symphonic poems *Marabá* and *Episódio sinfônico* (Rio de Janeiro, 1900), the former treating a Brazilian subject, but without reference to local music. During a short stay in Italy Braga completed his first opera, *Jupira*, which received its première at the Teatro Lírico on his return to Rio in 1900. He was very active as a conductor in Rio and São Paulo, and then took a position as professor of composition at the Instituto Nacional de Música (1902–38). For nearly 20 years he conducted the regular concerts of the Rio Sociedade de Concertos Sinfônicos, founded in 1912. As a composer he followed late Romantic European models, sometimes taking thematic material from national sources, as in the minuet *O contratador de diamantes* (Rio de Janeiro, 1906). Orchestral works form the backbone of his output, but he also left a considerable quantity of church music, chamber works and an unfinished opera, *Anita Garibaldi*; he is best remembered in Brazil as the composer of the patriotic *Hino à Bandeira* ('Hymn to the Flag').

GERARD BÉHAGUE

Braga, Gaetano (*b* Giulianova, nr Teramo, 9 June 1829; *d* Milan, 21 Nov 1907). Italian cellist and composer. He entered the Naples Conservatory in 1841 to study the cello with Ciandelli and composition with Mercadante, indicating talent in both disciplines. He left in 1852 with the title 'Maestrino di violoncello' and made many concert tours of Europe and the USA. In Vienna he was briefly a member of the Mayseder Quartet.

In 1853 his first opera, *Alina*, was produced at Naples. Over the next 20 years, during which he made Paris and London his principal homes, he composed another eight; though some were staged in Vienna, Paris and Lisbon as well as in Italy, they scarcely fulfilled his early promise, and none remained in the repertory. In 1868 La Scala turned down his *Ruy Blas* in favour of Marchetti's version; it remained unperformed and unpublished, colouring his decision to remain abroad for some 30 years, continuing a successful solo playing career besides composing. As a voice teacher Braga was much sought after; he coached Erminia Frezzolini, towards the end of her career, and Adelaide Borghi-Mamo, for whom he also wrote salon works. Braga's other compositions include orchestral, chamber and vocal music, fantasias on well-known operatic themes, two cello concertos and a method (1878), and salon pieces that enjoyed popularity during his lifetime. Still known is his *Leggenda valacca*, under the name 'La Serenata' or 'The Angel's Serenade', originally a song with cello or violin obbligato; despite describing it themselves as a 'cloying melody', in 1914 HMV listed no fewer than four recordings of it made by such prominent artists as Gluck and Zimbalist, and McCormack and Kreisler.

LYNDA MACGREGOR

Bragard, Roger (*b* Huy, 21 Nov 1903; *d* Etterbeek, 15 Dec 1985). Belgian musicologist. After concurrently studying Romantic philology at the University of Liège and the history of music at the Liège Conservatoire Royal, he obtained the doctorate in 1926 with a dissertation on the sources of the *De institutione musica* of Boethius. Together with André Pirro at the Sorbonne and with Amédié Gastoué and d'Indy at the Schola cantorum, he was instrumental in improving musicology in Paris. In 1934 he became vice-president of the Société Liégeoise de Musicologie. The following year he replaced Closson as professor of the history of music at the Brussels Conservatory and in 1939 became professor of the same subject at the Chapelle Musicale Reine Elisabeth. In 1957 he was elected director of the Brussels Musical Instruments Museum, which under his management gained a dynamic and international reputation. In 1965 he was appointed to teach the history of musical instruments, Latin texts of medieval musicology and music paleography at the Free University of Brussels. He became a member of the Belgian Royal Academy in 1980. Bragard's research was concerned with the music theorists Boethius and André de Pape, and also native musicians of the Low Countries, for example Lambert de Sayve of Liège. His study of manuscripts enabled him to rediscover in the Terry collection (*B-Lc*) the *Livre d'orgue* of Lambert Chaumont. While his *Histoire de la musique* is an invaluable reference book for all Belgian musicians, his most important work

is indisputably his monumental edition of the treatise *Speculum musicae* of Jacques de Liège.

MARIE CORNAZ

Braga Santos, (José Manuel) Joly. *See* SANTOS, JOLY BRAGA.

Bragg, Billy [Stephen William] (*b* Barking, 20 Dec 1957). English singer and songwriter. At school he listened to both rock and folk music, and in the 1970s was influenced by the punk band, the Clash. After playing with his own punk band Riff Raff and spending a brief spell in the army, he became a soloist, playing electric guitar and singing with a characteristic East End accent. He pioneered a distinctively English style that combined the raw energy of punk with the older tradition of political folk music. His first album *Life's a Riot with Spy vs Spy* (Utility, 1983) included 'A New England', which became a hit for Kirsty MacColl. His second album, *Brewing Up with Billy Bragg* (Go! Discs, 1984) was followed by the EP *Between the Wars* (Go! Discs, 1985) which showed how his staunchly left-wing views had been influenced by his campaign work during the British miners' strike. In 1986 he founded Red Wedge, a group of rock musicians who supported the Labour Party, and who aimed to involve British youth in politics. It was, however, most successful for its own rousing tours, in which Bragg was joined by other well-known musicians such as Paul Weller. Subsequent albums included *Talking with the Taxman about Poetry* (Go! Discs, 1986), *Workers Playtime* (Go! Discs, 1988) and *Don't Try This at Home* (1991) which included the thoughtful and witty 'Sexuality'. In 1998 he was invited to write new melodies for lyrics written by the American folksinger and activist, Woody Guthrie. The resulting album, *Mermaid Avenue* (1998), showed Bragg's widening musical interests, including American soul, country and rock, but retained his English sense of humour.

ROBIN DENSELOW

Braglia, Onorato. *See* VIGANÒ, ONORATO.

Braham, David (*b* nr London, 1834; *d* New York, 11 April 1905). American composer and conductor of English birth. In 1856 he went to New York, where he was an orchestral leader and composer for Pony Moore's Minstrels, at Tony Pastor's Opera House (from 1865) and at the Theatre Comique (from 1871). During these years he also wrote variety-show songs. In 1872 he set some lyrics for *The Mulligan Guard* by the playwright Edward Harrigan; the resulting march-song, sold to the publisher William A. Pond for only $50, became known worldwide and established the pair as a songwriting team. When Harrigan leased the Theatre Comique in 1876 Braham became his permanent orchestra leader.

Braham's music complemented Harrigan's scripts, which found humour in the mundane life of the urban ethnic neighbourhoods of New York. His deceptively simple harmonies, rhythms and melodies, his small details of variety and his long-term association with a single lyricist and a single publisher made him the best-known American theatre composer of the 1870s and 80s. He produced about 200 published songs for voice and piano. Braham's brother Josef as well as his sons Harry and George were also conductors and songwriters.

DEANE L. ROOT

Braham, John (*b* London, 20 March 1774; *d* London, 17 Feb 1856). English tenor and composer. His origins are obscure: both parents (his father is variously described as a German or Portuguese Jew) died when he was young. At the Great Synagogue in Duke's Place the boy's voice attracted the attention of the singer Leoni (Meyer Leon) and of the financier Abraham Goldsmid. Leoni, sometimes described as Braham's uncle, trained him and introduced him as a boy soprano at Covent Garden on 21 April 1787, when he sang Arne's The Soldier, Tir'd of War's Alarms, from *Artaxerxes*, and later at the Royalty Theatre, Wellclose Square. When Leoni went to the West Indies and Braham's voice broke, with Goldsmid's help he became a piano teacher. After his voice had settled he spent three years at Bath studying with Venanzio Rauzzini. He made some appearances there, and met Nancy Storace, a former pupil of Rauzzini. As a result he was engaged in 1796 to sing at Drury Lane in her brother Stephen's opera *Mahmoud*, left unfinished when Storace died that year, but completed by her. He appeared at the Italian Opera in Grétry's *Zémire et Azor*, also at the Three Choirs Festival at Gloucester, before leaving with Nancy Storace for a tour of the Continent. The couple gave concerts in Paris on the way to Italy. In 1798 they reached Florence, where Braham was heard at the Teatro della Pergola. Two years were spent at Milan, where they appeared together at La Scala in Nasolini's *Il trionfo di Clelia*, and where Braham emerged victorious from a contest with Mrs Billington. At Genoa he took lessons in composition. At Livorno he was befriended by Nelson. At Venice Cimarosa wrote *Artemisia* for him, but died in 1801 before completing it (the opera was performed, however, and Braham sang in it). At Trieste he appeared in Martín's *Una cosa rara*.

Braham's foreign success was noted in England. In Vienna he received offers to return to London, and did so by way of Hamburg. Towards the end of 1801 he made his adult début at Covent Garden in *The Chains of the Heart*, soon followed by *The Cabinet*; for this he wrote the music of his own part (see illustration), a procedure he followed for some years, and by which he became the

John Braham as Orlando in Thomas Dibdin's 'The Cabinet': etching by Robert Dighton (i), 1802

collaborator of various composers, including Bishop and Attwood. His ballads, duets and patriotic songs, especially *The Death of Nelson* in *The Americans* (1811), won great popularity. Between 1804 and 1806 he appeared in Italian opera at the King's Theatre, notably in the latter year as Sesto in *La clemenza di Tito*. Braham was a showman who gave his various audiences what they wanted, whether singing of high quality, stirring patriotic sentiment or florid, tasteless ornament. His voice was a magnificent, durable instrument, with a range of *A* to *e″*, the scale so even that the change to falsetto was said to be imperceptible. Scott declared him 'a beast of an actor but an angel of a singer'. His diction was generally agreed to be excellent. In a letter (1816) Mary Russell Mitford wrote:

> He is the only singer I have ever heard in my life who ever conveyed to my very unmusical ears any idea of the expression to which music is susceptible; no one else joins any sense to the sound. They may talk of music as married to immortal verse, but if it were not for Braham they would have been divorced long ago.

'Braham . . . can be two distinct singers', wrote Richard, Earl of Mount-Edgcumbe, who had reservations about him during the early part of his career, but on hearing him sing Handel during the 1834 Festival in Westminster Abbey was impressed not only by the undiminished brilliance of the voice but by the singer's 'most perfect taste and judgment'. He impressed Weber, who wrote the part of Sir Huon in *Oberon* (1826) for him (and at Braham's insistence wrote the aria, 'O, 'tis a glorious sight to see' to replace 'From boyhood trained', and added the Preghiera 'Ruler of this awful hour'); Braham had already sung Max in the first English adaptation of *Der Freischütz* at the Lyceum in 1824.

Braham's liaison with Storace lasted until 1816, when he married Frances Elizabeth Bolton. His worldly success was considerable. The Duke of Sussex was godfather to one of his sons. George IV, on a private occasion when his singing had been especially brilliant, was with difficulty restrained from knighting him on the spot. Braham made a large fortune, but his wife persuaded him to put money into two unsuccessful ventures, the purchase in 1831 of the Colosseum (an entertainment palace designed by Decimus Burton) in Regent's Park, and the building of St James's Theatre in 1836, and he was forced to resume his public career. As his voice had become lower, he appeared at Drury Lane in the baritone title roles of *William Tell* (1838) and *Don Giovanni* (1839). In 1840–42 he made a tour of North America with his son Charles that was only partly successful. In England he continued to sing at concerts in London and the provinces until his final public appearance at one of the popular Wednesday Concerts in March 1852, when he was well over 70. The Brahams had six children. Three sons, Charles, Hamilton and Augustus, became singers. The daughter, Frances, Countess Waldegrave, was a leading social and political hostess of the Victorian era. Braham's illegitimate son by Nancy Storace took holy orders and became a minor canon of Canterbury, in 1851 changing his name to Meadows.

RONALD CRICHTON

Brahe, May [Mary] **Hannah** (*b* Melbourne, 6 Nov 1884; *d* Sydney, 14 Aug 1956). Australian composer. She studied in Melbourne with Alicia Rebottaro and Mona McBurney. The majority of her 290 published songs were composed in England, where she lived from 1912 to 1939, and published by Allans, Enoch and Boosey. Her most enduringly popular songs (and two of her three musicals) were written in collaboration with Helen Taylor, notably *I Passed by Your Window* (1916) and *Bless This House* (1927–32). She wrote under nine pseudonyms, namely Stanley Dickson (*Thanks Be to God*), Mervyn Banks, Donald Crichton, Alison Dodd, Stanton Douglas, Eric Faulkner, Wilbur B. Fox, Henry Lovell and George Pointer. Her discography lists some 300 performances of 52 compositions, recorded by many great performers. It is however dominated by three songs: *I Passed by Your Window*, *Down Here*, and especially *Bless This House*, which continues to figure prominently in world record catalogues and appears to have attained a permanent place in the repertory. Brahe also wrote two operettas for children and four piano pieces.

MSS, published scores and other materials in *AUS-PYgm*

KAY DREYFUS

Brahms, Johannes (*b* Hamburg, 7 May 1833; *d* Vienna, 3 April 1897). German composer. The successor to Beethoven and Schubert in the larger forms of chamber and orchestral music, to Schubert and Schumann in the miniature forms of piano pieces and songs, and to the Renaissance and Baroque polyphonists in choral music, Brahms creatively synthesized the practices of three centuries with folk and dance idioms and with the language of mid- and late 19th-century art music. His works of controlled passion, deemed reactionary and epigonal by some, progressive by others, became well accepted in his lifetime.

1. FORMATIVE YEARS. Brahms was the second child and first son of Johanna Henrika Christiane Nissen (1789–1865) and Johann Jakob Brahms (1806–72). His mother, an intelligent and thrifty woman simply educated, was a skilled seamstress descended from a respectable bourgeois family. His father came from yeoman and artisan stock that originated in lower Saxony and resided in Holstein from the mid-18th century. A resourceful musician of modest talent, Johann Jakob learnt to play several instruments, including the flute, horn, violin and double bass, and in 1826 moved to the free Hanseatic port of Hamburg, where he earned his living playing in dance halls and taverns.

In 1830, as a condition for gaining citizenship (*Kleinbürger*), Brahms joined the local militia as a horn player; he also became a member of a sextet at the fashionable Alster Pavilion. Later he played the double bass and occasionally the flute in the Hamburg Philharmonie, obtaining a regular position as a bass player in 1864 through the influence of his son.

Brahms's parents were married in 1830. His elder sister, Elise (1831–92), experienced poor health throughout her life and was supported generously by Brahms, even after her marriage in 1871. The youngest child, Fritz (1835–86), became a musician; after attempting a career as a concert pianist and living in Venezuela, he settled in Hamburg as a music teacher. Although Brahms was not born into abject poverty, circumstances were precarious, because of Johann Jakob's inability to handle the family's hard-earned income sensibly. The family moved frequently, but their living quarters, though cramped and offering little privacy, were always in respectable working-class neighbourhoods. Tension over money, exacerbated by the great difference in the parents' ages, led Brahms's father to leave his elderly wife in 1864.

Despite personal difficulties, both parents were devoted to their children, a feeling reciprocated by Brahms. Both sons were sent to good private elementary and secondary schools, where their studies included history, mathematics, French, English and Latin. The young Brahms became a voracious reader, borrowing books and buying second-hand volumes. His well-used library of over 800 titles (preserved in the Gesellschaft der Musikfreunde, Vienna) including poetry, fiction, drama, history, art, philosophy, religion and travel, testifies to an abiding love of learning.

Brahms was given lessons on the piano, cello and horn (the family owned a piano and bought him a cello). From the age of seven he studied the piano with Otto Friedrich Willibald Cossel. Within a few years he was accepted for instruction in the piano and music theory, free of charge, by one of Hamburg's leading teachers, the pianist and composer Eduard Marxsen, who conveyed to his young pupil a love and knowledge of the music of Bach and the Viennese Classical composers.

Brahms's first documented performance was as a pianist in a chamber concert in 1843; he played an étude by Henri Herz and took part in a Mozart piano quartet and in Beethoven's Wind Quintet op.16. His first two solo recitals (in 1848 and 1849) included Bach and Beethoven, and fashionable bravura pieces. The second performance received a laudatory press notice.

To contribute to the family's income after leaving school, Brahms gave piano lessons, earned reasonable fees playing popular music at private gatherings and in *Schänken* (respectable working-class places for eating and entertainment), and accompanying in the theatre; he also made arrangements for brass bands and the Alster sextet, and for four-hand piano (some of the last, Anh.IV/6, were published, under the common pseudonym G.W. Marks, by Cranz in Hamburg). The influence of folk and popular music, apparent in his own compositions, had its roots in these activities. (The allegation that Brahms was sent as a boy to play the piano in sailors' bars has been called into question by the recent research of Kurt Hofmann; comments allegedly made by Brahms to Max Friedlaender and Siegfried Ochs provide a basis for this assertion, but testimony from those who knew the young Brahms and his family well speaks to the contrary; laws closely regulating these establishments forbade employment at such a young age.)

The enthusiasms of Brahms's formative years were the poetry of the German romantics, the novels of Jean Paul and E.T.A. Hoffmann, and the music of Bach and Beethoven. He immersed himself in the poetry of Eichendorff, Heine and Emanuel Geibel; he adopted as his pseudonym 'Johannes Kreisler, jun.', after the archetypal emotionally erratic young composer in Hoffmann's *Kater Murr* and *Fantasiestücke in Callots Manier* whose music is fragmentary, bizarre and painfully expressive; and he included in his first solo concerts a Bach fugue and Beethoven's 'Waldstein' Sonata, the latter a work that, together with the 'Hammerklavier' Sonata, informs the opening phrases of his C major Piano Sonata op.1 (1853). In the early 1850s Brahms assembled his favourite remarks on life, art and music by prominent poets, writers, philosophers and musicians in a series of chapbooks he entitled the *Schatzkästlein des jungen Kreislers*.

Brahms's love of folklore – including folk sayings, poetry, tales and music – began during these early years. By the late 1840s he had begun to compile manuscript collections of European folksongs; a notebook of German folk maxims dates from 1855. Linked to this interest was his liking for poems and tales from the age of chivalry. Over the years he acquired such old German books as *Die schöne Magelone, Faust* and *Siegfried*; Herder's collections of folksongs, Arnim and Brentano's *Des Knaben Wunderhorn*, and several volumes by J.L. and W.C. Grimm; the *Nibelungenlied* and the *Edda*; Kretzschmer and Zuccalmaglio's *Deutsche Volkslieder* (the source for the majority of the folklike tunes he arranged for choir

and as solo songs); collections of old English, Scottish and Danish ballads; and popular literature from around the world in German translation. The slow movement of the Piano Sonata in C op.1 was based on a German folksong recast by Brahms as a Minnelied; the comparable movement in the F♯ minor Piano Sonata op.2 (1852) was inspired by a genuine Minnelied poem by Count Kraft von Toggenburg.

When Hungarian political refugees on their way to the USA passed through Hamburg after the suppression of the revolutions of 1848, Brahms was exposed to the *style hongrois*, a blending of Hungarian musical gestures and gypsy performing style. His lifelong fascination with the irregular rhythms, triplet figures and use of rubato common to this style can perhaps be traced to his encounter at this time with the Hungarian expatriate violinist Ede Reményi. Another lasting impression was made by Joachim's performance of Beethoven's Violin Concerto with the Hamburg PO in 1848. The two other works that interested Brahms the most were Beethoven's Fifth Symphony and Mozart's *Don Giovanni*.

Although Brahms's first extant works (the song *Heimkehr* op.7 no.6 and the E♭ minor Scherzo for piano, op.4) date from 1851, he began composing several years earlier. Evidence exists of a Piano Sonata in G minor (mid-1840s), a Fantasia 'on a beloved waltz' for piano (by 1849), at least one piano trio and a 'Lied-Duet' for cello and piano (by 1851). During vacations in Winsen an der Luhe in 1847–8 he wrote several choral works and arranged folksongs for the men's choir he conducted. His musical confidante, Luise Japha, recalled many songs. By autumn 1853, in addition to the sonatas and songs that were his first published works, his portfolio included a string quartet in B minor and a violin sonata in A minor. All these youthful efforts fell victim to Brahms's intense self-scrutiny, which he continued to exercise throughout his life. As late as 1880 he destroyed the first movement of a newly composed piano trio in E♭ after showing it to friends.

Brahms as a youth in Hamburg was recalled by acquaintances as shy and reserved, thoughtful and self-effacing; but he was candid and already very much his own person. Slender, with delicate features, long fair hair, radiant blue eyes and a high voice, he projected a somewhat androgynous image. One also discerns a dual nature in his early works: sensitive settings of poems about the problems of young maidens co-exist with highly energetic instrumental allegros and scherzos suggestive of the athletic prowess of the teenage boy.

2. NEW PATHS. 1853 marked a turning point in Brahms's personal and professional life. On returning from the USA, Reményi resumed his collaboration with Brahms with a recital in January and a concert tour in northern Germany from April to June. Among other places, they visited Göttingen, where Brahms began a lifelong friendship with Joseph Joachim, and Weimar, where he met Liszt, who played the Scherzo op.4 at sight. Brahms's stay at the Altenburg, however, was brief (12–24 June). 'I soon discovered that I was of no use there', he later told Richard Heuberger; 'this was just at [Liszt's] most successful time when he was writing the "symphonic poems" and all that stuff, and soon it all came to horrify me'. Brahms considered himself a 'musician of the future', and his music embodied much that was progressive, but he viewed the path to the future differently.

1. *Johannes Brahms, c1853*

Brahms returned to Göttingen to spend the summer with Joachim, who recognized his genius and encouraged him to meet other prominent musicians, especially Schumann. At the end of August, Brahms departed on a long walking tour in the Rhineland, making the acquaintance of several musicians (including Wasielewski, Ferdinand Hiller and Franz Wüllner). At the country estate of the financier Deichmann in Mehlem he studied Schumann's music, which a few years earlier he had dismissed, and on 30 September he presented himself at the home of Robert and Clara Schumann in Düsseldorf.

To the Schumanns it seemed as if Brahms had 'sprung like Minerva fully armed from the head of the son of Cronus', as Robert observed in his laudatory essay on Brahms, 'Neue Bahnen' (*NZM*, xxxviii/Oct, 1853, pp.185–6). The 'young eagle' showed the Schumanns pieces for piano (including the op.4 Scherzo, the andantes from the sonata op.5 and the sonatas opp.1 and 2), duos for violin and piano, piano trios, string quartets and numerous songs, 'every work so different from the others that it seemed to stream from its own individual source'. Brahms's playing of his compositions was on a grand scale; Schumann remarked how the piano became 'an orchestra of lamenting and loudly jubilant voices', making his sonatas sound like 'veiled symphonies'.

In October Brahms completed the Piano Sonata in F minor op.5 and contributed the scherzo WoO2 to the 'F–A–E' violin sonata written with Schumann and Albert Dietrich for Joachim. During the next two months he went twice to Leipzig, preceded by enthusiastic letters of recommendation from Schumann, to present his compositions to publishers and oversee their printing; while there he performed the sonatas opp.1 and 4 in public and met Julius Otto Grimm, Ferdinand David, Moscheles, Berlioz and, again, Liszt. When he returned to Hamburg for Christmas he was able to report the acceptance of his

first four opuses by Breitkopf & Härtel and the next two by Bartolf Senff.

The new year found Brahms at work on the B major Piano Trio op.8. In March, on learning of Schumann's nervous breakdown, suicide attempt and removal to a sanatorium at Endenich, Brahms returned to Düsseldorf to assist Clara Schumann with the care of her family, the running of the household and the organization of her husband's library and business dealings concerning his music. He remained there throughout Schumann's protracted illness, attending to matters in Düsseldorf while she resumed her career as a concert pianist and reporting to her from Endenich on the condition of her husband, whom she was not allowed to visit. At the same time he conceived a strong romantic passion for her, despite the great difference in their ages. To him Clara Schumann, as wife, mother and musician, represented all that was ideal in womanhood. In June 1854 he dedicated to her his newly composed Variations on a Theme by Robert Schumann op.9; the theme, from *Bunte Blätter* op.99, is joined by variations that draw upon other works by Schumann (as well as a melody by Clara) and are initialled in Brahms's manuscript variously by the calm, introspective 'Brahms' and the mercurial 'Kreisler'. For her part, Clara drew sustenance from Brahms's creativity, which filled a void in her life after the sudden end of her husband's activity as a composer. On a personal level, though feeling a certain proprietary right to his affection, she viewed him much as a mother would a devoted older son.

After the death of Schumann in July 1856, Clara and Brahms took a trip together along the Rhine and into Switzerland during which they no doubt discussed their future and after which they went their separate ways, henceforth to remain the closest of friends, despite occasional intense disagreements. Brahms shared his joys and sorrows with her, and sought but did not always heed her assessments of his new compositions. He also never forgot the debt he owed to Robert Schumann, and in the roles of composer, performer, arranger and editor he strove to perpetuate the legacy of the man who had championed his music.

The 'two natures' of Brahms's personality, revealed musically in the Schumann Variations and acknowledged by Brahms in a letter to Clara Schumann in August 1854, were described by Joachim as 'eine kindlich, genial, vorwiegend ... eine dämonische auflauernde'. This duality is also evident in the contrasts between the demonic scherzos and the gentler trios of the early piano sonatas and the Ballades op.10, composed at this time. Two letters from 1854 offer vivid accounts of Brahms the self-styled, now confident young Romantic who let nothing interfere with his art. In April, Julius Otto Grimm wrote to Joachim:

> Br— Kr—. . . is full of crazy ideas – as the Artist-Genius of Düsseldorf he has painted his apartment full of the most beautiful frescoes in the manner of Callot, i.e., all kinds of grotesque visages and faces of Madonnas.

(The reference is to the engravings of Jacques Callot and E.T.A. Hoffmann's *Fantasiestücke in Callots Manier*.) The following October Joachim characterized Brahms as

> egoism incarnate, *without himself being aware of it*. He bubbles over in his cheery way with exuberant thoughtlessness . . . the things that do not arouse *his* enthusiasm, or that do not fit in with *his* experience, or even with *his* mood, are callously thrust aside . . . He will not make the smallest sacrifice of his intellectual inclinations – he will not play in public because of his contempt for the public, and because it irks him – although he plays divinely.

Brahms's withdrawal from the broader stage of German musical life in the later 1850s was nearly complete. After the publication of his Ballades op.10 in February 1856, he released no other works until the end of 1860. In the 1855–6 season, in need of money, he resumed concert activities, playing solo and chamber works and for the first time with orchestra, in Mozart's Piano Concerto K466 and Beethoven's fourth and fifth Concertos. But during the rest of the decade his appearances were sporadic. In autumn 1857 he accepted a well-paid, three-month position as piano teacher, pianist and conductor of the amateur choral society at the court in Detmold, a post to which he returned the following two autumns. In 1859 he founded an amateur women's choir in Hamburg which he conducted for the next three years. Otherwise the mid-and late 1850s were a time of intense self-scrutiny and musical study. Schumann's mental deterioration caused Brahms to ponder the relationship between creativity and insanity. His romantic involvement with Clara Schumann and in autumn 1858, with Agathe von Siebold (a professor's daughter in Göttingen), forced him, at least to his own way of thinking, to choose (as his hero Kreisler had) between the married life of 'die guten Leute' and the existence of 'echte Musikanten', who draw inspiration from the veneration of idealized women but must forgo normal intimate relations. During the summer of 1855, with little to show from recent efforts at composition, Brahms wrote to Clara Schumann that he felt he no longer knew 'at all how one composes, how one creates'. But an exchange of polyphonic exercises and compositions with Joachim soon sharpened his contrapuntal skills; renewed study of early music and folksong for his own edification and in conjunction with his conducting duties grounded his art in tradition and enriched his melodic, rhythmic and textural vocabularies; and work on his *Sturm und Drang* Piano Concerto in D minor op.15 and the two neo-classical Serenades opp.11 and 16 (written for Detmold) initiated him into the art of orchestration.

Products of Brahms's studies of counterpoint and early music included Baroque-style dance pieces, preludes and fugues for organ, and neo-Renaissance and neo-Baroque choral works (motets and a canonic mass); the variation set in the B♭ String Sextet op.18 (1860), which extends the tradition of the folia, likewise testifies to his knowledge and love of earlier styles. Inspired by Agathe von Siebold, Brahms composed a number of songs and duets in 1858; for his women's choir in Hamburg he wrote many original works and arrangements of folksongs. The Variations on an Original Theme op.21 no.1 and on a Hungarian melody op.21 no.2 (both for solo piano) and the passionate opening movement of the Piano Quartet in C minor op.60 also come from this decade. In July 1862 Brahms sent Clara Schumann the prototype of what became the first movement of his C minor Symphony op.68 (at that time without a slow introduction).

The composition that occupied Brahms most during the 1850s was the D minor Piano Concerto. The opening of the first movement was written in spring 1854 as part of the opening Allegro of a two-piano sonata. Realizing that its gestural language exceeded the capabilities of two pianos, he attempted to orchestrate the movement during the summer, with the assistance of Grimm, Joachim and

Marxsen. It was not until February 1855 that he thought to recast the symphonic movement as a concerto, and not until autumn 1856 that recomposition was completed. The Rondo-Finale was finished soon after, and the Adagio, which Brahms described as a 'gentle portrait' of Clara Schumann and whose opening melody he underlaid in his manuscripts with the text 'Benedictus, qui venit, in nomine Domini!' (from over the entrance to the monastery in Hoffmann's *Kater Murr*, where Kreisler finally found peace), was written late in December. But matters of form and orchestration were still being settled even after the first public performances at Hanover and Leipzig in January 1859. After the investment of so much energy, it was a keen disappointment for Brahms that the concerto's première in the Leipzig Gewandhaus was greeted with hostility by both audience and critics. 'The work ... cannot give pleasure', observed Edward Bernsdorf, the conservative critic of *Signale für die musikalische Welt*; 'save its serious intention, it has nothing to offer but waste, barren dreariness truly disconsolate ... one must ... swallow a dessert of the shrillest dissonances and most unpleasant sounds'. Although Brahms tried to appear philosophical about the fiasco, a note of pain sounded forth in his letter to Joachim:

> my concerto here was a brilliant and decided – failure .... The first movement and the second were heard without a sign. At the end three hands attempted to fall slowly one upon the other, at which point a quite audible hissing from all sides forbade such demonstrations. ... In spite of all this, the concerto will please some day, when I have improved its construction. ... I believe it is the best thing that could have happened to me; it makes one pull one's thoughts together and raises one's courage. ... But surely the hissing was too much?

Instead of establishing him as a composer of the first rank, the Leipzig performance cast a pall over his career, jeopardizing prospects with publishers. When Breitkopf & Härtel rejected a group of works in 1860, including the piano concerto, Brahms turned to the small Swiss publishing house of J. Rieter-Biedermann, which accepted the concerto and subsequently published many songs and choral works, including the *German Requiem*, and to the German firm N. Simrock, which eventually became Brahms's major publisher.

During the 1850s Brahms's opposition to the literary-orientated music of Liszt and his circle grew. In March 1860, enraged by an editorial in the *Neue Zeitschrift für Musik* claiming that all serious musicians of the day subscribed to the cause of the New German School, Brahms collaborated with Joachim to draft a manifesto deploring the 'Music of the Future' (i.e. that of Liszt, but not Berlioz and Wagner) as running 'contrary to the inner spirit of music', that is, to the need of music to progress according to its own logic. Prematurely leaked to the press while still being circulated for the signatures of other like-minded musicians, the document, published over the names of only Brahms, Joachim, Grimm and Bernhard Scholz, was soundly ridiculed and became an embarrassment to Brahms, who never again expressed his position on artistic matters in such a public manner.

3. First maturity. During the first half of the 1860s Brahms produced an illustrious series of chamber works (two string sextets, a piano quintet, two piano quartets, a horn trio and a cello sonata) and piano pieces (variations on themes by Schumann, Handel and Paganini), as well as numerous songs and solo vocal ensembles (including the Platen and Daumer lieder op. 32 and most of the *Magelone* Romances op.33), and, on the lighter side, dance music (the Waltzes op.39). Brahms's study of his musical heritage now encompassed both the larger forms and the short popular dances of Schubert. In instrumental music the imaginative Lisztian thematic transformations that had animated and unified the highly Romantic early piano sonatas were replaced by a balance of emotional and intellectual elements achieved through motivic and thematic projection (termed 'developing variation' by Schoenberg); bold tonal shifts and large climaxes are reminiscent of Beethoven, but long, evolving melodies and major-minor inflections recall Schubert; ländler rhythms and folkmusic drones at times introduce a popular element. The style Brahms developed during this period is in evidence for the rest of his career.

In autumn 1862 Brahms made his first trip to Vienna, where, with introductions in hand from Clara Schumann and other friends, he was rapidly accepted into the foremost musical circles and performed a series of solo and chamber concerts. His repertory included two works with special appeal for his Viennese audiences (both completed in 1861): the Handel Variations op.24, with its evocations of variation sets by Bach and Beethoven, and the G minor Piano Quartet op.25, with its rondo-finale imitating the cimbalom and fiddle playing of the gypsies. Among new acquaintances were the pianist Julius Epstein, the violinist Joseph Hellmesberger (with whose string quartet Brahms performed his two piano quartets), Otto Dessoff, director of the Philharmonic Concerts, the piano maker J.B. Streicher, and the pianist Carl Tausig, with whom Brahms shared a special interest in the music of Wagner.

Brahms had long coveted the conductorship of the Hamburg Philharmonische Konzertgesellschaft, but in autumn 1862 he was passed over in favour of the celebrated baritone Julius Stockhausen (the post eluded him again in 1867). In spring 1863 he accepted the directorship of the Vienna Singakademie, which he conducted for the 1863–4 season, presenting *a cappella* Renaissance works; a Bach cantata, portions of another and the *Christmas Oratorio*; and works by Beethoven, Mendelssohn and Schumann, and pieces of his own.

In the autumn of 1862 Brahms met Wagner, who listened appreciatively to his playing of the Handel Variations. Much has been written about the differences between these two strong musical personalities; from the late 1860s Wagner wrote a number of highly critical remarks about Brahms's music. Critics such as Eduard Hanslick, having little sympathy for Wagner and his music, adopted the banner of Brahms as their standard. For his part, Brahms considered himself a supporter of Wagner, telling friends that he understood Wagner's music better than anyone. He even helped the avid Wagnerites Carl Tausig and Peter Cornelius prepare performing materials for Wagner's concerts in Vienna during the 1862–3 season; in 1870 he attended the first productions of *Das Rheingold* and *Die Walküre* in Munich. Although Brahms possessed a keen dramatic instinct and ventured to compose such works as the cantata *Rinaldo* op.50 and the Alto Rhapsody op.53, he never found a libretto to his liking.

During the summer of 1864, while on vacation in Baden-Baden, Brahms became friendly with the conductor Hermann Levi, who remained one of his closest musical confidants into the mid-1870s, when their friendship

foundered over personal and artistic differences. He also renewed his acquaintance with the engraver and photographer Julius Allgeyer. Allgeyer introduced him to the work of Anselm Feuerbach, whose coolly classical paintings were among Brahms's favourites. For five more summers during the years 1865–72 Brahms returned to Baden-Baden, taking rooms in the village of Lichtenthal, a short distance from the small house occupied by Clara Schumann and her family, in order to compose amidst the natural beauty of the Black Forest. In future summers he retreated to country settings in Germany, Switzerland and Austria for the same purpose.

Although Brahms continued to spend as much time as possible in Vienna, financial problems prompted him to undertake lengthy concert tours in Germany, Switzerland, Austria, Hungary, Denmark and the Netherlands during the years 1865–9. His repertory was extensive, ranging from Bach to his own compositions, including works by Haydn, Mozart, Beethoven, Schubert and Schumann, and many lesser-known pieces by Scarlatti, Couperin, Rameau, Gluck, Bach's sons and Clementi. In addition to solo concerts, he performed frequently with Joachim and, with Stockhausen, pioneered the full presentation of the song cycles of Beethoven, Schubert and Schumann.

In February 1865 Brahms was profoundly shaken by the death of his mother. Soon afterwards he worked on the *German Requiem* op.45, completing six movements by the end of the summer of 1866 (there is no definite evidence that the work was conceived in the 1850s after the death of Schumann or that the texts of these movements were assembled in 1861). After a performance of the first three movements in Vienna to mixed reactions on 1 December 1867 and the première of the six movements in Bremen to tumultuous applause on Good Friday 1868, a seventh movement, the soprano solo 'Ihr habt nun Traurigkeit', was added and the complete work received its première at the Leipzig Gewandhaus on 18 February 1869. The critical acclaim that it received and its progress through Germany, Switzerland, the Netherlands, England and even as far as Russia established Brahms as a composer of major significance.

2. *Johannes Brahms with Julius Allgeyer and Hermann Levi*

In 1868 Brahms completed *Rinaldo* op.50, a lengthy cantata for tenor, male chorus and orchestra (on a text by Goethe) that he had begun in 1863. Other works for choir and orchestra followed: the Alto Rhapsody op.53 (1869, also Goethe), a personal response to the marriage of Julie Schumann, for whom Brahms had secretly harboured an affection; the *Schicksalslied* op.54 (completed 1871, Hölderlin); the *Triumphlied* op.55 (1870–71, biblical texts), an expression of strong patriotic feelings after the German victory in the Franco-Prussian War and dedicated to Emperor Wilhelm I; and later *Nänie* op.82 (completed 1881, Schiller) and *Gesang der Parzen* op.89 (1882, Goethe), the former a response to the premature death of Feuerbach.

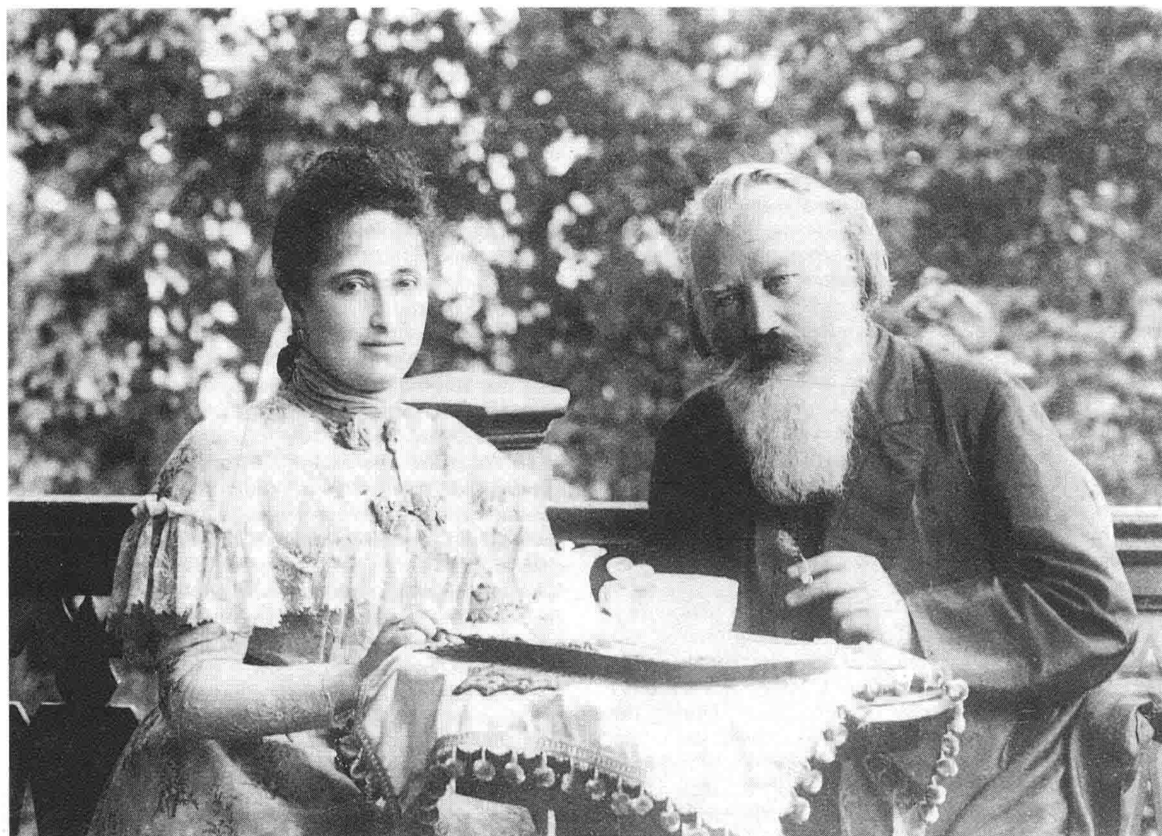
Brahms also continued to work in the intimate genres. In 1868 he supplemented the songs gathering in his portfolio since at least 1856 to issue five collections totalling 25 songs (opp.43, 46–9). The *Liebeslieder Walzer* op.52 (1869, on lyrics by Georg Friedrich Daumer, one of Brahms's favourite poets) express the joyous expectation of love fulfilled; the *Lieder und Gesänge* op.57 (1871, also on poems by Daumer) is perhaps his most sensual collection of songs. Such pieces as the piano waltzes op.39, the *Liebeslieder Walzer*, the first two books of Hungarian Dances, and the *Wiegenlied* op.49 no.4 endeared Brahms to music-making amateurs.

During the 1860s Brahms's affections were captured by several young women. As well as his infatuation with Julie Schumann in 1869, he had almost proposed to Ottilie Hauer, a Viennese girl with whom he spent many hours in 1863 reading Schubert's songs and his own; and his attraction to Elisabet Stockhausen (later married to the composer Heinrich von Herzogenberg) was so strong that he withdrew from giving her piano lessons. In the end, though, he maintained his personal freedom, in the service of his musical aspirations. His father's case was quite different: a little over a year after his wife's death, he married Caroline Schnack, a widow 18 years his junior. Brahms appreciated her care of his father and respected her as he had his own mother, and in later years provided her with regular financial assistance.

4. At the summit. In November 1872 Brahms conducted his first programme as director of the concerts of the Gesellschaft der Musikfreunde in Vienna, a position he retained for three years. He had long restrained himself from accepting any sort of official position, in order to protect his freedom to compose; his work in Detmold had left most of his year free, and his tenure with the Singakademie had lasted only one year. In 1870 he had declined nomination as conductor of the Gesellschaft orchestra, but two years later, after the death of his father and as he approached his 40th birthday, he accepted the directorship of both orchestra and choir. Earlier that year he moved into lodgings at Karlsgasse 4, near the Musikverein, where he remained for the rest of his life, living first in two modest rooms, later in three.

As music director Brahms reorganized the Gesellschaft orchestra, replacing amateurs with professionals from the court opera orchestra, and demanded extra rehearsal time. He brought to his Viennese audiences a rich repertory of 'early music': works by J.G. Ahle, Eccard, Isaac and Jacob Handl; four Bach cantatas (BWV4, 8, 34 and 50) and the *St Matthew Passion*; and Handel's 'Dettingen' *Te Deum*, the Organ Concerto in D minor,. the ode *Alexander's Feast* and the oratorios *Saul*, *Alexander's Feast* and *Solomon*. Also presented were symphonies by Haydn, Mozart's oratorio *Davidde penitente*, Cherubini's C minor Requiem, Beethoven's Choral Fantasy and *Missa solemnis*, and works by Mendelssohn, Schubert, Ferdinand Hiller, Volkmann and Schumann (*Des Sängers Fluch*, music to *Manfred*, Fantasy for violin) and by Brahms's contemporaries Bruch (*Odysseus*), Dietrich, Goldmark, Joachim and Rheinberger. Of his own works he conducted the *German Requiem*, the Alto Rhapsody, the *Schicksalslied* and the *Triumphlied*. The critics commented on the seriousness of his programmes and the choir initially resisted his repertory. However, his departure from the post was amicable and he remained on good terms with the Musikverein for the rest of his life.

For many years Brahms had struggled to master two genres dominated by Beethoven: the string quartet and the symphony. In the summer of 1873 he completed the first two string quartets (op.51, in C minor and A minor) that he considered worthy of publication. During the winter of 1873–4 he added the final movements to the Piano Quartet in C minor op.60, which he had begun in the mid-1850s and continued to polish through 1875. After three serious chamber works in minor keys the joyous and bucolic String Quartet in B♭ op.67, written while he was on vacation in Ziegelhausen near Heidelberg in 1875, provided a welcome contrast.



Brahms resumed the composition of purely orchestral music in 1873 with the Variations on a Theme by Haydn op.56, working in the extended form with which he felt most comfortable (the piece was first drafted in its version for two pianos). No less than a 'grand symphony' was now expected of him, and in summer 1876 he brought to completion the Symphony no.1 in C minor op.68, which had occupied him at least since 1862. Such was his striving for perfection that even after it had been performed for an entire season, to ever-mounting acclaim, he recast the slow movement before allowing publication.

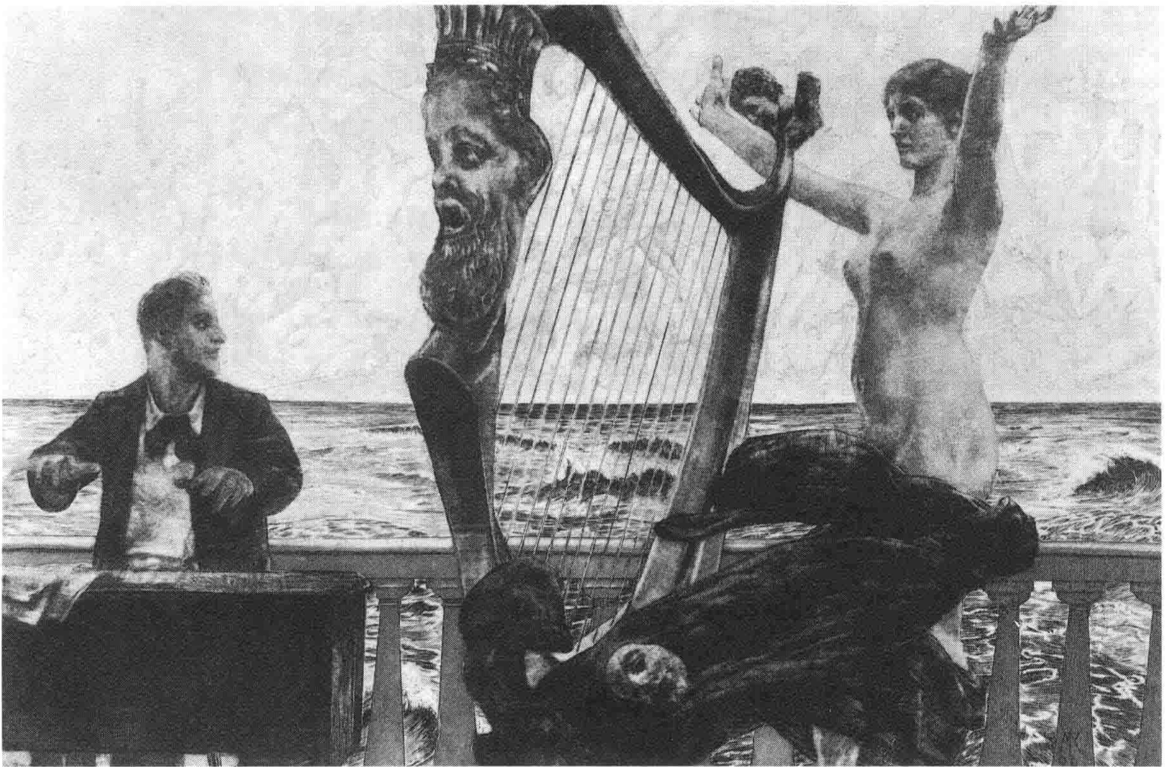
The Symphony no.2 in D op.73 soon followed (1877), its pastoral mood standing in clear distinction to the dark ruminations and mighty forces of its predecessor. Another pair of contrasting orchestral works date from the summer of 1880: the jocular Academic Festival Overture op.80, based on student songs (for the occasion of the conferral on Brahms of an honorary doctorate by the University of Breslau), and the Tragic Overture op.81, whose completion might have been prompted by the death of the painter Feuerbach in January (although, from the handwriting, sketches can be dated as pre-1872). The summers of 1883–5 were also devoted to orchestral composition, yielding Symphony no.3 in F op.90 (1883) and no.4 in E minor op.98 (1885). Three concertos complete Brahms's mature orchestral works: the Violin Concerto in D op.77 (1878), composed for and in close collaboration with Joachim; the Second Piano Concerto in B♭ op.83 (1881), dedicated to Marxsen; and the Double Concerto for violin and cello op.102 (1887), written for Joachim and Robert Hausmann.

While completing the Violin Concerto Brahms began work on the Violin Sonata no.1 in G op.78, which he finished during the following summer. An illustrious series of six chamber works followed: Piano Trio no.2 in C op.87 and String Quintet no.1 in F op.88 (both completed in 1882); the Cello Sonata no.2 in F op.99, the Violin Sonata no.2 in A op.100, and the Piano Trio no.3 in C minor op.101 (all 1886); the Violin Sonata no.3 in D minor op.108 (1886–8); and the String Quintet no.2 in G op.111 major (1890). During the 1870s and 80s Brahms added to the works for solo piano the eight *Klavierstücke* op.76 (1871 and 1878) and the two Rhapsodies op.79 (1879), and continued to compose choral music (both with and without piano accompaniment), quartets and duos for solo voices with piano (most notably the *Neue Liebeslieder Walzer* op.65 and *Zigeunerlieder* op.103), and solo lieder.

1874 marked the resumption of Brahms's travels as concert pianist and the beginning of invitations as guest conductor. The works performed were most often his own. Compositions written in spring and summer would receive trial performances the following autumn and winter – only then were they sent to the publisher. Over the next two decades Brahms appeared in all the major cities in Germany, the Netherlands and Switzerland, and in Budapest, Prague and Kraków. From 1881 he developed a special relationship with the court orchestra at Meiningen, first under Bülow, later under Fritz Steinbach. This highly trained ensemble of 49 players gave Brahms an opportunity to hear *Nänie*, the Second Piano Concerto and the Fourth Symphony before their official premières. Brahms was welcomed as an honoured guest by Duke Georg III and his wife, and was presented with the Meiningen Commander's Cross and Grand Cross, yet court etiquette was waived so that this man of the people could reside there as simply and agreeably as possible. He expressed his gratitude by dedicating the *Gesang der Parzen* op.89 to the duke. In 1882 Brahms toured with Bülow and the Meiningen orchestra, presenting his two piano concertos and the Academic Festival Overture to audiences in Berlin, Kiel and Hamburg (with Brahms and Bülow sharing soloist duties); subsequent tours took them to Budapest, Graz and Vienna in 1884 (with the piano concertos and the Third Symphony) and to the Rhineland and the Netherlands in 1885 (with the Fourth Symphony). Brahms's performing schedule was at times extremely intense during the 1880s; in the 1881–2 season, for example, he played his Second Piano Concerto 22 times in as many cities during a three-month period.

As his fame spread across the Continent and on to England and the USA, Brahms was repeatedly honoured by his peers and aristocratic admirers. In addition to the awards from Breslau and Meiningen, he received the Bavarian Order of Maximilian for science and art (1873, with Wagner), the Gold Medal of the Philharmonic Society in London (1877), a knighthood in the Prussian Order 'Pour le Mérite' for Science and Art (1887), the honorary presidency of the Tonkünstlerverein in Vienna (1886), the Knight's Cross of the Imperial Austrian Order of Leopold (1889), the freedom of Hamburg (1889), honorary membership of the Beethoven-Haus in Bonn (1889), and the Austrian Order for Art and Science (1895). In 1876 he declined an honorary doctorate from the University of Cambridge because he was unwilling to travel to England.

3. Brahms with Adele Strauss



With the income from concert appearances and sizable honoraria from the sale of compositions Brahms had more than enough money to support his modest style of life, and he amassed a substantial fortune that, in later years, he allowed his publisher Simrock to invest for him. Since there was no longer any need for an official position, he turned down offers, including that of music director in Düsseldorf (1876) and head of the Cologne Conservatory (1884). Brahms was generous with his money, helping his family and aspiring young musicians, and underwriting scholarly projects of Gustav Nottebohm and Friedrich Chrysander. His most extravagant expenditure on himself was for eight lengthy trips to Italy between 1878 and 1893 in the company of various friends and colleagues. Otherwise he lived frugally, taking his main meal at the favourite gathering place for Vienna's musicians, the inn Zum roten Igel.

Young composers with whose music Brahms felt empathy also received assistance. As an adjudicator, he recommended that Dvořák should be awarded the Austrian State Stipendium for several years, encouraged Simrock to publish his works, offered financial support to him and his family, and even helped with the proofreading of his scores. He also recommended to Simrock the music of Walter Rabl and Gustav Jenner, the latter Brahms's only composition pupil (1889–95).

Brahms's large circle of friends included musicians, writers, artists, scholars and music-loving members of the professional and wealthy business classes. In the years 1874–92 Elisabet von Herzogenberg in Leipzig emerged as one of Brahms's most trusted musical advisers, who – as well as Clara Schumann and Theodor Billroth – offered him sensitive and frank assessments of his works; he dedicated the Rhapsodies op.79 to her. Brahms's relationships with the composers Karl Goldmark and Johann Strauss the younger were always cordial; he travelled in Italy with Goldmark and spent vacations in Bad Ischl near the Strausses. In the 1870s the baritone George Henschel was often in close contact with Brahms; in later years the young composer Richard Heuberger was a regular member of Brahms's Vienna circle. Both friends wrote important memoirs.

With the poet Klaus Groth, several of whose lyrics he set to music, Brahms could share an enjoyment of the Low German dialect of their common ancestral Ditmarsch homeland; with the Swiss poet and writer Josef Victor Widmann, who unsuccessfully tried to supply Brahms with an opera libretto, he could enter into discussions of literature, current events, scientific progress and religion, and enjoy travelling in Italy. The German poet and novelist Paul Heyse (who was later a Nobel prizewinner) and the Swiss writer Gottfried Keller were also friends of Brahms, who set their poems.

In addition to Feuerbach, the artists associated with Brahms included the celebrated Berlin painter and illustrator Adolf Menzel, the psychological interpreter of classical mythology Arnold Böcklin, and the painter, engraver and sculptor Max Klinger, who illustrated title-pages for several of Brahms's works and was inspired by his music to create a series of etchings, engravings and lithographs entitled *Brahms-Phantasie* (1894; fig.4). The Bach biographer Philipp Spitta, the Handel scholar Friedrich

4. 'Evocation' by Max Klinger, from the 'Brahms-Phantasie' cycle: etching, engraving, aquatint and mezzotint, 1894 (Kupferstichkabinett, Altes Museum, Berlin)

Chrysander, the Beethoven specialist Gustav Nottebohm, and the music archivists C.F. Pohl (biographer of Haydn) and Eusebius Mandyczewski (editor of Haydn and Schubert) were all friends of Brahms, who took an interest in their research. The professional men in Brahms's circle included the surgeon Theodor Billroth and the physiologist T.W. Engelmann, both capable amateur musicians (and the dedicatees of the String Quartets opp.51 and 67 respectively).

From the business and industrial community Brahms had the friendship and support of Richard Fellinger (of Siemens Brothers), whose wife, Maria, sculpted and photographed Brahms; the industrialist Arthur Faber, who with his wife, Bertha (a special friend of Brahms's since the days of his women's choir in Hamburg), cared for Brahms like a family member; and the steel magnate Karl Wittgenstein, whose musical sisters sang in Brahms's Singakademie and whose daughter Margaret Stonborough amassed the largest private collection of Brahms manuscripts in the 1920s and 30s (now in the Library of Congress, Washington). Although Brahms lived simply and was wary of being lionized, he enjoyed the attention and fine food lavished on him by his wealthy admirers. Those sharing his company were regaled by his repartee and reaped the benefits of an inquiring mind with broad interests and knowledge.

The prickly side of Brahms's personality, usually directed against those who invaded his privacy or lacked modesty or sincerity in their dealings with him, was experienced by close acquaintances as well. Clara Schumann, who confessed that even after 25 years he remained a riddle to her, was wounded more than once by his gruffness. But Brahms could be a true and loyal friend, as when he supported Amalie Joachim in her divorce proceedings in 1881, writing a letter highly critical of her jealous husband. Brahms's relationship with Joachim, whose nature was so different from his own, was suspended, until he tendered the Double Concerto (1887) as a peace offering. Brahms also had a special love of children, whom he accepted unconditionally and enjoyed teasing and spoiling.

In his later years Brahms's bachelor existence was brightened by infatuations with two young singers. He met the contralto Hermine Spies, a student of Julius Stockhausen, in 1883. This gifted, quick-witted woman from the Rhineland invigorated the 50-year-old composer with her merry nature and spirited renderings of his songs. Brahms's changed mood was discerned by Billroth in the songs of opp.96 and 97. For her part, she openly confessed her 'Johannes passion', but by this time in his life marriage was not a serious option. The artistry and beauty of another contralto, Alice Barbi, captured Brahms's attention in 1890, and they greatly enjoyed each other's company (fig.5). But Brahms was also capable of treating less talented and less intelligent women with rudeness.

Throughout his career Brahms devoted much energy to preparing arrangements for piano four hands or for two pianos. His transcriptions of Schumann's Piano Quintet and Piano Quartet, three overtures by Joachim and most of his own chamber and orchestral works demonstrate a special affinity for this medium, which was important for the dissemination of music before the age of the gramophone. He also made keyboard arrangements of works by Bach, Chopin, Gluck, Schubert and Weber; composed keyboard realizations for vocal duets and trios by Handel; orchestrated six songs by Schubert; and made piano

5. Johannes Brahms with Alice Barbi in the Ringstrasse, Vienna, 1892

reductions of the orchestral accompaniments to Schubert's Mass in E♭ (D950) and many of his own choral works.

Brahms's study of early music led him to oversee editions of works by C.P.E. and W.F. Bach and François Couperin. He anonymously prepared an edition of Mozart's Requiem for the collected works and brought out previously unpublished works by Schubert and Schumann. He also edited Schubert's nine symphonies for the *Gesamtausgabe*, provided editorial assistance for Chopin's collected works and helped prepare Clara Schumann's collected edition of her husband's music.

Brahms's extensive collection of musical autographs and rare editions reflects the depth of his historical interests, as well as his tastes in more recent music. Choice items included early editions and manuscripts of Domenico Scarlatti's sonatas; more than 60 sheets of Beethoven sketches; and autographs of Haydn's string quartets op.20, Mozart's Symphony no.40, several Schubert songs and his *Quartettsatz* D703, Berlioz's *La mort d'Ophélie*, Chopin's Mazurka in E minor op.41 no.2 and A minor op.67 no.4 and A♭ Prelude op28 no.7, the original version of Schumann's D minor symphony (no.4), and excerpts from Wagner's *Tristan und Isolde* and *Das Rheingold*. Brahms copied out music that he could not acquire in manuscript or print, assembling large collections of European folk music and Renaissance and Baroque art music. He was also an inveterate collector of passages in the music of his predecessors containing parallel octaves and 5ths.

Brahms's historical awareness found resonance in his own music. His choral music drew heavily on the models of Renaissance and Baroque polyphony, uniting old methods with modern musical language in works that represent a peak in musical historicism. Such syntheses are found in his instrumental music as well. The double variations (à la Haydn) that comprise the slow movement of the String Quintet in F op.88, for example, are based on two neo-Baroque dances (a saraband and a gavotte) that he had composed in the mid-1850s. His Haydn Variations op.56 culminate with a set of variations on a ground bass, and a grandly scaled passacaglia closes the Fourth Symphony. Folk music as well informs Brahms's mature instrumental compositions. Austrian ländler-style movements are often encountered, and the *style hongrois* continues to exert its influence.

5. Final years and legacy. During the 1890s death took a terrible toll on Brahms's circle of friends. In 1892 Elisabet von Herzogenberg died at the age of 45 and in the following year Hermine Spies succumbed at 36; in 1894 Billroth, Bülow and Spitta all died within a three-month period. Brahms himself was beginning to feel his age. Though in robust health, late in 1890 and again early in 1894 he declared his work as a composer at an end; at least two symphonic movements were sketched but left incomplete. At both times the artistry of Richard Mühlfeld, clarinettist of the court orchestra in Meiningen, stirred him from his lethargy, inspiring a rich harvest of chamber works with clarinet (opp.114, 115 and 120), the last issued in 1895. In 1891 Brahms collected and published 13 canons composed from the 1850s onwards, and in 1894 he gathered in seven volumes his arrangements for voice and piano of 49 German folksongs. His four collections of short piano pieces opp.116–9 seem to represent a similar activity, though evidence suggests that most if not all the pieces were recently composed.

Brahms's music continued its triumphant progress through Europe. In January 1895 his chamber and orchestral works were surveyed in a festival of three concerts in Leipzig, with Eugen d'Albert playing both piano concertos. The following September a similar event took place over three days in Meiningen. In October the *Triumphlied* was performed with Beethoven's Ninth Symphony to open the new Tonhalle in Zürich. In January 1896 Brahms made his last appearance on the podium, conducting his two piano concertos in Berlin, again with Albert as soloist.

In May 1896, with the death of Clara Schumann imminent, Brahms set his reflections on the meaning of life and death to music in the *Vier ernste Gesänge* op.121. In the wake of her passing (20 May) he wrote his final compositions, the 11 Chorale Preludes for organ op. posth.122. At this time Brahms first came to realize that his own days were numbered. To friends he dismissed his sallow complexion as 'bourgeois jaundice', but he surely recognized the alarming symptom of cancer of the liver, the disease of which his father had died. Brahms was cared for during his final months by his landlady, Celestine Truxa, and by loyal Viennese friends. At one of his last appearances in public, a performance of the Fourth Symphony by the Vienna Philharmonic under Hans Richter (7 March 1897), he received an ovation after each movement. He died on 3 April 1897 and was buried in the Zentralfriedhof in Vienna, in a grave of honour near the remains of Beethoven and Schubert.

Because Brahms did not leave a valid will, a lengthy legal dispute over his estate ensued. Private correspondents were allowed to reclaim their letters; the remaining letters to Brahms, most of his books and music, and all the important manuscripts were acquired by the Gesellschaft der Musikfreunde in Vienna, as was his wish.

6. Influence and reception. 'Brahms is everywhere', observed the critic Walter Niemann in 1912 when assessing the composer's posthumous influence on contemporary piano music in Europe. Indeed, from about

6. Johannes Brahms, 1897

1880 Brahms's music was a powerful model for younger composers. The Brahms 'fog', as Wilhelm Tappert disparagingly called this influence around 1890, had permeated the major conservatories in Austria and Germany, where Wagner's music was, at least officially, disapproved of. Furthermore, the external elements of Brahms's style – such as two-against-three rhythms, thick chords, and triadic melodies – lent themselves readily to imitation.

Composers such as Heinrich von Herzogenberg or the more talented Robert Fuchs had difficulty developing beyond the Brahmsian idiom. Other, mostly younger, composers, including Zemlinsky, Reger, Schoenberg, Busoni, Hindemith and Weill, absorbed Brahms's techniques with greater originality into styles that became the earliest manifestations of musical modernism.

Brahms's music also had a profound influence outside Austria and Germany, especially in England, on Hubert Parry, Stanford, Elgar and Vaughan Williams. Brahms is audible as well in French music, for example in the rhythmic and textural aspects of Fauré. Further to the east, Sergey Taneyev, who produced symphonic and chamber music with a strong Brahmsian stamp, was dubbed 'the Russian Brahms'.

Well into the later 20th century a diverse array of composers acknowledged their indebtedness to Brahms. The complex motivic and rhythmic structures of Babbitt seek to extend Brahmsian precepts to their logical limits. Ligeti's lyrical Horn Trio (1982) is a direct homage to Brahms's trio op.40. Berio orchestrated the Clarinet Sonata op.120 no.1 (1984–6), adding a few introductory bars of his own to the first two movements. His effort recalls the earlier one of Schoenberg, who in 1937 arranged the Piano Quartet op.25 for large orchestra.

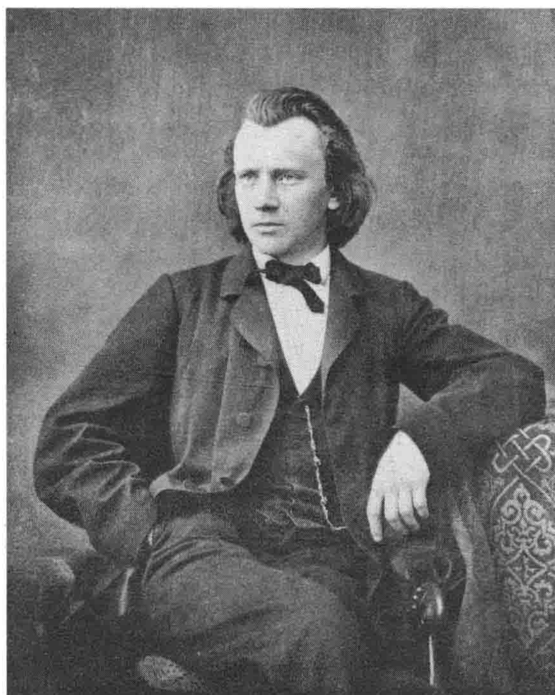
The critical reception of Brahms's music was unique among the major Classical and Romantic composers. Schumann's 1853 encomium of Brahms as the one destined to 'give expression to his age in an ideal fashion' had powerful repercussions, both negative and positive. For many years afterwards, he was judged by the standards and hopes expressed by Schumann. Sometimes willingly, sometimes not, Brahms became a lightning rod in the major musical-aesthetic tempest of the later 19th century. He was cast in direct opposition to the Lisztians and Wagnerites; his preferred genres of chamber music, lieder and symphony were set against the more modern forms of music drama and symphonic poem.

An unusual paradox became apparent in reactions to Brahms's music from about the period of the *German Requiem*. Even as he was acknowledged as a master, and his works entered the standard repertory and then the canon, there were strong reservations about his music. His technical prowess was never in doubt, but his music was felt to lack true originality and expressiveness. These views were held even by such staunch allies as Hanslick and Kalbeck.

Beethoven was the yardstick against which Brahms was constantly measured. For Louis Köhler in 1880, Brahms would never rise above epigonal status; without spiritual qualities he could be 'no kind of Beethoven'. In 1918 Paul Bekker advanced one of the main theories of Brahms reception, which had already been adumbrated as early as 1879 by Wagner: Brahms was essentially a composer of chamber music. For Bekker, Brahms's was a small-scale, bourgeois mentality, incapable of the 'society-forming' (*gesellschaftsbildend*) impulse that led Beethoven to write the Ninth Symphony. Brahms's symphonies were to Bekker no more than 'monumentalized chamber music'.

7. Eduard Hanslick and Brahms: caricature from 'Figaro', no.11 (1890)

Some years later, Theodor Adorno, and after him Carl Dahlhaus, radically inverted the Wagner-Bekker characterization from a defect to a virtue. The chamber-music qualities of Brahms's symphonic music were now deemed to be the most forward-looking aspect of his work. According to this view, the intricate textures and continuous motivic variation were harbingers of 20th-century music, especially that of the Schoenberg school. For Adorno, writing in 1940, Brahms's music represented the first time in Western music that the 'subjective' elements of thematic development determined 'objective' formal structures.



Adorno anticipated a better-known articulation of this position, an essay by Schoenberg that, beside Schumann's article, is the most renowned piece of Brahms reception. In 'Brahms the Progressive', originally prepared as a radio talk for the Brahms centenary of 1933 and revised in 1947, Schoenberg admired the compact richness of his harmonic language and his ability to spin themes, sections and even entire compositions from a few small motifs. For Schoenberg, these procedures of *Stufenreichtum* (abundance of scale degrees) and 'developing variation' paved the way towards an 'unrestricted musical language' of the 20th century.

Half a century after the appearance of Schoenberg's article (in *Style and Idea*, 1950), such special pleading for Brahms no longer seems necessary. His works continue to be mainstays on the concert stage and in recordings. There have been impressive achievements in documentary, historical and analytical research, and in performing practice, partly resulting from activities of the Brahms anniversary years 1983 and 1997. All this activity suggests that the special combination of beauty and integrity in his music continues to exert considerable appeal in a postmodern age.

7. Piano and organ music. Brahms's early works are dominated by the piano, the instrument on which he, like most composers of the period, received his training. As both recitalist and composer he seemed from the start intent on transcending the virtuoso and salon traditions that dominated Europe in the 1830s and 40s.

The first group of piano works, opp.4, 2, 1 and 5, completed (in that order) between 1851 and 1853, display an impressive command of the kind of motivic development and large-scale structures Brahms studied in Bach and Beethoven, a talent for the thematic transformation and colouristic harmony of Liszt and Chopin, and a strongly poetic-literary inclination like that of Schumann. The first movement of the F minor Piano Sonata op.5 draws imaginatively on all these traditions: the sonata form is built by subjecting a concise motif to a series of metamorphoses and wide-ranging modulations, so that we seem to be hearing the 'story' of a theme. In the Scherzo op.4 Brahms sought to compensate for the inherently sectional nature of the form by forging close thematic interrelationships between the sections.

The slow movements of the three piano sonatas are character pieces, or songs without words. They reflect the predilection for folk materials also evident in Brahms's early lieder. The theme of the Andante of op.1 is '*Verstohlen geht der Mond auf*', whose text Brahms reproduced under the notes and identified as 'an old German Minnelied' (though the melody is a recasting of one probably invented by Kretzschmer and Zuccalmaglio, the modern compilers of Brahms's source). The Andante

8. Johannes Brahms

theme of op.2 bears no words, but Brahms told his friend Dietrich that it was inspired by the text of the German Minnelied *Mir ist leide*. In op.5 both andantes are related to poems by C.O. Sternau, and portions of the movements may have been inspired by a folklike melody by Silcher, set to a text attributed to Wilhelm Hauff.

The slow movements of opp.1 and 2 are also significant for being Brahms's first mini-experiments in variation form; each consists of only a few variations on a short theme. Both themes also have a dialogic or call-and-response structure exploited with great freedom and imagination, as when near the end of the second variation in op.1, a laconic four-note motif in the middle register, in a homophonic choral style, is answered by a sprinkling of pianistic filigree from on high.

Brahms returned to variation form in the summer of 1854 for the more extended Variations on a Theme by Schumann op.9. Not surprisingly, the broad range of pianistic idioms owes much to Schumann's own works, to which there are also many allusions. The mood shifts dramatically among the 16 variations as a reflection of the two different personas implied in the music ('Brahms', slower, more meditative; 'Kreisler', faster, more impulsive) and made explicit in the autograph manuscript, where Brahms extended the double bars into either a 'B' or 'Kr'.

Brahms's first set of smaller piano pieces, the Ballades op.10, share the interest in folk sources (the first is based on the Scottish ballad *Edward*) and Schumannesque style evident in the sonatas and op.9. A retrenchment sets in with the pairs of gavottes, gigues and sarabands that comprise WoO3–5 and were probably intended as parts of complete suites in the manner of Bach. The A minor Saraband WoO5 is an exquisite miniature in rounded binary form closely modelled on the analogous number in Bach's English Suite in G minor, and yet it shows how

well Brahms could absorb the essence of Bach's structures into his own developing style.

The retrospective trend of the mid-1850s continues in four organ works (WoO7–10), some of which originated in the course of Brahms's counterpoint exchange with Joachim. The Fugue in A♭ minor (WoO8), the gem of the group, is a masterful synthesis of Baroque and Romantic principles. A slow, highly chromatic subject undergoes strict contrapuntal treatment by inversion, augmentation, diminution and stretto, as it simultaneously embarks on remote harmonic journeys that could only have been charted in the mid-19th century. Also dating from this time is the masterly Chorale Prelude on the Passion chorale *O Traurigkeit, o Herzeleid* (WoO7), to which Brahms later added an imposing fugue.

The two sets of Variations in D (op.21 nos.1 and 2) from 1856–7 show that Beethovenian influences were beginning to temper Brahms's Romantic approach to this form. The Variations and Fugue on a Theme by Handel (op.24), which look still further back into the musical past, are the supreme manifestation of this neo-classical or neo-baroque tendency. The composer himself valued this set highly, calling it his 'Lieblingswerk'. Even Wagner, who heard Brahms play the variations in Vienna in 1862, is reported to have expressed admiration 'for what may still be done with the old forms'. The Handel Variations take Bach's Goldberg and Beethoven's Diabelli Variations as the starting point for building a monumental and variegated structure upon a theme of the utmost simplicity, here the Air from Handel's suite in B♭. From the viewpoint of piano technique, the Handel Variations are the work of a composer who had for his time an exceptional understanding of earlier keyboard idioms.

The Schumann Variations op.23, based on a melody Schumann had written down not long before his suicide attempt, maintain a more restricted range of expression and character than the earlier op.9 set and as such may be said to partake of Brahms's neo-classicism of the 1860s. The final variation is a major-mode funeral march into which is ingeniously woven a return of the original theme.

By comparison with almost every other keyboard work of Brahms, the Variations on a Theme by Paganini (op.35) place an emphasis on extreme virtuosity. (Clara Schumann called them 'witch variations' and regretted they were beyond her capacity.) The more didactic nature of the set is suggested by its principal title: 'Studies for the Piano'. As with the études of other great composers, however, including Schumann, Chopin, Liszt, and Debussy, technique is always allied with powerful and widely ranging musical expression.

A complete contrast to the variation sets is offered by the piano works of the 1860s based on popular genres. The exuberant set of 16 Waltzes op.39, written for piano four hands and adapted almost immediately for two hands, were composed in the spirit and on the scale of Schubert's dances, some of which (the Ländler D790) Brahms had recently edited for publication. Dedicated to Hanslick, the op.39 set also constitutes Brahms's affectionate tribute to the dance form most closely identified with his adopted city Vienna. These miniatures, mostly in rounded or recapitulating binary form, unfold a great variety of expression, from the propulsive *style hongrois* to Biedermeier sentimentality.

The 1860s also saw Brahms paying more concentrated homage to the gypsy style: in 1869 Simrock issued the first two of what were to be four books of Hungarian Dances for piano four hands WoO1. (Brahms later arranged ten of the dances for solo piano and three for orchestra.) The dances are large-scale sectional works based mainly on pre-existing gypsy tunes, some of which Brahms may have known as early as 1853, when he toured with the violinist Ede Reményi. Brahms managed to combine folk and high art as effortlessly as he blended divergent historical periods in other works.

With the eight *Klavierstücke* op.76, mainly composed in 1878, Brahms entered the late phase of his writing for piano, dominated by shorter character pieces. This set alternates between works labelled 'Capriccio' and 'Intermezzo'. The former tend to be faster (sometimes marked *agitato*), with continuous rhythmic motion; the latter are more lyrical, but with a melodic style that is economical rather than expansive.

The two Rhapsodies op.79 are Brahms's largest independent, single-movement piano works after the Scherzo op.4. Despite the implications of the title, both pieces have clear formal designs. On the largest scale, no.1 in B minor has a ternary form, while no.2 in G minor is in a fully fledged sonata form. The G minor Rhapsody begins with one of the most striking (and most analysed) gestures in all of Brahms's music, a kind of deceptive cadence in which deception comes not in the bass, which behaves properly (D–G), but in the melody, whose D–E♭ resolution sends the piece spiralling off into a bold harmonic sequence.

Among the late collections opp.116–19, Brahms's last works for piano, the *Fantasien* op.116, dubbed a 'multi-piece' by one critic, have the strongest claim to be considered as a coherent whole because of thematic, harmonic and stylistic connections. The set, divided like op.76 between intermezzos and capriccios, begins and ends with energetic pieces in D minor; in the interior there is a group centred on E major/minor. The Intermezzo in E op.116 no.4 shows how fluid Brahms's conception of structure had become. The three main thematic units fall into neither conventional ternary nor recapitulating binary form, but rather are varied continuously so that one is justified in speaking of what Schoenberg called 'musical prose', a discourse that unfolds without patterned repetition.

In a letter to his friend Rudolf von der Leyen, Brahms called the three Intermezzos op.117 'Wiegenlieder meiner Schmerzen' ('lullabies of my sorrow'). In the first piece the association with the lullaby is made explicit: the rhythm is a softly rocking 6/8 and Brahms prefaced the music with a pair of lines from a Scottish ballad, as translated by Herder, beginning 'Schlaf sanft mein Kind' ('Sleep softly, my child'). It has been suggested that the other two intermezzos in the set are also related to Scottish ballads.

In Brahms's late piano pieces we begin to see a breakdown of the traditional distinction between melody and harmonic support, between 'above' and 'below'. The Intermezzo in F minor op.118 no.4 unfolds as a canon, sometimes free, sometimes strict, between the hands. The thematic material is extraordinarily compressed: in the middle section, the canon at the octave is based on nothing more than a sustained chord followed by a single note. A still stricter spatial symmetry characterizes the

harmony and texture of the Intermezzo in E minor op.116 no.5. The triad played by each hand in the first six bars is an exact mirror of that in the other hand. Moreover, each chord appears on a weak beat and resolves to bare, two note dissonances on strong beats. Brahms thus reversed the traditional metrical procedure of associating the succession weak–strong with dissonance–consonance.

The 11 Chorale Preludes for organ, composed in May and June 1896, were published posthumously in 1902 as op.122. Intimations of the composer's mortality are clear from his choice of chorales, including two settings of *O Welt, ich muss dich lassen*. The models for this set are the preludes of Bach's *Orgelbüchlein*, described by Reger as 'symphonic poems in miniature', in which the chorale melody remains mostly in the top part. Reger's description could apply equally well to Brahms. The expressive seems inseparable from the structural in moments like the achingly sustained half-diminished 7th chord that precedes the final cadence in the first *O Welt* prelude, or in the complex motivic development that supports the guileless melody of *O Gott, du frommer Gott*. These last works capture the unique synthesis of historical and modern that lies at the core of Brahms's musical personality.

8. CHAMBER MUSIC. Brahms revived chamber music after the death of Schumann, one of its greatest Romantic practitioners, and defined it for the later 19th century. Across 40 years, from the Piano Trio op.8 (1854) to the Clarinet Sonatas op.120 (1894), ranges a corpus of 24 complete works that is arguably the greatest after Beethoven. For many commentators, chamber music captures Brahms's basic creative personality, as the music drama does Wagner's.

A good number of compositions, all destroyed or lost, preceded the B major/minor Piano Trio op.8, which in its original version is an ambitious, somewhat uneven attempt to synthesize Classical and Romantic traditions. The main theme of the first movement has a breadth and tunefulness reminiscent of Schubert; the hymn-like theme of the Adagio seems inspired by Beethoven; and the propulsive Scherzo is Mendelssohnian in spirit. Into the mix comes Baroque counterpoint: the large second group of the first movement begins with a Bach-inspired chromatic theme which in the recapitulation becomes the subject of an elaborate fugato.

Written during Brahms's earliest and most intense involvement with the Schumanns, the trio is also replete with allusions. The second theme of the finale seems based on the last song of Beethoven's cycle *An die ferne Geliebte*, a work which also had particular significance for Schumann. Brahms's slow movement includes an apparent reference to the song *Am Meer* (from Schubert's cycle *Schwanengesang*), whose text by Heine about frustrated love may have had special resonance for Brahms at the time.

In 1889, after Simrock bought from Breitkopf & Härtel the publishing rights for this and other early works, Brahms took the opportunity to revise op.8 extensively. He excised the fugato, removed the most obvious allusions and tightened up the formal structures. This process included writing a new contrasting theme for the slow movement and a new second theme for the finale. Brahms's revisions, although not greeted with enthusiasm by some in his circle, bring the trio more into the style of his later chamber works.

The B♭ String Sextet op.18 (1859–60) stands at the head of a group of seven chamber works, extending to the Horn Trio op.40 (1865). Together they comprise what Donald Tovey called Brahms's 'first maturity', in which the influences of his predecessors, especially Beethoven and Schubert, were absorbed into a style of great originality.

The B♭ Sextet represents a consolidation in the spirit of the contemporaneous orchestral serenades and the Handel Variations for piano. The main theme of the first movement is as tuneful as that of op.8, but more compact and restrained. Brahms adopted a streamlined version of the 'three-key' model of Schubert's sonata forms: the traditional dominant, F major, is delayed by a modulation from the initial tonic to a remote key (A major). The slow movement, whose dour theme and chaconne-like bass recall Beethoven's 32 piano variations in C minor (WoO80), tempers the Romantic approach to variation form characteristic of the early piano works.

By contrast with the Sextet, the piano quartets in G minor op.25 and A op.26 are unabashedly innovative. Both are massive in scale, lasting nearly three-quarters of an hour in performance. The exposition of the first movement of op.25 has no fewer than five thematic groups, which trace a path from the sombre opening to an exuberant D major close. In a striking tonal reversal that may owe something to the first movement of Schubert's G major String Quartet D887, the recapitulation begins in G major with the middle rather than the initial segment of the tripartite first theme. In the Intermezzo of op.25, Brahms for the first time substituted for the expected scherzo or minuet a gentler movement that became a hallmark of his works. The fiery rondo-finale 'alla Zingarese' constitutes the earliest appearance of the *style hongrois* (and one of the most successful) in Brahms's chamber music.

The first movement of the A major Piano Quartet is remarkable for the way in which a profusion of lyrical melodies is generated by the kind of small-scale motivic manipulation that Schoenberg called 'developing variation'. The slow movement is full of striking timbral effects, among them an episode (reminiscent of Schubert's *Die Stadt*, from *Schwanengesang*) in which the piano's sweeping diminished 7th arpeggios confront an impassive four-note motif in the strings.

The F minor Piano Quintet op.34 originated in 1862 as a string quintet with two cellos (in imitation of Schubert's identically scored work) and was also arranged as a two-piano sonata (op.34*b*). It is perhaps the most tightly integrated work of Brahms's first maturity, especially in the way harmonic and melodic details determine large-scale structure. The note D♭, prominent in the opening theme (and representing the flattened sixth degree), is projected on to the tonal scheme of the three-key exposition, which moves to C♯ minor, then to its enharmonic parallel D♭ major. A D♭–C motivic figure and its transpositions permeate the scherzo, especially the energetic final cadences. The coda of the finale begins in C♯ minor and returns to the tonic area with a prominent descent in the bass from D♭ to C.

Also important in the F minor Quintet is the technique of thematic transformation, whereby themes retain their basic contour and length but are altered in mood or character. In the development section of the first movement, the sinuous main theme, originally played in stark

9. Autograph MS of the end of the second movement and opening of the third of Brahms's Piano Quintet in F minor, composed 1861–4 (US-Wc)

octaves, is adjusted in rhythm and texture to yield, in Tovey's apt phrase, 'the lilt of an ancient ballad'.

The first movement of the G major Sextet op.36 is justly admired for its elegant tonal and motivic symmetries. The main theme swiftly outlines keys that lie a major 3rd on either side of the tonic: E♭ and B major. The taut fugal finale of the E minor Cello Sonata op.38, based on a theme that recalls the two mirror fugues (Contrapunctus nos.16 and 17) of Bach's *Art of Fugue*, shows how far Brahms had advanced since the Piano Trio op.8 in the integration of strict contrapuntal technique and sonata form.

Brahms wrote the Horn Trio op.40 for the natural or *Waldhorn*, whose timbre and capabilities lend the work an unforgettable sound and unique formal qualities. For the only time in the first movement of an instrumental work Brahms abandoned sonata form, as if sensing that a relaxed rondo structure might allow the horn a broader range of expression. The Horn Trio is also characterized by motivic connections, and even direct thematic recalls, among the four movements.

After an eight-year hiatus in chamber music – a period marked mainly by large choral works – Brahms returned to the medium in 1873 with the revision and completion of the two string quartets op.51, in C minor and A minor, begun some years earlier. The C minor Quartet reflects a new stylistic phase, characterized by motivic density and formal compactness. The first movement churns with chromatic turbulence, rarely settling down into stable key areas or broad themes. Its language resembles that of the First Symphony in the same key, which was gestating at this time. The movements are linked thematically in a way that lends the work a breathless unity. The A minor Quartet is more overtly lyrical, but still concentrated in technique. The Andante, whose theme is generated from the constant rhythmic-metric displacement of the interval of a 2nd, was justly singled out by Schoenberg as a miracle of musical economy.

In 1875 Brahms attacked more unfinished chamber music with the Piano Quartet in C minor op.60, begun in 1855 in C♯ minor. The early date of at least the first movement may account (as with the original version of the B major Trio) for the oddly experimental treatment of sonata form. The second group, in the key of E♭, is built as a quasi-independent theme and variations. In the recapitulation, in a case probably unique in the history of sonata form, this group is transposed not to the expected tonic, but to the dominant, G major.

In the last String Quartet (no.3 in B♭, op.67) Brahms's writing for the medium becomes especially transparent. Formal and thematic structures are correspondingly lucid, and often innovative. In the first movement, the sonata exposition is articulated not only by conventional harmonic and melodic procedures but also by metrical ones.

The main theme is cast in a buoyant 6/8, the second in a more hesitant 2/4. The transition between them is made by a series of striking hemiolas. The finale represents the first time Brahms ended a multi-movement work with a set of variations, here exploited to create a new kind of cyclic unity. After the sixth variation, the opening theme of the first movement returns suddenly and manages as if by magic to integrate itself into the variation structure. In the final bars it is combined with the original variation theme in seemingly effortless counterpoint.

In the interregnum between his symphonic periods, Brahms completed three chamber works, the Violin Sonata in G op.78, the Piano Trio in C op.87 and the String Quintet in F op.88. The pastoral first movement of the Violin Sonata represents a kind of expressive overflow from the first movement of the Second Symphony. As in the symphony, a more sombre tone is struck by the slow movement, especially the funeral march in the *più andante* episode, and by the finale, which begins in the minor mode with a citation of Brahms's song *Regenlied*, and into which the main theme of the slow movement momentarily reasserts itself.

In the String Quintet op.88 Brahms innovated a three-movement format in which a central rondo structure combines the functions of a slow movement and scherzo. The theme of the Grave ed appassionato, adapted from a keyboard saraband of 1854 (WoO5), alternates with an Allegretto vivace based on a gavotte from the same period (WoO3). Like the finale of the Cello Sonata op.38, the Quintet's last movement integrates sonata and contrapuntal form, here in a more jovial spirit. The first group is a fugal exposition, with a Baroque-style subject in busy quavers. For the second group, the subject retreats to an inner part to accompany an expansive melody.

Brahms achieved a remarkable new level of economical lyricism in the next four works, the Cello Sonata op.99, the Second Violin Sonata op.100, the Third Piano Trio op.101 and the Third Violin Sonata op.108. The opening theme of op.99 consists essentially of a two-note figure (C–F) whose intervallic and rhythmic structure (semiquaver–minim) evolves rapidly by means of developing variation. The process is so continous that it also envelops the second group, derived from the same material. In all four works the highly concentrated approach makes for very brief structures: the four movements of op.108 altogether last just over 20 minutes, barely longer than the first movement of the F minor Piano Quintet.

The first movement of the G major String Quintet op.111, a work with which Brahms initially thought to take leave of composition, seems to press against the limits of chamber music. The powerful opening tremolos announce a symphonic manner, and the main theme, introduced by the cello, is one of the most expansive in all Brahms, with an ambitus and harmonic scope that invite comparison with the athletic melodies of Richard Strauss.

Very different in mood are those in the final group of chamber works: the Clarinet Trio op.114, the Clarinet Quintet op.115 and the two Clarinet/Viola Sonatas op.120. Although the timbre of the clarinet imparts a reflective quality – critics have used the word 'autumnal' – there is nothing retrospective about the compositional techniques. Structural fluidity is especially evident in the first movements, where the conventional boundaries of sonata form become blurred. With the exception of the Clarinet Quintet, the expositions are not repeated. Brahms built complex thematic groups, in which the opening ideas, harmonically and formally ambiguous, are at the same time introductory in nature and integral to the exposition. In op.120 no.1 the initial unison flourish could be in either F minor or D♭ major. When the first theme reappears at the end of the the development, it is harmonized in the remote key of F♯ minor. The recapitulation proper begins with the appearance on the tonic of what was the contrasting part of the first group. With these kinds of techniques, the late chamber works achieve both continuity and clarity in a way that is unique in the history of music.

9. Orchestral works and concertos. In his article 'Neue Bahnen', Schumann hinted that it was Brahms's destiny to compose for orchestra. By the time of Brahms's death in 1897, this prediction had been fulfilled with the creation of two serenades, four concertos, a set of variations, two overtures and four symphonies.

The D minor Piano Concerto is one of the most powerful statements after Beethoven in what Carl Dahlhaus called the 'symphonic style', which aimed for monumental effects achieved by orchestral means – a symphony could not be merely the transcription of a sonata – and was defined by moments like the opening of the Ninth Symphony. The first theme of the concerto recalls Beethoven's Ninth in its angularity, rhythmic energy and use of a throbbing timpani pedal point. Brahms also explored the tonal relationship between D minor and B♭ major characteristic of the Ninth. The first movement of the Concerto (marked Maestoso) is distinctive for the ample dimensions of the orchestral exposition, its harmonic range and piano writing that, unlike that of most concertos of the period, is virtuoso without being flashy.

The turbulent first movement has often been associated with Schumann's attempted suicide. The Adagio movement, in broad ternary form, is a reflective counterpart: Brahms called it a 'gentle portrait' of Clara Schumann. Strikingly, it is in the same unusual time signature as the first movement, 6/4, and there are clear thematic links. The rondo-finale shows a very different spirit. Its formal structure is modelled closely, even slavishly, on the finale of Beethoven's Third Piano Concerto in a way that might be called neo-classical.

It is this neo-classical impulse that comes to the fore in the next orchestral works. In the first movement of the First Serenade op.11, written (after several metamorphoses of medium) for 'full [grosses] orchestra', the angry D pedal point of the First Concerto has given way to a pastoral drone; the ferocious trills and chromaticism yield to a theme bouncing gently among the notes of the D major scale. The models for the First Serenade are in Haydn and in early Beethoven (especially the Second Symphony, in the same key). The apparent simplicity of the work, however, conceals sophisticated Brahmsian techniques of motivic development and flexible phrase structure. The Serenade includes two scherzos and a pair of exquisite minuets. In the minuets the origin of the Serenade as a chamber work is especially apparent. The expansive slow movement is the only one in Brahms's works to use full sonata form.

Unlike its D major counterpart, the Second Serenade op.16 in A was conceived for a 'small' orchestra, distinctive (like the first movement of the *German*

Requiem) in having no violins, a scoring that gives prominent melodic roles to the wind instruments and violas. The Second Serenade has five movements, including two inner dance movements, a scherzo and a minuet. The darkly hued slow movement is noteworthy for its rich counterpoint, expansive ternary form and harmonic adventurousness.

In 1862 Brahms plunged back into the symphonic style with the first movement of what eventually became his C minor Symphony. But once again the symphonic engine stalled. He seems to have made no substantial progress with the work over the next 14 years. In 1873 he returned to orchestral writing with virtually simultaneous versions for two pianos and for orchestra of the Variations on a Theme of Haydn op.56, based on the St Anthony chorale for wind instruments (a piece no longer firmly attributed to Haydn). The Haydn Variations is the first orchestral work in which Brahms may be said to have assimilated fully earlier models and influences. There are eight variations, plus a finale in the form of a passacaglia with 17 variations and a coda. Although the techniques owe much to Brahms's forebears, what is new and genuinely symphonic is the way the counterpoint is realized through the orchestra, not only in the strict devices of canon and invertible counterpoint but also in the polyphonic movement of the parts. A passage like the Presto (eighth variation), with its eerie pedal points spread out over six octaves, also indicates a new level of sophistication in Brahms's orchestration.

The completion and première of the First Symphony in 1876 was a milestone for Brahms and for symphonic music generally in Austro-German lands. Although it was not universally loved, the symphony was acknowledged as the most significant since Schumann. It adheres to the standard four-movement format and as such was sometimes considered to contribute little to the development of the genre after Beethoven's Ninth. In fact, Brahms adapted with great originality the model of Beethoven's Fifth Symphony, which likewise progresses from struggle in C minor towards triumph in C major by means of links between the individual movements. In Brahms, these techniques include thematic-motivic connections involving especially the figures of a descending 4th and a chromatic rising 3rd, as well as a harmonic-tonal scheme in which the keys of the successive movements depart from and return to C by major 3rds: C–E–A♭–C.

From Beethoven's Ninth Symphony Brahms took over the idea of giving both outer movements slow introductions. The introduction to the finale revisits the turbulent mood of the first one, then brings forth two new elements (a horn-call and a chorale-like passage) that point towards resolution, which comes with the famous first theme of the movement proper, a C major melody reminiscent of Beethoven's Ode to Joy theme.

The First Symphony is special in its combination of contrapuntal density, fluid phrase structure, and soaring lyricism. The main 'theme' of the first movement is actually a complex of three different motifs presented simultaneously, then immediately developed. The phrases generated are of irregular, constantly changing lengths. At certain moments – and their rarity makes them especially powerful – the momentum of this motivic style lets up to yield broader melodies, as in the G♭ tune in the development of the first movement and, more prominently, in the C major theme of the finale.

The Second Symphony in D op.73, composed less than a year after the completion of the First, is often described as its sunny counterpart. The work indeed radiates a warmth and tunefulness absent in parts of the earlier work. But as Brahms himself acknowledged, the Second Symphony also has a 'melancholy' side. The lyrical opening theme of the first movement unravels almost at once into a dark passage for timpani and trombones. The voice of melodic continuity is reasserted often in this movement, however, first by the violin melody that follows the unravelling and again by the second group and the large coda. The pensive slow movement, in B major and in a modified sonata form, is dominated by a motivically rich, metrically ambiguous main theme remarkable for its combination of tunefulness and developing variation.

The second half of the symphony distinctly brightens in mood, although it too contains sombre moments – often involving the trombones – that evoke the expressive world of the first two movements. The Allegretto recasts the traditional scherzo–trio alternation into a rondo-like structure that is one of Brahms's most original creations. Although the finale ends the symphony in a jubilant blaze of D major, it glances back at the mood of the earlier movements, especially in the haunting passage at the end of the development section (whose chains of descending 4ths Mahler recalled his First Symphony) and in the syncopated episode for brass in the coda.

Two concertos and two overtures separate the first two symphonies from the second pair. Temperamentally, the Violin Concerto op.77 is in many respects a companion piece to the Second Symphony, with which it shares the key of D and a first movement in 3/4 time built from triadically orientated themes that furnish energetic development as well as gentle lyricism. The elegiac opening ritornello of the Adagio, scored for woodwind and solo oboe, introduces one of Brahms's most classically poised slow movements. The exuberant rondo is one of Brahms's greatest essays, and certainly his most virtuoso, in the *style hongrois*.

The Academic Festival Overture op.80 and the Tragic Overture op.81 are counterparts to each other, somewhat like a satyr play and a tragedy. In the Academic Festival Overture about half a dozen popular tunes and student songs, including the Rákóczi March and *Gaudeamus igitur*, are woven into a sophisticated large-scale binary form consisting of a three-key exposition and a recapitulation that incorporates developmental elements. Beyond its title, the Tragic Overture has no specific programme or narrative. This imposing movement is in the spirit of D minor predecessors, including Beethoven's Ninth and Brahms's own First Piano Concerto. It is in a broad sonata form, in which the recapitulation begins with the transition to the second group. The overture is remarkable for its motivic concentration, especially the way in which all the thematic material seems to be generated from the bold opening 'motto' of a descending 4th.

The B♭ Piano Concerto op.83 is the Olympian successor to Brahms's first effort in the genre. (His friend Theodor Billroth remarked that the two works stood in the relationship of youth to man.) The interpenetration of solo and orchestral parts, as well as the addition of a scherzo to the normal three-movement design, brings op.83 closer to the genre of symphony than any other major concerto of the 19th century.

The piano makes an early appearance (as in Beethoven's Fourth and Fifth Concertos), responding to an evocative horn-call, then embarks on a fully fledged cadenza. All of this is a prelude to Brahms's most expansive concerto movement. The scherzo is an intense, compact sonata form in D minor, which flows into a radiant trio in D major: it is as if the worlds of the earlier D minor Concerto and the more recent Violin Concerto are put side by side. A masterpiece of tone painting, the Andante is almost a double concerto for solo cello and piano. The piano never takes up the cello's opening melody directly, responding instead with apparently improvisatory garlands of figuration that (being by Brahms) are in fact thematic. The finale, a sonata-rondo, encompasses a great range of moods, from the gypsy swagger of the first episode to the clownish romp of the coda.

With his Third Symphony op.90 Brahms achieved a new level of coherence in a large-scale orchestral work. It is the shortest of the four symphonies, lasting only half an hour in most performances. The durations of the individual movements are closer to being equal than in any of the others. The compact dimensions and balanced proportions seem intended to point up processes that extend over the entire work. These include the most direct thematic recall in any symphonic work by Brahms: the opening motto and theme return transfigured at the end of the finale. Coherence is also imparted by harmonic devices, such as the frequent juxtaposition of F major and F minor. The tonal scheme is unique in the genre: outer movements centred on F and inner movements on C, thus creating a plateau of harmonic tension in the dominant that implies a large-scale sonata form over the whole work.

In many ways the Fourth Symphony op.98, composed soon after the Third, represents the summit of Brahms's achievement in the genre. The finale, in the form of a passacaglia with a terse eight-bar theme and 30 variations, is his most thoroughgoing attempt to synthesize historical and modern practice. While observing the strictures of the ostinato subject, he created continuity by arranging the variations in groups according to figuration, thematic style, dynamics and harmony.

As in the Third Symphony, tonal relationships, here involving E and C, extend over the entire work at both larger and more detailed levels. The four movements are in E minor, E major, C major and E minor, respectively. At the beginning of the recapitulation in the first movement, a C major triad that had been only a discreet harmony at the opening becomes a broad arpeggio under the sustained fourth note of the theme. In the Andante, the Phrygian inflections of the theme continually bring C (as flattened sixth) into play. In the finale, whose ostinato theme suggests a single harmonic framework, variations 26–8 are brought deftly into the key of C major.

The Fourth Symphony is also remarkable for what Edward T. Cone called 'harmonic congruence', whereby the vertical and horizontal dimensions of the music are fashioned from the same basic material. This principle is adumbrated by the descending chain of melodic 3rds that shapes the main theme. Here and elsewhere in the first movement, the augmented triad forms a significant element on both the thematic and the harmonic axes. Congruence of this type foreshadows remarkably Schoenberg's concept of the unity of musical space, in which 'there is no absolute down, no right or left, forward or backward'.

Brahms's final work involving orchestra is the much underrated Concerto for Violin and Cello op.102, which was composed in 1887 in part as a gesture of reconciliation with Joachim after a long period of cool relations. There is no apparent precedent for the use of these two instruments in a concerto, though Brahms's work is clearly indebted to Mozart's Sinfonia concertante for violin and viola K320*d* and to Beethoven's Triple Concerto. The opening of the first movement is dominated by two cadenzas, one for each instrument, corresponding to the two main themes of the exposition. Because of the subsequent interpenetration of solo and orchestra, the dialogic aspect of the solo parts and the nature of the thematic material, the standard demarcation points in the sonata form are blurred to an even greater degree than is normal in Brahms. The central Andante movement is built from one of Brahms's most expressive melodies, which, when played by the two soloists in octaves, almost takes on a Puccinian intensity. The finale is a sonata-rondo in the gypsy style.

The many orchestras that played Brahms's music in his lifetime, often under his baton, varied widely in size. The largest was the Vienna Philharmonic, which had about 100 players at the time of the premières of the second and third symphonies. The smallest were the court orchestras at Karlsruhe and Meiningen, which gave the premières of the First and Fourth, respectively; they had 49 players, with only nine or ten first violins. Especially in these smaller groups, the balance between strings and woodwind brass was more even than is common today.

Two basic trends in interpretation of Brahms's orchestral music can be gleaned from surviving evidence. One was that of Hans Richter, conductor of the Vienna Philharmonic, whose straightforward, more literal approach was inherited in part by Felix Weingartner. The other was the heavily nuanced style, with rhythmic inflection and tempo fluctuation, of Hans von Bülow, passed on to Fritz Steinbach. Although not always content with either Richter or Bülow, Brahms approved of both Weingartner and Steinbach. This suggests that he had no fixed idea of how his symphonies should sound, putting his trust in the musicianship of the best conductors.

10. Choral works. Large-scale works for chorus and orchestra occupy a significant niche in Brahms's output. At the head of this group – for many it stands at the centre of Brahms's entire output – is the *German Requiem* op.45, composed mainly between 1865 and 1867, with the fifth movement added in 1868.

The *German Requiem* was the first work in which Brahms fulfilled Schumann's mandate (made in the article 'Neue Bahnen') to 'direct his magic wand where the massed forces of chorus and orchestra may lend him their power'. Schumann's own contributions to the choral-orchestral tradition, composed within the last decade of his life and including such works as *Szenen aus Goethes Faust*, served as inspirations for Brahms, who likewise turned for his texts to high-quality German poetry and to the scriptures.

Although it falls into the tradition of the sacred oratorio, the *Requiem*, which employs baritone and soprano soloists, belongs to no established genre. It is not a conventional requiem mass, since it avoids the liturgical Latin text. Brahms assembled his texts for the seven

movements from 15 passages in Martin Luther's translation of the Bible. The focus is less on death than on consolation for the living. The texts are striking for avoiding altogether the notion of redemption through Christ, who is not mentioned at all. The religious sentiment is thus more universal – Brahms said it could be called a 'human' requiem – than denominational.

The choral writing in the *Requiem* displays great diversity and historical awareness. At one textural extreme is the stark, sombre homophony at the opening of the second movement ('Denn alles Fleisch'); at the other, the elaborate neo-Handelian fugues that close the third and sixth movements (at 'Herr, du bist würdig' and 'Der Gerechten Seelen', respectively). The first part of the fourth movement ('Wie lieblich sind deine Wohnungen') evokes the lilt of a Viennese waltz (fig.10). In the sixth movement, at 'und der Zeit der letzten Posaune' and 'Tod, wo ist dein Stachel?', Brahms composed passages as explosively declamatory as anything in the 19th century.

In many ways the *Requiem* set the stylistic parameters for the choral-orchestral works that followed. The *Triumphlied* op.55 (1871), which employs double chorus and a baritone soloist, is often called neo-Handelian because of its contrapuntal textures, broad sequences and frequent interjections of 'Hallelujah'. Such a label tends to mask the original features of this seldom-performed work, including the sophisticated polyphonic writing and the mastery of timbre evident in Brahms's deployment of the massed forces. The nationalistic, celebratory *Triumphlied* is, however, the anomaly among the post-*Requiem* works, which otherwise deal with the general theme of the alienation felt by an individual (or by humanity) towards the higher powers that control existence.

Between them, the Alto Rhapsody op.53 (1869) and *Rinaldo* op.50 (completed 1868) may provide the closest approximation of how an opera by Brahms would have sounded. In the Rhapsody, Brahms shaped three stanzas from Goethe's *Harzreise im Winter* into a compact, quasi-theatrical scena. An orchestral ritornello is followed by a recitative and aria (or arioso) for contralto, who is then joined by a men's choir for a chorale-like finale. The psychological evolution of the protagonist from solitary

10. Autograph MS of 'Wie lieblich sind deine Wohnungen' from Brahms's 'German Requiem', composed 1865–8 (A-Wgm)

despair to the prayer of consolation in the 'Father of Love' is traced by the increasing regularity of the phrase structure and melodic style, and by a harmonic trajectory from a chromatically inflected C minor towards a radiant C major.

Rinaldo, which Brahms called a 'cantata', is a setting of a still more overtly dramatic poem by Goethe, itself based on an episode from Torquato Tasso about a Crusader knight (solo tenor) who is persuaded by his crew (men's chorus) to leave the enchantress Armida and return to war. Brahms skilfully interwove rounded forms – such as Rinaldo's recitative and large-scale ternary aria – with more open-ended ones that convey the hero's increasing doubts.

Friedrich Hölderlin's poem *Hyperions Schicksalslied*, set by Brahms as *Schicksalslied* op.54 (1868–71), may be said to reverse the pattern of the *Harzreise* fragment: here, the trouble-free life of the gods on high (stanza 1) is contrasted with the tormented existence of mortals below (stanzas 2–3). To avoid ending in the darker mood, Brahms brought back the music of the elegiac orchestral introduction. The tonal scheme of the *Schicksalslied*, E♭ major–C minor–C major, is distinctive in Brahms as an example of progressive tonality.

For the text of *Nänie* op.82 (1881), a musical memorial to his friend the neo-classical painter Anselm Feuerbach, Brahms turned to a distinguished earlier neo-classicist, Schiller. Like the other shorter choral-orchestral works, this one touches on the theme of human destiny, here the ephemeral nature of beauty. Since the tone is more uniformly elegiac, one of Brahms's remarkable achievements in *Nänie* was to create so much variety of expression. This was done in part through strongly contrasting choral textures and key areas: the fugal opening and closing sections in D enclose a central, more homorhythmic segment in the 3rd-related key of F♯.

The *Gesang der Parzen* op.89 (1882), whose chromatic and turbulent D minor tonality seems to revisit the worlds of Beethoven's Ninth and Brahms's First Piano Concerto, is a setting for six-part chorus (with divided altos and basses) of a monologue from Goethe's drama *Iphigenie auf Tauris*. As in the *Schicksalslied*, the mortals and immortals are separated by an unbridgeable gulf. The overall form is a rondo, achieved by repeating the opening stanza and its music in the middle of the work. The coda contains one of Brahms's most striking harmonic passages, a cycle of major 3rds (D–F♯–B♭–D) in which each step functions as an augmented 6th chord of the next. (Webern admired this progression as the beginning of 'the chromatic path' to the 20th century.)

Brahms also composed numerous smaller-scale sacred and secular works for women's, men's and mixed choirs. The earliest extant compositions, written for his choirs in Detmold, Hamburg and Vienna, reflect his interests in historical styles and his exchange of counterpoint exercises with Joachim. The fragmentary *Missa canonica* WoO18 (1856) and the two Latin pieces for Good Friday, *O bone Jesu* and *Adoramus te* op.37 nos.1 and 2 (1859), were inspired by late Renaissance music. In the independent *Kyrie* WoO17 (1856) a basso continuo accompanies Baroque-style polyphony. The *Geistliches Lied* op.30 (1856) combines chorale-like melody with strict canonic procedures, Classical closed form and a free polyphonic accompaniment. In the *Regina coeli* op.37 no.3 (1863) a melody employing 18th-century dance rhythms is sung in duet with its inversion and is punctuated by choral responses. The techniques of early music occur as well in the Two Motets op.29 (1856–60): in no.1, *Es ist das Heil uns kommen her*, a four-part chorale is succeeded by an elaborate fugal variation on the chorale melody; in no.2 the first and third parts of Brahms's setting of verses from Psalm li are canonic (a *stile antico* augmentation canon and a 'group' canon in siciliano style), the second and fourth parts fugal (angular Bachian versus triumphant Handelian/Beethovenian).

Two works from autumn 1858 employ orchestral forces. In the *Ave Maria* op.12 sweetly flowing passages of parallel 3rds in 6/8 recall earlier Marian settings, but the structure is that of a miniature sonata movement. In the majestic *Begräbnisgesang* op.13 Brahms marshalled an impressive array of historical textures: darkly hued solo chorale singing with choral response, instrumental ostinato accompanying choral psalmody and canonic trio sonata texture with obbligato winds reminiscent of Bach's cantatas, all united by ritornellos of woodwind and low brass into a Classical rondo structure.

Forest mystery and the rippling music of wind and water infuse the *Vier Gesänge* op.17 for women's choir, harp and horns (1860), a cycle of Romantic tone sketches that opens with a movement in C major that is more essence than substance and culminates with a fateful dactylic dirge in C minor replete with howling hounds, restless ghosts and sweeping wind. In between are two more songs of love and death, an Andante and a scherzo-like Allegretto, both in E♭. Chiastic tonal planning and a final chorale-like song on the theme of human redemption in the seven strophic *Marienlieder* op.22 (1859) may have been inspired by Bach's cantatas.

Brahms's love of folksong is evident in the 14 arrangements of traditional secular and sacred tunes for mixed voices published in the *Deutsche Volkslieder* WoO34 (1864) and in the *Lieder und Romanzen* op.44 (1859–60), original compositions on folksong texts and folk-influenced poetry. Though cast in 'simple' strophic form, these miniatures abound in artifice, moving at times as close to madrigal as to folksong.

Among the eight opuses published between 1874 and 1891 most of the 13 Canons op.113, two of the seven Lieder op.62 (nos.6 and 7) and the richly contrapuntal chorale motet *O Heiland, reiss die Himmel auf* op.74 no.2 were composed between 1858 and 1869. The motet *Warum ist das Licht gegeben* op.74 no.1 (1877), one of Brahms's finest *a cappella* works, draws extensively on material originally composed for the *Missa canonica* of 1856 to set an assemblage of biblical passages crafted by Brahms. Anxious homophonic queries ('Warum?') punctuating a densely chromatic fugal texture give way to imitative entries ascending in six parts, as humankind lifts its hands to God. A steadily progressing melody underlaid with imitative voices effectively conveys the patience of Job. The motet closes peacefully with a cantional setting of the Lutheran chorale *Mit Fried und Freud*.

Inspired by the polychoral compositions of Schütz, the three *Fest- und Gedenksprüche* op.109 (completed 1889), intended as celebratory pieces for the commemoration of German 'national festival and memorial holidays', reveal Brahms's fear of the divisions between 'Volk' and 'Reich' increasing in Germany at the time and his abiding faith in the 'strong armed man' Bismarck, who 'keepeth his palace in peace'. Simple chorale singing juxtaposed with more

learned responses in the first piece suggests disparate cultural levels, but eventually all are united in a strong society blessed by the Lord with peace. In the second number polyphonic disunity leading to dissonant desolation is countered by confident, militaristic order. With the final piece Brahms warned his fellow Germans against forgetting the lessons of history. An elaborate sevenfold Amen, each statement entering on a different diatonic pitch, celebrates the diversity of future generations, before closing on a unified plagal cadence. In the triptych of Motets op.110 a central four-part cantional hymn deriving from the chorale *Es ist genug* is flanked by two pieces for double choirs. The situation here is personal rather than communal: the wretched, sorrowful man, deceived by the false riches of the world, faces death, seeking comfort and salvation in God.

The seven lieder for mixed choir op.62 (1873–4) employ cantional texture and strophic form, as befits their legendary and folk themes. Each of these seemingly simple songs is characterized by one or two very sophisticated devices, for example, the restricted chordal movements of the delicately budding young heart that is gradually opened by Love in a series of tenderly blossoming canonic hemiolas in *Dein Herzlein mild* (no.4), and the anxious lament of the wind's bride in parallel 6–3 chords over intoned octaves in *Es geht ein Wehen* (no.6).

Brahms's final two sets of secular choruses mingle traditional Rhenish, Bohemian and Serbian verses with refined lyrics by Goethe, Rückert, Achim von Arnim, and Klaus Groth. While glimmers of hope can still be found in the *Lieder und Romanzen* op.93*a* (1883), the theme of the *Fünf Gesänge* op.104 (1886–8) is resigned acceptance of the realities of a lonely old age. Unfolding in strophic variation exquisitely tailored to reflect the changing nuances of their texts, these miniatures demonstrate Brahms's deftness in creating apt tonal analogies; for example, the close canon that portrays leaves gliding down one upon the other in *Letztes Glück* (no.3), and the double-dotted rhythms, hollow 5ths and chromaticism tempered only by a fleeting moment of resigned waltz in the poignant *Im Herbst* (no.5).

11. LIEDER AND SOLO VOCAL ENSEMBLES. Brahms was a prolific composer of song. Over a period of 43 years (1853–96) he published 190 solo lieder, 5 songs for one or two voices, 2 songs with obbligato viola, 20 duets and 60 vocal quartets for solo voices, all with piano accompaniment. His earliest extant solo song, the exuberant *Heimkehr* op.7 no.6, dates from May 1851, his final work in this genre, the profound *Vier ernste Gesänge* op.121 for bass and piano, from May 1896. The published songs, though, represent only a portion of his total output. Supressed were many youthful settings of poetry by Joseph von Eichendorff, Emanuel Geibel, Adalbert von Chamisso and Heinrich Heine, as well as mature songs on poems by Geibel, Friedrich Halm, Heine and Paul Heyse, and possibly Georg Friedrich Daumer, J.W.L. Gleim, Hans Schmidt and Friedrich Rückert as well.

The opus number of a Brahms song is not always a good indication of its chronological position. Typically he would compose songs singly or in small clusters, as he became interested in a particular volume of poetry or the verses of a certain poet. Some songs might be published soon, others would be consigned to his portfolio, where they could reside for many years before being selected, revised and positioned in a carefully ordered collection (characterized by Brahms as 'bouquets of songs'). He might also write a large number of songs within a relatively short period, for example, the 18 *Liebeslieder* waltzes of 1868–9 for solo quartet. Other concentrated outpourings occurred during autumn 1858 and summer 1864, and in March 1877. But many of the songs traditionally attributed to what Kalbeck called the 'Liederjahr of 1868' cannot be dated precisely, and others published then were written earlier, even as far back as 1853. Brahms's one extended cycle of solo songs, the *Magelone* Romances op.33, consists of pieces composed during at least three different times over an eight-year period (1861–9).

Brahms has often been criticized for the mediocre quality of his texts. Besides setting poems by leading writers such as Eichendorff, Goethe, Heine, Ludwig Hölty, Mörike, Rückert and Theodor Storm, he also settled upon lyrics by minor versifiers, fashionable in his time, such as Daumer (54 settings, including the two sets of *Liebeslieder* waltzes), Carl Candidus, Halm, Carl Lemcke, Adolf Friedrich von Schack and Max von Schenkendorff. The tendency cannot be explained by poor education or lack of literary taste. Like most cultured people of his day, Brahms was an avid reader of poetry by both established masters and contemporaries. Rather, the criterion he applied when selecting texts was whether the poem left room for enhancement by a musical setting. In 1876 he told George Henschel that all Goethe's poems seemed to him 'so perfect in themselves that no music can improve them'. The mood and substance of the poem must have some special quality that lends itself naturally to music and the poem must affect the composer spontaneously, though not so strongly as to destroy the objective detachment that Brahms felt necessary for the act of composing. Once attracted to a poem, Brahms would recite it aloud until he felt he could achieve in his musical setting a declamation so effortless and natural that its metre, rhythm and form would seem inevitable (in this regard Schubert was his ideal). Yet Brahms, especially in the early songs, did not hesitate to alter poems, even to delete whole stanzas, in order to adapt the text to his musical interpretation.

On occasion Brahms's choice of poem was the result of external circumstance or event. Hermann Levi called his attention to Goethe's late masterpiece *Dämm'rung senkte sich von oben*, and after he had produced a setting of his own rather too reminiscent of one of Brahms's early songs, Brahms accepted the challenge and composed one of his finest songs, op.59 no.1. Similarly, he wrote the quartet *O schöne Nacht* op.92 no.1 as a corrective to a setting by Heinrich von Herzogenberg, even borrowing his colleague's opening bars to make the point clear. At times the mood and content of his texts clearly reflected his own feeling at the time of composition. Many of the 14 songs and duets that poured from his pen in autumn 1858 seem to be exploring aspects of his relationship with Agathe von Siebold. His infatuations with other singers, including Ottilie Hauer and Hermine Spies, certainly would have lent a personal meaning to songs written for them to sing. The five Ophelia songs of 1873 WoO22 posth. were written with stage performance by the actress Olga Precheisen in mind. Brahms's most famous 'occasional' piece is the celebrated *Wiegenlied* op.49 no.4, composed in 1868 to mark the birth of Bertha Faber's second son and employing in its accompaniment an

Austrian folksong that the child's mother had sung to Brahms many years before. Likewise, the *Geistliches Wiegenlied* op.91 no.2 for alto, viola and piano, which employs as cantus firmus the old Catholic song *Josef, lieber Josef mein*, was written to celebrate a birth, that of the first child of the alto Amalie Joachim and her violinist/violist husband Joseph Joachim in 1864.

Although Brahms could evoke lighter moods – as in the perennial favourite *Vergebliches Ständchen* op.84 no.4, the muscular *Der Schmied* op.19 no.4, the more convivial of the vocal ensemble pieces and *Unüberwindlich* op.72 no.5, a jocular excursion into the realm of *opera buffa* – most of his songs explore such serious themes as the passion of love, the true heart unrewarded, the loneliness of the solitary human, the longing for home and the passing of life. Some of his finest songs animate Nature with the emotions of the human heart. Among the early songs several express the viewpoint of young women in emotional distress (for example, *Liebestreu* op.3 no.1, *Die Trauernde* op.7 no.5 and *Agnes* op.59 no5), while others evoke scenes from the age of chivalry in their texts and archaic musical gestures (*Vom verwundeten Knaben* and *Murrays Ermordung* op.14 nos. 2 and 3 and *Das Lied vom Herrn von Falkenstein* op.43 no.4). With advancing age an autumnal tone is sounded, lost opportunities in love are lamented and the spectre of death is faced (*Gestillte Sehnsucht* op.91 no.1, *Mein Herz ist schwer* and *Kein Haus, keine Heimat* op.94 nos.3 and 5, and *Immer leiser wird mein Schlummer* and *Auf dem Kirchhofe* op.105 nos.2 and 4). As a culmination along this path, yet unique in Brahms's output – and indeed in the repertory of art song – are the *Vier ernste Gesänge* op.121, on scriptural texts assembled by Brahms himself. Composed in expectation of the death of Clara Schumann, this austere cycle harks back to Baroque sacred monody to explore the meaning of human existence.

The sketches for Brahms's songs confirm an approach to texture that is also obvious in the finished works. Fluent, expressive and essentially diatonic melodies are supported by strong basses that rival the vocal part in vitality and often engage it in contrapuntal interplay. The interior voices, indicated in the sketches mostly by figured bass symbols and left to be worked out in detail at a later stage, enrich the miniature with further counterpoint and chromatic inflection. Such a texture, as well as Brahms's predilection for simple as well as varied strophic forms and for melodic formulations that are found in folktunes, reveals the deep roots of his lyrical art in the folksong ideal embraced by poets and composers since the Enlightenment.

At times it is difficult to distinguish Brahms's artless folklike songs from his artful arrangements of folk melodies. Brahms's original setting of the Lower Rhenish folk poem *Dort in den Weiden* op.97 no.4, for example, is in much the same vein as his arrangement of this poem using the 'folk' melody conveyed in the *Deutsche Volkslieder mit ihren Original-Weisen* of Kretzschmer and Zuccalmaglio, one of his favourite collections of folktunes. (That Kretzschmer and Zuccalmaglio heavily edited and rewrote many of their songs did not concern Brahms, who had little use for the authentic but inartistic collections of such folktune preservationists as Franz Böhme and Ludwig Erk.) In some songs, such as *Magyarisch* op.46 no.2 and *Sonntag* op.47 no.3, the folk melody with which the setting opens is wedded seamlessly to the original material that forms its completion. Brahms's first efforts at providing folktunes with piano accompaniments, dating from the 1850s and 60s, were inspired by the arrangements of Friedrich Silcher and Friedrich Wilhelm Arnold. The seven-volume set of 49 *Deutsche Volkslieder* WoO33 (1894), which marks the culmination of a lifelong involvement with the study of folk idioms, presents Brahms's solution to the 19th century agenda of uniting folk simplicity with urban amateur music-making.

Despite a preference for poems cast in 'Volksliedstrophe' and a dedication to strophic song, Brahms welcomed the challenge of more complex structures. Worthy of special note is the song *Die Mainacht* op.43 no.2, a setting of an Asclepiadean ode by Hölty. The song's first stanza demonstrates Brahms's seemingly effortless command of an intricate metrical scheme. A developmental central section follows the poem's structure less strictly, as does the varied and climactic close of the musical reprise. Such a form, allowing for continuing development as the poem unfolds, unites features of strophic song, developing variation and ternary form. (In this case, though, balance is achieved only by the deletion of the Hölty's second stanza.) Brahms also set to music a sonnet (the beautifully delicate *Die Liebende schreibt* op.47 no.5), a Sapphic ode (op.94 no.4) and a number of *ghazals* (in op.32). The extended ballads among the *Magelone* Romances op.33 posed special difficulties for the creation of musical continuity and unity.

Brahms's songs up to the 1860s can be classified into three periods. As a whole the 18 songs published in 1853–4 (opp.3, 6 and 7) can be distinguished from later ones by their highly expressive vocal writing, bold though not always purposeful chromaticism and sometimes melodramatic accompaniments. On the other hand, the tension between musical means and structure is well controlled in such folklike pieces as *Volkslied* and *Die Trauernde* (op.7 nos.4 and 5), based on traditional texts, and in the finest song of the group, *Liebestreu* op.3 no.1, which Brahms placed at the head of his first published set of songs. Three of the Eichendorff settings (op.3 no.6 and op.7 nos.2 and 3) evoke not only their texts but also the contexts of the poems in the novels from which they were drawn.

During the second period (1858–9), which yielded most of the songs in opp.14 and 19 and the duets op.20, Brahms focussed on folk and folk-inspired poems from Herder, Kretzschmer and Zuccalmaglio, Karl Simrock and Ludwig Uhland. The original versions of two Mörike songs – the poignant *Agnes* op.59 no.5, with folk-style mixed metres, and the ironic duet *Die Schwestern* op.61 no.1, with a bow to the *style hongrois* – also date from this period, together with three settings of Goethe: *Die Liebende schreibt* op.47 no.5, *Trost in Tränen* op.48 no.5 and the quartet *Wechsellied zum Tanze* op.31 no.1. Strophic form predominates, and the excesses of the earlier songs are dispelled by simpler melodies and accompaniments. The influence of Brahms's study of early music is at times evident in his harmonic language and use of counterpoint. The first of the folksong arrangements – 28 *Deutsche Volkslieder* (WoO32 post.) given to Clara Schumann and 14 *Volks-Kinderlieder* (WoO31) dedicated to the Schumann children – were prepared at this time.

A clear stylistic shift is apparent in the early 1860s, during Brahms's 'first maturity'. The ambitiously scaled

songs of the nine *Lieder und Gesänge* op.32 on poems by August von Platen and Daumer and the 15 Romances op.33 from Tieck's *Magelone* reveal operatic aspirations in their proportions, interior shifts of tempo and style, illustrative writing, strong harmonies, forays into quasi-recitative and 'orchestral' piano parts. Such songs as *Wie bist du, meine Königin* op.32 no.9 and *Von ewiger Liebe* op.43 no.1, however, strike a more balanced pose and point the way to the future. Although Brahms indulged in the grand scale again in the early 1870s with the tempestuously passionate and intensely sensual eight *Lieder und Gesänge* op.57 on poems by Daumer, most of his later songs fall within the parameters of the 'volkstümliches Kunstlied' established by Schubert.

Braille notation (Ger. *Blindennotenschrift*; *Punktmusikschrift*).

1. General. 2. The system.

1. GENERAL. Louis Braille (1809–52), blind from the age of three, became a pupil at the Institution Nationale des Jeunes Aveugles in Paris in 1819. From 1828 to the time of his death he held a professorship there. He was also organist of a Paris church. In 1829 he devised a tactile system of expressing both music notation and literary text by means of dots embossed into thick, stiff paper, to be deciphered by touch.

The originator of the idea of embossed dots was a French officer, Charles Barbier, who between 1819 and 1825 had invented an ingenious embossed-dot system whereby speech-sounds could be recorded. He also invented a frame and embossing awl which enabled blind people to write in that system; but although his method undoubtedly introduced (in rudimentary form) certain

TABLE 1

	Pitches										Rests
alphabetical:	A	B	C	D	E	F	G	H	I	J	
letters:	⠁	⠃	⠉	⠙	⠑	⠋	⠛	⠓	⠊	⠚	⠭
numerals:	1	2	3	4	5	6	7	8	9	0	
quavers:	–	–	–	C	D	E	F	G	A	B	𝄾
crotchets:				⠹	⠱	⠫	⠻	⠳	⠪	⠺	⠧
minims:				⠝	⠕	⠏	⠟	⠗	⠎	⠞	⠥
semibreves:				⠽	⠵	⠯	⠿	⠷	⠮	⠾	⠍

(the small dots do not appear in the embossing)

new and scientific principles destined to be the basis of what is now known as 'braille', his embossed characters were elaborate and difficult to decipher and understand. Each sign was derived from a pattern of twelve dots arranged in two vertical columns of six, and the outline was too extended to range itself under the fingertip. Louis Braille overcame this disadvantage by reducing the cell to two columns of three dots. By applying the method to musical notation as well he became the first to render it possible for blind people to write music for themselves. The dots may conveniently be numbered in two columns, counting downwards: 1–2–3 on the left, 4–5–6 on the right.

Braille did not live to see the general acceptance of the principles of his system; indeed his method was not officially adopted at the Paris Institution until about the time of his death, after which its adoption in Europe and America followed rapidly. Meanwhile John Alston (1777–1846) issued a *Musical Catechism with Tunes for the Blind* (Glasgow, 1838), followed by a *Selection of Scottish Songs* (Glasgow, 1844).

In 1868 the British and Foreign Blind Association, London (now Royal National Institute for the Blind), was founded by Dr T.R. Armitage (1824–91), himself blind, who, with his blind colleagues on the council, set to work to investigate the various methods of embossing reading material for blind people, ultimately deciding to adopt the Braille system. In 1871 a short 'key' to Braille music notation was published by the British and Foreign Blind Association, said to be the first published explanation in any language.

2. THE SYSTEM. At the outset it is important to mention that whereas printed music is graphical (pictorial), braille music notation is linear, with both the note and its value represented by a series of dots. The Braille method is founded on ten basic signs derived from the four upper dots of the complete cluster of six, as shown at the top of Table 1. Seven of these are assigned the pitch names C–B with the value of quavers. The addition of dot no.6 to any of these renders it a crotchet in value, the addition of dot no.3 a minim, and the addition of both dots a semibreve. The corresponding rests are also shown in Table 1. While only four time values of notes and rests are represented, each sign also stands for a note, or rest, of 1/16th its original duration (ex.1). A moment's reflection will suffice to convince any musician that the possibility of ambiguity is generally remote. However, where such ambiguity arises there are ways of distinguishing long and short note values.

Ex.1

Pitch is indicated by seven 'octave signs', which represent the particular octave in which a note appears. All notes from *c'* to *b'*, for instance, are said to belong to the fourth octave, and so on. These pitch or 'octave' signs are shown in Table 2. Thus a crotchet *c* would be represented as the third octave sign followed by the pattern of dots for crotchet C. Pitch signs precede the notes; however, in general, in order to reduce the signs to a minimum, it is unnecessary to restate the pitch for melodic steps of a 2nd or 3rd; for 4ths and 5ths only when the melodic leaps are into adjacent octaves; while skips of 6ths and wider leaps always necessitate fresh pitch signs.

Accidentals are formed by adding dot no.6 to the ordinary alphabetical characters for A, B and C (see Table 3). Key signatures are shown by quoting simply the number of flats or sharps. C major and A minor are implied by the absence of any statement as to key.

Intervals (for the notating of chords) are written as shown in Table 4. For compound intervals, the combination of two minims G and *d'* would be described in the form 'second-octave G minim with fourth-octave 5th', and the combination of three crotchets *c*, *g* and *e'* in the form 'third-octave C crotchet with 5th and 3rd'.

Besides the signs described, there are many others available to convey information contained in a printed score.

During the last few years, much work – on an international basis – has been carried out to ensure a uniformity of signs. However, while these are regarded as international, a wide range of formats is used for the layout of scores, so for the user to derive maximum benefit it is necessary to be conversant with as many as possible.

Because of the special demands of music from the 20th century, it has been necessary to devise appropriate signs to represent it. Where braille is not thought to be the best vehicle to convey aspects of some contemporary notations, it is possible to use either raised diagrams, or a combination of conventional braille with additional information in either a diagrammatic or spoken form.

The way in which braille music is transcribed from printed music notation has evolved considerably since the earliest days. At the outset each dot was embossed by

hand; later, to facilitate duplication, power-driven machines were used, enabling the dots required for each cell to be depressed at once, the master copies of the music then being stored on zinc plates. In another method of duplication, an original master could be created using a domestic brailling machine, the dots for each cell being formed by one depression of keys. The dots could then be transferred by a heat process onto a plastic sheet.

During more recent years, computer technology has greatly assisted with production as the dots can be replicated on the screen by using a program that redefines the letters F, D, S, J, K and L for dots 1 to 6 respectively. It will be readily recognized that this system offers much more flexibility for editing a score and storing completed items. Current developments centre upon investigation of an automated process of converting print music notation directly into its braille equivalent. For many years this has been recognized as a possiblity; however, it is still at an early stage. To date, the use of Musical Instrument Digital Interface (MIDI) files offers a partial solution, by which basic elements of a musical score can be reproduced from the input of musical sound from a music keyboard or synthesizer (*see* COMPUTERS AND MUSIC, §II). Another avenue of exploration is to take an already existing print music publishing program and to create a front-end package to undertake the translation, a process more complex than may at first be realized. For high quality production to be effected in an automated manner a program will need to take into account that the rules of braille music may be interpreted depending on a number of factors, and that the two systems are very different in their presentation. As a considerable amount of work is being undertaken to define standards with computer codes, this may well prove beneficial in the long term by solving some of the existing difficulties for an unlimited supply of automated high quality production of braille music.

As the heart of music is sound, combining sound alongside a tactile representation may again offer some future opportunities for making music accessible in a new and original way.

EDWARD WATSON/H.V. SPANNER/ROGER FIRMAN

Brăiloiu, Constantin (*b* Bucharest, 13/25 Aug 1893; *d* Geneva, 20 Dec 1958). Romanian ethnomusicologist, active in France. He became a naturalized French citizen in 1956. He studied music in Lausanne, then with Gédalge at the Paris Conservatoire (1912–14) and later in Romania. Initially he worked as a composer and music critic, publishing some piano pieces in Lausanne (1911), followed by other works in Paris and Bucharest, but he soon turned to the study of musical folklore; he served as professor of music history and aesthetics at the Académie Royale de Musique (appointed 1921) and taught at the Académie de Musique Religieuse de la Sainte Patriarchie (1929–35). From 1926 he was secretary-general of the Society of Romanian Composers and in 1928 founded and organized its folklore archives, which later became the Institute of Ethnography and Folklore. With a team of sociologists he did fieldwork in several Romanian provinces (1929–32). In 1938 he was appointed cultural adviser to the Ministry of Foreign Affairs in Romania and later worked in Berne (1943–6) as attaché to the Romanian Legation; with Eugène Pittard, director of the Museum of Ethnography, he founded the Archives Internationales de Musique Populaire (AIMP) in Geneva (1944). On settling in Paris (1948) he became a member of the Centre National de la Recherche Scientifique, and in this capacity worked in the ethnomusicology department of the Musée de l'Homme and at the Sorbonne Institute of Musicology.

Brăiloiu was one of the leading ethnomusicologists of his generation. All his work was inspired by the conviction that music in the oral tradition should be considered as being governed by a system, and that the principal task of the ethnomusicologist is to define this system, possible only through an adequate method of analysis. These ideas led to his important methodological, critical and theoretical writings. His principles of the 'synoptic' transcription of music ('Schiţa unei metode de folklore muzical', 1931) are an important contribution to ethnomusicological method and have been widely applied in Romania and France. His theories about the pentatonic system ('Sur une mélodie russe', 1953), rhythm in children's songs ('Le rythme enfantin', 1954), the *aksak* rhythm and Romanian popular sung verse are each fundamental developments in the history of ethnomusicology. However, he was not only a theoretician. Like Bartók, he did extensive fieldwork, and his collections of Romanian folksongs (particularly those for funerals, marriages and Christmas) are models of ethnomusicological description.

Brăiloiu was greatly concerned with the production of records, convinced that whatever the quality of the musical transcription, nothing could replace sound recording. He was responsible for 33 records published by the Society of Romanian Composers (Bucharest, 1930–43), 19 for the Archives Internationales de Musique Populaire (Geneva, 1948–9), four for the Musée de l'Homme (Paris, 1950) and 40 published by UNESCO and the Archives Internationales de Musique Populaire in the Collection Universelle de Musique Populaire Enregistrée (Paris and Geneva, 1951–8). A complete re-edition of these 40 records was published on a set of six LPs by the Musée d'Ethnographie of Geneva in 1984 with the original accompanying texts in French and English, an introduction by Laurent Aubert and a study of Brăiloiu's work by J.-J. Nattiez. Brăiloiu's collection of 'Musique populaire suisse' was similarly reissued in 1986 on two LPs. Earlier records of Romanian popular music, made between 1930 and 1940, were transferred on to three CDs in 1988 by the Archives Internationales de Musique Populaire of Geneva, with a foreword by Aubert and commentaries by Esperanţa Rădulescu. Thus, the important part of Brăiloiu's historical work as a collector is more readily available.

GILBERT ROUGET

Brailowsky, Alexander (*b* Kiev, 4/16 Feb 1896; *d* New York, 25 April 1976). American pianist of Ukrainian birth. His first teacher was his father, who had been a professional pianist. He then went to study with Pukhal'sky at the Kiev Conservatory, before moving to Vienna in 1911, where, along with an equally talented sister, he became a pupil of Leschetizky. He continued his studies with Busoni in Zürich following the outbreak of World War I and after the Armistice settled in France, making his début at the Salle Gaveau, Paris, in 1920. An exceptionally successful international career was to follow. In the summer of 1923 Brailowsky retreated to Annecy, where, over a period of eight weeks he devised a cycle of the complete solo works of Chopin (in six recitals), which was presented first in Paris in 1924 and later in New York (twice), Buenos Aires, Brussels, Zürich and Mexico City. His repertory, however, encompassed many of the big virtuoso works of the Romantics. He was particularly admired in Liszt. Brailowsky's interpretations, many of which were recorded, were noted for their extreme clarity of texture, cleanly articulated phrasing and technical panache. By no means an original artist, his warm personality and discernment in presenting effective recital programmes ensured a lasting success.

JAMES METHUEN-CAMPBELL

Brailsford, Humphrey. *See* BRALESFORD, HUMPHREY.

Brain. English family of instrumentalists.

(1) Aubrey (Harold) Brain (*b* London, 12 July 1893; *d* London, 20 Sept 1955). Horn player. The son of a horn player, he studied at the RCM under Borsdorf. In 1911 he became principal of the New SO, and in 1912 he toured the USA with the LSO under Nikisch; in 1913 he was principal horn for Beecham's adventurous touring opera company. Ethel Smyth wrote her Concerto for violin, horn and orchestra for Brain, who gave its first performance in 1927 in London and later played it in Berlin. After being first horn at Covent Garden, he became principal of the BBC SO, remaining until 1945 when he retired prematurely because of ill-health. He was also professor of horn at the RAM from 1923 until his death. Brain had an astonishing mastery of the horn, an exceptionally fine tone and a restrained and pure style. With his marked preference for the French instrument, he normally played a Labbaye hand horn built in 1865, with English-made valves added. While with the BBC SO he appeared frequently as a soloist and made several notable recordings, that of Mozart's Concerto K447 being particularly fine.

(2) Alfred Brain (*b* London, 24 Oct 1885; *d* Los Angeles, 29 March 1966). Horn player, brother of (1) Aubrey Brain. He was principal horn in Wood's Queen's

Hall Orchestra for many years and after World War I was invited by Beecham to play in the orchestra at Covent Garden. He emigrated to the USA in 1923, where he was principal horn of the New York SO (from 1923) and, for 14 years, of the Los Angeles PO. He became manager of the Hollywood Bowl concerts and from 1943 until his retirement played in the film studio orchestras of MGM and 20th Century Fox.

(3) **Leonard Brain** (*b* London, 11 April 1915; *d* London, 10 Nov 1975). Oboist, son of (1) Aubrey Brain. He studied at the RAM (1937–9), and on the outbreak of World War II joined the RAF Central Band. During the war he played in various orchestras under, among other conductors, Beer, Cameron, Wood and Sargent. He was a member of the Philharmonia Orchestra (1945–6), the RPO (1946–73) and the Dennis Brain Wind Quintet and Ensemble (from 1946). In 1963 he became professor of oboe at the RAM.

(4) **Dennis Brain** (*b* London, 17 May 1921; *d* Hatfield, 1 Sept 1957). Horn player, son of (1) Aubrey Brain. At the RAM he studied the horn with his father and the organ with G.D. Cunningham. After his début in 1938 he played much chamber music, including performances with the Lener, Griller and Busch quartets, and during World War II was principal horn in the RAF Orchestra. Afterwards, he performed frequently in Britain and on the Continent, and was the original principal horn of the RPO and later principal of the Philharmonia Orchestra. Works composed for him include Britten's *Serenade* and concertos by Lutyens, Gordon Jacob, Malcolm Arnold and Hindemith.

At first he used a French horn, on which his tone was full and round, but in 1951 he changed to a German double horn to produce a more robust sound. On both instruments he had an astonishing mastery of the entire compass; he played with great delicacy of execution in rapid staccato passages and with very subtle phrasing. In addition to his famous recording of Mozart's horn concertos with Karajan, he recorded concertos by Strauss and Hindemith, various chamber works, and Britten's *Serenade* with Pears and the composer. Like his father, he set a standard of horn playing that is difficult to surpass. He was killed in a car accident.

Dennis Brain

Brainard, Paul (*b* Binghamton, NY, 18 April 1928). American musicologist. He attended the University of Rochester and the Eastman School of Music, receiving the BA in 1949 and the MA in 1951. He continued his studies in Germany, working at Heidelberg University in 1954 and at Göttingen University under Gerber from 1954 to 1960; he received the PhD at Göttingen in 1960 with a dissertation on Tartini. After teaching at Ohio State University from 1960 to 1961 he was appointed to the faculty of Brandeis University, where he was chairman of the school of creative arts (1965–7) and chairman of the department of music (1969–72). In 1981 he was named Scheide Professor of music history at Princeton University; he was director of graduate studies there from 1982 to 1984. He was Tangemann Professor of Musicology at Yale University Institute of Sacred Music from 1987 until his retirement in 1993. Brainard's principal interest is the music history of the 17th and 18th centuries. He has written on the violin sonatas of Giuseppe Tartini and the sacred vocal music of J.S. Bach. A Festschrift has been published in his honour (*Critica musica: Essays in Honour of Paul Brainard*, ed. J. Knowles, Amsterdam, 1996). His wife Ingrid, also a musicologist, specializes in dance music, ranging from the 15th-century *Hoftanz* to 17th- and 18th-century dance treatises.

PAULA MORGAN

Brainard, Silas (*b* Lempster, NH, 14 Feb 1814; *d* Cleveland, OH, 8 April 1871). American music publisher. He moved to Cleveland in 1834 and with Henry J. Mould opened a music shop, Brainard and Mould, two years later. By 1845 the company was known as S. Brainard and in that year began to publish music; this business (known as S. Brainard & Sons from 1866) became one of the most important in the country.

Brainard published popular music, mostly pieces for piano and songs for solo voice with piano accompaniment, but also a few sacred hymns and quartets. Also in 1845 Brainard bought Watson Hall (built 1840, known as Melodeon Hall, 1845–60, and then Brainard's Hall until 1872), where many musical events took place. Brainard was a flautist who participated in and arranged works for musical organizations in Cleveland. The company opened branches in New York, Louisville and Chicago (where it was eventually based), and in 1864 established an influential journal, *Western Musical World*, which became *Brainard's Musical World* in 1869. Brainard married Emily Mould in 1840. Two of their seven children, Charles Silas Brainard and Henry Mould Brainard, assumed responsibility for the firm on their father's death, changing its name to S. Brainard's Sons. The firm ceased in 1931.

J.H. ALEXANDER

Brakkher, Georg. *See* BRACK, GEORG.

Bralesford [Brailsford], **Humphrey** (*b* Southwell, Notts., 29 Feb 1658; *d* Southwell, 1733). English composer. He was a chorister at Southwell Minster, 1672–4, and took the BA (1679) and MA (1682) at Corpus Christi College, Cambridge. He held positions as minor canon at the cathedrals in Peterborough (1681), Rochester (1682) and Canterbury (1684–92), and also served successively as rector of Wouldham, St Mildred's, Canterbury, and (from 1708) Hawksworth in his native county. On 21 April 1721 he was admitted to a prebend at Southwell Minster. His efforts to better his standing within the church are extensively documented, as is the disdain in which he was held by many, including the Southwell organist William Popeley.

Except for the anthem *Praise the Lord O my soul*, which survives incomplete at Lincoln Cathedral in copies dated 1719, Bralesford's compositions probably stem from his time in Canterbury. His service in C minor, probably his best work, is strongly treble-orientated but also includes many three-part verses for men's voices; it continued to be copied at Canterbury until the 1760s and was listed among its repertory in 1824. The verse anthem *God standeth in the congregation* includes some gauche attempts at contrapuntal writing for two or three solo voices. The sacred song *Full of Wrath* was erroneously attributed to Henry Purcell and included in that composer's collected works. Bralesford's services, like his other works, are deliberately 'modern' in style, with prominent use of triple metre, hemiola and an active basso continuo line. He was no contrapuntist, and his harmonies, perhaps meant to be expressively italianate, are often jarring.

ROBERT FORD

Brall. *See* BRANLE.

Brambilla. Italian family of singers.

(1) Marietta Brambilla (*b* Cassano d'Adda, 6 June 1807; *d* Milan, 6 Nov 1875). Contralto. After studying at the Milan Conservatory with Secchi, she made her début in 1827 at the King's Theatre, London, as Arsace in Rossini's *Semiramide*. During the season she sang two more travesty roles, Adriano (Meyerbeer's *Il crociato*) and Romeo (Zingarelli's *Romeo e Giulietta*), becoming a specialist in such parts. She sang Paolo at the first performance of Generali's *Francesca di Rimini* in 1828 at La Fenice. At La Scala (1838) she sang Cherubino and Arsace (*Semiramide*). Donizetti composed two trouser roles for her, Maffio Orsini in *Lucrezia Borgia*, first given at La Scala in 1833, and Pierotto in *Linda di Chamounix*, which had its première at the Kärntnertortheater, Vienna, in 1842. He also adapted the second tenor role of

Armando di Gondi in *Maria di Rohan* for her, adding an extra number, when the opera was performed at the Théâtre Italien in Paris (1843). She also sang Pippo in *La gazza ladra* and Smeton in *Anna Bolena*. In 1848 she retired. Her voice, a true contralto, ranged from *g* to *g″*.

(2) **Teresa Brambilla** (*b* Cassano d'Adda, 23 Oct 1813; *d* Milan, 15 July 1895). Soprano, sister of (1) Marietta Brambilla. She made her début in Milan in 1831 and sang throughout Italy with great success for 15 years. In 1846 she appeared in Paris as Abigaille in *Nabucco*. She sang Gilda at the first performance of *Rigoletto* at La Fenice (1851), while other Verdi operas in which she appeared included *Luisa Miller* and *Ernani*.

(3) **Giuseppina Brambilla** (*b* Cassano d'Adda, 1819; *d* Milan, 1903). Contralto, sister of (1) Marietta Brambilla. She made her début in Trieste in 1841 and sang in Rome, Milan and Barcelona; then in 1846 she was engaged at Her Majesty's Theatre, London, where she appeared as Maffio Orsini, the part created by her eldest sister. In 1853 she sang Maddaleno (*Rigoletto*) at La Scala.

(4) **Teresa** [Teresina] **Brambilla-Ponchielli** (*b* Cassano d'Adda, 15 April 1845; *d* Vercelli, 1 July 1921). Soprano, niece of (1) Marietta Brambilla. She studied with her aunts Marietta and Teresa. She made her début in 1863 as Adalgisa at Odessa, afterwards singing in Lisbon, Madrid, Paris, St Petersburg and Italy. In 1872 she sang in the revised version of Ponchielli's *I promessi sposi* at the Teatro dal Verme, Milan, and two years later married the composer. She was a famous interpreter of the title role of *La Gioconda*, and sang Paolina in a revival of Donizetti's *Poliuto* at the Teatro Costanzi, Rome (1883). Other roles that she sang included Leonora (*Il trovatore* and *La forza del destino*), Aida and Elsa (*Lohengrin*). She retired in 1889.

ELIZABETH FORBES

Brameley, Richard. *See* BRIMLE, RICHARD.

Bramley, John. *See* BRIMLEY, JOHN.

Bramston [Smyth], **Richard** (*b* *c*1485; *d* Wells, 1554). English musician and composer. He was admitted as a probationary vicar-choral of Wells Cathedral in January 1507. At that time Richard Hygons was about to retire as master of the choristers and organist; in July 1507 the chapter agreed that Bramston should take over Hygons's duties, in the first instance until September 1508. However, Bramston soon fell foul of the cathedral authorities. He was admitted permanent vicar-choral in January 1508 on condition that he be more diligent at his job in that year, but in May he was prematurely relieved of the duties of organist and master of the choristers, and in September 1509 was warned that unless he took sub-deacon's orders by Christmas he would be dismissed. He left Wells, and became master of the Lady Chapel choir at St Augustine's Abbey, Bristol; he scandalized the chapter at Wells by returning in February 1510 'in privy and disguised apparel' on an apparently successful mission to kidnap Farr, 'one of our best choristers', presumably to strengthen the Bristol choir.

Nevertheless, he was back at Wells as a vicar-choral by 1515, and remained there for the rest of his life, occupying a stall that did not necessitate his entering holy orders. His earlier exploits did not prevent him from being reinstated as organist and master of the choristers, offices which he seems finally to have given up in 1531. (At this date he appears also to have been known as Richard Smyth.) As well as being vicar-choral, he occupied a variety of administrative posts at the cathedral until he died, a man of considerable substance, in 1554.

Only two of his compositions survive. His *Recordare Domine testamenti tui* (*GB-Lbl* Add.17802–5), for four men's voices, is a setting of the responsory sung during the *Historia regum* (the readings from the books of *Kings* at Matins on the Sundays following Pentecost). An incomplete five-part Marian antiphon, *Marie virginis fecunda viscera* (ed. N. Sandon, Moretonhampstead, 1996) is in *GB-Cu* Peterhouse 471–4. He was said by Morley to have been one of the 'Practicioners' whose works he consulted during the preparation of his *Plaine and Easie Introduction* (1597); however, his surviving compositions demonstrate no conspicuous degree of either fluency or skill.

ROGER BOWERS

Branca, Giovanni Giacomo (*b* ?Rome, *c*1620; *d* Rome, after 1694). Italian violinist and composer. Probably the younger brother of the alto singer Cesare Branca, he first appeared as a violinist for the Nativity of the Virgin Mary at S Maria della Consolazione, Rome, on 8 September 1650. From 1658, under the name 'Jacomo violino', he was second violin (to Carlo Caproli and then to Carlo Manelli) for the festival at Saint-Louis des français, the French church at Rome. In February 1675 he was first violin of the concerto grosso for the performance of Antonio Masini's oratorio *S Eustachio* at the Pietà, Florence. On this occasion Corelli was last violin.

Only sacred vocal works by Branca survive, all in manuscript and mostly autographed, including three antiphons, an alleluia, offertory, psalm and canticle, and four motets (all *I-Rvat* in the music collection of the Cappella Giulia). Some bear dates (the earliest 1662 and the latest 1680) and most are 'per Sant'Apollonia', a convent in Trastevere where he was probably giving music lessons on a regular basis. In the antiphons and alleluia particularly, for two sopranos and basso continuo, one can detect the influence of instrumental, especially violin, technique.

JEAN LIONNET

Branca, Glenn (*b* Harrisburg, PA, 6 Oct 1948). American composer and performer. After studying theatre at Emerson College, Boston, he went to New York City (1976). With the composer and musician Jeffrey Lohn, he formed the experimental rock band Theoretical Girls (1977–9); even more extreme was Branca's other band, the Static (1978–9), with whom he delved more deeply into the densities and loudness of electric guitars. He began creating longer, more austere and challenging works for ensembles of electric guitars and the drummer Stefan Wischerth. Such landmark compositions as *The Spectacular Commodity* (1979) and *The Ascension* (1980) introduced a visceral, high-volume, ecstatic music unknown to rock or the avant garde. The harmonics of amplified electric guitars interacted and generated new kinds of sometimes unpredictable or uncontrollable acoustic phenomena. He developed larger ensemble works, such as 1981's 10-guitar *Indeterminate Activity of Resultant Masses*, or Symphony no.1, which combined guitars and drums with keyboards, brass and percussion. For his Symphony no.2 (1982), he devised mallet guitars

that gave the musicians more open strings. His research into the harmonic series led him to develop new tunings and new instruments, and he designed several keyboard instruments which were used to unique effect in his symphonies nos.3 (1983), 4 (1983) and 5 (1984). His notable later guitar works include symphonies nos.6 (1988), 8 and 10 (1994) and 12 (1998). A self-taught composer, Branca began receiving orchestral commissions in 1989, with his Symphony no.7. Although restrained in its loudness, his instrumental music can create sound fields of a hallucinatory density that rivals his guitar music. Among his orchestral works are the dance scores *The World Upside Down* and *Les honneurs du pied*, and the symphonies nos.9 (1994) and 11 (1998), both for chorus and orchestra.

WORKS
(*selective list*)

Orch: Sym. no.7, 1989; Shivering Air, 1989; Freeform, 1989; Harmonic Series Chords, 1989; The World Upside Down, dance score, 1990; Vacation Overture, 1991; Les honneurs du pied, dance score, 1991; Sym. no.9 (L'eve future), vv, orch, 1994; Sym. no.11 (The Nether Lands), Die Genenfeld, Part I, vv, orch, 1998

Gui/new-inst ens: (Instrumental) for Six Guitars, 1979; The Spectacular Commodity, 1979; Dissonance, 1979; Lesson no.1, 1979; The Ascension, 1980; Light Field, 1980; Lesson no.2, 1981; Mambo Diabolique, 1981; Sym. no.1 (Tonal Plexus), 1981; Indeterminate Activity of Resultant Masses, 1981; Music for Bad Smells, dance score, 1982; Sym. no.2 (The Peak of the Sacred), 1982; Sym. no.3 (Gloria), 1983; Acoustic Phenomena, 1983; Sym. no.4 (Physics), 1983; Sym. no.5 (Describing Planes of an Expanding Hypersphere), 1984; Chords, 1986; Music for the Murobushi Company, 1986; Hollywood Pentagon, 1986; Music for Edmond, theatre score, 1986; Sym. no.6 (Angel Choirs at the Gates of Hell), 1987, rev. 1988 as (Devil Choirs at the Gates of Heaven); Syms. nos.8 and 10 (The Mysteries), 1994; Movement Within, 1997; Sym. no.12 (Tonal Sexus), 1998

Other works: Anthropophagoi (music theatre), 1975, collab. J. Rehberger; Percussion, Electronics, and Mouth [5], 1975; What Actually Happened (music theatre), collab. Rehberger, 1976; Ballet Continuo, movement piece, 1976; Shivering Tongue Fingers Air (music theatre), 1977; 14 Songs for Theoretical Girls, 1977; Cognitive Dissonance, theatre, 1978; 20 Songs for the Static, 1978; Inspirez/Expirez, 1978; In Passions Tongue, op, 1986 [scene]; The Belly of an Architect (film score), str orch, 1986; Gates of Heaven, vv, 1989; Str Qt no.1, 1991; The Tower Opera, 1992, unperf.

COLE GAGNE

Branche, Charles-Antoine (*b* Vernon, Eure, 31 March 1722; *d* after 1779). French violinist, composer and teacher. He was the son of Nicole Picot and Antoine Branche, a dancing-master and possibly the musician who was active in Lyons in 1732. In 1748 Branche dedicated his *Première livre de sonates à violon seul et basse* (Paris) to his patron, the Marquis de Caraman. The following year he was first violinist at the Comédie-Française, playing with, among others, Piffet, Chartier, Perrin, Sénéchal and Blondeau until his retirement in 1764. He continued to teach the violin until 1779 after which his name no longer appears. He had contemporaries with the same surname: a first violinist in a 1767 concert at Orleans, and a woman who in 1771 published a book of *airs* and a sonata for harpsichord; it is not clear whether they were related.

Although the accompaniment to Branche's *Concerto à violon principal* (*F-Pc*) is lost, his debt to the Italian school and especially to Albinoni can be seen from the violin part. His 12 violin sonatas, filled with challenging double stops, ornamentations and syncopation, are graceful and natural in effect. Boisgelow, who made a catalogue of the king's library in 1787, said of them: 'These sonatas, in which one finds melody, harmony and excellent workmanship, have not had the success they deserve'.

ELIZABETH KEITEL

Branciforte [Branciforti], **Girolamo** [Hyeronimo] (*b* Palermo, *c*1560; *d* Palermo, *c*1620). Italian composer and poet. He was Count of Cammarata (or Camerata), Duke of S Giovanni and Knight of the Order of Alcantara, and the head of one of the most powerful noble families in Sicily. According to Micheli, Branciforte was in Rome during 1593, when his household included Sebastián Raval (whom he afterwards took with him to Sicily), Francesco Soriano and G.M. Nanino. In the preface to Monteverdi's *Scherzi musicali* (1607), Giulio Cesare Monteverdi mentioned the 'Conte di Camerata' among several other eminent composers who had adopted the *seconda pratica*; this reference is to Branciforte. He is also mentioned by Cerone in a list of 'illustrious persons whose musical compositions are clearly excellent'. Like Gesualdo, Prince of Venosa, Branciforte had his *Madrigali a cinque voci, libro primo* (Palermo, 1603) published with a dedication to himself, signed by the poet Luigi d'Heredia, who claimed that the pieces were childhood compositions, probably because social convention considered the profession of music unsuitable for a nobleman. The texts (see Caruso) are all erotic epigrams by Tasso, Guarini and their followers, including Livio Celiano; the music is lost. Branciforte's only other known compositions were three madrigals in the collection *Infidi lumi* (Palermo, 1603) which no longer survives. This collection consisted of five-part settings of madrigal texts by Luigi d'Heredia (see Razzoli Roio). All the poems end with the same line, borrowed from Tasso's *Aminta*: 'Specchi del cor fallaci, infidi lumi'.

PAOLO EMILIO CARAPEZZA, GIUSEPPE COLLISANI

Branco, Luís (Maria da Costa) de Freitas (*b* Lisbon, 12 Oct 1890; *d* Lisbon, 27 Nov 1955). Portuguese composer,

teacher, musicologist and critic. He studied composition in Lisbon privately with Augusto Machado and Tomás Borba, then with Désiré Pâque and Luigi Mancinelli. He also studied the piano and the violin. He completed his studies in Berlin with Humperdinck and Pâque (1910) and in Paris with Grovlez (1911). After his marriage he lived on Madeira for two years, returning to Lisbon in 1914. He taught at the Lisbon Conservatory (1916–39), later becoming its assistant director (1919–24). There he worked with Mota in the major reforms which began in 1918. At the same time he established himself as a composer, musicologist, critic and lecturer and slowly rose to a position of fundamental importance in Portuguese musical life. As a teacher, he also played an important role in the preparation of a new generation of composers. In the 1930s, he began to have difficulties with the political authorities and in 1939 he was forced to abandon all his official duties and to retire from public life. He dedicated his last years mainly to composition, the investigation of Portuguese early music and the publication of several books and articles. He also wrote music criticism in several newspapers and was the director of the periodicals *Arte musical* and *Gazeta musical*.

The first stage of Branco's evolution is, perhaps, the most interesting. After the first songs, he wrote a succession of symphonic poems where the influence of Debussy's Impressionism is present. *Vathek* (1913), constructed in the form of contrasting variations, also has some Expressionist touches and some quite atonal passages. On the other hand, the piano and chamber music of this period and the Violin Concerto (1916), in a Classical style, show the influence of Franck. After a period where national themes (traditional or literary) dominated his vocal and instrumental work, he returned to Classical forms with the First Symphony and to a new modal-diatonic language, found in the *Madrigais camonianos* and in songs like the cycle *A ideia*. As a musicologist, his contribution to the study and propagation of early Portuguese music was significant. Whatever the period and the field, all his work shows his technical assurance and wide culture.

WORKS

Choral: Manfredo (dramatic sym., L.F. Branco, after Byron), solo vv, chorus, orch, 1905; Tentações de S. Frei Gil (orat, C. de Oliveira), solo vv, chorus, orch, 1911; Tantum ergo (liturgical texts), 3vv, 1912; Lembrança (J. de Deus), 4vv male chorus, 1931; Marcha militar (C. Queirós), 4vv male chorus, 1935; 10 madrigais camonianos, chorus, 1935, rev. 1943; Noemi (cant., Branco, after Bible), solo vv, chorus, org, 1937; 2 redondilhas (L. de Camões), 4vv female chorus, 1943; 6 canções populares portuguesas, chorus, 1943; 5 redondilhas (Camões), female chorus, 1943–8; Cançao da pastora (Branco), solo v, 2vv male chorus, 1949; Dança pastoral (Branco), 4vv female chorus, 1949; 11 redondilhas (Camões), 3/4vv male/female chorus, 1949; 2 sonetos (Camões), male chorus, 1949; Cançao da pedra (A. Duarte), chorus, 1950; Roma não é mais senhora (F. Mouga), solo v, 2vv chorus, pf, 1950; Só te cantamos a ti (J. G. Ferreira), solo v, unison chorus, pf, 1950

Songs (1v, pf, unless otherwise stated): Aquela moça (A. Lima), 1904; Contrastes (J. Vasconcelos e Sá), 1904; A formusura (Camões), 1907; Canção portuguesa (trad.), 1907; Trilogie de la mort (C. Baudelaire), 1909; A elegia das grades (M. Beirão), 1911; La glèbe s'amollit (J. Moréas), 1912; O salutaris, 2vv, org, 1912; Sub tuum praesidium, 2vv, org, 1912; Tota pulchra es, 1v, org, 1912; Veni Sancte Spiritus, 1/2vv, org, 1912; 3 sonnets (M. Maeterlinck), 1913; 2 sonnets (S. Mallarmé), 1913; Minuete (Sardinha), 1915; O motivo da planície (A. Sardinha), 1915; Soneto dos repuxos (Sardinha), 1915; Soneto (L. de Camões), 1916; O canto do mar (A. Monsaraz), 1v, orch, 1918; Despedida (G. d'Annunzio), 1920, orchd 1949; Frivolidade (S. Teles), 1920; 2 poemas (L. Stechetti), 1920; Hino à razão (de Quental), 1934; Idílio (de Quental), 1934; A sulamita (A. de Quental), 1934; Conquista pois (de Quental), 1937; Sonho oriental (de Quental), 1941; A ideia (de Quental), 1943; 27 canções populares portuguesas, 1943, 8 canções populares portuguesas, 1v, orch, 1951; Cá nesta Babilónia (L. de Camões), 1951

Orch: Depois de uma leitura de Antero de Quental, sym. poem, 1908; Depois de uma leitura de Júlio Dinis, sym. poem, 1908; Depois de uma leitura de Guerra Junqueiro, fantasy, 1909; Os paraísos artificiais, sym. poem, after T. de Quincey and C. Baudelaire, 1910; As tentações de S. Frei Gil, sym. fragment after C. de Oliveira, 1911; Vathek, sym. poem, after W. Beckford, 1913; Minuete, 1915; O motivo da planície, 1915; Viriato, sym. poem after H. Raposo, 1916; Vn Conc., 1916; Balada, pf, orch, 1917; Cena lírica, vc, orch, 1917; Suite alentejana no.1, 1919; Sym. no.1, 1924; Sym. no.2, 1926; Suite alentejana no.2, 1927; 1640, sym. ov., 1939; Sym. no.3, 1943; Solemnia verba, sym. poem after A. Quental, 1951; Sym. no.4, 1952

Chbr and solo inst: Albumblätter, pf, 1907; Sonata no.1, vn, pf, 1907; Mirages I e II, pf, 1911; Str Qt, 1911; Ária, org, 1913; Coral, org, 1913; Sonata, vc, pf, 1913, rev. 1927; Luar, pf, 1916; 3 peças, pf, 1916; 2 danças, pf, 1917; 10 prelúdios, pf, 1918; Sonatina, pf, 1930; Rapsódia portuguesa, org, 1938; Sonata no.2, vn, pf, 1938; 4 prelúdios, pf, 1940

Film scores: Douro, faina fluvial (M. de Oliveira), 1934; Gado bravo (A. Lopes Ribeiro), 1934; Frei Luís de Sousa (Lopes Ribeiro), 1950; Algarve de além-mar (Lopes Ribeiro), 1952

Principal publishers: Pabst, Sassetti, Valentim de Carvalho

ADRIANA LATINO

Brâncuşi, Petre (*b* Brădiceni/Peştişani, Gorj district, 1 June 1928; *d* Bucharest, 27 Feb 1995). Romanian musicologist. At the Ciprian Porumbescu Conservatory (1950–55) he studied music history with George Breazul, theory with Victor Iusceanu and Dragoş Alexandrescu, harmony with Ion and Gheorghe Dumitrescu, musical form with Tudor Ciortea and folklore with Sabin Drăgoi. After a period as a music editor with various firms (1951–9) and as the director of Editura Muzicală (1959–62), he became music director of Romanian radio and television (1968–72). Concurrently he was professor of music history (1959–95) and rector (1972–82) at the conservatory. He was president of the Composers' Union (1977–82) and director of Opera Română (1982–9). His publications include educational handbooks, studies of Romanian music and two books on Breazul. He was awarded the prize of the Romanian Academy in 1965 and received the prize of the Composers' Union on numerous occasions.

VIOREL COSMA

Brand, Dollar. *See* IBRAHIM, ABDULLAH.

Brand [Brandt], **Jan.** *See* BRANT, JAN.

Brand, Max(imilian) (*b* Lemberg [L'viv], 26 April 1896; *d* Langenzersdorf, nr Vienna, 5 April 1980). Austrian composer, active in the USA. Following military service during World War I, he became a pupil of Schreker in Vienna (1919) and Berlin (1920); Krenek was a fellow student. He also studied with Alois Hába and came to know Erwin Stein. Initially employed as a teacher in Salzburg, Brand returned in 1924 to Vienna, where he heard a performance of Schoenberg's Wind Quintet, op.26. This inspired him to compose five settings of Else Laske-Schüller's *Hebraische Balladen* (1913) using the 12-note method. He was the first composer outside of Schoenberg's circle to employ the 12-note technique.

From 1926 to 1927 Brand wrote music for communist cultural productions. The success of his ballet-pantomime *Tragödietta* was crowned by the triumph of his opera *Maschinist Hopkins* (1929), a work that, although written out of economic necessity, confirmed Brand as a self-professed 'Theatermensch'. First performed in Duisburg, the opera appeared in 37 other venues and was performed in at least four languages until 1932 when fascism, of which it can be read as a parody, began to take hold. The opera was applauded for its multi-faceted contemporary references and its impassioned blend of Schrekerian lyricism and Neue Sachlichkeit. With its agenda of political confrontation between workers and the authority of human and technological power, Brand's dramatic and sonorous mélange of Expressionism and constructivism made comparisons with Fritz Lang's *Metropolis*, Brecht and Weill's *Dreigroschenoper* and Krenek's *Jonny spielt auf* inevitable. The work's popularity with audiences was matched by serious regard from contemporary composers. Its selection as the best operatic work of 1929 by a committee of the Allgemeiner Deutscher Musikverein that included Alban Berg led to its initial production.

In the early 1930s Brand founded the Mimoplastisches Theater für Ballett, and became co-director of the Wiener Opernproduktion at the Raimundtheater, the first Austrian company to perform (in a condensed version) Brecht and Weill's *Aufstieg und Fall der Stadt Mahagonny*. He also worked on experimental films in the same studio as Hanns Eisler, writing prize-winning music for *Der zerbrochene Krug*. Plans for a new work, *Requiem*, for the Berlin Staatsoper under Karl Böhm, were abandoned in 1933 for political reasons. The well-advanced score was lost in Prague, presumably when Brand, condemned as a Jew, was forced to flee Vienna in 1937. He travelled in 1939 to Brazil, where he worked briefly with Villa-Lobos, before settling in 1940 in the USA, where he became a naturalized citizen.

Brand's American career was characterized by participation in émigré musical life, continued involvement in music theatre, an enduring interest in popular culture and a commitment to electro-acoustic composition. He became co-director of the music and theatre wing of the Caravan of East and West, and was vice-president of the American League of Authors and Composers from Austria. *The Gate* (1944), a 'scenic oratorio' symbolic of his international perspective as a new American citizen, was given its première at the Metropolitan Opera. With *Notturno brasileiro* (1959), a composition facilitated by one of the first Moog synthesizers, Brand dedicated himself to exploring the musical potential of electronics. *The Astronauts: an Epic in Electronics* (1961) is a veritable paean to technological achievement incorporating recordings of John Glenn's conversations with NASA alongside Brand's own voice. His last large-scale electronic work, *Ilian 4* (1974), was one of a series based on Greek myths. His decision to return to Austria secured the future of electronic composition in Vienna; since his death his sound studio has become a living memorial where musical activities and performances continue to take place.

WORKS

Dramatic: Musik zum Zauberspiel 'Wrecken von Nijmegen' (incid music), 1924, Vienna, 1924; Die Wippe (ballet), 1925; Tragödietta (ballet), 1926, Stuttgart, Opernhaus, 1927; Maschinist Hopkins (3, M. Brand), op.11, Duisburg, Stadttheater, 13 April 1929; 3 Kurzfilme (film score) 1932–3, ?lost: Ausflug; Nächtliche Ruhestörung; Hände Hoch!; Requiem (1, Brand), 1932–3, lost; Der zerbrochene Krug (film score), 1933; Kleopatra (1, Brand), 1934–7, unfinished; Die Zauberreise (musical comedy, 3, R. Goetz), 1934; Die Chronik (scenic cant., Brand) 1938, unfinished; A Musical Feud (Spl, 1, Brand), 1941; The Gate (scenic orat, 2, Brand, M.A. Sohrab, J. Chanler), 1941–3, New York, Metropolitan, 23 May 1944; Stormy Interlude (1, Brand), 1955

Vocal: 3 Lieder (Lao Tse), S, pf, 1922; Nachtlied (F. Nietzsche: *Also sprach Zarathustra*), S, orch, 1922; 3 Lieder (J. Ringelnatz), 1924; 5 Balladen, op.10, 1v, 6 insts, 1927; 4 Lieder (F. Hölderlin), 1935; Kyrie Eleison, SATB, 1940; The Ballad of Lidice, 1v, pf, 1942; On the Day of Victory (L. Hughes), 1v, pf; Sehnsucht der Menscheit (G. Beer), 1v, pf

Inst: Suite and Fugue, pf, 1920; 3 Stücke, pf, 1921; Eine Nachtmusik, op.5, chbr orch, 1922, rev. 1931; Str Trio, 1923; 5 Dances, orch, 1926 [from Tragödietta]; Peca, fl, pf, 1940; United Nations, march, brass band, 1942; Turkey's Holiday, 3 cl; The Wonderful One-Hoss-Shay, orch, 1946; Night on the Bayous of Louisiana, tone poem, 1953; other pf works

El-ac: Triptych, ?1960; The Astronauts: an Epic in Electronics, 1961; Folksongs, 1v, elec, 1962; Ilian 1–2, 1966; Ilian 4 (elec ballet)

Brand, Michael. *See* MOSONYI, MIHÁLY.

Brandão, Paulo (José Rebelo) (*b* Lisbon, 21 Jan 1950). Portuguese composer and horn player. He studied at the Fundação Musical dos Amigos das Crianças (1954–64). From 1965 he studied at the Lisbon Conservatory and at the Academia de Amadores de Musica, with professors Adácio Pestana, Artur Santos, Elisa Lemos, Capdeville and Álvaro Salazar, graduating in 1979. In 1976 he attended the composition courses in Darmstadt and also seminars with Heinz Henings, Peter Sefcik, Corboz, Vassili Arnaudov and others. He has directed the Coral Publia Hortensia, which he also founded, since 1973 and the Grupo Coral Arsis since 1989. As a horn player he has often played his own compositions and from 1968 until 1994 he was the soloist in the Portuguese navy's brass band. He has been awarded various prizes for composition and has taken part in selection panels for composition and choir competitions. He has been a professor at the Lisbon Conservatory since 1985. His activity as composer is not restricted to the concert hall, but he has also composed extensively for cinema, radio, television and theatre. His early music shows the influence of the Second Viennese School and of Peixinho, but in later pieces the influence of Morton Feldman is increasingly evident.

WORKS

SÉRGIO AZEVEDO

Brande. *See* BRANLE.

Brandenstein, Johann Konrad (*b* Kitzingen, *c*1695; *d* Regensburg, 21 Nov 1757). German organ builder. He was presumably a son of Johann Adam Brandenstein, an organ builder of Kitzingen. He settled at Stadtamhof, near Regensburg, and from 1725 built a considerable number of organs in the old Bavarian region, including those in Rohr (1725), Metten (1726), Weltenburg (1728), Regensburg Upper Minster (1744) and Frauenzell (1752). Most of his organs are very imposing structures; his greatest stood in the church of the former Cistercian abbey in Waldsassen (1738). Brandenstein's status as an organ builder was equivalent to that of König in Ingolstadt and Egedacher in Passau. His pupils included Ferdinand Stiefel (1737–1818) and his own two sons-in-law Johann I.P. Hillebrand (1710–44) and Johann Michael Herberger, who after Brandenstein's death succeeded him as head of his workshop.

THEODOR WOHNHAAS

Brandis Quartet. German string quartet. It was formed in 1976 by members of the Berlin PO: Thomas Brandis, Peter Brehm, Rainer Moog (soon replaced by Wilfried Strehle) and Wolfgang Boettcher. That year Boettcher left the Berlin PO to devote more time to solo work and teaching, and Brandis followed suit in 1983, but Brehm and Strehle were still playing in the orchestra in 1999. The ensemble's fine tone and strong structural sense are best heard in the Viennese Classics and in music by such 20th-century composers as Hindemith, Weill and Schulhoff. Much of its repertory has been recorded, including the Concerto for string quartet and orchestra by Martinů. It has given the premières of works by Frank Michael Beyer, Gottfried von Einem, Giselher Klebe and Helmut Eder.

TULLY POTTER

Brandmüller, Theo (*b* Mainz, 2 Feb 1948). German composer and organist. He studied composition with Klebe in Detmold (1970–75), with Kagel in Cologne (1976–7), with Cristobal Halffter in Madrid, and with Messiaen in Paris (1977–8), where he also studied the organ with Litaize. In 1979 he was appointed professor of composition at the Saarbrücken Musikhochschule and in 1982 accepted the post of honorary organist at the Ludwigskirche, Saarbrücken. His honours include the Villa Massimo Rome prize (1979) and the Saarland grand arts prize (1986). Brandmüller's extensive body of work was influenced early on by Skryabin, Kagel and the music of the French school. Initially eclectic with elements of both humour and ritual, his music became more economical after 1990. Although constructed of highly concentrated materials, these later works display a powerful lyricism.

FRIEDRICH SPANGEMACHER

Brando (It.: 'branle'). Generally, the 16th-century Italian equivalent for BRANLE. The word also designated a particular kind of social and theatrical set dance only tenuously related to it. Castiglione and G.B. Doni mentioned the brando as a social dance, agreeing that its most important distinguishing feature was that it was best performed in costume. Like the *moresca*, the brando was often part of a mascherata or *intermedio*.

The dancing-master Cesare Negri described both social and theatrical brandos in *Le gratie d'amore* (1602), including 'la musica della sonata con l'intavolatura del liuto del brando'. Negri consistently referred to brandos together with 'balletti' and 'balli', all multi-sectional dances reminiscent of or directly incorporating individual dances such as the corrente, pavan or *gagliarda*; the musical accompaniments to his choreographies are not labelled, so that one must read the dance descriptions to ascertain which sections are thought to be 'in corrente', which 'in *gagliarda*' and so on. In addition to describing social brandos for sets consisting of two to four couples with four to nine musical sections, Negri mentioned three theatrical brandos he created. Two were part of a mascherata staged in 1574: a brando for the kings and queens of each of the four elements was the first of a series of allegorical dances and madrigal performances, ultimately culminating in a brando for the entire masked company of 82 performers. Rather more detail (and a musical accompaniment) is given for a brando that followed the last *intermedio* to a performance of G.B. Visconti's pastoral comedy *Armenia*, given in Milan in 1599 for the Infanta Donna Isabella of Spain and Archduke Albrecht of Austria. The brando, for four couples, is not pantomimic as has been suggested, but simply an extended version of the court dance, with the performers costumed as shepherds and nymphs. Both the detailed choreography and the 11 sections of the 'sonata del brando' were re-created by M. Dolmetsch (*Dances of Spain and Italy from 1400 to 1600*, London, 1954/*R*).

Few pieces specifically called 'brando' survive in 16th- and 17th-century collections of dance or chamber music. Those included in Megalaniscus's *Suonate da camera a tre*, published by Hendrik Aertssens (iii) in 1692 (incorrectly attributed to Corelli), are straightforward binary dances in duple metre, mostly cast in two repeated eight-bar strains. The brandos in Salvatore Mazzella's *Balli, correnti, gighe, sarabande, gavotte, brande e galiarde* (1689) are rather more interesting historically, for the triple-metre dances called 'brande' in the title are each called 'minuetta' in the print itself, lending some credence to the often debated idea that the minuet derived from the branle.

For bibliography *see* BRANLE.

Brandram, Rosina (Moult) (*b* Southwark, London, 2 July 1845; *d* Southend, 28 Feb 1907). English contralto. She was engaged by Richard D'Oyly Carte as an understudy for Isabella Howard Paul in the original production of Gilbert and Sullivan's *The Sorcerer* (1877) and filled her place towards the end of the run. She played Kate in the New York première of *The Pirates of Penzance* (1879), and assumed the principal contralto parts in Carte's London company, beginning with Lady Blanche in *Princess Ida* (1884). Brandram was intimately connected with the Gilbert and Sullivan operas, remaining with the D'Oyly Carte company for well over 20 years. She created Katisha in *The Mikado* (1885) and the Duchess of Plaza-Toro in *The Gondoliers* (1889) and took principal roles in Sullivan's later comic works, including Dancing Sunbeam in *The Rose of Persia* (1900), and in Edward German's Savoy operas.

She performed only in comic opera, nearly always in roles written for her, and seldom appeared outside London. Although typecast in matronly, sometimes unsympathetic roles, Brandram was not unattractive. Her deep, rich voice was characterized by Gilbert (in a speech to the O.P. Club, 30 December 1906) as 'full-bodied burgundy'.

FREDRIC WOODBRIDGE WILSON

Brandt, Aleksander. *See* BANDROWSKI-SAS, ALEKSANDER.

Brandt [Brant, Prant, Prantner], **Jobst** [Jodocus, Jost] **vom** [zum] (*b* Waldershof, nr Marktredwitz, Upper Franconia, 28 Oct 1517; *d* Brand, nr Marktredwitz, 22 Jan 1570). German composer and administrator. He came from an Upper Palatinate family of landed gentry and administrators, traceable back to the early 13th century. He matriculated at the Palatinate University of Heidelberg in 1530 at the age of 12. At about the same time he evidently became a pupil at the electoral choir school where, together with Georg Forster and Caspar Othmayr, he received his musical training under Lorenz Lemlin. After further studies, possibly in law, he entered electoral service under Ludwig V (*d* 1544). Early in 1545 the Elector Friedrich II appointed him his personal servant and in 1548 installed him as the official in charge of the monastery at Waldsassen, Upper Palatinate (a post formerly held by his father) and as a judge in the district of Liebenstein, where Waldsassen was situated. He must have lost the former position between July 1553 and June 1555. In the latter, which he seems to have held until 1561 or 1562, he and other employees of the monastery were affected by the aspirations of Count Palatine Ottheinrich (Elector 1556–9) in the cause of the Reformation: from March to June 1556 he was kept in custody, first at Amberg, then at Neumarkt, Upper Palatinate, though, like the others, he continued to be involved in religious controversy until the end of 1557. By March 1558 he was again back at his official duties in Liebenstein. After about 1562 he seems to have held no official position and to have retired to his family estates at Brand, where he devoted himself to the management of his properties and fiefs and to composition. He was a Lutheran by confession, perhaps from as early as 1545. Towards the end of 1569 he lay ill for several weeks at Eger (now Cheb), Bohemia, as Clemens Stephani, the editor of his *Geistliche Psalmen* (1572–3), stated in his preface. When

there was no improvement in his condition he returned to Brand and died shortly afterwards.

Most of Brandt's known secular music was published relatively early in his life, nearly all his sacred music posthumously. The fact that there are no pieces by him in the first two parts (RISM 1539[27], 1540[21]) of Forster's large song collection suggests that the two childhood friends came together again only after they had been published. Brandt was certainly composing by the early 1540s, for ten pieces by him are listed in the so-called Heidelberg Chapel Inventory (1544). Forster evidently had a high opinion of him, for of the 382 pieces in his collection no fewer than 51 (in the third, fourth and fifth parts) are by him (ascribed with the initials 'J.V.B.') – more than there are by Forster himself, Lemlin, Othmayr, Senfl or Zirler; moreover, Forster dedicated the third part (1549) to him. In 1572 Stephani, a representative of conservative opinion, praised him as an 'excellent composer' and declared his *Geistliche Psalmen* a 'masterpiece'. Like his Heidelberg companions Forster, Othmayr and Zirler, he remained an amateur, considering perhaps that professional status would have been inappropriate for a man of his high birth. Even so, he was a notably competent composer. His pieces show great formal variety, for example in the construction of opening and – in many cases expanded – closing sections, as well as in the location of the cantus prius factus in polyphonic textures. His basic approach was clearly that of a composer of polyphonic songs in motet style. His music abounds in imitation, there are ostinato contrapuntal motifs and even here and there strict canons, as well as 'quodlibet' movements based on the simultaneous statement of pre-existing melodies. One of the more progressive features of his music is the flexibility with which the cantus firmus is used: in five pieces it actually appears in the treble, and other pieces are based on double cantus firmi. Brandt also liked full textures: more than half of his secular pieces are in five parts, and one, which contains a canonic duo, is in eight.

The works in Brandt's *Geistliche Psalmen* are less well known; the vagans partbook is lost, so not all of them have survived complete. In addition to 35 complete four-part pieces, the collection includes five pieces in five parts, six in six, and one each in seven and nine, besides one in three parts (despite the title-page there are none in eight). Brandt generally went far beyond the technique of earlier composers of such music, for example Johann Walter, though in some of the six-part (all of which include strict canonic writing) and seven-part works he used a conservative technique in which the cantus firmus is stated in relatively long note values; more often than not it is in the treble. The counterpoint is rich in imitation; chordal writing and chromaticism occur infrequently. Of particular note is the nine-part work that concludes the collection; at several points it involves the use of *cori spezzati* technique, and it has no cantus firmus. Nor do Brandt's two Latin motets, which stand on the periphery of his output.

WORKS

complete list in Haase, 1967

SACRED VOCAL

Der erste Theil geistlicher Psalmen und teutscher Kyrchengeseng, 4–9vv, insts (incl. trbns) (Eger, 1572–3)

Motet, 6vv, 1558[4]

Hymn, 5vv, lost, cited in *Aller meinss genedigen Herrn Gesang, inventirt und beschriben Anno* [*MD*] *XLIIII* (Heidelberg Chapel Inventory, 1544), *D-HEu*, codex Pal.Germ.318

HANS HAASE

Brandt, Marianne [Bischoff, Marie] (*b* Vienna, 12 Sept 1842; *d* Vienna, 9 July 1921). Austrian mezzo-soprano. She studied in Vienna and in Baden-Baden with Viardot, making her début at Olmütz in 1867 as Rachel (*La Juive*). She first appeared in Berlin in 1868 as Azucena, and was engaged there until 1882. After making her London début at Covent Garden in *Fidelio* (1872), she sang Amneris in the first Berlin performance of *Aida* (1874) and Waltraute in *Götterdämmerung* during the first Bayreuth Festival (1876). At Bayreuth she also sang Kundry at the second performance of *Parsifal* (1882). Her other Wagner roles included Brangäne, which she sang at the first Berlin (1876), London (1882) and New York (1886) performances of *Tristan und Isolde*, Ortrud, Fricka (*Die Walküre*), Magdalene, Adriano (*Rienzi*) and Erda (*Siegfried*). The extensive compass (*g* to *d'''*) of her large and well-projected voice enabled her to sing both soprano and mezzo-soprano parts; at the Metropolitan, where she appeared from 1884 to 1888, her roles included Leonore, Fidès (*Le prophète*), Siébel (*Faust*), Astaroth, in the American première of Goldmark's *Die Königin von Saba* (1885), and Eglantine, which she sang at the first American performance of Weber's *Euryanthe* (1887). After her retirement in 1890 she taught in Vienna.

ELIZABETH FORBES

Brandt, Willy [Vasily] **(Georgiyevich)** (*b* Coburg, 1869; *d* Saratov, 2 Feb 1923). German trumpeter, conductor and composer. He studied at the Coburg Music School with Carl Zimmermann. In the summer seasons of 1887 and 1888 he played in the spa orchestra of Bad Oeynhausen, and in the winter seasons 1887–90 in the Helsinki Orchestral Association under Kajanus. From 1890 to 1909 he was first trumpeter (from 1903, first cornettist) in the Bol'shoy Theatre Orchestra in Moscow. He was professor of trumpet from 1900 to 1912 at the Moscow Conservatory and from 1912 to his death at the Saratov Conservatory, where he also managed and conducted the orchestra. Brandt had a powerful tone and is regarded as one of the founders of the Russian school of playing; one of his most influential pupils was Mikhail Tabakov. His cornet survives in the Bad Säckingen Trumpet Museum. His compositions include two Konzertstücke in F minor op.11 and E♭ op.12 (1910), which are still in the repertory, short pieces for cornet, as well as 34 orchestral studies for trumpet and 23 solo studies.

EDWARD H. TARR

Brandts Buys [Buijs]. Dutch family of musicians.

(1) **Cornelis Buys** (bap. Amsterdam, 17 June 1757; *d* Zaltbommel, 2 March 1831). Organist and carillonneur. He was appointed to positions in Kampen (1783) and Zaltbommel (1791).

(2) **Cornelis Alijander Brandts Buys** (*b* Zaltbommel, 3 April 1812; *d* Deventer, 18 Nov 1890). Organist, carillonneur, conductor and composer, son of (1) Cornelis Buys. He succeeded his father in Zaltbommel (1834) and from 1840 played an important role in musical life in Deventer. He composed chamber music, male choruses, orchestral works and piano pieces in a Mendelssohnian style. An edition by M. Degenkamp and D. van Heuvel of his Scherzo op.22 was published in the series Nederlandse Orkestmuziek (Arnhem, 1995).

(3) **Marius Adrianus Brandts Buys** [Buijs] (i) (*b* Deventer, 31 Oct 1840; *d* Eerbeek, 13 Jan 1911). Organist, conductor and composer, son of (2) Cornelis Alijander Brandts Buys. In 1864 he was appointed organist in Zutphen, where he gave a series of historical recitals in 1869.

(4) **Ludwig Felix (Willem Cornelis) Brandts Buys** (*b* Deventer, 20 Nov 1847; *d* Velp, 29 June 1917). Organist, conductor and composer, son of (2) Cornelis Alijander Brandts Buys. He was conductor of the Rotterdam Male-Voice Choir (1874–91) and was best known for the Sieben Lieder op.21 (1876–7), his chromatic Latin psalms for male chorus, and for his national songs.

(5) **Henri (François Robert) Brandts Buys** (*b* Deventer, 20 April 1850; *d* Ede, 16 Oct 1905). Conductor and composer, son of (2) Cornelis Alijander Brandts Buys. His Wagnerian concert drama *Albrecht Beiling* (1881) was performed as an opera in Amsterdam in 1891.

(6) **Jan (Willem Frans) Brandts Buys** [Buijs] (*b* Zutphen, 12 Sept 1868; *d* Salzburg, 7 Dec 1933). Composer, son of (3) Marius Adrianus Brandts Buys (i). After studying the organ, piano and theory with his father he became organist at the Protestant Broederenkerk (1884–9), also giving organ recitals and playing the piano in chamber concerts. He then studied at the Raff Conservatory in Frankfurt, with Anton Urspruch as his composition teacher. In 1892 he moved to Vienna, where he worked for the publishers Cranz, Universal Edition (from 1901) and Doblinger (from 1902). In 1899 he won second prize to Ernő Dohnányi in the Bösendorfer competition with his Piano Concerto op.15. Influenced by Dohnányi's example, he wrote some chamber works for strings, which received performances from 1901. From 1907 the Wiener Concert-Vereinorchester, with which he had appeared as a keyboard soloist, gave the premières of several of his compositions. In 1910 he settled near Bozen (Bolzano), but he returned in 1914 to Vienna to consolidate his success as a composer. Disappointed at the passing of old Viennese society, however, he moved in 1920 to Loznica, near Dubrovnik, finally returning to Austria in 1928 and settling in Salzburg.

Jan Brandts Buys composed in a generally conservative style that bears traces of influence from several of his slightly older contemporaries, although some more up-to-date elements are found in such works as the *Sizilianische Serenade* for string quartet op.28 (*c*1911) and the serious opera *Der Eroberer* (1917). Most of his other operas belong to the undramatic comic 'Spieloper' type, the most successful being *Die Schneider von Schönau* (1915), in which leitmotif and folklike melodies are used. The orchestration is light, with flute and glockenspiel predominating. Wagnerian traits are revealed in *Das Veilchenfest* (1905) and in the orchestral *Illyrische Ballade* op.24 (1907). The songs with flute or string accompaniment are of special interest, but after 1920 the quality of his works declined.

WORKS
(*selective list*)

MSS in A-Smi and NL-DHgm; opus numbers 1–4 are duplicated

Stage: Schluck und Jau (incid music, G. Hauptmann), *c*1901; Das Veilchenfest (comic op, V. Heindl), 1905, Berlin, Komische, 3 Dec 1909 (Vienna, 1905); Glockenspiel (comic op, prol, 1, B. Warden and J.M. Welleminsky), 1912, Dresden, Kgl, 4 Dec 1913 (Leipzig, 1913); Die Schneider von Schönau (comic op, 3, Warden and Welleminsky), 1915, Dresden, Kgl, 1 April 1916 (Mainz, 1916); Der Eroberer (serious op, 3, Warden and Welleminsky), 1917, Dresden, Kgl, 14 Jan 1918 (Munich, 1917); Der Mann im Mond (comic op, 3, Warden and Welleminsky), ?1918, Dresden, Staatsoper, 18 June 1922 (Mainz, 1921); Micarême (comic op, 1, Warden and Welleminsky), 1919, Vienna, Ronacher, 4 Nov 1919 (Vienna, 1920); Traumland (comic, 3, Brandts Buys), 1927, Dresden, Staatsoper, 24 Nov 1927 (Leipzig, 1927); Hero und Leander (serious, 5, F. Grillparzer) 1929; Ulysses (comic op, 8 scenes, W. Solander) (Starnberg, n.d.)

Vocal (1v, pf, unless otherwise stated): Chanson and Berceuse, 1v, vc, pf (V. Hugo, H. Chantavoine), ?1889; 6 Lieder, op.2 (Frankfurt, 1891); 6 liederen (Utrecht, ?1891); 4 Nachtliedjes (F. van Eeden) (Amsterdam, 1892); Die Liebe, Bar, SATB, orch, op.6 (Hamburg, 1897); Der Abend kommt (M. Kalbeck) (Vienna, 1899); Die Nachtigall, 1v, fl, hp; 6 Lieder, op.18 (Vienna, 1901); 4 Lieder, op.22 (Vienna, 1908); 3 Lieder, 1v, fl, pf, op.20 (Munich, 1911); 3 Lieder, 1v, 2 vn, va, vc, op.33 (Leipzig, 1916); 6 Lieder, op.30 (J. von Eichendorff) (Leipzig, 1917); 6 Hafislieder, op.38 (Leipzig,

1917); 4 Lieder, op.42 (Vienna, 1925); Bergpsalmen, 1v, orch, op.52 (J. von Scheffel)

Orch: Konzertstück, pf, orch, op.3 (Hamburg, 1894); Des Meeressang (Hamburg, 1895); Suite, hp, hn, str, op.7 (Hamburg, 1897); Ov., op.12 (Leipzig, 1899); Pf Conc., op.15 (Berlin, 1899); Vorspiel Neidhart Fuchs, 1905; Illyrische Ballade, op.24, 1907; Tancred, vc, orch, op.35 (Leipzig, 1916); Oberon, op.27 (Leipzig, 1919); Bilder aus dem Kinderleben (Mainz, 1922); Dyptichon, op.57, 1930, ed. (Starnberg, 1961); Poetischer Spaziergang, op.50 (Cologne, 1931); Aus der spanischen Reitschule, op.55, *c*1930, ed. (Starnberg, 1961); orch piece, op.58, *c*1930; Salzburger Serenade, op.51 (Cologne, 1933)

Chbr: Herfstzang, va, pf, 1889; Pf Trio, op.1 (Frankfurt, 1891); Qnt, fl, 2 vn, va, vc (Vienna, 1903); Suite im alten Stil, str qt, op.23 (Vienna, 1908); Romantische Serenade, str qt, op.25 (Vienna, 1910); Sonata, vn, pf, op.26 (Vienna, 1910); Str Qt, op.19 (Munich, 1911); Sizilianische Serenade, str qt, op.28 (Leipzig, 1917); Aus dem Westöstlichen Divan, 2 vn, va, vc, pf, op.32 (Leipzig, 1917); Sextett, 3 vn, 2 va, vc, op.40 (Leipzig, 1917); Suite, vn, pf, op.43 (Vienna, 1925)

Pf: 6 lyrische Stückchen und Variationen, op.1 (Zutphen, 1883); Sonata, b; Variationen, G, 1890; Aus dem Lande Rembrandt's, op.5 (Frankfurt, 1894); 3 Klavierstücke, op.9 (Hamburg, 1896); 5 Characterstücke, op.11 (Leipzig, 1897); Moderne Studien, opp.13 and 14 (Brussels, 1899); Tänze und Weisen (Leipzig, 1900); 3 pieces for Alma, 1912–21; 3 Klavierstücke, op.29 (Leipzig, 1917/*R*); Ave Samobor, op.37 (Leipzig, 1917); Capriccio fugato (Leipzig, 1917)

Org: Orgel en harmonium, op.3 (Zutphen, 1889); Nieuw Leven (Zutphen, 1889); Onze koraalboeken (Zutphen, 1890–92); Toccata en Fuge, g (Zutphen, 1891); Choral, 1915; Hochzeitsmarsch (Leipzig, 1917); Patria, op.36 (Leipzig, 1917)

(7) **Marius Adrianus Brandts Buys** [Buijs] (ii) (*b* Zutphen, 9 Nov 1874; *d* Velp, 21 July 1944). Conductor and composer, son of (3) Marius Adrianus Brandts Buys (i). As conductor of the Arnhem section of Toonkunst (1915–42) he gave annual performances of Bach's *St Matthew Passion* from 1923. His compositions include Singspiele for children and a *Requiem voor de gevallenen* for chorus and orchestra. He published a book on analysis, *Muzikale vormleer* (Arnhem, 1934), and some articles on the art of carillon playing.

(8) **Hans** [Johann] **(Sebastian) Brandts Buys** [Buijs] (*b* Warnsveld, 28 June 1905; *d* Hilversum, 21 Feb 1959). Conductor, composer and writer on music, son of (7) Marius Adrianus Brandts Buys (ii). His music teachers included Sem Dresden and Johan Wagenaar. From 1930 to 1933 he studied the harpsichord. He conducted student ensembles in Amsterdam (from 1930), Utrecht (1942) and Hilversum (1943), and gave private performances of Bach cantatas during World War II. From 1945 he directed the Arnhem section of Toonkunst and from 1955 the Hilversum section as well. He taught at the Amsterdam Muzieklyceum from 1938 and the Rotterdam Conservatory from 1949, and was appointed director of the Goois Muzieklyceum Hilversum in 1951. He specialized in the performance of Baroque works with small, non-professional forces; like his father, he put on Bach's *St Matthew Passion* each year in Arnhem, in performances noted for their sprightly tempos. He also promoted the music of his contemporaries. As a scholar he was best known for his analytical writings on Bach; he also published editions of the keyboard suites of Rynoldus Popma van Oevering (UVNM, xlvi, 1955) and Pieter Hellendaal's Six Grand Concertos op.3 (MMN, i, 1959). Among his compositions theatre music predominates: he wrote the music for the first Dutch sound film, *Terra nova*, in 1931.

JAN TEN BOKUM

Brandukov, Anatoly Andreyevich (*b* Moscow, 22 Dec 1856; *d* Moscow, 16 Feb 1930). Russian cellist. He studied at the Moscow Conservatory with Cossmann and Fitzenhagen from 1868 to 1877; he also studied music theory with Tchaikovsky. From 1878 to 1905 he lived in Switzerland and France, spending much time in Paris, where Turgenev introduced him into Pauline Viardot's salon. In Paris he played in Martin Marsick's string quartet and performed Saint-Saëns's A minor Concerto under the composer's direction. Visiting Russia almost every year, he appeared with such artists as Anton Rubinstein, Tchaikovsky, Liszt and Rachmaninoff. In 1906 he was appointed director and professor at the Moscow Philharmonic School of Music and Drama, and from 1921 he was a professor at the Moscow Conservatory. He nevertheless continued to perform as a soloist – he was noted for his stylish interpretations, his refined temperament and his beautiful, expressive tone – and as a chamber music player, and conductor. Tchaikovsky's *Pezzo capriccioso* for cello and orchestra op.62 (1888) and Rachmaninoff's Cello Sonata (1901) were both dedicated to him. A number of Brandukov's own cello pieces were published in Moscow and Paris; the manuscripts of his concertos are in the Tchaikovsky Museum at Klin.

LEV GINZBURG

Brandus. French firm of music publishers. It was established in Paris in January 1846 as Brandus et Cie when Louis Brandus (*b* Kremmen, 28 March 1816; *d* Paris, 30 Sept 1887) purchased the firm of Maurice Schlesinger. Brandus took over Schlesinger's premises at 97 rue Richelieu, Paris; in December 1848 a move was made (or the house was renumbered) to 87 and later, in January 1851, to 103 rue Richelieu. In October 1850 Louis's younger brother, Gemmy (*b* Berlin, 3 Jan 1823; *d* Paris, 12 Feb 1873), became a partner, and the firm of Troupenas (with which Brandus had for more than a year occasionally published) was acquired; for a time Troupenas' premises at 40 rue Vivienne were retained. In 1854 Sélim-François Dufour (*b* Cherbourg, 18 March 1779; *d* Paris, 25 July 1872), who had previously been manager of Brandus' outlet in St Petersburg (in existence 1853–5), was taken into partnership, the firm becoming known from August as G. Brandus, Dufour & Cie and, in February 1858, as G. Brandus & S. Dufour. When Dufour died in July 1872 the firm reverted to the name Brandus & Cie, and on

Gemmy's death the next year the direction was re-assumed by Louis Brandus. In October 1887, after the latter's death, Philippe Maquet acquired the firm, giving it his own name; in 1899 Maquet's business was taken over by C. Joubert & Cie, which remained in existence until 1971.

Brandus took care to maintain Schlesinger's contacts with Berlioz, Chopin, Halévy and Meyerbeer. The firm published the first editions in score of Berlioz's *Harold en Italie*, *Roméo et Juliette* and the *Te Deum*, and the piano-vocal score of *Béatrice et Bénédict*. It published Chopin's opp.59–65, the last of his works to appear in his lifetime, Meyerbeer's last four operas, from *Le prophète* (1849) to *L'africaine* (1865), and, before Halévy transferred his allegiance elsewhere, seven of his operas. It also printed (though probably not always for general sale) full scores and orchestral parts of operas and operettas by Auber, Flotow, Lecocq, Maillart and Offenbach; together with its stock of earlier Schlesinger and Troupenas publications it was able in 1867 to offer performing materials of no fewer than 65 works for the stage; by 1887, excluding reissues, it had put out piano-vocal scores of a total of about 80 new stage works, including 15 by Offenbach and 25 by Lecocq. In the field of instrumental music it concentrated particularly on the piano music of Blumenthal, Victor Duvernoy, Heller and Liszt, the dance music of Musard and Labitzky, and violin works by Vieuxtemps. It published Schlesinger's *Revue et gazette musicale* until 31 December 1880, when the final number appeared. Brandus continued Schlesinger's chronological series of plate numbers, starting at 4293 in 1846 and continuing to 13,167 in 1887. A gap of about 3400 numbers (1851) may be explained partly by the acquisition of Troupenas' stock (to which Brandus probably allocated new numbers).

Catalogues (selective list): *Catalogue général* (Paris, *c*1846 [Maurice Schlesinger pubns to 30 June 1845], suppls. 1848–50); *Catalogue général* (Paris, 1850–51, suppl. 1852); Piano, instrumental and vocal music (Paris and St Petersburg, 1853); *Catalogue de G. Brandus et S. Dufour* (Paris and St Petersburg, 1855, supps 1856–8) [piano, instr and vocal music]; *Catalogue de G. Brandus et S. RICHARD MACNUTT

Brândus, Nicolae (*b* Bucharest, 16 April 1935). Romanian composer and pianist. Drawn to music from childhood, he studied piano at the Bucharest Conservatory (1952–7). He also had lessons in composition from Martian Negrea. Between 1960 and 1969 he worked as a solo pianist with the Filharmonica in Ploieşti, during which time he also gave concerts in Romania and elsewhere which displayed his virtuoso technique. In 1968–81 he taught chamber music at the Academy of Music in Bucharest. In order to develop his understanding of new music, he attended courses in Darmstadt (1969–80) and during 1985 he worked at IRCAM. His doctoral dissertation (Cluj Academy of Music, 1981) is indicative of his interests: *Bases of a Formal Analysis of Musical Language*. In 1991 he returned to the Bucharest Academy, working as a doctoral supervisor. He became involved in the Romanian branch of the ISCM and was also elected to its executive commitee.

His composition is centred on orchestral and chamber music, and is notable for its development of new techniques, though he has never lost sight of his traditional training as a composer. His musical language is dense and complex, and he uses a wide range of musical devices: modal, serial, improvisational and random compositional techniques are all to be found in his work. He also composes for the theatre and has written an opera-pantomime *The Betrothal* (1966) and an opera *With the Gipsy Girls* (1985). He has composed several works for 'instrumental theatre', usually for voice and instruments (including tape).

WORKS
(*selective list*)

Sonata, 2 pf, 1963; Ballad sym., vv, orch, 1964–78; 7 Psalms (T. Arghezi), solo vv, inst ens, 1965; The Betrothal (op-pantomime, M. Eminescu), 1966, Bucharest, 9 Feb 1975; Domnişoara Hus [Miss Hus] (cant., Barbu), 1968; Antiphonia, str orch, 1971; Vagues, pf, vn, va, vc, cl, perc, 1972; Polyphony IV, chbr orch, tape, 1973; Kitsch-N, fl/sax, tape, 1974; Infrarealism (I. Barbu), 1v, cl, pf, 1975; Dialogos–Divagues [Pf Conc. no.1], 1978; Languir me fais [I am kept Waiting], solo perc, 1979; Rhythmodia, conc., solo perc, 1982; With the Gipsy Girls (op, M. OCTAVIAN COSMA

Brandus Posnaniensis. *See* BRANT, JAN.

Branle [brande, brawl, brall, brangill]. A sideways step or movement in the 15th- and 16th-century BASSE DANSE; a variety of French dances of popular character that were widely cultivated over several centuries. Some branles are still danced in France, and branle-like dances (line and circle dances) are popular in many cultures. A group dance, the branle, involves several couples disposed in a circle, in a single-file line (fig.1) or in a line of couples. Randle Cotgrave vividly defined in his *Dictionarie of the French and English Tongues* (London, 1611):

> Bransle: a totter, swing, or swindge; a shake, shog, or shocke; a stirring, an uncertain and inconstant motion; ... also, a brawl, or daunce, wherein many (men, and women) holding by the hands sometimes in a ring, and otherwise at length, move all together.

The music was often provided by the singing of the participants, and the characteristic motion was a step to the side. Visual illustrations of the dance go back to medieval times, but the term 'branle' is relatively recent, being rarely encountered before 1500 except as a designation for one of the steps of the basse danse. Branle music occasionally echoed the solo verse and choral refrain structure of the old French *carole*. An example of this primitive type may be found as late as the branle *J'avois pris mes pantouflettes* collected by J.-J. Rousseau and printed posthumously in his *Consolations des misères de ma vie* (1781). In this piece a 'choeur' singing in unison echoes the words and music of a solo 'choryphée'. In his *Dictionnaire* of 1768 Rousseau gave a corresponding definition, which must be based on his observations of

1. Rustic chain dance, possibly a branle: miniature attributed to Robinet Testard from a Missal for Poitiers Use, c1480 (F-Pn lat.873, f.21)

2. Round-dance at the court of Henri III: 'Bal du duc d'Alençon', French School, 1581 (Musée du Louvre, Paris)

rural practices: 'Branle: Sorte de danse fort gaie qui se danse en rond sur un Air de cour et un Rondeau, c'est à dire avec un meme refrain à la fin de chaque couplet'. Thus defined, the musical characteristics of the branle shared some affinities with the vaudeville; indeed, several 16th-century *voix de villes* were labelled 'chanson-branle'.

The CAROLE was also a round dance. Illustrations of *Le roman de la rose* frequently depict it as such in medieval manuscripts. When translating Boccaccio's *Decamerone* into French in the first half of the 16th century, Antoine Le Maçon replaced 'carolette' (little *carole*) with 'branle'.

In his macaronic treatise on dancing, *Ad suos compagnones*, written in about 1519, Antonius de Arena described three kinds of branles: *double*, *simple* and *coupé*. Thoinot Arbeau, describing the practices of the mid-16th century in his *Orchesographie* (1588), mentioned four types of branle that were characteristically employed to begin the dancing at any festival. These may be tabulated according to general character, metre and musical phrase structure as illustrated in Table 1.

The last category corresponds to Arena's *branles coupés* (mixed and mimed branles) and were also known as 'branles de Champagne', to Arbeau. Characteristic of

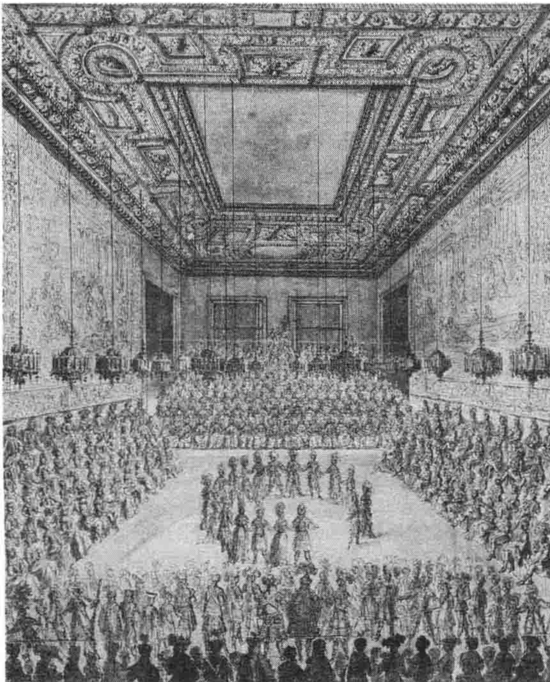
TABLE 1

Double	*Simple*	*Gay*	*Burgundian*
sedate	sedate	lively	very lively
duple	duple	triple	mixed
2 + 2 bars	2 + 1 bars	regular	irregular

3. Round-dance in a theatrical show: detail from the 'Mystère de la vengeance de Jésus-Christ', painted textile, c1530 (Musée St-Denis, Reims)

branle simple was its three-bar phrase structure, resulting from the choreographic feature of a simple step (half as long) alternating with a double. This phraseological feature marks much French music not specifically identified with the branle, but surely deriving ultimately from the *branle simple*, or from the verse structure of texts that were made up to accompany its strains. The *branle gay* had a typical rhythmic pattern which is also often encountered in music not specifically so labelled (ex.1; cf 'Fear no danger to ensue' in Purcell's *Dido and Aeneas*).

Ex.1



The mixed branles included many regional varieties. The 'branles d'Escosse' were popular in France in the 1560s. The 'triory' and the passepied were the characteristic branles of Brittany, just as the bourrée typified the Auvergne and the gavotte Dauphiné. The *branle de Poitou* was distinguished by its 9/4 metre, although sometimes it was in 6/4, or even 6/4 in alternation with 9/4. There are examples of all three possibilities in the earliest source that contains extensive examples of the branle types, *Dixhuit basses dances* (Paris, 1530) for lute, printed by Attaingnant (ed. D. Heartz, 1964). The typical suite of branles of about 1600 added four more dances to the four types of Arbeau: the *branle de Poitou* (in 9/4), the *branle double de Poitou* (in 6/4), the *branle Montirandé* (related to Arbeau's *branle du Haut Barrois*, which he said is 'sur l'air d'un branle de Monstierandel') and the gavotte. Such is the order found in Anthoine Francisque's lute tablature, *Le trésor d'Orphée* (Paris, 1600), in the *Terpsichore* (1612) of Michael Praetorius, the *Apologie de la danse* of De Lauze (1623; ed. J. Wildeblood, London, 1952) and the *Harmonie universelle* of Mersenne (1636–7). The initial *branle double* is lacking in both De Lauze and Mersenne and the former called the 'Montirandé' the '5e branle'. The 'branle de Poitou à mener' is the ancestor of the minuet, to which it bequeathed the possibilities of phrasing in 2 x 3 beats or in 3 x 3 beats. Pieces called 'amener', often found in 17th-century suites, belong to the same complex.

The diverse localities represented in the family of branles had characteristic instrumental accompaniments associated with them as well. According to the *Mémoires* of Marguerite de Valois the people of Burgundy and Champagne danced 'avec le petit hautboys, le dessus de violon et tambourins de village', and this is corroborated by Arbeau, who lived at Langres in Champagne. Regarding the *branle de Poitou*, Marguerite de Valois referred to 'Les Poitevines avec la cornemuse'. Indeed, drone effects are a frequent feature of the *branle de Poitou*, lending it a character even more rural than other types. The many illustrations showing simple country people dancing out of doors in a chain or a circle to the accompaniment of a bagpipe may actually represent the *branle de Poitou* (fig.1 shows a 15th-century miniature of shepherdesses and

shepherds dancing in a line with the characteristic sidewise step of the branle, accompanied by a bagpipe). In the 16th century rustic pipes were used even at the highest level of society. An anonymous painting at the Louvre, one of several commemorating festivities that took place in connection with the wedding of the Duke of Joyeuse in 1581, shows several elaborately dressed and gowned courtiers dancing in a circle, evoking the typical sideways motion of Arbeau's branle (fig.2). Watching at the side is King Henri III with his mother, Catherine de Medici, and his queen, Louise de Lorraine, who is seated. On a raised platform behind the dancers are depicted one or more bagpipes and what looks like a shawm.

The variety of branle that Arbeau called 'mimed' (*morgué*) falls partly within the sphere of his mixed branles (*branles de Champagne*). Some took their origin from the commonplace: peas, clogs, horses and washerwomen. Others came from court masquerades, such as the 'branles de Malte', a veritable ballet of several movements that can be traced to an actual event at the French court in 1551. To this variety of mimed branle is related the Italian BRANDO, which designated a variety of entertainments related in character to the *moresca* (Cesare Negri described a 'brando' he staged in 1574). 'Brando' was also the general Italian title for branle tunes imported from France, just as 'brawl' was the most usual anglicization. With its adaptability to theatrical use and its tendency to form suites of like dances, or of contrasting dances, the branle was an important forerunner of the *ballet de cour*. One of the best early 16th-century illustrations of a branle is precisely that of a stage dance, a round executed by several couples representing the rejoicing of the Jews in the *Mystère de la vengeance de Jésus-Christ* (fig.3). This painting shows an ensemble of shawms, sackbut, fiddle and tabor that is close in its make-up to the characteristic ensemble of Champagne mentioned above.

4. *'Un branle au Louvre': drawing by Israël Silvestre, pen and ink (Musée du Louvre, Paris)*

With more abundant musical sources for stage dances in the early 17th century the debt owed by the ballet to the rhythmically variegated branle family becomes more apparent. In the movements of the *Ballet des chevaux* of 1610, for example, as it survives in the Philidor collection and as intabulated in Robert Ballard (ii)'s *Deuxième livre* for lute (1614), it is possible to identify by phrase structure a *branle simple* (Chant 3e) and a *branle de Poitou* in 9/4 (Chant 6e). Branles remained close to an easily singable, syllabic tune, and never lost this folklike quality, even in the more elaborate instrumental settings of later French ballet music. Rameau, for example, reveals in his music a sensitive ear for the rhythms of traditional and provincial dances.

Increasingly fewer dances entitled 'branle' were recorded in the late 17th and early 18th centuries, despite the fact that branles were almost ritually danced at the opening of court balls (fig.4). The few choreographic examples set down in Feuillet-Beauchamps notation are *danses à deux*, or resemble contredanses.

The fascination of the branle over the centuries has been largely the nostalgia of city dwellers for country pleasures, but urban civilization required ever newer fashions. By 1800 contredanses (akin to English country dances, which in turn resemble branles) and waltzes were the most popular dances in the French ballroom. Yet it is still possible to witness a variety of branles danced in regions of France.

DANIEL HEARTZ (with PATRICIA RADER)

Brannenburger, Reinmar der. *See* REINMAR VON BRENNENBERG.

Brannigan, Owen (*b* Annitsford, Northumberland, 10 March 1908; *d* Newcastle upon Tyne, 9 May 1973). English bass. He studied part-time at the GSM, London, and won its gold medal in 1942. He made his début in 1943 with the Sadler's Wells Opera as Sarastro, and sang with the company until 1948, and again from 1952 to 1958. As well as specializing in Mozart and *buffo* characters, he created Britten's Swallow (*Peter Grimes*), Collatinus (*The Rape of Lucretia*) and Superintendent Budd (*Albert Herring*); Britten later composed Noye and Bottom for him; in the latter role he remains unsurpassed, as can be heard in his recording under the composer. Brannigan also created roles in operas by Malcolm Williamson and John Gardner. He performed at Glyndebourne from 1947 and at Covent Garden from 1948, as well as appearing frequently in oratorio and concerts in Britain and abroad. With a voice of expressive tone and ripe verbal inflection, he gained a wide popularity in radio and television programmes of Northumbrian and other folksongs, many of which he recorded. Brannigan's other recordings include roles in Purcell's *Fairy Queen* (under Britten), Cavalli's *La Calisto* (with Leppard), operas by Britten, and several by Gilbert and Sullivan (with Sargent). He was made an OBE in 1964. In 1972 he was involved in a road accident from which he never fully recovered.

NOËL GOODWIN

Branscombe, Peter (John) (*b* Sittingbourne, 7 Dec 1929). English musicologist. He studied at Oxford, where he was influenced by Jack Westrup and Egon Wellesz. He later took the PhD at London University with a dissertation *The Connections between Drama and Music in the Viennese Popular Theatre from ... 1781 to ... 1855* (1976). In 1959 he was appointed to teach German at the University of St Andrews, becoming Professor of Austrian Studies (1979), and later professor emeritus. Branscombe's work, in studies of the Classical period and of the German Romantics, has a strong literary basis (for example in his work on the 18th-century Viennese theatre and his studies of Hofmannsthal's librettos for Strauss), but he is also a perceptive and judicious critic, especially of opera and of singing generally. He has written particularly valuably on *Die Zauberflöte*, in a number of studies of its literary and theatrical context as well as its music, culminating in a Cambridge opera handbook (1991); Haydn, Wagner and Strauss are among the composers on whom he has worked, as well as Schubert – he co-edited *Schubert Studies* (Cambridge, 1982) with Eva Badura-Skoda, contributing a chapter on the melodrama. Branscombe has written many articles and chapters for collective works and dictionaries, chiefly on German and Italian opera of the Classical period.

□

Branscombe, Gena (*b* Picton, ON, 4 Nov 1881; *d* New York, 26 July 1977). American composer and conductor. She studied at the Chicago Musical College with Rudolph Ganz (piano) and Borowski (composition), twice winning the gold medal for composition (1901, 1902). After a year of further study in Germany, which included lessons with Humperdinck, she moved in 1910 to New York and in the 1920s studied conducting with Chalmers Clifton and Stoessel. She was active in women's arts organizations and as a choral conductor, notably of the Branscombe Choral (1933–54), a women's chorus for which she composed and arranged many works and commissioned works by other women composers.

A tireless advocate of contemporary music, she was awarded the annual prize of the League of American Pen Women for the best work produced by a woman composer (*Pilgrims of Destiny*, 1928, concerning the pilgrim fathers). Many of her songs and other choral works were also inspired by historical events. Textual expression is of prime importance in her works and is achieved through an emphasis on late Romantic, richly textured harmony. Branscombe's most important orchestral work is *Quebec Suite*, drawn from *The Bells of Circumstance*.

WORKS

texts of vocal works by Branscombe unless otherwise stated

Vocal, orch: The Bells of Circumstance (op), 1920s, unfinished; Dancer of Fjaard, SSA, orch, 1926; Pilgrims of Destiny, S, B, chorus, 1928; Quebec Suite, T, orch, 1930; Youth of the World, SSA, chbr orch, 1932; *c*35 works, mostly choral arrs.

Songs (1v, pf, unless otherwise stated): Serenade (R. Browning), 1905; Autumn Wind, 1911; A Lute of Jade (Chin. poets), song cycle, 1911; The Sun Dial (K. Banning), song cycle, 1913; I bring you heartsease, 1915; 3 Unimproving Songs for Enthusiastic Children, 1922; Hail ye tyme of holiedayes (Banning), 1924; Wreathe the holly, SSAA, pf, 1938; Coventry's Choir, SSAA, pf, 1944; Bridesmaid's Song, SSAA, pf, 1956; A Joyful Litany, SSAA, pf, 1967; *c*100 others; *c*70 choral arrs.

LAURINE ELKINS-MARLOW

Brant, Henry (Dreyfuss) (*b* Montreal, 15 Sept 1913). American composer of Canadian birth. The son of a violinist, he developed his experimental attitude towards music in boyhood: at the age of nine he was composing for his own home-made instruments and organizing performances with them. He studied at the McGill Conservatorium, Montreal (1926–9), the Institute of Musical Art in New York (1929–34) and the Juilliard Graduate School (1932–4), also taking private lessons from Riegger, Antheil and Fritz Mahler (conducting) during the 1930s. Having settled in New York, he earned his living by composing, conducting and arranging for radio, film, ballet and jazz groups, working for Benny Goodman, Andre Kostelanetz and others. In the 1950s and 60s he extended his work in commercial music to Hollywood and Europe. He also taught composition and orchestration at Columbia University (1945–52), the Juilliard School (1947–54) and Bennington College (1957–80). His honours include two Guggenheim Fellowships (1947, 1956), and the distinction of being the first American composer to win the Italia Prize (1955). In 1979 he was elected to the American Academy and Institute of Arts and Letters.

From early on Brant was attached to unusual timbres and unconcerned with stylistic consistency. His *Music for a Five and Dime* (1932) is scored for E♭ clarinet, piano and kitchen hardware, while *The Marx Brothers* (1938) features a tin whistle, accompanied by a chamber ensemble. For a while he explored the idea of writing for multiples of the same instrument (a technique he returned to in later years), modifying instruments, when necessary, to obtain a smooth continuum of instrument sizes. His

1931 flute concerto, *Angels and Devils*, uses three piccolos, five normal flutes and two alto flutes; his *Consort for True Violins* (1965) is written for the eight instruments of the New Violin Family, in whose conception and musical development he played a seminal role.

Brant is most closely associated, however, with spatial music, or music for spatially separated groups, a genre that he pioneered. Although inspired by the thick counterpoint of Charles Ives (and the angular melodic style of Carl Ruggles), he found that when he wrote 12 contrapuntual lines to be played simultaneously 'you really couldn't identify the details in the compound result .... But there didn't seem to be a necessary reason why music should be limited to even twelve horizontal events at once. Why not more than twelve? The ear never said, "I refuse to listen"'. Taking a cue from Ives's *The Unanswered Question*, and also from Teo Macero's *Areas* for five separated jazz ensembles (1952), Brant found a solution to his perceptual problem in separating players from each other at distances of more than several yards. Space became, for Brant, music's 'fourth dimension', after pitch, rhythm and timbre.

A breakthrough came with *Antiphony I* (1953) for five widely separated orchestral groups, a work that predated the signal European spatial work, Stockhausen's *Gruppen*, by three years. Unlike Stockhausen, Brant developed Ives's ideas of stylistic contrast, and in most of his spatial works wrote music quite diverse in style, texture and timbre for spatially separated groups. Achieving spatial separation often required the relinquishment of close rhythmic synchronization, so Brant began to explore controlled improvisation, often giving detailed instructions for register and timbre, but not pitch and rhythm. Because of the size of their forces and the logistical problems of placing ensembles around an auditorium, such mammoth Brant works as *Kingdom Come* for orchestra, circus band and organ (1970), or *Orbits* (1979) for high soprano, organ and 80 trombones (each of which plays an independent part, the coincidence of which often results in quarter-tone clusters), are staged only rarely, and recordings fail to capture the music's essentially spatial nature. Brant's frequent outdoor performances can also be difficult; a 1972 New York performance of *The Immortal Combat* was obliterated by traffic noise, a thunderstorm and the fountain at Lincoln Center.

As early as 1950, Brant wrote that he had 'come to feel that single-style music ... could no longer evoke the new stresses, layered insanities and multi-directional assaults of contemporary life on the spirit'. In the 1980s he expanded his concept of stylistic diversity to include the musics of non-Western peoples; *Meteor Farm* (1982) is scored for Indonesian gamelan ensemble, jazz band, three South Indian soloists and West African chorus with percussion, as well as conventional European performing forces. Steel drum bands and jazz bands began to appear regularly in his works. His *500: Hidden Hemisphere*, commissioned to celebrate the 500th anniversary of Columbus's discovery, positioned a steel drum band in one corner of Lincoln Center's outdoor courtyard and concert bands in the other three corners. In addition to using non-Western ensembles, Brant has increasingly turned to improvisational scoring. When writing for jazz band, gamelan, or African ensemble, he has explained that 'I listen to their repertory and ask if I can have this piece or that, and they play at a certain point in their usual manner. I prefer to do that than modify the traditional music'.

As Brant gained recognition in his later years as a pioneer of both spatial music and multi-cultural style-mixing, he received more commissions for large works. He continued to eschew amplification of any kind (even refusing to use a microphone to lecture), and dreamed of developing larger, louder acoustic instruments similar to foghorns. In the 1980s he worked at designing a concert hall with movable plywood walls, which could be repositioned during a performance to make the acoustics of the room one of the changing components of the composition; though he toured with a cardboard model in search of support, the space was not made a reality.

Also recognized as a fine orchestrator, Brant laboured for 30 years on the ultimate orchestral challenge, the scoring of Ives's dense *Concord Sonata* for orchestra, a project he completed in 1995.

KYLE GANN (with KURT STONE)

Brant, Jan [Brand, Brandt, Brandus Posnaniensis, Brantus] (*b* ?Poznań, 1554; *d* Lwów [now L'viv], 27 May 1602). Polish composer and theologian. In 1571 he entered the Jesuit order, and after his ordination in 1578 he went to Rome to undertake further theological studies. He returned to Poland in 1584 and carried out various duties while attached to convents at Kraków, Poznań, Vilnius and Pułtusk. In 1599 he again went to Rome. On his return in 1601 he was appointed superior of the Jesuit college at Lwów, and he held the position until his death. He was a notable Jesuit of the Counter-Reformation period and an outstanding theologian and preacher. His collection *Pieśni różne pospolite o różnych pobożnych potrzebach roku 1601* ('Popular songs for various festive occasions in the year 1601') mentioned in certain older bibliographies is lost, but works by him survive among the manuscripts in the library of Uppsala University, notably in the 1620 organ tabulature that had belonged to the Jesuit college at Riga. These are the four-voice *Celestes merces*, an incomplete *Christus natus est nobis* for five voices and organ, and settings for three to six voices of nine verses of the hymn *Jesu dulcis memoria* (all ed. in ZHMP, xxiv, 1974); they may come from the lost collection of 1601. They are sonorous examples of late Renaissance polyphony and include frequent homophonic passages and, in the five- and six-voice pieces, the use of contrasting vocal groups. One or two features, notably the rhythmic independence of the organ bass in *Christus natus est nobis*, are typical of the period around 1600, and Brant's works may be considered as the earliest intimations of the Baroque style in Polish music.

MIROSŁAW PERZ

Brant, Jobst vom. *See* BRANDT, JOBST VOM.

Brant, Per (*b* Uppland, Dec 1714; *d* Stockholm, 9 Aug 1767). Swedish violinist, copyist, composer and poet. He was active in Stockholm from 1727, and was employed as a member of the royal chapel from 1735; in 1738 he became Konzertmeister and in 1745 Kapellmeister. He succeeded his teacher, J.H. Roman, as chief court Kapellmeister from 1758 until at least 1765.

Brant contributed energetically to Stockholm's musical life, particularly during the 1730s and 40s, organizing, for example, a series of subscription concerts (1738–41) in which young amateur noblemen and members of the court chapel worked together. He also planned with Roman an educational institution (or 'seminarium') for music, which did not materialize.

Brant was one of the most capable and successful music copyists in Sweden during the mid-18th century. He also had a good knowledge of languages and wrote some

poems which reflect the spirit of the age. His position as a composer is difficult to establish: while one contemporary account states that he had 'shown his knowledge in composition' (J. Wellander), another noted that he had written only a few small 'occasional pieces' (J.F. Hallardt). Although 18 extant works have been attributed to him (three to four symphonies, a sonata for flute and basso continuo, two cantatas and a few solo songs), Bengtsson has shown that only one work (a song published in 1768) is authenticated beyond doubt. Several songs are ascribed in other sources to Roman, as are all of the symphonies. Stylistic comparisions have proved inconclusive. The *Cantata vid Nyåret 1754*, however, may be an authentic representation of the 'occasional' works noted by Hallardt.

INGMAR BENGTSSON/BERTIL H. VAN BOER

Branzell, Karin (Maria) (*b* Stockholm, 24 Sept 1891; *d* Altadena, CA, 14 Dec 1974). Swedish contralto. She studied in Stockholm and sang with the Swedish Royal Opera (1912–18), then the Berlin Staatsoper (1918–23), where she was the Nurse in the Berlin première of *Die Frau ohne Schatten* under Strauss. She sang Kundry in Vienna, and made her American début at the Metropolitan as Fricka in *Die Walküre* (1924), singing major contralto roles there, including Amneris and Delilah, until 1942 and returning in 1951–2; her range was such that she could also sing the *Walküre* Brünnhilde. She sang at Bayreuth in 1930 and 1931 and at Covent Garden under Beecham in 1935, 1937 and 1938, and made other guest appearances at leading houses. Branzell's voice was rich and sumptuous, and her tall figure with its aura of the grand manner fitted her ideally for the big Wagnerian roles, which she recorded extensively, most vitally Waltraute's Narration. She was also a significant lieder interpreter, as her recordings confirm.

MAX DE SCHAUENSEE/ALAN BLYTH

Brânzeu, Nicolae (*b* Piteşti, 28 Dec 1907; *d* 7 March 1983). Romanian composer and conductor. He studied music from a young age in his home town, then from 1926 to 1931 at the Bucharest Conservatory. After graduating in law from Bucharest University, in 1931, he completed his education at the Schola Cantorum in Paris (1931–4), studying composition with Guy de Lioncourt. Brânzeu worked as chorus master and conductor at the Romanian Opera in Bucharest (1946–7) and from 1948 to 1972 as professor of music and conductor at the Arad State Philharmonic.

His compositions combine neo-Romantic stylistic elements with folk music, augmented by linear polyphonic elements. Although he composed songs and choral works, his preferred genres remained symphonic music and opera. After *Monna Vana* (1934, rev. 1976), an opera based on Maeterlinck, he went on to enjoy critical success with his one-act musical drama *Săptămîna luminată* ('Shrovetide') which was first performed in Bucharest in 1943. Other works followed, including *Cruciada Copiilor* ('Crucifixion of the Children', 1961). His orchestral and chamber works are loosely based on classical structures and include three symphonies and a series of instrumental sonatas.

WORKS
(*selective list*)

Stage: Monna Vana (op, after M. Maeterlinck), 1934, rev. 1976; Săptămîna luminată [Shrovetide] (op, 1, C. Pavel after M. OCTAVIAN COSMA

Braquet, Gilles. *See* BRACQUET, GILLES.

Brase, (Wilhelm) Fritz (Anton) (*b* Egestorf, 4 May 1875; *d* Dublin, 1 Dec 1940). German composer and conductor. He studied with Carl Reinecke, Hans Sitt and Salomon Jadassohn at the Leipzig Hochschule. In 1893 he enlisted in the military band at Bückeburg. After a further period of study with Joseph Joachim and Max Bruch at the Hochschule für Musik, Berlin, he was appointed to the prestigious post of conductor of the Kaiser Alexander Garde Grenadier Regiment 1. In 1922 he accepted an invitation to establish a music school for the Irish army. He created and conducted the Army no.1 Band and three other bands. In addition, he co-founded the Dublin Philharmonic Society (1926).

A prolific composer, Brase's works are coloured by a rich chromatic palette. Many orchestral works survive, such as the Symphony in D Major (1905), as well as an impressive body of music for military band that includes a set of six Irish rhapsodies.

WORKS

Militär-Festouvertüre, military band, 1900; Dramatische Ouvertüre, orch, 1902; Heimatlos Suite, orch, 1902; Symphony, D, orch, 1905; Heil Danzig, military band, 1910; Grosse Zeit, neue Zeit, 1911; Mondnacht in Venedig, 1921; Herbst, 1923; Irish Fantasia no.1, 1923; Little Moira, 1925; Irish Dances, orch, 1938

JOSEPH J. RYAN

Brashovanov, Stoyan (*b* Ruse, 14 Sept 1888; *d* Sofia, 16 Oct 1956). Bulgarian musicologist. During his schooling in Ruse he learnt the piano, violin and viola. In 1907 he left for Germany, studying philosophy in Jena and Berlin under Stumpf, Friedlaender and Max Dessoir and musicology, aesthetics and teaching methods in Berlin and Leipzig under Riemann and Johannes Volkelt. During the

Balkan War (1912–13) and World War I, Brashovanov returned to Bulgaria, but in 1922 he returned to Leipzig to take his doctorate under Abert, the first DPhil in musicology awarded to a Bulgarian. On his return to Bulgaria in 1923 he began lecturing on music history, aesthetics and teaching methods at the State Musical Academy in Sofia; in 1933 he became reader there and in 1937 professor, a position he held until his retirement in 1951. In 1927 and 1936 he studied further in Switzerland under Kurth and Handschin. On his return he became director of the State Musical Academy in Sofia (1937–40). He held many important musical posts and was deputy president of the Union of Folk Choirs for about 20 years and editor of its periodical *Rodna pesen* (1931–44). In 1948 he was appointed deputy president of the Union of Bulgarian Composers, Musicologists and Performers for one year. He contributed to many foreign journals and dictionaries and was a frequent lecturer both in Bulgaria and abroad.

LADA BRASHOVANOVA

Brashovanova(-Stancheva) [Stancheva-Brashovanova; Braschowanowa], **Lada** (*b* Sofia, 11 Feb 1929). Bulgarian musicologist, daughter of Stoyan Brashovanov and the Swiss pianist Mathilde Kurz. She studied the piano with Dimiter Nenov and Lyuba Encheva at the Bulgarian State Music Academy in Sofia, graduating in theory (1951) and performance (1953). She began to publish musicological articles in 1949, and until 1965 also taught the piano. From 1967 she worked as a music editor and has lectured at international music conferences, universities and music schools and on the radio in Bulgaria and abroad (Germany, Austria, Switzerland and Poland). Her chief subjects are the history of music in Bulgaria (particularly the Middle Ages) and western European music history; she has written books on Handel, Mozart and Berlioz, and is a contributor to the major music encyclopedias. She continues to work as a freelance music critic and publicist.

RAINA D. KATSAROVA/MAGDALENA MANOLOVA

Brasolini [Brassolini], **Domenico** (*b* Rovigo; *fl* 1689–1707). Italian violinist and composer. His *Suonate da camera a tre* (Bologna, 1689), his 'primo componimento musicale', reveals that he was a native of Rovigo and in the employ of the Accademia della Morte in Ferrara. This collection, his only known publication, strongly favours balletto–corrente–giga groupings without prelude, and the twelfth sonata calls for scordatura. The scoring for two violins and 'clavicembalo ò violoncello' is somewhat unusual in placing the keyboard instrument as the first option. Fètis affirms that Brasolini served as *maestro di cappella* in Pistoia and that in 1707 he produced an opera in Modena, *Il trionfo dell'umilità* (*FètisB*).

PETER ALLSOP

Braşov (Hung. Brassó; Ger. Kronstadt). Town in Romania. It is on the southern edge of the Carpathians, and the main town of southern Transylvania. It was a Roman citadel when the area was part of the province of Dacia (107–275 CE). The earliest documentary reference dates from 1234; the town was subsequently known as Corona, Barasu, Brasu, Braso, Braşov, Brassov, Brassó, Kronstadt and Krunen-Kronen. The German name Kronstadt was officially used up to 1918, when the town became Romanian; there still exists a large German (Saxon) minority in Braşov. The main churches are St Bartholomew's, the 'Black' Church (*c*1385–*c*1476), and St Nicholas in the Schei quarter.

As early as 1533 it was a centre of Romanian and Transylvanian Saxon printing; Honterus and Gheorghe Coressi printed religious and secular texts and music (*Odae cum harmoniis*, 1548). The virtuoso lutenist Bálint Bakfark was born in Braşov in 1507; he performed at the courts of Poland, France, Austria and Transylvania, and composed dances and fantasies based on Transylvanian folk music. The town was well known as a centre of culture and education particularly because of the Schola Coronensis (founded in 1544), a humanist school with strong musical traditions. Subsequent outstanding schools of music were the Şcoala de Psaltichie Rumânească (Romanian psalm school, 16th century, the first school to teach in Romanian), the Kronstädter Gesang-Schule (founded in 1845 by J.L. Hewig) and the Astra Conservatory (founded in 1928 by C. Bobescu). Since World War II the Faculty of Music, the Music Lyceum and the Popular Art School have been the main centres of musical education. The organ school of the 'Black' Church has long been a feature of the musical life of Braşov; among the many musicians associated with it are Wolfgang (15th century), Hieronimus Ostermayer (1500–61), Georgius Ostermayer (1530–71), Michael Hermann (17th century), Daniel Croner and, in the 20th century, Rudolf Lassel

(1895–1964), Adolf Weiss, Klaus Fogarascher, Eckart Schlandt and Valentin Gheorghiu.

In the 18th century instrumental bands (the *Turnerii* and a collegium musicum) grew up in the town and in 1815 a theatre was founded which was visited by Italian, German, Romanian and Hungarian troupes. In 1882 the Romanian operetta *Crai Nou* ('Morning Star') by Porumbescu had its première in Braşov. Musical activity flourished in 19th-century Braşov under the auspices of the many societies, which included the Gesellschaft der Musikfreunde (founded in 1834), the Stadt-Kapelle, the Kronstädter Männergesangverein (1859), the Reuniunea Română de Gimnastică şi Cîntări (Romanian Group of Gymnastics and Singing, 1868), the Reuniunea Sodalilor Români (1869), the Deutscher Lieder Kranz (1885), the Brassói Magyar Dalárda (Hungarian Choral Society), the Societatea Română de Muzică and, above all, the Kronstädter Philarmonischen Gesellschaft (1878), which survives as the Gheorghe Dima State PO. In the 19th century Braşov was visited by a number of virtuosos, including Brahms and Joachim.

Musical institutions active in the 20th century are the Teatrul Muzical (which produces opera, operetta, ballet and variety shows), the Pro Musica chamber group, a folk music orchestra and the Gheorghe Dima and Paul Richter choirs. Braşov is the home of the Cerbul de Aur international light music festival, the Muzica de Cameră festival and a national string quartet contest. In 1995 the company of the Teatrul Muzical made a successful tour of Austria, Germany, the Netherlands and Britain.

Noted musicians associated with Braşov since the early 19th century are Anton Pann, Gheorghe Dima, Iacob Mureşianu, Ciprian Porumbescu, Tiberiu Brediceanu, Radu Lupu, Christiom Mandeal, Horia Andreescu and Ilarion Ionescu-Galaţi.

VIOREL COSMA

Brassart [Brassar, Brassaert, Brasart, Brassant], **Johannes** (*b* ?Lowaige [now Lauw], Belgium, *c*1400–05; *d* before 22 Oct 1455). South Netherlandish composer and singer. The fact that he celebrated his first mass as a priest in 1426 suggests a date of birth of about 1400–05, while the designation 'de Ludo' sometimes appended to his name is thought to indicate that he was born in the village of Lowaige in the province of Limburg. Throughout his career he had close ties with Liège, where he held benefices at several churches. His earliest and most important connections were with the church of St Jean l'Evangeliste (from *c*1422) and the cathedral of St Lambert (from 1428), at each of which he for a time held the post of succentor. His associations with both institutions continued into the 1430s, and several of his motets were apparently composed for them. He visited Rome in the mid-1420s, and in 1431 he was listed, with Du Fay, as a singer in the papal chapel; two years later he was admitted to the Council of Basle. It was probably in Basle that he met Emperor Sigismund and began his lengthy spell in imperial service (1434–43), during which he occupied the positions of *rector capelle* under Sigismund and *cantor* or *rector principalis* under his successors Albrecht II and Friedrich III. How continuous this service was is uncertain, but Brassart evidently maintained strong ties with his homeland. From 1442 he served in turn as canon and *cantor* at the church of Our Lady in Tongeren, but in 1445 apparently exchanged the latter post for that of canon at the collegiate church of St Paul in Liège. Brassart appears to have resided in Liège while continuing his association with Tongeren. A supplication to Pope Calixtus III for the benefice of St Paul confirms that he had died shortly before 22 October 1455.

All of Brassart's works are sacred, many of them are liturgical, and all but one set Latin texts. More than half are items for the Ordinary or Proper of the Mass. Most of the Ordinary settings appear to be freely composed (only the two Kyries and the Sanctus are known to be chant-based). They include paired as well as single movements: one indisputable Gloria–Credo pair is firmly attributed to Brassart, and another has been ascribed to him on the basis of manuscript and stylistic evidence; both are strongly unified through the use of common material. The Proper settings do not belong to an established tradition: Brassart's introits are among the earliest extant polyphonic settings. Each one follows a pattern of alternating plainchant and polyphony, with the psalm verse and doxology partly set to fauxbourdon and the discantus paraphrasing the chant more lightly in these sections than in the antiphon. Though musically linked, the introits do not constitute a liturgically cohesive group.

The remaining compositions are all classified as motets in Mixter's edition. In fact one of these is a hymn, another a cantio and a third a *Leise*, leaving a total of ten complete motets (the lament for Albrecht II, *Romanorum rex*, long believed to be by Brassart, is now known to be by Johannes de Sarto). Approximate dates can be assigned more easily to the motets than to the mass music, partly because half of them are located in layers of the manuscript *I-Bc* Q15 datable to the 1420s and early 1430s, but also because several can be linked, with varying degrees of certainty, to particular individuals or institutions. *Fortis cum quevis*, in honour of St John the Evangelist, and *Cristi nutu sublimato* and *Lamberte vir inclite*, both in honour of St Lambert, were probably intended for the churches at which Brassart worked; *Te dignitas presularis* is thought to date from around the time of his membership of the papal choir; and *O rex Fridrice* must have been composed for either the accession (1440) or the coronation (1442) of Friedrich III as King of the Romans.

Three complete isorhythmic motets and the tenor of a fourth survive. *O rex Fridrice*, arguably the finest of these works, has a stylistic grandeur befitting the kind of occasion for which it was conceived, and is particularly striking on account of its tenor's unique proportional scheme (6:4:2:1, with rests omitted from the final statement) and its simultaneous use of different mensurations. The seven non-isorhythmic motets divide into four-part works with an equal pair of upper voices and three-part works in which the discantus is to a greater or lesser extent the dominant voice. *O flos fragrans*, an

appropriately florid tribute to the Virgin, is the outstanding composition in this group. Ex.1 illustrates the fluent, expressive quality of its discantus line, characterized by distinctive turns of phrase and varied rhythmic pacing. Du Fay's *Flos florum* is the model here, but Brassart's motet appears to have been itself influential, as can be seen bycomparison with two of de Sarto's works.

PETER WRIGHT

Brass band. A type of wind band, consisting solely of brass instruments and percussion, which originated in the 1820s. *See* BAND (i), §IV.

Brassicanus, Johannes [Kraut, Johann] (*b* Murau, Styria, *c*1570; *d* Regensburg, bur. 22 Sept 1634). Austrian composer and poet. He may have attended the grammar school at Murau. His title of 'Magister' indicates that he must have studied at a Lutheran university in Germany. Until the beginning of the Counter-Reformation he taught in Styria and then, in 1603, became Kantor at Regensburg; from 1606 he was also *Präzeptor* at the Gymnasium Poeticum there. In 1609 he was appointed Kantor at the Protestant district school at Linz. After its closure in 1624 he remained there, apparently without employment, until the autumn of 1627, when he returned to the Gymnasium Poeticum, Regensburg; he was employed first as superintendent of the boarders and from 1628 until his death as Kantor and teacher. His musical output consists mainly of Latin motets for six to eight voices, most of which are lost, and numerous chorales (with the melody in the top voice) in the style of Hans Leo Hassler and Michael Praetorius. The melody of the Protestant psalm *Gleich wie der Hirsch nach frischem Wasser schreit*, usually ascribed to Michael Altenburg, is found as early as 1615 in Brassicanus's output (in *Similia Davidica*); it may thus have originated with him. The five-part quodlibet *Was wölln wir aber heben an?*, a synthesis of German and Italian song fragments, is all that remains of his secular music. Numerous vernacular poems and aphorisms by him were published posthumously by Martin Zeiller in his *Wunderbare und traurige Geschichten* (Ulm, 1648).

WORKS

Similia Davidica, das ist Gleichnus Text auss dem Psalter Davids zusammen getragen, 4vv (Nuremberg, 1615)
2 funeral laments: 1 in C. Anomaeus: Zwo Christliche Leichenpredigten uber … Hans Christoffen, Herrn von Gera (Regensburg, 1610); Amen! Deo nostro in saecula, 7vv (Augsburg, 1619) [on the death of W.W. von Wolckerstorff; extract repr. in *MGG1*]
76 hymns, 4vv: all in D. Hitzler: Musicalisch figurierte Melodien (Strasbourg, 1634); 5 in L. Erhardi: Harmonisches Chor- und Figural-Gesangbuch (Frankfurt, 1659)

Other works in *D-Rp*; 1 quodlibet and 6 chorales ed. in MAM, ii (1954)

OTHMAR WESSELY

Brassin [de Brassine]. Belgian family of musicians.

(1) **Louis Brassin** (*b* Aix-la-Chapelle, 24 June 1840; *d* St Petersburg, 17 May 1884). Pianist and composer. Son of the principal baritone at the Leipzig Stadttheater (active 1847–59) and nephew of the flautist and composer Louis Drouet, he received his first piano lessons from a family friend. While still very young he made his début at the Thalia-Theater, Hamburg, and two years later, at Stade, the eight-year-old Louis was applauded both as performer and teacher, when he introduced his five-year-old brother Leopold. At the age of 12 he went on a concert tour with his brothers. He studied at the Leipzig Conservatory with Moscheles and in 1866 became a piano teacher at the Stern Conservatory in Berlin. Between 1869 and 1878 he was professor of the piano at the Brussels Conservatory and in 1878 accepted a similar post in St Petersburg. His compositions are chiefly piano works, including two concertos and salon pieces. He made piano transcriptions of excerpts from Wagner's *Ring*, among them a popular version of the Magic Fire Music from *Die Walküre*, and also wrote songs and two German operettas, *Der Thronfolger* (Brussels, 1865) and *Der Missionar*. He was the author of an *Ecole moderne du piano*.

(2) **Leopold Brassin** (*b* Strasbourg, 28 May 1843; *d* Constantinople, May 1890). Pianist, brother of (1) Louis Brassin. He first learnt the piano from his older brother. He appeared in public at the age of five, studied under Moscheles at Leipzig, and undertook many concert tours with his violinist younger brother, (3) Gerhard Brassin. In 1862 he became pianist to Ernst II, Duke of Saxe-Coburg-Gotha, later establishing himself as a piano teacher at Berne. He composed concertos and other piano pieces.

(3) **Gerhard Brassin** (*b* Aix-la-Chapelle, 10 June 1844; *d* ?Constantinople, after 1885). Violinist, brother of (1) Louis and (2) Leopold Brassin. In 1863 he was a violin teacher at Berne; he was for a time orchestral conductor at Göteborg and in 1874–5 taught at the Stern Conservatory, Berlin. In 1875 he became the director of a musical society at Breslau; after 1880 he lived in St Petersburg and then in Constantinople. His compositions include works for solo violin.

MARIE-THÉRÈSE BUYSSENS

Brass instruments (Fr. *cuivres*; Ger. *Blechbläser*; It. *ottoni*). The family of lip-reed instruments, including brasswinds (*see* BRASSWIND). A brass instrument is essentially tubular, sounded by the player exhaling through vibrated lips applied to one end of the tube. The term 'brass instrument' does not denote the material of construction, which is most commonly metal but can be of wood, plastic, etc. or composite. For further information, *see* entries on individual instruments; *see also* INSTRUMENTS, CLASSIFICATION OF (in the system of Sachs and Hornbostel a brass instrument is classified as an AEROPHONE).

Brassolini, Domenico. *See* BRASOLINI, DOMENICO.

Brass quintet (Fr. *quintette de cuivres*; Ger. *Blechbläserquintett, Blechquintett*; It. *quintetto di ottoni*). A composition for two trumpets, horn, trombone and tuba or bass trombone, or a group performing such a composition. During the 16th and 17th centuries numerous European composers wrote five-part consort music played by two cornetts and three sackbuts; five-part *Turmmusik* was written and performed by German *Stadtpfeifer* (town musicians). J.C. Pezel, a well-known Leipzig *Stadtpfeifer* wrote 116 pieces for five-part brass ensemble. Five-part works for brass instruments in the 19th century and the early 20th include compositions by Ludwig Maurer, Alexander Aliabev, Victor Ewald and Anton Simon. Although these were written for conical bore instruments (cornets, E♭ horns, B♭ horns, tuba), they are treasured by modern brass quintet ensembles for their musical and historical value, receiving frequent performances. Five-part brass writing is also found in European and American brass band music of the 19th century.

Chamber music ensembles flourished in New York in the years immediately following World War II, especially among students at the Juilliard School. Around 1947 the flautist Samuel Baron, founder of the New York Woodwind Quintet, helped to organize the loosely-structured New York Brass Ensemble, which performed primarily as a brass quintet and was the template for the modern ensemble. In 1954 two of its members, the trumpeter Robert Nagel and the tuba player Harvey Phillips, set up the New York Brass Quintet as a professional entity. The American Brass Quintet, organized in 1960 by the trombonist Arnold Fromme (also a member of the New York Brass Ensemble), uses a bass trombone instead of a tuba. These two groups, along with the Philip Jones Brass Ensemble in Britain and the Annapolis Brass Quintet in the USA, have been the leading force in establishing the brass quintet as a standard chamber ensemble. They have collectively commissioned over 300 musical works and

have inspired the formation of scores of professional ensembles. Over 900 composers have written music for brass quintet since 1954, among them Malcolm Arnold, Jan Bach, Leslie Bassett, Richard Rodney Bennett, Leonard Bernstein, William Bolcom, Eugène Bozza, Elliott Carter, John Cheetham, Ingolf Dahl, Peter Maxwell Davies, Jacob Druckman, Alvin Etler, Eric Ewazen, Lukas Foss, William Mathias, Vincent Persichetti, Ned Rorem, David Sampson, Gunther Schuller, Richard Wernick and Charles Wuorinen. These works can be loosely categorized into three types: those in sonata form; suites, that is, collections of dances or scenes, some in divertimento form and many emulating the dance rhythms of early consort music, *Turmmusik* and the Baroque suite; and single-movement works, varying greatly in style and length and including tonal and serial pieces.

BILL JONES

Brasswind. Term used to denote 'European' brass instruments, including those made in the European tradition on other continents, but excluding instruments used purely for signalling and those of folk traditions that have not been integrated into the mainstream of 'art' music. Brasswind instruments generally have compasses of between one and four octaves. They are designed to comply with the prevailing conventional framework of pitch standards and temperament, and are normally said to be pitched 'in' a key, such as B♭. The term 'brasswind' is used in much the same way as 'woodwind'.

ARNOLD MYERS

Brätel, Ulrich (*b* *c*1495; *d* Stuttgart, 1544 or 1545). German composer. From a letter that he wrote from Stuttgart on 27 September 1538 to the humanist Joachim Vadian it is clear that he had been Vadian's pupil in Vienna 23 or 24 years earlier, together with the composer Ludovicus Haydenhammer (see RISM 1537[1]) and the theorist Wenzeslaus Philomates. The three probably studied privately with Vadian, since their names do not appear in the Vienna university register. According to the letter Brätel later spent much time travelling in distant lands 'with king and princes' as a composer and performing musician, specifically with the Polish court: in the song *Ich denck offt vil* there is a reference to Polowitz castle, near Kraków. He may also have stayed in Hungary and Heidelberg. Moser's theory that Brätel belonged to Hofhaimer's circle in Vienna, and was perhaps even taught by him, is possible but remains unproved. From 1534 Brätel was in the service of Duke Ulrich of Württemberg, who had just introduced the Reformation movement to his land, so Brätel must have been converted to Protestantism by that time at least. Although he was mainly active as a composer from 1534 until his death, he was also a member of the privy council as secretary of the divorce court (1534–40). As a musician his chief duty was to build up a new repertory of service music that was compatible with the doctrine of the Reformed Church; he also wrote instrumental and secular vocal music. Most of his surviving compositions dated from 1533 to 1542 seem to have been written for the court at Stuttgart.

Opinion of Brätel's music bears the stamp of Eitner's verdict, 'dry and workmanlike'; this may have some connection with the social-critical texts of many of his songs, which were not in keeping with the lighter fare being offered by Georg Forster's collections. Brätel has left posterity in no doubt as to his musical models, naming them in the song *So ich betracht und acht der alten Gsang* as Ockeghem, La Rue, Josquin, Finck and Agricola. He is represented by seven motets in *D-Kl* 4° 24; the manuscript, compiled by the Kassel Kapellmeister Johannes Heugel (who seems to have been a friend of his), contains 21 works by or attributed to Josquin as well as compositions by a dozen lesser composers, and thus provides evidence of a contrapuntal school following on from Josquin. The historical tendency is in keeping with that of the Reformation: a sense of national identity achieved through adherence to an established international tradition.

WILFRIED BRENNECKE/CLYTUS GOTTWALD

Bratislava (Ger. Pressburg; Hung. Pozsony). Capital city of Slovakia. An important Slavonic centre in the 9th-century Great Moravian Empire, Bratislava fell later under Hungarian rule. The Hungarian defeat at the battle of Mohács (1526) opened Hungary to the Turks and in 1536 Bratislava replaced Buda as the capital and in 1653 as the coronation city of Hungary. This, and the removal of the Archbishop of Esztergom, had a long-lasting impact on Bratislava as a cultural centre and contributed to its population growth in the 18th century. In 1784, with the Turkish threat over, the National Assembly and administration returned to Buda and Bratislava's cultural importance diminished accordingly. This was reversed only after 1918, first as part of the new Czechoslovak Republic, then as the capital of a Slovak state (1939–45) during the Nazi occupation of the Czech lands, and in 1993 as capital of an independent Slovakia.

Bratislava's musical past was active and international in outlook. It was the birthplace of the lutenist Hans Neusidler, of J.N. Hummel and Ernő Dohnányi; composers who studied there include the Hungarians, Erkel (1822–5) and Bartók (1892–3, 1894–9). The list of foreign musicians who have appeared in the city includes Haydn, Mozart, Beethoven, Liszt, Brahms, Bülow, Clara Schumann, Bruno Walter and Richard Strauss.

Bratislava's contribution to music in central Europe was already important in the Middle Ages (the city charter dates from 1291). Until the 17th century the city's musical life centred on the 14th-century cathedral of St Martin (which had a cantor and a choir school from 1302) and the Franciscan church, founded in 1397. The music collections of both churches show that vocal polyphony was cultivated, as well as Gregorian chant. The most important medieval manuscript in the cathedral collection is the so-called Bratislava notated missal (*Missale Notatum Strigoniense*), in neumatic notation, of 1341, which contains the whole Hungarian repertory of medieval mass chants (see illustration). The manuscript of Anna Schumann (1571), from the cathedral library, contains 239 compositions – mainly hymns, responses and antiphons – in two to six parts. The city pipers, who took part in services until the 18th century, are first mentioned in records in 1448. The first Protestant church was consecrated in 1638, and until its closure and the banning of Protestant services in 1672 regular performances of Viadana, Michael Praetorius, Schütz, Schein, Hammerschmidt, Giovanni Valentini, Carissimi and others were heard under Samuel Friedrich Capricornus (1651–7) and Johann Kusser (1657–72), the father of J.S. Kusser. The church repertory, like those at the residences of the Esterházy and Grassalkovich families, later became strongly influenced by Viennese Classical works. Important musicians active in Bratislava between 1770 and 1830 included the organist and composer Anton Zimmermann, the pianist and teacher F.P. Rigler, the composer Georg Druschetzky and the double bass player Johannes Sperger. The *Pressburger Zeitung* (founded 1764) was one of the leading newspapers in Central Europe and carried influential music criticism. Artists who performed at the concerts organized by the St Martin's Church Music Society (1833–1945) included Liszt (the society's first patron) and Anton Rubinstein.

The first performances of secular dramatic works in the city were in the so-called Weiten Hof in 1609. The Imperial Hofkapelle in Vienna gave frequent guest performances in Bratislava Castle from 1637 to 1688. A theatre was built in 1764, and 12 years later an opera house on the site of the present Slovenské Národné Divadlo (Slovak National Theatre). From 1791 twice-weekly Italian opera performances were recorded, in a temporary theatre. But most performances were given in German or Hungarian until 1919, and the repertory included works by Haydn, Mozart, Dittersdorf, Boieldieu, Rossini, Weber, Lortzing, Verdi and Puccini. Operettas were performed from 1859. The Bratislava Opera Theatre (renovated 1969–72) was completed in 1886.

In 1919 Bratislava became part of the republic of Czechoslovakia, and within a decade the Czech and, especially, Slovak population had increased markedly. The first performance of an opera in Slovak was given in Bratislava on 10 December 1919 (*The Bartered Bride*), but Smetana's *The Kiss* on 1 March 1920 marked the real beginning of the Slovak National Opera, founded in 1919. During the inter-war years the company developed a wide international repertory as well as supporting native composers such as J.L. Bella, Viliam Figuš-Bystrý and Mikuláš Schneider-Trnavský, in addition to Smetana, Dvořák, Fibich and Janáček. Two outstanding opera conductors and directors of the period were the composer Oskar Nedbal (1923–30), and his nephew Karel Nedbal (1931–8). Important musicians associated with the Slovak National Theatre after its nationalization in 1945 have been the Croatian composer Krešimir Baranovič, Zdeněk Chalabala, Ladislav Holoubek, himself a prolific composer of operas, Tibor Frešo, Juraj Hrubant and Ondrej Lenárd. A golden age was Zdeněk Košler's tenure as chief conductor (1971–6). The Slovak National Opera in Bratislava presents standard repertory and contemporary works as well as the Slovak opera repertory. Its many first performances of Slovak operas have included the première of Suchoň's *Krútňava* ('The Whirlpool', 1949). The orchestra of the theatre, the Bratislava SO, in the thirties gave orchestral concerts presenting the standard repertory and new music. Native and foreign Singspiele, operettas and musicals are given at the Nová Scéna.

Until 1918 there was no permanent orchestra in Bratislava, and even the first Slovak Philharmonic Society founded in 1920 was really an amateur group of local

Neumatic notation in the Bratislava notated missal ('Missale Notatum Strigoniense'), 1341 (SK-BRbv)

government officials. However, through the efforts of their chief conductor, Zdeněk Folprecht (1920–33), the orchestra performed, before 1938, works by contemporary Slovak composers (Bella, Schneider-Trnavský, Lauko, Alexander Moyzes, Suchoň) as well as such works as Haydn's *The Creation* and Verdi's Requiem. The Bratislava RO (founded in 1926) reached its peak under František Babušek (1939–49). The professional Slovak PO was founded in 1949 and has its headquarters in Bratislava. Its conductors have included Václav Talich, Ludovít Rajter, Ladislav Slovák, Libor Pešek, Bystrík Režucha and Ondrej Lenárd. It comprises an orchestra of 100 and a choir of 80 and gives regular concert series in addition to undertaking tours throughout Slovakia, Bohemia and Moravia as well as abroad. The Slovak Chamber Orchestra (founded 1960), which specializes in Baroque music for strings, and the Slovak Madrigal Choir (founded 1964) are both composed principally of members of the Slovak Philharmonic Society. Other ensembles in the city include Musica Aeterna, which concentrates on early music, the Moyzes Quartet, successor to the Slovak Quartet (founded 1948), the municipal chamber orchestra Musica Istropolitana (1984), the New Slovak Wind Quintet and the Veni Ensemble, which specializes in new music. There were many choral societies during the 19th century. At the turn of the 21st century a number of amateur choirs perform to a high standard and often collaborate with professional orchestras. Ensembles like the professional SĽUK (Slovak Folk Art Group) and the youth ensemble Lúčnica (both founded in 1949) devote themselves to the performance of Slovak dances and other folk music.

The Bratislava Festival was founded in 1965; it is held for two weeks each October and includes exhibitions,

opera, ballet, orchestral and chamber music concerts, solo recitals and a musicological congress. It later included a series of concerts by young performers in association with UNESCO. Since the fall of the communist regime in 1989 several smaller festivals have been established, notably the biennial Melos-Ethos Festival (which focusses on contemporary works), the Bratislava Jazz Days and the Early music festival held each November. Two important competitions have also been inaugurated: the Hummel International Piano Competition and a singing competition in memory of the soprano Lucia Popp, who studied in Bratislava.

The Bratislava radio station provides both regional and national services and has an electronic studio. The television studio in Bratislava was opened in 1954 and regularly transmits opera, concerts and other music programmes.

Bratislava has ten elementary schools of music, a state conservatory (founded in 1919 as a music school, renamed the Music and Drama Academy in Slovakia in 1928 and made into the State Conservatory in 1941) and the High School of Musical Arts (founded 1949). Following the political changes of 1989 a school of church music and several private music schools were founded in the city. Musicology is studied at the department of philosophy of the Comenius University (founded 1919). The Institute of Musicology of the Slovak Academy of Sciences (founded 1951) comprises three departments (history of music, ethnomusicology, and contemporary music and music theory) and is concerned primarily with the study of Slovak music. Many of the principal monuments of Slovak music, including rare music prints, manuscript collections and a valuable collection of musical instruments, are held in the music department of the Slovak National Museum in Bratislava. A museum commemorating the life and work of Hummel is housed in the composer's birthplace. The Slovak state music publisher OPUS, which published scores by native composers and books on music, became privately owned in 1989; in the following years a number of small music publishers were founded in the city. The Bratislava Music Information Centre (founded 1965) promotes contemporary Slovak music abroad.

RICHARD RYBARIČ/ĽUBOMÍR CHALUPKA

Bratsche (Ger.). *See* VIOLA.

Bratu, Teodor (*b* Draghiceanu-Gogoşari, Ilfov, 20 Jan 1922). Romanian composer. He began studies in music late, after working as a schoolteacher (1945–50). He took courses at the Bucharest Academy of Music (1950–57), studying composition with Alfred Mendelsohn. From 1950 he was secretary of the Music Fund of the Composers' Union, later moving to the Ministry of Culture as a consultant and instructor (1958–82). All of his music is accessible and undemanding. His output is centred on dramatic works and vocal-orchestral music, especially choral, ranging from patriotic occasional pieces and madrigals to arrangements of folk music.

WORKS
(*selective list*)

Stage: Stejarul din Borzeşti [The Oak Tree from Borzeşti] (op, 4 tableaux, Bratu, after folk legend), 1968, Iaşi, State Opera, 15 April 1969; Punguţa cu doi bani [The Purse with Two Pennies] (children's op, 4 tableaux, after I. Creanga), 1970, Iaşi, State Opera, 1971; Dreptul la dragoste [The Right to Love] (op, 3, E. Lazar and Bratu), 1971, Bucharest, 1975; Din vremea Unirii [From the Time of the Union] (lyric-dramatic fresco, 3, S. Popescu and C. Ghinea), 1978, Iaşi, Opera, 1979; Tudor din Vladimiri [Tudor of Vladimiri] (op, 3, Bratu), 1982, Craiova, Liric, 1983

Choral: La joc [At Play], 1947; Minirii (suite, Bratu, P. Ghelmez, I. Meitoiu), solo vv, chorus, orch, 1957; 1907, 1957; Floare dobrogeana, 1961; Peste vârfuri, 1964; Cuvantul romanesc, 1974; Arc peste vremi [Arc over Time], 1981; 20 cântece, 1v/2 equal vv, 1981

OCTAVIAN COSMA

Brauchli, Bernard (*b* Lausanne, 5 May 1944). Swiss clavichord player and musicologist. After piano studies in Lausanne (1963–7) and Vienna (1968–9), he became increasingly attracted to the clavichord and its repertory. He made his European début at Fribourg, Switzerland, in 1972 and his American début at Marlboro College, Vermont, in 1973. He studied musicology at the New England Conservatory with Julia Sutton (MMus 1976) and began research in early Iberian clavichord music with Macario Santiago Kastner in Lisbon in 1977. He regularly tours Europe and North America, performing and recording a wide repertory of Renaissance and Baroque clavichord music, with an emphasis on Iberian composers. He has won high praise as a sensitive and tasteful performer. In contrast to most other modern clavichord players, he restricts himself to the fretted form of the instrument. Brauchli has given summer courses in many European countries, has lectured at the Boston Museum of Fine Arts, and was appointed professor of clavichord at the New England Conservatory in 1983. In 1993, in collaboration with Christopher Hogwood, he began the International Clavichord Congress that meets biennially in Magnano, Italy. His publications, most important among them *The Clavichord* (Cambridge, 1998), include articles on the clavichord, its history and iconography.

HOWARD SCHOTT

Braudo, Yevgeny Maksimovich (*b* Riga, 8/20 Feb 1882; *d* Moscow, 17 Oct 1939). Russian musicologist. He studied at the Riga Music School (1891–7) before taking piano lessons with B. Mellersten. He took a philology degree at St Petersburg University, graduating in 1911, after which he studied music history with Hugo Riemann and Hermann Kretzschmar in Germany. He was active as a music critic from the 1890s, and as a lecturer from 1903. He was appointed lecturer at the Petrograd Institute of Art History in 1922 and lecturer at Moscow University in 1924. As a representative of modernist music – he was a great admirer of Nikolay Roslavets's work – he was frequently disparaged by the proletarian camp in the 1920s, and although his many writings on western European music are considered important, his work on music of the 1910s and 20s is particularly revealing. His criticism displays a keen sense of style as well as aesthetical competence, profound knowledge and a most elegant manner of writing.

MARINA LOBANOVA

Bräuer, Ferenc (*b* Pest, 20 Oct 1799; *d* Pest, 15 April 1871). Hungarian conductor, teacher and composer. He studied the piano with János Skrobák and Joseph Czerny and, at the same time, the violin, which enabled him to play in János Bihari's gypsy orchestra during the carnival season of 1809. In 1812 he became a pupil of Hummel in Vienna, and in 1815 he conducted the residential orchestra of the Kállay family in Nagykálló. For over 50 years he worked in Pest, first as a music teacher (his most famous pupil was Stephen Heller), later as choirmaster of the Inner City Parish Church (1833) and as assistant director of the Singing School (later the Conservatory) of the Pestbuda Society of Musicians (from 1845). Together with Erkel he conducted the orchestral concerts of the Musical Society in 1847; this activity led to the founding of the Pest Philharmonic Society in 1853.

Bräuer was a characteristic figure in Hungarian musical life during the 'Age of Reform' which preceded the Revolution of 1848. His sacred compositions are in the Classical Viennese tradition, while the spirit of early German Romanticism is combined rather unusually with the new Hungarian national *verbunkos* style in his instrumental works.

WORKS

MSS in H-Bn

Sacred (chorus, orch): 2 masses; 2 offertories, 1 for double chorus; 2 graduals; Tantum ergo
Instrumental: Jubel Ouverture à la hongroise, orch, 1865; Variations brillantes, on a Hungarian theme, pf qnt (Vienna, 1829); Allemande mélancolique, pf (Vienna, ?1830); Waltzes, pf, before 1838; Allegro all'ungherese, pf, n.d.
Vocal: Rejtsd előlem [Dissemble before me] (K. Kisfaludy), before 1832

FERENC BÓNIS

Braun. German family of musicians. Active between 1760 and 1860, the family included instrumental virtuosos in three generations, and several female members had significant singing careers. The family's activities extended to Denmark, the Netherlands and Sweden; its members had close relations with the Kunzen and Türrschmidt families.

(1) Anton Braun (*b* Oberbeisheim, nr Kassel, 20 Jan 1729; *d* Kassel, 26 April 1798). Instrumentalist. After a period of study (probably with a town musician in Kassel) and a period as a military oboist in Hesse, he was

employed as a first violinist in the Kassel court orchestra from 1760 until his retirement in 1785. There are no surviving works to suggest that he was active as a composer. He had five sons (whom he taught the violin) and one daughter: (2) Johann; (3) (Johann) Friedrich; (4) Moritz; Maria (Louise) (*b* Kassel, 22 Oct 1762; *d* Munich, 7 April 1834); (Johann) Daniel (*b* Kassel, 24 June 1767; *d* Berlin, 16 June 1832); and (Johann) Andreas (*b* Kassel, 22 Feb 1771; *d* Waltershausen, 27 July 1833). Maria was active as an opera singer in Kassel. Daniel began his career as a violinist and tenor in Kassel but turned to the cello, and after studying with J.-P. Duport became a chamber musician to King Friedrich Wilhelm II, whom he accompanied on campaigns in 1793–4; he was briefly married to the singer Catharina Brouwer (*b* The Hague, 7 March 1778; *d* Amsterdam, 14 April 1855), a niece of Christian Ernst Graf, and had a daughter, Auguste (*b* Berlin, 20 Nov 1800; *d* Berlin, 7 Sept 1866), who married Carl Nicholas Türrschmidt, a son of the famous horn player Carl Türrschmidt. Auguste had a career as a singer and was contralto soloist in Mendelssohn's Berlin performance of Bach's *St Matthew Passion*.

(2) **Johann Braun** (*b* Kassel, 29 Aug 1753; *d* Berlin, 1 Jan 1811). Violinist and composer, son of (1) Anton Braun. As a child he was sponsored by Landgrave Friedrich II of Hessen-Kassel; he studied the violin with K.A. Pesch and composition with J.G. Schwanenberger in Brunswick. In the Trios op.2 (*c*1769) he described himself for the first time as 'musicien de la chambre' of the Landgrave. After the Landgrave's death and the disbanding of the orchestra in 1785, Braun remained as music tutor to the young Crown Prince Wilhelm. On 1 January 1788 Queen Friederike of Prussia (formerly Princess of Hessen-Darmstadt) appointed him her music director in Berlin. With F.L.A. Kunzen, the brother-in-law of his brother (3) Friedrich Braun, and other colleagues, he promoted some well-attended weekly concerts during Lent 1791 and 1793 at the Hotel Stadt Paris ('Nachricht von merkwürdigen Tonkunstlern', *Musikalische Monathsschrift* (1792), 23 only; repr. in *Studien für Tonkünstler und Musikfreunde*, ed. Kunzen and J.F. Reichardt, Berlin, 1793/*R*, ii). He may well have given up solo playing after the turn of the century; in the aftermath of war, the irregular and reduced payment of his pension (1806–9) caused him hardship.

Johann Braun's trios are composed in a cantabile idiom and each consists of a movement in sonata form, followed by a rondo or set of variations. In the Cello Concerto op.4 no.2, which was dedicated to King Friedrich Wilhelm II, the solo cello part emphasizes the top register of the instrument. The concertos for two horns became famous particularly through performances by Johann Palsa and Carl Türrschmidt.

WORKS

Orch: Simphonie concertante, 2 hn, orch (Zürich, n.d.); 2 vc concs., op.4, no.1 (Berlin, *c*1790), no.2 (Berlin, *c*1792); Conc., cl, 2 hn, *D-Bsb*

Chbr: 3 Str Trios, op.2 (Berlin, *c*1769); 3 Str Trios, op.3 (Berlin, *c*1783)

Lost: 18 concs. (11 for 2 hn, 7 for hn, bn, fl, vc), 12 hn trios, works for wind insts, all cited in *GerberNL*

(3) **(Johann) Friedrich Braun** (*b* Kassel, 15 Sept 1759; *d* Ludwigslust, 15 Sept 1824). Oboist and composer, son of (1) Anton Braun. He studied the oboe with C.S. Barth in Kassel and (thanks to the support of Landgrave Friedrich II) with Carlo Besozzi in Dresden. From June 1777 he served as an oboist and violinist in the Mecklenburg court orchestra at Ludwigslust; he also went on concert tours to cities including Hamburg (1784), Copenhagen (1786, 1793), Berlin (1792, 1800) and Breslau (1801).

As an oboist, Friedrich Braun strove to achieve a cross between Barth's expressive and cantabile style of playing and Besozzi's brilliant style. His own compositions, which are somewhat routine in character, exemplify this approach, which he also followed when teaching his pupils.

Friedrich Braun married in 1786 Louise Friederica Ulrica Kunzen (*b* Lübeck, 15 Feb 1765; *d* Ludwigslust, 4 May 1839), the daughter of Adolph Carl Kunzen. She was engaged as a court singer there in 1787 and was active until 1837.

WORKS

Orch.: Sinfonia a 8, *D-SWl*; 5 ob concs., *SWl*, solo parts only

Chbr: Duo concertante, va, vc (Hamburg, n.d.), ed. B. Päuler (Winterthur, 1976); 24 exercises, ob, pf (Leipzig, 1825); Einige Übungsstücke in den schwereren Tonarten, ob, pf, *Bsb*

Doubtful: Concerto-potpourri, ob, pf, attrib. Braun, *SWl*, possibly by C.A.P. Braun; Ob Conc., cited in Breitkopf catalogue, 1781, attrib. Braun

Lost: Conc., 2 ob, Adagio and Rondo, va, mentioned in L. Massonneau's diary, see Meyer

(4) **Moritz Braun** (*b* Kassel, 1 May 1765; *d* Würzburg, 16 Nov 1828). Violinist and bassoonist, son of (1) Anton Braun. By 1777 he was already serving in the Kassel court orchestra as a violinist; however, because of an injured finger, he changed to the bassoon a few years later, studying in Kassel and with Franz Anton Pfeiffer in Ludwigslust (1782). After a brief period in Silesia, he was appointed as a court and chamber musician at the archiepiscopal court in Würzburg in 1785. His concert tours took him in 1783–5 and 1787–9 to various German cities and courts. At the end of 1787, his father recommended him to Duke Friedrich Franz I of Mecklenburg-Schwerin as a successor to Pfeiffer, who had recently died. However, he decided to remain in Würzburg, where he had started a family in 1790, and received a rise in salary in 1791. In the following year, encouraged by Prince-Bishop Franz Ludwig von Erthal, he again took up the violin, and he was sent for further training to Bamberg. Braun was now regarded as a violin virtuoso; his pupils included (Franz) Joseph Fröhlich, who secured his involvement in the royal music school founded in 1804. His only surviving work is a piece for 12 instruments (*D-SWl*).

Two of Moritz Braun's children became musicians. Catharina Maria Louise ['Cathinka'] (*b* Würzburg, 14 March 1799; *d* Ludwigslust, 8 June 1832), after initial success as a pianist, became a prominent opera singer; she married her cousin (6) Theodor Braun, and went with him to Ludwigslust in 1825. Joseph Braun (*b* Würzburg, 1804; *d* Würzburg, 6 April 1861), a bassoonist, worked as a chamber musician at the Donaueschingen court, also touring as a virtuoso and composing pieces for his instrument.

(5) **Carl (Anton Philipp) Braun** (*b* Ludwigslust, 26 Dec 1788; *d* Rommehed, Sweden, 11 June 1835). Oboist and composer, son of (3) Friedrich Braun. He was taught the oboe by his father and made his début in 1806 at the Mecklenburg court. From 1 August 1807 he was engaged under his uncle and composition teacher F.L.A. Kunzen as a musician at the royal court in Copenhagen. He made a long concert tour in 1811, and in 1812 he played in

Munich, where he met Meyerbeer. After returning to Copenhagen, he left for Stockholm and joined the court orchestra there at a higher salary in 1815; later he became music director of various regiments stationed there. He also organized subscription concerts (1817) and military concerts (from 1826).

Carl Braun's output, which is centred on his own instrument, was well received by German critics, and his mastery of humorous writing, as in the finale of the Sonata for oboe and piano, was widely acknowledged. However, his attempt in the Fourth Symphony to develop his compositional style was criticized by E.T.A. Hoffmann in 1813.

WORKS

Incid music: Hytten i Schwarzwald (N.T. Bruun), Copenhagen, 1814; Axel och Valborg (A. Oehlenschlager), *S-St*, ov. arr. kbd (Stockholm, n.d.); ov. to Jenny Mortimer, *St*; ov. and entr'acte to Skulden, Stockholm, 1830, *St*; ov. and entr'acte to Wallensteins död (after F. von Schiller), Stockholm, 8 Dec 1831, *St*

Lost: other works, mentioned in L. Massonneau's diary (see Meyer) and contemporary pubns (see *SBL*, Nisser)

(6) Wilhelm (Theodor) Braun (*b* Ludwigslust, 20 Sept 1796; *d* Schwerin, 12 May 1867). Oboist, son of (3) Friedrich Braun. He was a pupil of his father and by 1809 had been engaged by the royal orchestra in Berlin (Ledebur). From here he went on concert tours (1814, 1817–18, 1821), and in 1824 he married his cousin Catharina Maria Louise ['Cathinka'] Braun. At Easter 1825 he became a member of the court orchestra in Ludwigslust, succeeding his father, and his wife was appointed a court singer there. At the change of government in 1837, he was transferred to Schwerin, and he retired there in 1856.

Wilhelm Braun took up the sensitive *galant* style of his father's oboe playing and applied it to the Romantic idiom of the day, producing a varied, expressive tonal quality (*AMZ*, xxv, 1823, 18–20). A similiar approach is evident in the Concertino op.12, with its frequent changes of tempo, its use of minor keys and its deliberate lack of symmetry. In his essay 'Bemerkungen über die richtige Behandlung und Blasart der Oboe' (*AMZ*, xxv, 1823, cols.165–72) Braun attempted to perpetuate the era of the oboe virtuoso, but by 1823 this had come to an end and courtly musical life was in decline. Braun now turned his attention to music for domestic entertainment, in particular the string quartet medium, for which he arranged keyboard works by Bach and Mozart and composed his own attractive pieces in a similiar but simpler idiom.

WERNER BRAUN

Braun, Jean. *See* LEBRUN, JEAN.

Braun, Johann Georg Franz (*b* Ubthal, ?Bohemia, before 1630; *d* Eger, Bohemia [now Cheb, Czech republic], after 1675). German composer from Bohemia. The title-page of his 1675 songbook gives his place of birth as Ubthal, a place that cannot now be identified. According to the prefaces to his songbooks he was cantor and choirmaster of St Nicolai, Eger, from at least 1658 until at least 1675. The two songbooks that he issued in 1664 are important contributions to the development of the sacred song with continuo. The *Marianischer Psalter* was produced for a Marian fraternity founded by the Jesuits in Eger, of which he was a member. Most of the 72 poems it contains are from Curtz's *Harpffen Davids* (1659) and 28 of them have melodies with continuo (including a little figuring). One of the melodies is from Georg Joseph's *Heilige Seelenlust* (1657); all the others are by Braun. His other songbook of 1664 is known only from a much enlarged edition of 1675. It was produced for the people of Eger

and contains 206 poems and 150 melodies with continuo. 58 of the melodies are new, and most of these are certainly by Braun himself: they include both simple tunes of a popular nature and songs in the style of Joseph. For the remainder Braun drew on the following sources: Schlindel's *Catholisches Gesangbuch* (1631), Spee von Langenfeld's *Trutznachtigall* (1649), Angelus Silesius's *Heilige Seelenlust* (1657), the Prague songbook of 1652, the Rheinfels songbook of 1666 and the collection *Keusche Meerfräulein* (Würzburg, 1649/*R*1983). In some 30 songs the original melody is radically altered, and this is even truer of the original basses. (W. Lipphardt: 'Das generalbassbegleitete deutsche geistliche Lied in Böhmen 1650–1750', *Musica cameralis: Brno VI 1971*, 118–19)

Omnes gentes, plaudite, 2vv, 2 viols, *S-Uu*

WALTHER LIPPHARDT/JIŘÍ SEHNAL

Braun, Joachim (*b* Riga, 11 Aug 1929). Israeli musicologist of Latvian origin. He was banished to Siberia with his family (1941–6), which influenced his career in the former USSR. He was educated at the State Conservatory, Latvia (1948–52, MA), studying the violin with Karl Brueckner and at the Tchaikovsky Moscow Conservatory (1958–64), where he gained the doctorate with a dissertation on violin art development (1964), studying with Lev Ginzburg (history of musical instruments and performing practices) and Dmitry Tsiganov (violin). His career began as a violinist with the Latvian Broadcasting SO (1952–60) and he taught the violin at E. Darzina Music School, Riga (1958–60). He was active as a music critic in the periodical press and professional journals (1960–70), but when he applied for emigration to Israel (1970) he was forbidden to publish. After emigrating in 1972 he joined the music department of Bar-Ilan University in 1974, becoming professor of musicology (1987), and later head of department (1992–4). He was made professor emeritus in 1997. Braun has been visiting professor at universities worldwide, including Indiana University, Bloomington (1981) and Martin-Luther University Halle-Wittenberg (1997). He was appointed chair of the RILM committee, Israel in 1991. His writings have focussed on sociology and hermeneutics, archaeology and iconography, Baltic music, ancient Israel and the Near East and Jewish music.

Braun, Peter Michael (*b* Wuppertal, 2 Dec 1936). German composer and pianist. He studied at the Cologne Hochschule für Musik (1956–9) with Frank Martin, Bernd Alois Zimmermann and others, at the Detmold Hochschule für Musik, where his teachers included Giselher Klebe (1959–61), and with Herbert Eimert in Cologne (1965–8). He also attended several Darmstadt summer courses (1958–66); his early works were influenced by Boulez, Pousseur and Cage. He has taught at Darmstadt, for the Goethe Institute (1973–4) and at the Heidelberg-Mannheim Hochschule für Musik (from 1978). An active performer of his own works, he has appeared as both pianist and conductor. His honours include a residency at the Villa Massimo, Rome (1976), and awards from the city of Cologne (1971) and the Cité Internationale des Arts, Paris (1991–2).

Braun's early works explore atonal (Piano Trio, 1958) and serial (*Disposition*, 1958–60) techniques, sometimes linking these with principles that anticipate minimalism (*Interstellar*, 1959) or aleatory ideas (*4 Aphorismen*, 1956; *Quanta*, 1958–67). His orchestral works of the 1960s emphasize instrumental timbre and explore the variable states of sound complexes. *Transfer* (1965–8), one of his best-known works, features static sound planes

that function both as autonomous blocks with interior development, and as foils for foreground figuration. In the early 1970s he turned towards tonality and melodic simplicity. Later compositions synthesize stylistic elements from past and present. In *Reise in die Zeit* (1977–83), for example, medieval dance rhythms are reflected against an impressionistic backdrop; other passages of the work adopt a late Romantic style, or refer to North American musical idioms such as folk music, jazz and minimalism.

WORKS

RAINER KÖHL

Braun, Victor (Conrad) (*b* Windsor, ON, 4 Aug 1935). Canadian baritone. He studied with Lilian Watson and at the Royal Conservatory of Music, Toronto. He joined the Canadian Opera Company in 1961, making his début as Escamillo. In 1963 he joined the Frankfurt Opera and in 1968 the Staatsoper in Munich. He made his Covent Garden début in 1969 as Hamlet in the first London performance of Searle's opera and also sang there as Count Almaviva and Yevgeny Onegin and in several Verdi roles. At Santa Fe he sang Jupiter in *Die Liebe der Danae* (1982), Mandryka in *Arabella* (1983), the General in *We Come to the River* (1984) and Holofernes in the American première of Matthus's *Judith*. His repertory also included Wolfram, which he sang at La Scala and the Metropolitan and recorded under Solti. In the later part of his career he became a noted Hans Sachs, Wozzeck, Dr. Schöw and Golaud. Braun's voice, accomplished if not particularly individual, was enhanced by his gifts as an actor.

HAROLD ROSENTHAL/ALAN BLYTH

Braun, Werner (Hermann Georg) (*b* Sangerhausen, 19 May 1926). German musicologist. From 1946 he attended the University of Halle, Wittenberg, where he studied musicology with Max Schneider and music teaching with Fritz Reuter (state examination, 1950). He received the doctorate from Halle in 1952 with a dissertation on Mattheson. From 1951 to 1958 he was assistant lecturer at the musicology department of Halle University, where in 1958 he completed the *Habilitation* in musicology with a work on the central German chorale Passion. In addition to his teaching commitments in Halle, he was entrusted with the project of cataloguing music documents from central Germany. From 1961 he was assistant lecturer in the musicology institute of Kiel University, becoming an external lecturer in 1965 and supernumerary professor in 1967. In 1968 he became a research fellow at Saarbrücken University, where he was appointed professor in 1972; he retired in 1994. In his numerous writings Braun has brought to light and interpreted previously undiscovered 17th- and 18th-century sources, predominantly from central and north Germany. His other areas of research include reception history, particularly of early opera, Handel, church music history, and the relationship between historical perspective and methodology.

HANS HEINRICH EGGEBRECHT/HERBERT SCHNEIDER

Braun, Yehezkel (*b* Breslau, 18 Jan 1922). Israeli composer. His parents settled in Palestine in 1923. After studying at the Israel Academy of Music with Alexander Boskovitch, among others, he was appointed to teach there when it merged with Tel-Aviv University in 1966. In 1975 he completed the MA in classical studies at the University, and studied Gregorian chant with Dom Jean Claire at Solesmes. He has served as a jury member for prizes in Gregorian chant at the Conservatoire National Supérieur, Paris (1990, 1996, 1997).

In his early works Braun adopted the ideology of a national Israeli music, merging folklike dance patterns with cantillation motifs and modal chromaticism, as in his transparent Piano Sonata (1957). During the late 1950s and 1960s he composed several 12-note compositions, such as the Prelude and Passacaglia for harp (1967), retaining his predilection for simple melodic lines and consonant harmonies within the dodecaphonic context. Later works are more stylistically diverse. His Piano Trio no.1 (1988) is related to French neo-classicism, while *Hexagon* (1998), commissioned for inclusion on the same programme as Brahms's Sextets, was conceived as a nostalgic commentary on Brahms's musical language.

Much of Braun's prolific output has been inspired by the folk music of Israel. *'Iturim limgilat Ruth* ('Illuminations to the Book of Ruth', 1983) unfolds in a sequence of dance tunes and monophonic cantillation motifs in which diminished 4ths and pentatonic scales predominate. His interest in Hebrew poetry has led him to favour vocal writing. *Kinnoro shel David* ('King David's Lyre', 1990), a large-scale cantata setting verses from the book of *Psalms* and the Mishnah, combines psalmodic tones, traditional formulas for learning the Mishnah and dance tunes in folk style. He has also contributed to the repertory of Jewish reform congregations in the USA, such as in his *Hallel* ('Praise Ye', 1984), commissioned by Bnei Yeshurun in Minneapolis. This work is based on Ashkenazi and Sephardi cantillation motifs combined with rich and festive choral harmonies. He has also arranged numerous traditional tunes for children's chorus.

WORKS
(*selective list*)

VOCAL

Choral: Maḥmad levavi [The Sweetheart of my Heart] (S. Levi) SATB, 1964 [after trad. Yemenite melody]; Sabbath Evening Service, Bar, SATB, org, 1971; Shir Ha-shirim pereq Gimel (Cantici canticorum caput III), SATB, 1973; Hilkhot teqi'at shofar [Festive Horns] (cant., Mishnah), SATB, wind octet, 1980; Hallel [Praise Ye] (cant.), cantor, SATB, orch, 1984; 3 Ancient Songs on Classical Greek Children's Rhymes (Braun, after ancient Gk and Hebrew), chorus, 1987; Kinnoro shel David [King David's Lyre] (orat, Pss, Midrash), Tr, children's choir, orch, 1990; Alkman (Alkman, trans. JEHOASH HIRSHBERG

Brauneis, Walther (*b* Vienna, 27 Feb 1942). Austrian music historian. After studying at the Technische Hochschule in Vienna, he was employed as an engineer at the Bundesdenkmalamt, where he was appointed director of the department of historical instruments in 1984. His numerous publications on the history and topography of the city of Vienna include articles on composers of the Viennese Classical period, in particular the results of his Mozart research have attracted interest. He was made secretary of the Wiener Beethoven-Gesellschaft in 1970.

RUDOLF KLEIN

Braunfels, Walter (*b* Frankfurt, 19 Dec 1882; *d* Cologne, 19 March 1954). German composer. At an early age he demonstrated strong musical gifts which were encouraged by his mother, a pianist who was a great-niece of Louis Spohr and a friend of Liszt and Clara Schumann. Braunfels

began studying the piano at the age of 12 with James Kwast at the Hoch Conservatory in Frankfurt. He studied law and economics at the University of Munich, but after hearing a performance of Wagner's *Tristan und Isolde* under Mottl he decided to devote his energies to music. In 1902 he went to Vienna to study the piano with Leschetizky and after a year attained a level of virtuosity sufficient to enable him to pursue a successful career as a concert pianist for many years. He returned to Munich to study composition with Thuille, and also served under Mottl at the Nationaltheater. In 1925 he became co-director of the newly constituted Cologne Hochschule für Musik with the conductor Hermann Abendroth. A determined opponent of the Nazis, Braunfels was removed from this post in 1933 on account of being half-Jewish. Although his music was officially proscribed during the Third Reich, Braunfels refused to leave Germany, withdrawing instead into self-imposed exile at Lake Constance where, in isolation, he continued to compose. In 1945 he was again summoned to Cologne in order to rebuild the Hochschule, and was made professor emeritus in 1950.

Like many composers of his generation, Braunfels was profoundly influenced by Wagner. But he was equally inspired by the orchestral virtuosity and fantasy of Berlioz's music to which he paid homage in the orchestral piece *Phantastische Erscheinungen eines Themas von Hector Berlioz* (1917). His first breakthrough came with the opera *Prinzessin Brambilla* which enjoyed a successful première under Schillings in Stuttgart in 1909. The work, based on a story by Hoffmann, is a typical post-Wagnerian fairy tale opera in the manner of such contemporaries as Humperdinck, Klose and Pfitzner. A greater individuality is manifested in his second staged opera *Die Vögel* (1920), based on Aristophanes' comedy. Here the romantic ardour and the sense of longing for unearthly spiritual values struck a chord in a Germany trying to recover from World War I. Enthusiastically championed by Bruno Walter in Munich, it quickly established a place in many German opera houses during the early 1920s. Further success came with his next opera *Don Gil von den grünen Hosen* (1924), a work distinguished for its skilfully conceived sequence of through-composed ensemble scenes coloured with elements of Spanish folklore.

By 1925 Braunfels ranked with Strauss and Schreker as one of the most popular of contemporary German opera composers. But his non-operatic compositions also gained considerable respect. Influential conductors such as Furtwängler performed the *Phantastische Erscheinungen* and the brilliant *Don Juan: eine klassich-romantische Phantasmagorie* (1923), while Abendroth gave the immensely successful premières of the Te Deum (1921) and the *Grosse Messe* (1926). In the latter works, Braunfels moved away from the late Romantic language of the early operas to a more austere neo-Baroque style, the massive sonorities of which almost recall those of Bruckner. This austerity became even more pronounced after Braunfels had been removed from his post in Cologne in 1933. During this period he was increasingly drawn to religious and mystical subjects, collaborating for example with the poet Paul Claudel on the opera *Verkündigung*, composed during the first years of the Nazi regime but first performed only in 1948. Near the end of World War II Braunfels turned to chamber music, composing three string quartets and a string quintet, works of great formal concentration which reveal the profound influence of Beethoven.

Although Braunfels was rehabilitated after 1945, his music no longer enjoyed the same level of esteem as in the 1920s. Considered old-fashioned and reactionary in the context of postwar musical developments, his work was quickly forgotten. However, a revival of interest in Braunfels took place during the 1990s with performances of *Die Vögel* in Bremen (1991) and Berlin (1994), and a subsequent recording of the opera released in 1996.

WORKS

STAGE

Fallada (Feerie, K. Wolfskehl), op.3, 1905, unperf.
Der goldne Topf (op, after E.T.A. Hoffmann), op.6, 1906, inc., unperf.
Prinzessin Brambilla (heitere Oper, 2, Braunfels, after Hoffmann), op.12, Stuttgart, 25 March 1909
Ulenspiegel (3, C. de Coster), op.23, Stuttgart, 4 Nov 1913
Die Vögel (lyrisch-phantastisches Spiel, 2, Braunfels, after Aristophanes), op.30, Munich, National, 30 Nov 1920
Don Gil von den grünen Hosen (musikalische Komödie, 3, Braunfels, after T. de Molina), op.35, Munich, National, 15 Nov 1924
Der gläserne Berg (Weihnachtsmärchen, J. Elstner-Örtel), op.39, Krefeld, 1928
Galathea (griechischen Märchen, 3, Braunfels, after S. Baltus), op.40, Cologne, 26 Jan 1930
Verkündigung (Mysterium, 4, P. Claudel), op.50, 1933–5, Cologne, 4 April 1948
Der Traum ein Leben (3, Braunfels, after F. Grillparzer), op.51, 1934–7, Frankfurt, HR, 22 March 1950
Szenen aus dem Leben der heiligen Johanna (Braunfels), op.57, 1939–41, unperf.
Der Zauberlehrling (TV ballet), op.71
Das Spiel von der Auferstehung (Alsfeld Passion Play, after H. Reinhart), op.72, 1938–54, Cologne, WDR, 1954
Incid music

VOCAL

Large-scale vocal: Offenbarung Johannis Kap. VI, op.17, T, double chorus, orch, 1909; 3 chinesische Gesänge (H. Bethge: *Die chinesische Flöte*), op.19, S/T, orch, 1914; Auf ein Soldatengrab (H. Hesse), op.26, Bar, orch, 1922; 2 Gesänge (F. Hölderlin), op.27, Bar, orch, 1922; Die Ammenuhr, op.28, boys' chorus, orch, 1919; TeD, op.32, S, T, chorus, orch, org, 1921; Grosse Messe, op.37, S, A, T, B, boys' chorus, chorus, org, 1926; Introitus and Graduale, op.37b, S, A, T, B, boys' chorus, org, 1926; Conc., op.38, org, boys' chorus, 4 brass, str orch, 1928; 2 Männerchöre, op.41; Adventskantate, op.45, Bar, chor, orch, 1933; Weihnachtskantate, op.52, S, Bar, chorus, orch, 1937; Die Gott minnende Seele (M. von Magdeburg), op.53, S, chbr orch (1947); Passionskantate, op.54, Bar, chorus, orch, 1943; Osterkantate, op.56, S, Bar, chorus, orch, 1944; Romantischer Gesänge (C. von Brentano, J. Eichendorff), op.58, S, orch, 1947; Der Tod des Kleopatra, op.59, S, orch (1946); Von der Liebe süss und bittrer Frucht (Jap.), op.62, S, orch (1947); Trauer, Tanz- und Weiselieder, op.65, coloratura S, chbr choir, chbr orch, hpd, lost

Songs: 6 Gesänge (Wolfskehl, W. Wenghöfer, S. George), op.1; Lieder in Volkston, op.2; 6 Gesänge (Hölderlin, F. Hebbel, F. Hessel, J.W. von Goethe, Des Knaben Wunderhorn), op.4; Fragmente eines Federspiels (Des Knaben Wunderhorn), op.7, v, pf; Nachklänge Beethovenscher Musik (Brentano), op.13; Gesänge (Goethe), op.29; 2 Gesänge (H. Carossa), op.44

INSTRUMENTAL

Orch: Hexensabbath, op.8, pf, orch, 1906; Sym. Variations on an old French children's song, op.15, 1909; Ariels Gesang, op.18, 1909 [from incid music to W. Shakespeare: *The Tempest*]; Serenade, E♭, op.20, chbr orch, 1909; Pf Conc., A, 1911; Carnaval Ov. to E.T.A. Hoffmann's Prinzessin Brambilla, op.22, 1912; Phantastische Erscheinungen eines Themas von Hector Berlioz, op.25, 1917; Don Juan: eine klassich-romantische Phantasmagorie, op.34, 1923; Prelude and Fugue, op.36, 1926; Suite from Der gläserne Berg, op.39b, chbr orch, 1928; Divertimento, radio orch, op.42, 1930; 2 Weihnachtsmärchen, op.43, school orch, 1931; Schottische Fantasie, op.47, va, orch, 1932–3; Orchester Suite, op.48, 1933–6; Conc., op.49, vc, orch, inc.; Konzertstück, c♯, op.64, pf, orch, 1946; Musik, op.68, vn, va, 2 hn, str orch, 1947; Symphonia brevis, op.69, 1948; Hebriden-Tänze, op.70, pf, orch, 1950–51

Bräutigam, Helmut (*b* Crimmitschau, 16 Feb 1914; *d* nr Ilmensee, 17 Jan 1942). German composer. He began music studies in 1934 at the Leipzig Hochschule für Musik. In 1938 he became instructor at the Leipzig Musikschule für Jugend und Volk and was active simultaneously as assistant director of the Saxon Folksong Archive and as associate of the youth music section of Leipzig radio. He entered military service in 1938 and was killed in action.

Bräutigam's early association with the German youth movement in music (the 'Jugendmusikbewegung'), as well as his unequivocal commitment to National Socialism, was decisive for his career. He assembled folk songs from central Germany and Swabia and composed in a distinctly popular vein. His music is tonal, melodious and technically undemanding, intended for amateur performers: the instrumental pieces require lightness and rhythmic precision in their execution, and the numerous choral works, which include a large proportion of songs and folksong settings, are social in nature, composed for youth groups and for comrades-in-arms. Bräutigam also wrote poetry, including a volume *Den Freunden* (Bad Godesberg, 1941), novellas and essays.

WORKS
(*selective list*)

Vocal (songs, cants., choral pieces): Kume, Geselle min, 1932; 4 kleine Weihnachtsmotetten, chorus, 1935; Kommt, ihr G'spielen, 1937; Mein Sommerliederbuch, 1937; Rundadinella, 1937; Ach, bittrer Winter, 1938; Das grosse Sauffe- und Fastnachtsquodlibet, 1–8vv, 1938; Die Patengabe, children's songs, 1938; 3 Gesänge nach altgriechischen Dichtungen, chorus, 1938; Gottes Glocke, 3 choruses, 1938; Ich spring in diesem Ringe, 1939; 7 Mädchenlieder (Des Knaben Wunderhorn), female chorus, 1939; Guten Abend euch allen, 1940; Kleine Weihnachtsfeier, 1940; Lebenslust (J.W. von Goethe), chorus, 1940; Der Krieg stösst in sein Horn (soldiers' cant., M. CHARLOTTE ERWIN/ERIK LEVI

Brautigam, Ronald (*b* Haarlemmermeer, 1 Oct 1954). Dutch pianist. He studied with Jan Wijn at the Sweelinck Conservatory, Amsterdam, and continued his studies at the RAM, London, and in the USA with Rudolf Serkin. He made his solo concerto début with the Concertgebouw Orchestra in Amsterdam in 1979, and has played with all the major orchestras in the Netherlands, and internationally with such orchestras as the Bavarian RSO, the Oslo PO, the Orchestre National de France and the English Chamber Orchestra. Brautigam made his Japanese début in 1988, playing with the orchestras of Osaka, Sapporo and Nagoya, and has since been a regular visitor to Japan and south-east Asia. In 1992 he first played at the Salzburg Festival, with the Concertgebouw Orchestra under Frans Brüggen. He also appears widely in chamber music, often in partnership with the violinist Isabelle van Keulen, with whom he has recorded works ranging from Mozart to Poulenc and Shostakovich. Other notable recordings include an award-winning coupling of Ravel's *Le tombeau de Couperin* and Schumann's Second Sonata, Shostakovich's Piano Concerto no.1 and works by Hindemith and Martin.

As a result of his collaborations with musicians such as Brüggen and Ton Koopman, Brautigam has developed a particular interest in the fortepiano. He regularly gives recitals on this instrument, has played concertos with the Orchestra of the Age of Enlightenment and the Orchestra of the Eighteenth Century, and has made stylish and imaginative recordings of the complete Haydn and Mozart sonatas, and the complete piano music of Mendelssohn.

RICHARD WIGMORE

Bravničar, Matija (*b* Tolmin, Slovenia, 24 Feb 1897; *d* Ljubljana, 25 Nov 1977). Slovenian composer. He studied in Gorizia and later with Kogoj at the Ljubljana Conservatory (1932). He was active in Ljubljana as a member of the opera orchestra (1919–45), a composition teacher at the academy of music (until 1968) and co-editor of the *Slovenska glasbena revija*. He was also a member of the Slovenian Academy of Sciences and Arts. Although he made use of Slovenian folk elements, his music is fundamentally expressionist, with some application of 12-note techniques. He is important above all for his orchestral pieces, which display an aptitude for symphonic construction, and for his operas.

ANDREJ RIJAVEC/IVAN KLEMENČIČ

Bravura (It.: 'skill, bravery'). The element of brilliant display in vocal or instrumental music that tests the performer's skill. The term was particularly common in the 18th century with the *aria di bravura*, also known as the *aria d'agilità*. John Brown (*Letters on Italian Opera*, 2/1791) remarked that such arias were 'composed chiefly – indeed, too often – merely to indulge the singer in display'; and Mozart said of the aria for Constanze, 'Ach, ich liebte' in *Die Entführung aus dem Serail*, 'I have tried to express her feelings, as far as an Italian bravura aria will allow it' (letter dated 26 September 1781).

OWEN JANDER

Bravusi, Paolo (*b* 1586; *d* Modena, Oct 1630). Italian composer. He spent his life in Modena and was a pupil – possibly a foster-son – of Orazio Vecchi. From 1626 until his death from the plague he was one of Vecchi's successors as *maestro di cappella* of Modena Cathedral. He had already been assistant *maestro* to Gemignano Capilupi from 1606 to 1614, and in 1608 directed an ensemble of three cornetts and five trombones in the city square for the entry into the city of Isabella of Savoy. He saw through the press Vecchi's first book of masses for six and eight voices (Venice, 1607), and included a mass of his own; Vecchi's *Dialoghi* for seven and eight voices (Venice, 1608), another posthumous publication, also includes a work by Bravusi, as does *Missae ... Horatio Vecchio* (Antwerp, 1612). His only other known works are four motets in another volume that he saw through the press, the posthumous large-scale *Concerti ecclesiastici* (Venice, 1621) of Capilupi. Bravusi's contributions are in the mixed concertato style pioneered by Giovanni Gabrieli. One 12-part piece is scored for six soloists and six instruments, with a vocal and instrumental tutti, and includes a sinfonia in the manner of Gabrieli.

JEROME ROCHE

Brawl. *See* BRANLE.

Braxton, Anthony (Delano) (*b* Chicago, 4 June 1945). American alto saxophonist, contrabass clarinettist and composer. In his teens he pursued the study of jazz and European art music, eventually reading philosophy and composition at Roosevelt University (1966–8). After army service (1963–6) he returned to Chicago, where he joined the Association for the Advancement of Creative Musicians, and in 1967, with Leroy Jenkins and Leo Smith, he formed a trio which performed and recorded in New York as the Creative Construction Company. Along with other AACM members, the trio travelled to Paris in 1969 in an attempt to find steady work, but Braxton himself was not well received. He left Paris for New York in 1970 and joined the Italian improvisation ensemble Musica Elettronica Viva, then played with Chick Corea in the cooperative free-jazz quartet Circle (1970–71). From 1972, following the delayed success of For Alto, the first album for unaccompanied saxophone ever recorded, he was invited to present numerous solo concerts. He also appeared frequently from 1971 to 1976 as the leader of his own quartets, which included the other members of Circle, Dave Holland (see illustration) and Barry Altschul, and a brass player – either Kenny Wheeler or George Lewis (ii); at times Phillip Wilson or Jerome Cooper replaced Altschul. Braxton performed and recorded with Derek Bailey and Company in London (1974–7) and with the Globe Unity Orchestra in Germany (1975).

Braxton has continued to record regularly into the new century as a soloist, composer and leader. He was based in New Haven, Connecticut, for two years from 1983 before securing a position as a professor of music at Mills College in Oakland, California, in 1985; in this last year he formed a long-standing quartet consisting of the pianist Marilyn Crispell, the double bass player Mark Dresser, and the drummer Gerry Hemingway. He also toured Europe with the double bass player Adelhard Roidinger and the drummer Tony Oxley in 1989, and from 1990 he taught at Wesleyan University. A prestigious MacArthur Foundation award in 1994 enabled Braxton to start a corporation, the Tri-Centric Foundation, which organized ensembles to perform his musical, multimedia and interdisciplinary works in New York, beginning with a series of concerts in 1995, and in October 1996, the première of *Shala Fears for the Poor*, the third in his projected series of 12 three-act operas sharing 12 central characters. In 1996 he began giving concerts of *Ghost Trance Music*, lengthy performances involving an intricate dialectic between notated and improvised materials. In 1997, with Velibor Pedevsky, he established the record company and label Braxton House, to issue examples of *Ghost Trance Music* and other projects. In addition to these principal activities, he also played in a duo with an African percussionist, led a sextet devoted to interpretations of Charlie Parker's legacy, wrote a two-act musical in which he joined the ensemble as a pianist rather than a wind player, and edited an edition of his piano music, among other projects.

A virtuoso on all members of the saxophone and clarinet family, Braxton is a leading figure in the merger of free jazz and contemporary art music, but he is equally comfortable in these separate fields, whether improvising in free-jazz contexts and interpreting jazz standards, or writing compositions which may draw from aleatory, atonal, or electronic music, or *musique concrete*. Braxton's diversity emerges in many other ways, not the least that he may be extremely funny, or deadly serious; the former quality manifests itself in delightfully unexpected

sounds, and in this sometimes whimsical and cartoonish approach to musical notation, and the latter in many pieces of music, and in his notoriously impenetrable publications, *Tri-Axium Writings* (on the philosophical underpinnings of his music; n.p., 1985) and *Composition Notes* (on the material and structure of 330 of his compositions; n.p., 1988).

BARRY KERNFELD/R

Bray, John (*b* England, 19 June 1782; *d* Leeds, 19 June 1822). English actor, composer and arranger. He was active in Philadelphia, New York and Boston from 1805 to 1822. He went to Philadelphia in 1805 as a member of Warren and Reinagle's theatre company, and also acted in Charleston, New York, Richmond and Baltimore. In 1815 he moved to Boston, where he remained active until the onset of his final illness, when he went back to Leeds.

Most of Bray's compositions are songs for the stage, patriotic songs and sacred works. His most important work is the 'Operatic Melo Drame' *The Indian Princess*, based on the story of Captain John Smith and Pocahontas; this was issued in 1808 in a vocal score which, besides songs and choruses, included the overture and instrumental background pieces for the scenes in melodrama – an unusually complete publication for the period. Bray's musical style is less polished than that of his American contemporaries Reinagle, Graupner and Taylor; although his melodies are graceful and full of rhythmic variety, his piano textures often lack clarity.

WORKS

ANNE DHU SHAPIRO

Braye Manuscript. *See* SOURCES OF INSTRUMENTAL ENSEMBLE MUSIC TO 1630, §7.

Brayssing, Grégoire [Gregor] (*b* Augsburg; *fl* 1547–60). German instrumentalist and composer, active in France. He left Germany after the defeat of the Elector Johann Friedrich of Saxony by Charles V at Mühlberg in 1547. A note in the Paris archives dated 1553 describes him as a lutenist, and other documents of 1556 and 1560 (in *F-Pn*) attest his friendship with Estienne Du Tertre and Loys Bourgeois. Adrian Le Roy's *Quart livre de tablature de guitarre* (Paris, 1553) contains six fantasias (3 ed. D. Kennard, London, 1956; facs. Monte Carlo, 1979) 'composed by M. Gregoire Brayssing deaugusta', as well as intabulations of five psalms and seven chansons by Janequin, Sandrin, Maillard and others with a frottola by Sebastiano Festa. The final piece, entitled *La guerre, faitte à plaisir*, includes a marginal note in German referring to the Battle of Mühlberg.

FRANK DOBBINS

Brazhnikov, Maksim Viktorovich (*b* St Petersburg, 19 March/1 April 1902; *d* Kiev, 23 Oct 1973). Russian musicologist. The founder of medieval music studies in modern Russia, he studied the piano at the Leningrad Conservatory with L.V. Nikolayev, graduating in 1925, and completed a second degree in theory and composition (with V.P. Kalafati) and early Russian musical notation (with A.V. Preobrazhensky) in 1927. Until 1935 he taught at the conservatory and the Institute of the History of the Arts, Leningrad, and worked as a draughtsman and technician at a Leningrad pipe-casting factory, giving concerts to workers; he was then appointed research assistant at the department of musical instruments of the Hermitage. In 1940 he requested permission from Stalin to conduct research in his area of specialization, early Russian chant, and was appointed research assistant at the Leningrad State Research Institute of Theatre and Music. Forced to evacuate to Kirov in 1941, he defended his *Kandidat* dissertation on polyphony in sign notation scores at the Moscow Conservatory in 1943. In 1945 he

returned to Leningrad, where he continued to work at the Institute of Theatre and Music until he was dismissed in 1953 for investigating early Russian sacred chant. He then worked in the manuscript department of the Leningrad Academy of Religion until 1960; and taught at the Moscow Institute for the History of the Arts during the 1960s. In 1968 he defended his doctoral thesis on early Russian musical theory and he was appointed professor in 1970 at the Leningrad Conservatory, where, renewing a tradition that had been suspended for 40 years, he lectured on the palaeography of early Russian sacred chant and church singing, preparing students for further studies in the field.

Brazhnikov is known principally for his pioneering work in the history and theory of early Russian sacred chant, and his descriptions of Russian manuscripts from the 12th to the 19th centuries, his deciphering of their notation, and his publication of monuments of Early Russian chant are remarkable academic achievements. He also composed concertos for piano and orchestra and for violin and orchestra using themes from early Russian *znamenniy* chant, wrote poems and diaries (which are extant), and painted.

The Brazhnikov Archive, which houses most of his papers, is in the Russian National Library, St Petersburg; the Brazhnikov Collection, which contains the chant manuscripts he collected, is held at the Institute of Russian Literature, St Petersburg. The bulk of his work, including his *Kandidat* dissertation, his *Blagoveshchenskiy kondakar'* ('The kondakar' of the Annunciation'), *Slovar' drevnerusskikh muzïkal 'nïkh terminov* ('Glossary of Early Russian Musical Terms') and descriptions of a large number of manuscripts of early Russian sacred chant, remains unpublished.

NATAL'YA SEMYONOVNA SERYOGINA

Brazil (Port. República Federativa do Brasil). Country in South America. It is bordered by all other South American countries except Chile and Ecuador, and by the Atlantic Ocean to the east. It was colonized by Portugal after 1500, but the culture of the indigenous peoples survived. São Paulo, the largest centre of production in Latin America, is its financial capital, and Rio de Janeiro its cultural capital. The official language is Portuguese.

I. Art music. II. Traditional music. III. Popular Music.

I. Art music

1. Colonial period (to 1822). 2. After independence.

1. COLONIAL PERIOD (TO 1822). Relatively little is known about art music activities and composition during

the first two centuries of Brazilian history. The substantial documentation attesting to important musical activities in Pernambuco (Olinda, Recife) and Salvador, Bahia, was not compiled and studied until the mid-20th century. Throughout the colonial period most music-making related directly to church services, and surviving colonial music is therefore mainly sacred. The regular clergy was responsible for first organizing Christian religious life in Brazil. The Franciscans started using music in the conversion of the Amerindians, but it was the Jesuits who had the strongest influence on the musical life of the colony, and as early as 1550 the Jesuit Nóbrega had initiated musical instruction at Bahia. Instrument making did not flourish, however, until the 18th century. Organs and other instruments were built in Pernambuco and Minas Gerais.

The first extant colonial composition, a recitative and aria in the vernacular for soprano, first and second violins and continuo, was written at Bahia in 1759, but the attribution of the authorship to Caetano de Mello Jesus, *mestre de capela* at Bahia Cathedral, appears unfounded. Another early work is a *Te Deum* (*c*1760) for mixed chorus and continuo by Luiz Álvares Pinto, a mulatto composer who was *mestre de capela* at S Pedro dos Clérigos, Recife, and founder in that city of the important Irmandade de S Cecília dos Músicos, a musicians' guild. In addition, he wrote a theoretical treatise, *Arte de solfejar*, whose manuscript is in the Biblioteca Nacional, Lisbon.

An exceptional musical life developed during the latter part of the 18th century in Minas Gerais province, in response to the socio-economic boom there. According to the musicologist F.C. Lange, who first uncovered the primary sources of that repertory, there were about 1000 musicians active in Minas Gerais between about 1760 and 1800, particularly in the cities of Vila Rica (now Ouro Preto), Sabará, Mariana, Arraial do Tejuco (now Diamantina) and São João del Rei. Most of them were mulatto and associated with various local brotherhoods (*irmandades*), musical guilds that were relatively independent of the clergy. Composers whose works are known include Lobo de Mesquita, Coelho Neto, Gomes da Rocha and Parreiras Neves. They all cultivated a prevailingly homophonic style in sacred works for mixed chorus with orchestral accompaniment including violins, viola, horns, occasionally oboes and flutes and continuo. Most of the compositions that have been discovered are liturgical (masses, motets, antiphons, novenas etc.). The only work with a vernacular text is Parreiras Neves's *Oratoria ao Menino Deos para a Noite de Natal* (1789), discovered in Mariana in 1967; only its soprano and instrumental bass parts have survived. It is remarkable that this tradition of colonial church music has survived continuously in the city of São João del Rei, with the Orquestra Ribeiro Bastos and the Lira Sanjoanese, thanks to the efforts in the late 20th century of musicologist-conductor José Maria Neves and others. These organizations involve local amateur musicians as vocalists and instrumentalists.

The Bahian Damião Barbosa de Araújo (1778–1856) was an active composer of sacred music and left about 23 works. Of the various *mestres de capela* at São Paulo Cathedral, André da Silva Gomes was particularly notable, not only as a prolific composer of sacred music but also as an influential teacher. In the interior of the state of São Paulo, the town of Mogi das Cruzes was also a centre of sacred music; the manuscripts of 11 compositions, almost certainly dating from the late 17th and early 18th centuries, were discovered in 1984.

In the early 18th century the musical comedies of Antonio José da Silva (1705–39), nicknamed 'O Judeu', enjoyed great success in the colony as well as in Lisbon. Musical life at Rio de Janeiro was greatly stimulated by the transfer to that city of the Portuguese royal court in 1808. In the same year King João VI created the royal chapel to which he appointed as musical director and *mestre de capela* the mulatto composer Nunes García, who is rightly considered one of Brazil's finest musicians. 237 of his works are extant, among them a multitude of masses, motets, and pieces for Holy Week and other feast days. His earlier sacred pieces have a devotional character while his later ones, like those of contemporary Europe, show the influence of opera in both choral sections and arias. His Requiem (1816), written on the death of Queen Maria I, and *Missa de Santa Cecília* (1826) are generally considered his masterpieces.

Professional European composers began to migrate to Brazil during João VI's residency in Rio de Janeiro. Most notably, the Portuguese opera composer Marcos Portugal settled there in 1811, adding great prestige to the musical life of the city. The Austrian Sigismund Neukomm was employed by the court from 1816 to 1821 to teach the young Prince Pedro; he wrote the *Missa para o dia da Aclamação de João VI* and earliest known Brazilian piano piece (1819), using a tune from a Brazilian popular song.

2. After independence. The 19th-century musical scene was dominated by opera and salon music. After independence the former Royal Theatre became the Imperial Theatre. The reign of Pedro II was characterized by the cultivation and official protection of Italian opera; Bellini's *Norma* in particular was often performed. In the government-subsidized theatres in Rio (e.g. S Pedro de Alcântara, and later Provisório) the principal operas of Rossini, Verdi and their contemporaries were produced. Manuel da Silva, remembered today as the composer of the Brazilian national anthem, attempted to stimulate the use of the vernacular in the operatic repertory. In 1847, under the auspices of the emperor, an institution was created with that aim, the Imperial Academy of Music and National Opera. After that date the first native operas were presented; their composers included Álvares Lôbo, Alves de Mesquita and, above all, Carlos Gomes who had the most brilliant career of any composer of the southern hemisphere in the 19th century. He studied at Milan Conservatory, and with the première of *Il Guarany* at La Scala in 1870 reached the climax of his career.

Regular concert life developed particularly in Rio de Janeiro, but only during the last three decades of the 19th century. Concert societies and clubs were founded which promoted the appearance in Brazil of some of the most celebrated performers of the time (Thalberg, Napoleão, Gottschalk). Concurrently several composers, such as Miguéz and Oswald, cultivated the prevailing European styles, particularly those of Wagner and the early Impressionists. Francisco Braga, an influential teacher of composition, fostered a local adaptation of Wagnerian Romanticism.

The first 'nationalist' composition was published in 1869 by Itiberê da Cunha, an amateur musician and an accomplished pianist. His piano piece *A Sertaneja* attempts to recreate in various ways the atmosphere of

urban popular music, and quotes a characteristic popular tune. Alexandre Levy wrote his most typically national compositions in 1890, among them the *Tango brasileiro* for piano, and the *Suite brésilienne* for orchestra, the first of many such pieces produced by later nationalist composers. The last movement, 'Samba', can be considered the first decisive step towards musical nationalism; it draws on urban popular dance rhythms, such as those of the *maxixe* and the Brazilian tango, rather than on the characteristics of the folk samba.

By the beginning of the 20th century art music in Brazil began to display definite individuality. The composer Alberto Nepomuceno played a primary role in the creation of genuine national music: many of his compositions present folk or popular material or simply draw directly on popular music. The last movement ('Batuque') of his *Série brasileira* (1892) for orchestra is symptomatic of the discovery of the rhythmic basis of popular music, and anticipates similar accomplishments in 20th-century compositions.

After about 1920 the most important figure of Brazilian art music was Villa-Lobos. He wrote about 1000 works (including arrangements) in a wide variety of genres and media. The Week of Modern Art in São Paulo, in 1922, led by Mario de Andrade and others, was a great stimulus to Villa-Lobos's exploration of musical nationalism. Among his most important works of the 1920s the nonet *Impressão rápida de todo o Brasil*, the series of *Choros*, inspired by urban popular music of the early years of the century, and piano works, such as *Rudepoema*, *Prole do bebê* nos.2 and 3 and *Cirandas*, reveal the various facets of his creativity. His final productive period (1930–57) includes the nine *Bachianas brasileiras*, 13 string quartets out of a total of 17, seven symphonies out of a total of 12, numerous solo songs etc. The *Bachianas* were intended as homage to J.S. Bach, and were written as dance suites beginning generally with a prelude and ending with a fugal or toccata-like movement. Actual Baroque compositional techniques are seldom used; the use of the fugue as a formal principle is a neo-Baroque device, resulting in clear horizontal movement and systematic imitation. Other neo-classical devices – ostinato figures and long pedal notes – are also used.

Of Villa-Lobos's contemporaries Oscar Lorenzo Fernândez, Luciano Gallet and Francisco Mignone were typical of the orientation towards native styles. Mignone, a pianist, flautist and conductor, cultivated a national style relying heavily on urban popular and folk idioms, as in his four *Fantasias brasileiras* for piano and orchestra and in the series of piano pieces *Lendas sertanejas*, *Valsas de Esquina* and *Valsas-choros*.

The most important composers of the next generation included Camargo Guarnieri, Luiz Cosme, Radamés Gnatalli and José Siqueira. Guarnieri, a prolific composer, achieved an international reputation. Cosme's works include the ballet *Salamanca do Jarâu* (1933), and *Novena à Senhora da Graça* (1950), written in a free 12-note technique. Gnatalli cultivated both popular and art music, with an inclination in his later works towards neo-classical idioms.

The younger composers first active in the 1940s (e.g. Claudio Santoro and César Guerra Peixe) alternated between musical nationalism and prevalent European techniques, particularly Schoenberg's dodecaphonic theories, first introduced in Brazil by the German composer Hans-Joachim Koellreutter. Edino Krieger, after incursions into strict atonality, found some interesting compromises within a modern neo-classical style (e.g. in his First String Quartet, 1956). Serial and experimental techniques have been used by younger composers who became known during the 1960s, when São Paulo became the centre of the Brazilian avant garde; the Música Nova group there included Gilberto Mendes, Damiano Cozzella, Willy Corrêa de Oliveira and Rogério Duprat. The subsequent focus of new music, the Bahia Group of composers, founded in 1966, included Ernst Widmer, Jamary Oliveira, Lindembergue Cardoso, Fernando Cerqueira, Walter Smetak and Milton Gomes, all wholly committed to the contemporary artistic world. Under the leadership of Widmer, the Bahia Group remained quite distinctive in the eclecticism of its members, who stressed individuality rather than fashionable trends. In spite of the limited means of the Brazilian musical scene, by the 1970s most composers advocated the use of new musical resources and techniques, thus breaking completely with the predominant trend of musical nationalism. For example, Mendes's *Nascemorre* is a setting for voices (using microtones), percussion and tape of a text by the concrete poet Haroldo de Campos. The major figures who emerged in the 1970s and 80s included Marlos Nobre, Jorge Antunes, Almeida Prado, Aylton Escobar, Ricardo Tacuchian, Jocy de Oliveira, Raul do Valle, Ronaldo Miranda and Vasconcellos Corrêa. During the period 1975–97, the Bienal de Música Brasileira Contemporânea, organized in Rio mainly by Edino Krieger, represented a much-needed encouragement for Brazilian composers, while the Sociedade Brasileira de Música Contemporânea, especially during the tenure of the pianist Belkiss Carneiro de Mendonça, was influential in creating a sense of community. By the 1980s studios for electro-acoustic composition had been established in major universities in São Paulo, Rio de Janeiro, Belo Horizonte, Brasília and Bahia. In the 1990s the most promising Brazilian composers included Paulo Costa Lima, Agnaldo Ribeiro, Luis Carlos Csekö, Marisa Rezende, Tim Rescala, Flo Menezes, Cirlei de Hollanda, Rodolfo Coelho de Souza, José Augusto Mannis, Vânia Dantas Leite, Rodrigo Cicchelli Velloso and Roberto Victorio.

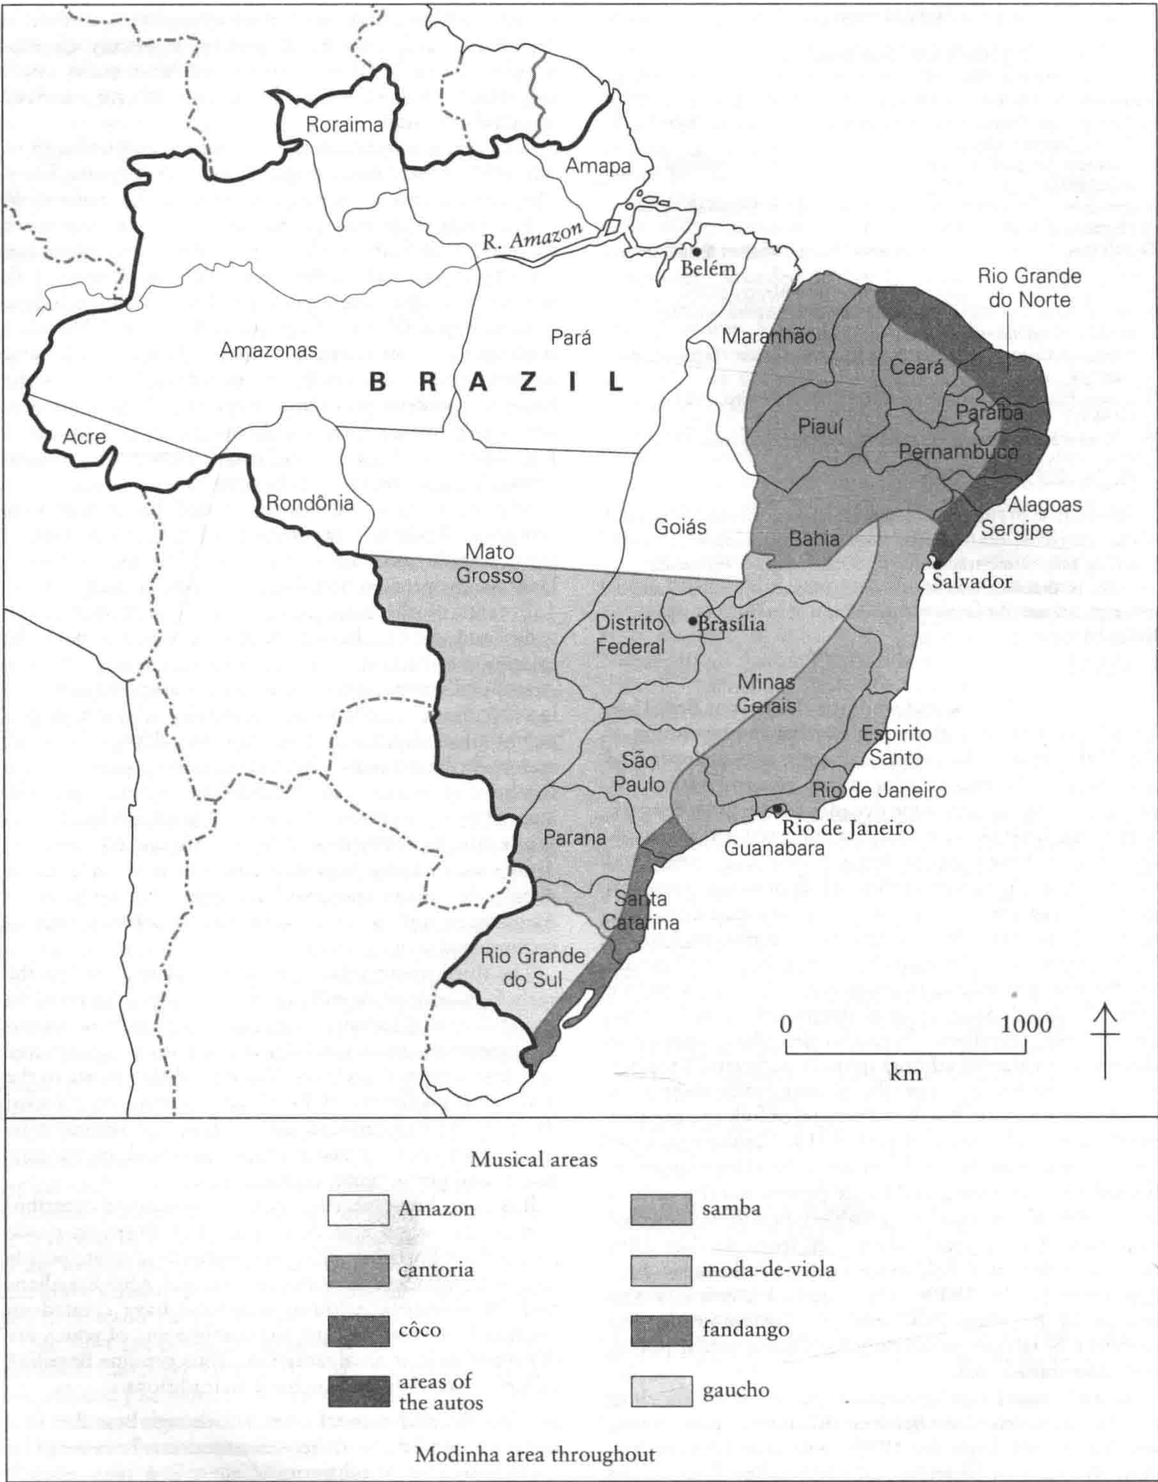
II. Traditional music

1. Introduction.

(i) History. The folk and traditional music of Brazil has been studied from various angles since the beginning of the 20th century; however, although the collecting of substantial folk and popular music repertories has improved during the last four decades of the 20th century, it remains limited. The samples collected are relatively recent and have not undergone adequate analytical examination. Historical studies of folk or popular musical genres do not, for the most part, rely on sound documentary evidence. With few exceptions, historical archives in both Brazil and Portugal have not been sufficiently scrutinized to enable us to reconstruct the history of folk music in Brazil. Such archival documents include, most importantly, travellers' chronicles describing songs and dances, and valuable ethnographic data. Several Brazilian writers have pointed out the almost total absence of notated examples in Brazil or Portugal of folk and popular music during the colonial period (16th century to early 19th). Our knowledge of this music is therefore necessarily limited to certain song and dance genres and the various socio-cultural contexts in which they function. Collected examples of such genres date only from the late 19th century. Substantial field collections of folk music were first made in the 1930s. The study of continuity and change in Brazilian folk and popular traditions can therefore be contemplated only for a fairly recent past in well-determined areas.

As with most Latin American countries, it is difficult to make a clear distinction between Brazilian popular music and folk music. Until the 1930s, with a few exceptions, clear distinctions between rural and urban areas could hardly be made in Brazil, since the culture of most cities and towns was strongly rural-orientated. The continuous growth of urban centres since the 1940s, however, makes the distinction easier as a large urban market for popular musical genres has developed. Concurrently the migratory movement from the rural areas has activated a substantial amount of folk music-making and consumption in the cities. Mass media and the greater mobility of the rural population have had inevitable consequences on certain repertories and folk music genres, especially choreographic genres used in a social secular context. Such important changes have, however, hitherto received minimal attention.



Brazilian folk music reflects its varied cultural origins. Since the country was colonized by the Portuguese, Luso-Hispanic folk music constitutes the basis of Brazilian folk music. Portuguese material has, in most cases, undergone essential modifications throughout Brazilian history but certain stylistic characteristics, such as Iberian folk polyphony, have been retained. Portuguese melodies, especially in children's songs, can still be found. Melodies built on the older European modes, 'gapped' scales and altered modes can easily be related to Portugal. The harmonic system prevailing in most folk and popular genres is likewise a European heritage. The rich variety of Luso-Hispanic instruments, particularly string instruments, has also penetrated the country.

The slave trade with Africa lasted for almost four centuries. While at first most of the Africans originated from Angola and the Congo area, Yoruba and Fon-Dahomeans predominated during approximately the last 150 years of the slave trade. Yet most Afro-Brazilian songs and dances show a clear Bantu origin, with the exception of certain cycles of songs functioning in some Afro-Brazilian religions. Specific scales frequent in Brazilian folk music have been attributed to an African origin: pentatonic scales, major diatonic with a flattened seventh and major hexatonic without the seventh degree. African rhythmic traits, such as the hemiola rhythm, form the basis of many rhythmic intricacies of Brazilian folk music. While not as sophisticated as its African counterpart, drum music among Afro-Brazilians exhibits similar complexity. Specific instruments have been inherited from the Africans, as well as certain performance features, such as responsorial singing and vocal style.

The third major ethnic group that contributed to the early formation of Brazilian folk music is the Amerindian group. Tropical Indian cultures in Brazil are by no means homogeneous, and knowledge of tribal music is restricted to a few scattered enclaves. Vestiges of this music in the main folk traditions of Brazil can at best be revealed through the retention of certain types of instruments, mainly rattles of the maraca type, certain choreographic genres and performance characteristics.

It is clear, however, that the most substantial contribution to the origin and development of Brazilian music comes from Portugal. The predominance of white people and their influence on Amerindians and Afro-Brazilians and the reverse acculturative process have created an essentially mestizo culture, the components of which are the result of that amalgamation. Thus genuine Brazilian folk musical traditions are mestizo traditions.

(ii) Cultural and musical areas. Although Brazilian folk music cannot be considered homogeneous because of its varying socio-cultural patterns, there is a large enough corpus of music in the various geographical areas for the general characteristics to be described. There have been several attempts to define cultural areas in Brazil, but the criteria of classification have neglected musical traits. Maynard de Araújo (1964), for example, has proposed the following division: Amazon area, cattle herding area, mining area, agricultural area, fishing area, with subdivisions, all according to techniques of subsistence. Joaquim

1. Map of Brazil showing musical areas based on Azevedo's classification of genres and instruments (1954)

Ribeiro was the first to propose, in 1944, a set of four musical areas, based on musical genres: *embolada* (north-east); *moda* (south); *jongo* (several zones of Bantu influence); *aboios* (cattle herding zone of the hinterland or *sertão*). Azevedo (*Grove's Dictionary*, 1954) based his own more comprehensive classification on the distribution of musical genres and instruments. He distinguished nine musical areas and one song cycle: Amazon area; *cantoria* area (north-east); *côco* area (north-eastern coastal area); area of the *autos* (throughout the country, with specific

nuclei in Sergipe and Alagoas); samba area (from the states of Bahia to São Paulo); *moda-de-viola* area (from Goiás, Mato Grosso to northern Paraná); fandango area (southern coastal area); gaúcho area (cattle zone of Rio Grande do Sul); *modinha* area (including mostly the oldest urban areas); and the cycle of children's songs found in all areas (fig.1). This classification is useful as a main working tool, but omits Brazilian indigenous music as a result of the extremely limited attention that this has received. In addition, it has had to disregard the numerous overlappings of distribution of folk genres.

(iii) General musical characteristics. Cultural syncretism of various kinds (Amerindian with Portuguese, Amerindian with Spanish, Amerindian with African, Portuguese with African, Spanish with African, and the fusion of syncretism among all of these with native black Brazilian) has created a substantial diversity of folksongs and dances. Within that diversity, certain stylistic elements unify the various repertories.

Melodic organization tends to follow patterns associated with Europe, such as arched melodies, conjunct motion and melodic gravity. Antecedent and consequent strains occur frequently in Brazilian folksongs. Short and symmetrical phrasing is also generally observed. Melodic tension created by intervallic leaps tends to occur at the beginning of a song, followed by a typically conjunct descending motion, or a static phrase made up of repeated notes. This markedly descending tendency has been attributed to western European and West African influences in Brazilian music. But a similar characteristic has been shown to exist also in the music of the Nambicuara Indians of Mato Grosso, among other Amerindian groups. Very frequently the descending motion follows an undulating design. Melodic sequence abounds. Songs more closely associated with Iberian folk traditions exhibit a predominantly triple metre (3/4) or compound metres (6/8, 9/8). Duple metre prevails in genres of a clearer Afro-Brazilian folk origin, though quite often there is a duple-triple composite in actual performance, creating the hemiola rhythmic effect.

A large proportion of cadences end on the dominant or the mediant and masculine endings predominate, as the result of Portuguese prosody. In addition, there is a great deal of recitative-like singing, with little or no metric structure, and with some ornamentation. Plainsong has been considered an important influence on Brazilian folk melodic characteristics. From the 16th century onwards missionary work carried the well-established Iberian tradition of singing Gregorian melodies. Furthermore some aspects of Portuguese folk music implanted in Brazil already had Gregorian chant characteristics in melody, modes and rhythms. Mário de Andrade was the first to call attention to rhythmic traits and melodic cadences related to chant. Later, Oneyda Alvarenga (1950), Tavares de Lima (1954) and Father José Geraldo de Souza (1960–63) provided examples from various areas. Ex.1, a *lundu* melody collected in Ceará, illustrates Gregorian characteristics, such as beginning on the dominant and ending on the tonic; cadential diatonicism; and the seventh or G mode. Examples of true recitatives and types of cantillation occur frequently. The amensural nature of ex.2 is typical. Besides this rhythmic freedom in melodic phrasing, melodies and cadences are frequently based on the church modes, such as the A mode shown in ex.3, a *reisado* from Rio Grande do Norte; the D mode in ex.4,

Ex.1 *Lundu* from Ceará

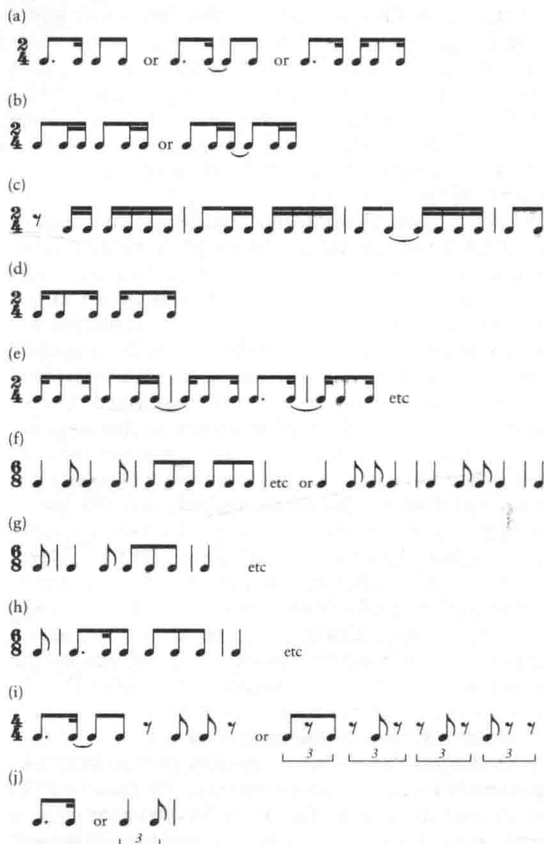
Ex.6 *Pagelança* from Pará

a lullaby from Pará; the F mode in ex.5, a mendicant blind man's cry from the north-east; and the E mode in ex.6 in a *pagelança* song from Pará.

Despite these instances of modes, melodies tend to be mainly diatonic and tonal (or major/minor). Anhemitonic pentatonic scales prevail in certain repertories. The range in Brazilian folk music varies a great deal: generally, songs have a narrower range than strictly instrumental pieces; while many songs exceed the octave in their range, most do not.

The melodic material is organized in several forms, predominantly stanza-refrain alternation and strophic form with slight variations. Through-composed songs occur to a much lesser extent. Literary forms inherited from Spain and Portugal, such as quatrains and *décimas* (ten-line verse), common in the *romances*, or ballads, have naturally determined their musical forms. In songs and dances of a more specifically Afro-Brazilian stock, the stanza-refrain pattern often shows textual and musical improvisation in the stanza (performed by a soloist) with a set choral refrain.



Of all the musical elements rhythm is certainly the most difficult to generalize about. In theory, the Iberian heritage has provided Brazilian folk music with triple and compound metric structures (3/4, 6/8, 9/8), and the clear stressing of downbeats. Simple isometric figures abound. Dotted figures (ex.7*a*) or compound triple time (ex.7*f*) are quite common. The peculiar rhythmic characteristic of Brazilian music, however, is syncopation, either by irregular accentuation or anticipation. Syncopations are generally contrasted with a steady rhythmic pulsation (often represented as semiquaver units). Exx.7*a–f* give some indication of the frequent rhythmic patterns occurring in mestizo folk music. Numerous variant possibilities, however, are present in performance. The rhythmic practices most commonly associated with Afro-Brazilian folk music reveal a subtle duple-triple ambivalence, as illustrated in exx.7*i* and 7*j*, which show two different renderings of rhythmic patterns. The characteristically African hemiola rhythm is often found. Irregular rhythmic structures and amensural or free-rhythm melodies occur in certain song types, such as the typical *aboios* (cattle herding songs) of the north-eastern states.

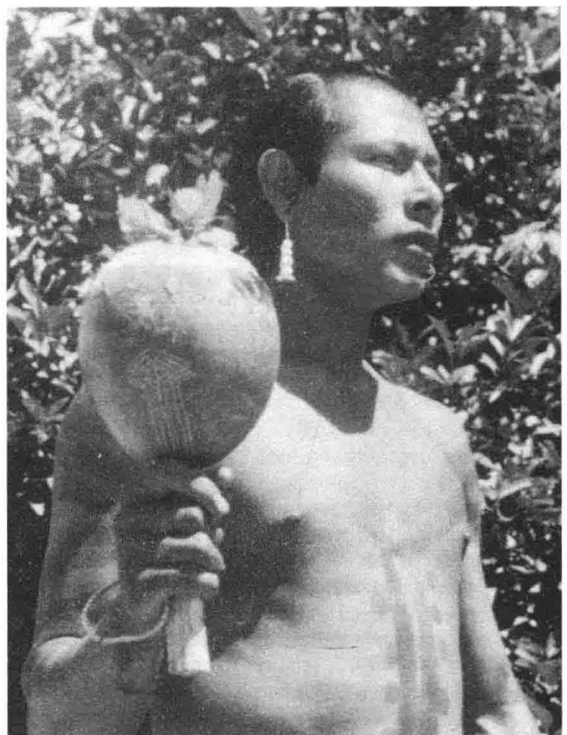
Polyphonic parallelism prevails. The most common type of folk polyphony inherited from the Iberian peninsula involves singing in parallel 3rds and 6ths, either by two or more soloists or more commonly in responsorial singing. This type of polyphonic practice is also present in instrumental music. Parallel 4ths and 5ths, although rare, are found more readily in songs of a soloistic nature. Singing and playing at the octave are relatively common. Imitative types of polyphony are rare and are not systematized. Song types such as the *desafio* and *embolada*, which involve alternate singing, are not polyphonic. Overlapping commonly occurs with responsorial singing. Contrapuntal textures abound in certain instrumental types of urban popular music, such as the *choro*.

(iv) Organology. Indigenous, African and European instruments are played in Brazil, although it is not always possible to determine the origin of each with accuracy.

It is generally accepted that Amerindians did not have chordophones at the time of the conquest. In Brazil the rare examples described in the literature are post-colonial or even 20th-century. The musical bow, called *urucungo* in the south and *berimbau* (or *berimbau de barriga*) in the north and north-east, with or without resonator, is much in use in such dance-games as the Bahian *capoeira*. Of African provenance, the *berimbau* is still played in an African manner: the string is struck with a wooden stick

Ex.7 Frequent rhythmic patterns in Brazilian folk music

and a metal coin serves as a bridge. Timbre may be changed by manipulating the resonator against or away from the body of the performer. Generally a small basket rattle, called *caxixi* in Bahia, accompanies the strokes of the stick, as shown in fig.2.



The majority of string instruments came from Europe, particularly from the Iberian peninsula. Most important in the various folk musical expressions of Brazil is the *viola*, a type of guitar with five double courses made of wire or steel. There are various sizes, the standard one being somewhat smaller than the Spanish classical guitar. There are at least five types of *viola* distributed throughout the country: the *viola paulista*, *cuiabana*, *angrense*, *goiana* and *nordestina*. The differences are mostly in size, in number and material of strings, and in tunings. The variety of tunings is considerable. In São Paulo alone some 25 tunings are known, such tunings being used according to the particular function of the instrument. To accompany the song genre known as *moda*, for example, the tuning *A–D–G–B–E*, known as *quatro pontos*, is considered most suitable. *Viola* players give each tuning a special name. Thus, in São Paulo and southern Brazil in general, *D–G–B–D–G* is termed *cebolão*, *E–B–E–G#–B cebolinha simples*, *D–G–B–E–A cana-verde* or *cururu*, *D–G–C–F–A# oitavado* or *pontiado-do-Paraná*. The instrument may be used to accompany both singing and dancing, but it is also played solo and frequently in duets. Myths and legends involving the *viola* attest to its paramount importance among the Brazilian people. The personalization of the instrument has created certain magic secular rituals designed to prevent 'diseases' affecting the *viola*. A special type of *viola* is the *viola de cocho*, known as the 'Brazilian lute', with five single strings, a short neck and no soundhole. It is used in Mato Grosso in the *cururu* festivities.

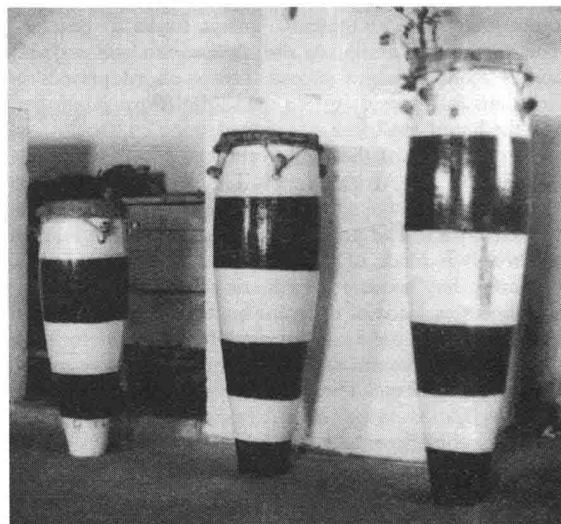
In conjunction with the *viola*, the Portuguese *rabeca*, or fiddle, tuned *A–D–D–G*, is still used in popular religious feasts, dramatic and secular dances. In the 1920s it began to decline in popularity, only to regain some of its former importance in the 1980s. The Spanish guitar is also widely played in Brazil, particularly in the urban areas. The *cavaquinho* is of Portuguese origin and has gained a wide popularity in the cities since the late 19th century. It has four metallic strings tuned *d′–g′–b′–d″*. The *machete* is similar to the *cavaquinho* and possibly comes from Madeira Island. Other chordophones in Brazilian folk music are the mandolin (Port. *bandolim*) and the banjo, the latter introduced in the 1930s.

The majority of the many types of idiophone are of Amerindian and African derivation. The maraca and the various types of *chocalhos* are the most widespread of the shaken rattles. The pre-Columbian Amerindian maraca (*mbaracá*) is made of a calabash filled with dry seeds. *Chocalho* has become the generic term for shaken and struck rattles made of different materials and varying in shape and size (fig.3). They are often known by their onomatopoeic names, such as *xaque-xaque*, *xeque-xeque*, *xequerê*, *xexerê* etc. The *ganzá* (or *canzá*) often appears as a two-headed *chocalho*, usually made of metal. Though generally considered to be of African origin, because the Amerindians had no metal idiophones when the first African slaves were brought to Brazil, it is strikingly similar to the maraca and, as with other rattles, there is not enough evidence for one to be certain of its origin. The *afoxê* (or *afuxê*), called *xequerê* in Bahia and more

2. *Berimbau (musical bow) with caxixi (small basket rattle), used to accompany the stick strokes*

3. *Kayapó Indian playing a chocalho (rattle) decorated with feathers*

generally *piano-de-cuia*, is another widespread type of rattle. Instead of the calabash being filled with seeds, it is covered with threaded beads or cowrie shells, as in West Africa. The instrument is played by rotating the calabash from the handle with the right hand while the beads are held firmly with the left hand. Basket rattles are known among both Amerindians and Afro-Brazilians. The *caxixi*, mentioned above in connection with *capoeira*, has its counterpart in the *angóia* of the *jongo* and *batuque* dances. The most widespread struck idiophone is the *agogô*, a cowbell of African provenance. Usually a double bell, it is struck with a metal rod and used on different occasions. The single-bell instrument called *gan* is preferred among the more traditional Afro-Brazilian religious groups. In the same groups the *adjá*, similar to the *agogô*, fulfils a more specifically liturgical function. The African marimba (xylophone) has lost its former importance as a solo instrument or an accompanying instrument for singing. In modern times it is used only to accompany such dramatic dances as the *congada*. The two types of marimba still in use are portable and have six and 11 keys respectively, which are struck with wooden sticks. The African lamellophone is practically extinct in Brazil.

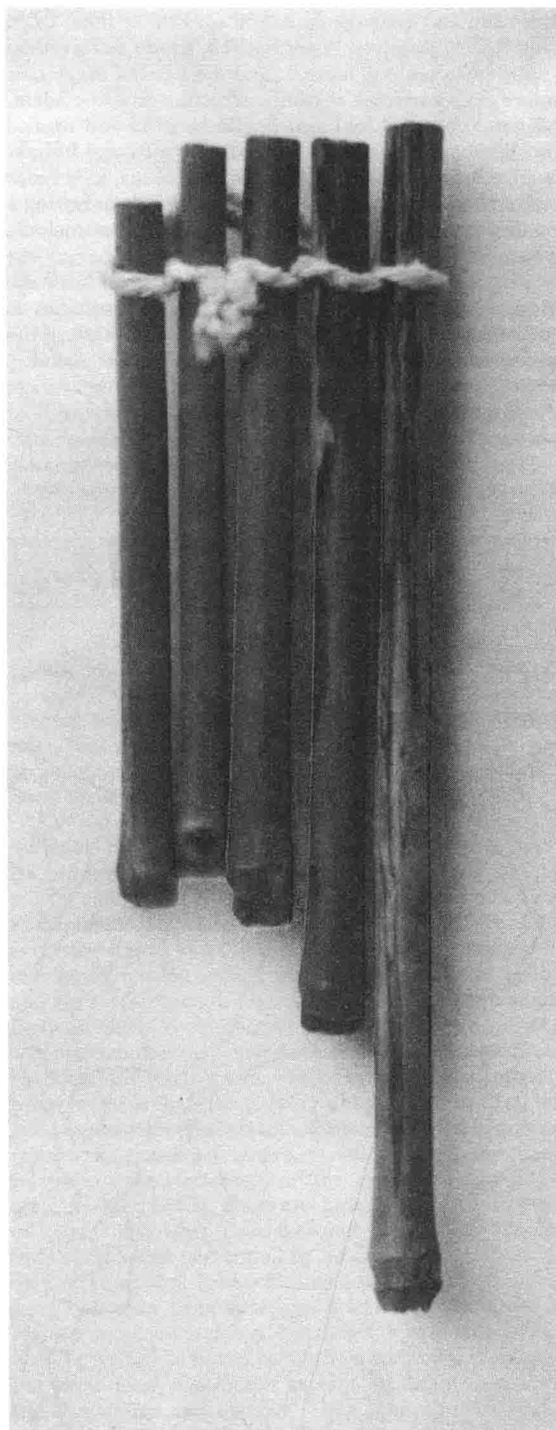


A popular type of scraped idiophone is the *reco-reco* (also known as *raspador*, *casaca* or *catacá*; fig.4); it is used in traditional rural dances such as the *congada*, *cururu*, *cana-verde* and folk samba, as well as in modern urban dances such as Carnival sambas and marches. Numerous types of membranophone of European and African origin are used in Brazilian folk and popular music. The conical single-headed drum, similar to the Afro-Cuban *conga* drum, is known throughout the country under the generic terms *atabaque* and *tambor*. Of African derivation are the various drums accompanying Afro-Brazilian religious ceremonies. There the *atabaques* are generally played in threes, each of different size, and are known in Bahia, from the largest to the smallest, as *rum*, *rumpí* and *lê* (fig.5). These drums are played with sticks, with hand and stick or with the hands alone, depending on the particular religious group or particular song repertory. In the north-eastern provinces, especially Pernambuco and Ceará, cylindrical single-headed drums are known by the Yoruba name of *ilu*, although the same term was formerly used for double-headed barrel-shaped drums. *Tambu* designates a similar cylindrical single-headed drum, especially in the southern-central and southern regions where it plays an important role in the *jongo* and the *batuque* dances. The *candongueiro* or *candongueira* is a small *tambu* used in the *jongo* and usually played with the fingers only. A still smaller and higher-pitched drum in the *jongo* is the *cadete*. Another African drum still used in the *batuque* is the *mulemba* or *quinjengue* which has a funnel-like shape, giving it a higher pitch. The skin of all these drums is traditionally attached to the body either by pegs or by wedges, but modern mass-produced conga-type drums use screw devices. The 'talking drums' of West Africa with their typically varying pitch are unknown in modern Brazil.

A characteristic drum known throughout the country is the *cuíca* or *puíta*, a friction drum with remarkable pitch range. Its origin is difficult to determine. Introduced in Brazil probably by Bantu slaves, it has also been known in Spain for centuries and it is believed to have been brought to Africa by Muslims. It is used in numerous folk

4. *Reco-reco (wooden scraper)*

and urban popular dances. The tambourine is known in Brazil with and without jingles. The oldest type is the *adufe*, a square tambourine, usually without jingles, of Arab origin, but brought to Brazil by the Portuguese and still much in use in Portugal. The standard tambourine is known as *pandeiro* and since the early 20th century has become one of the most widely accepted drums in popular music. The instrument known in Portuguese as *tamborim* is a small (30 cm long and 15 to 18 cm in diameter) cylindrical drum percussed with a stick, used in dramatic



5. *Atabaques (conical drums) known in Bahia as (from left to right) lê, rumpí and rum*

dances such as the *congada* and *moçambique* and in the percussion ensembles of Carnival bands.

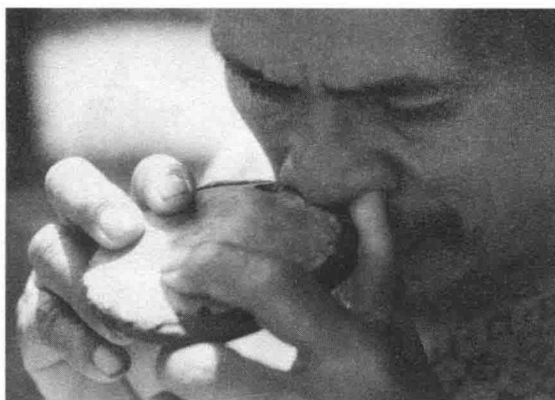
Double-headed drums of European origin include snare drums (known as *caixa*) of various sizes (the smaller is often referred to as *tarol*, the larger as *caixa-surda* or *surdo*). The *zabumba*, variously called *bombo*, *bumba* and *tambor grande*, is a bass drum played with a beater, popular in the north-eastern states where it leads ensembles consisting of two or three fifes, as in the Beira province of Portugal. The *zabumba* accompanies rural sambas, *congadas* and other dances. Double-headed drums are the most common types among Brazilian Indians.

Amerindian tribes have a wide variety of flutes, trumpets and whistles. The flutes include transverse flutes made of reed, slit tubes, nose flutes, and reed panpipes such as the *avirarê* of the Aweti Kamaiurá of the High Xingu area (fig.6). Aerophones in Brazilian folk and popular music are mostly modern European instruments, from simple fifes to valve trumpets, trombones and saxophones. The modern flute and the piccolo have been cultivated in urban popular music since the advent of the urban samba in the second decade of the century. Both button and piano keyboard accordions (*sanfona*) are widely used in folk and popular music throughout the country. In folk music wind instruments generally play a lesser role than percussion and string instruments.

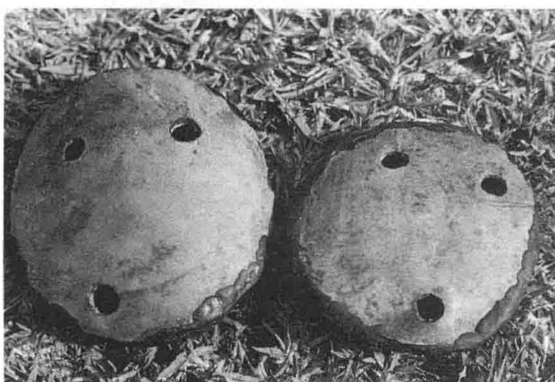
2. AMERINDIAN MUSIC. Brazilian Indians belong to the tropical forest type of indigenous culture. This has been classified according to the relative degree of integration with the main national (i.e. Luso-Brazilian and mestizo) socio-cultural groups. Most Indians, however, have had sporadic or no contact with white and mestizo Brazilians. In such cases they maintain cultural autonomy. Those who have had permanent contacts have been, or are in the process of being, integrated into the mainstream of Brazilian society. Four main indigenous linguistic families have traditionally been distinguished: Tupi, Arawak (Aruak), Carib and Gê, with several subdivisions. 11 indigenous culture areas have been proposed by Darcy Ribeiro and others (fig.7). The music of the Taulipang Indians from the northern Amazon area (between Rio Negro and the coast) was collected by Theodor Koch-Grünberg from 1911 to 1913 and subsequently studied by Hornbostel, who outlined the following traits: existence of solo and choral singing; melodies of medium range, generally less than an octave (ex.8 has a range of a minor 7th); conjunct and descending melodic motion; predominantly ternary divisions of fixed rhythmic patterns. Dance music seems to prevail in the collected repertory, but curing songs and other songs for ritual ceremonies, such as hunting magic, are also common among the Taulipang. Hornbostel observed that the motivic organization of most Taulipang songs is simple and that the motifs are frequently interrelated. Ex.8 provides a good illustration of the strophe arrangement. According to Hornbostel they 'fall into two halves of three motives each a b d/e f c: the 4/2 groups of the first part become the 3/2 in the second, and the final tactus through omission of the pause is further shortened to 5/4. The motive g–f♯–e is expanded to 4/2 cadence, and is repeated in *b* as 2/2 and in *d* as 1/4. (Such progressive abridgements are generally characteristic of the form of the Indian style.)' Music from the Jeruá-Purus area, south-west of the Amazon River, has not yet been collected and studied.

6. *Avirarê (five-tube panpipes) of the Aweti Kamaiurá*

The music of the Nambicuara Indians of the Guaporé area was first collected and studied by Roquette Pinto. He observed among them war and festive dances, and two types of flute: the nose flute with three holes (studied by



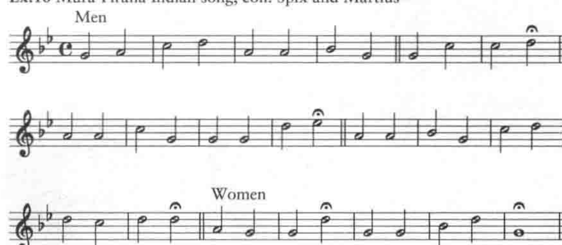
Izikowitz and Halmos; fig.8) and the double flute. Ex.9, collected by Roquette Pinto in 1912, shows a clear tonal centre (*e′*), conjunct motion, and the narrow range of a minor 3rd. Isometric rhythmic structure is also evident. Material collected by Lajos Boglár in 1959 and studied by Halmos shows that the neighbouring Paressí Indians sing melodies similar to those of Nambicuara. Halmos was able to characterize Nambicuara melody as having a small range and frequently repeated motifs. But melodic structures do not always appear to be simple. They consist in general of stanzas, 'the totality of which form the melody'. The number of stanzas in sung melodies is constant while 'there is no regularity in the length of the melodies performed on instruments'. The 28 melodies analysed reveal a descending motion, a medium average range (out of the 28 only four extend to a 7th), and the presence of a basic final on which the stanzas always end.



From the Tapajós-Madeira area, lying approximately between the two rivers, western Pará and eastern Amazonas, little of the music of the Mura-Pirahã Indians is known. The oldest example, collected and transcribed by Spix and Martius in the early 19th century, reveals the same general characteristics of Brazilian indigenous music: six-note scale with a tonal centre; melodic range of a minor 6th; prevailing conjunct motion; motifs related in an *ABCD* organization; and isometric rhythm (ex.10).

Ex.8 Taulipang Indian song

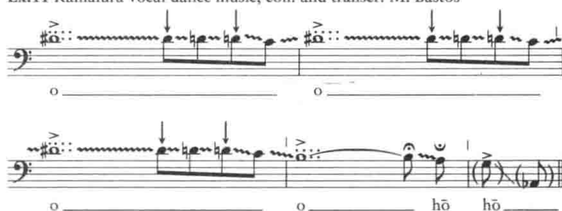
7. *Map of Brazil showing indigenous cultural areas as proposed by Darcy Ribeiro*



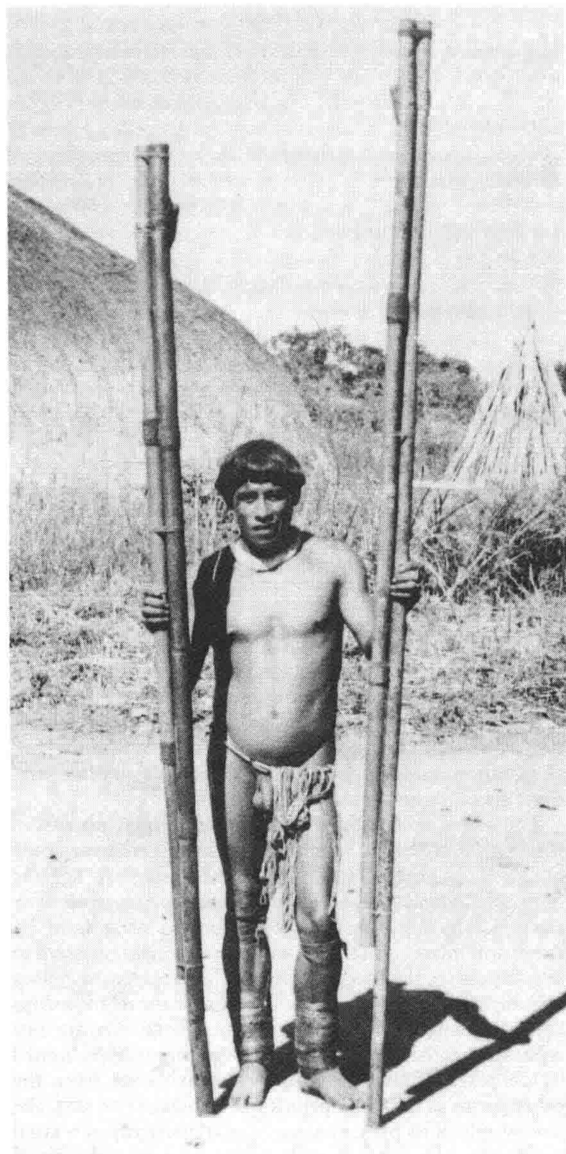
8. Nose flute: (a) being played by an Indian of the Nambicuara language group, Mamaindé village; (b) showing two finger-holes opposite the nose-hole

In the High Xingu area in the state of Mato Grosso, between the rivers Paranatinga, Ronuro and Culuene, the Parque Indígena do Xingu, a large reservation, has brought together numerous tribes. Traditionally, the principal groups of this area are the Kamaiurá (Tupi), the Mehinaku and Yawalapiti (Arawak) and the Trumai. Kamaiurá music has been studied by Menezes Bastos. Kamaiurá Indians have giant flutes (up to 2·5 metres in tube length) known as *uruá*, with ritual functions. The *aviraré* (four- or five-tube panpipes, up to 50 cm in tube length; fig.6) are used as an introduction to the mastering of the *uruá*, but while they can be played by one person only, the *uruá* requires two players (fig.9). Ex.11 illustrates Kamaiurá vocal dance music. A characteristic feature is the microtonal sliding of the voice followed by a wide-range descending glissando. The isometric rhythmic figures emphasize the beginning of each phrase, stressing the long note values. The noticeable exhaling and harsh aspiration corresponding to this beginning of phrases was pointed out by Hornbostel as a typical feature of Amerindian vocal style. In addition, there is a direct relationship between tension and pitch, *d♯* being the tension point. As indicated in the studies of Menezes Bastos (1978, 1986, 1988), Kamaiurá music functions as a form of knowledge and communication in very specific ways. An elaborate system of taxonomy reveals the presence of an ethnotheory that explains the cognitive processes differentiating and integrating music, speech and language, and the various levels of music-making in

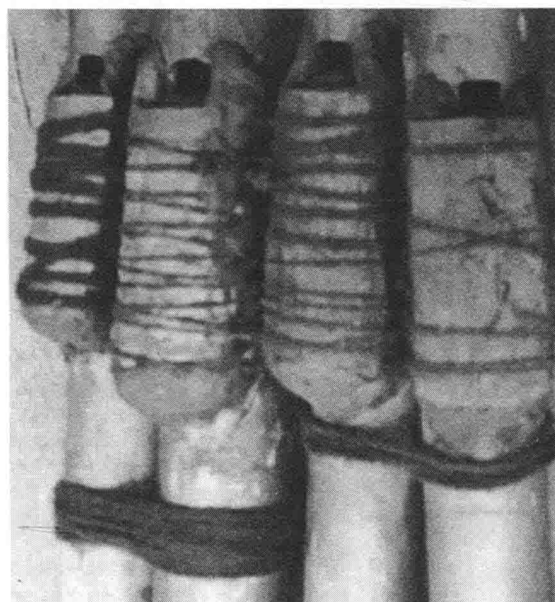
Ex.9 Nambicuara Indian song; coll. R. Pinto



Ex.10 Mura-Pirahã Indian song; coll. Spix and Martius



which musical instruments and human voices take on particular meanings. Such a theory, elucidated primarily through linguistic analyses, also clarifies the close connections between such concepts as musical substance and elaboration and the culture's political, economic and basic social structures.



The music of the Suyá Indian community, also from the High Xingu, has been the subject of extensive study by Anthony Seeger (1987). Here also one finds specific native categories of forms of sound production. For example the Suyá term *ngére* refers to song (and by extension music, since they only know songs), *sangére* to invocation (curing songs), *sarén* to instruction or telling and *kapérni* to speech. There are significant relationships between these vocal forms: music and speech are not separated, rather they operate in a continuum determined by contexts. What seems to distinguish song from the other forms is first 'the priority of melody over text, the fixed mode of its presentation, the extensive use of textual repetition, the fixed length of its phrases, the fixed relations among pitches, and the authority of its fixed texts' (Seeger, 1987). There are, however, different genres of song. The *akia* ('shout song' or call) designates individual songs performed by adult men or boys 'until they have several grandchildren', while *ngére* ('unison song'), distinct from *akia*, designates song usually performed in unison and in a lower register by men, women, boys or girls. The functions of these songs are numerous but their most significant aspects are associated with social relations and identity. Thus *akia* reaffirms social ties to sisters and mothers and expresses emotions. *Ngére*

9. Uruá (giant flutes) of the Kamaiurá: (a) showing tube length and position of external duct; (b) performed by two players in the uruá dance; (c) detail of the external ducts

is used 'to reaffirm the identity of the collectivity' and the invocation would serve 'to instill a particular animal trait into the body of the patient so that a desirable physical change could take place'. The integration of song performance within Suyá cosmology reveals the degree to which songs represent the very centrality of Suyá existential essence.

The Tocantins-Xingu area, between the two rivers, in south-eastern Pará and northern Goiás, is inhabited by Kayapó Indians, of whom the Gorotire are a sub-group belonging to the Gê linguistic family. They apparently know only three types of instrument: gourd rattle, stamping tubes and a small trumpet; the last is thought to be the result of outside influence. Much of the collected music reveals the predominance of choral monophonic pieces with pentatonic melodies.

The Pindaré-Gurupi area, between the two rivers, extends to the Guamá and Capim rivers in the west and to portions of the Grajaú and Mearim rivers in the east. The music of the Urubu-Kaapor Indians (of the Tupi family) from this area has been studied by Helsa Cameu. Although this music reveals tritonic to pentatonic scales, simple polyphonic singing occurs, perhaps the result of intermittent contact with mestizo culture.

In the Paraguay area, to the south of the swamp region of Mato Grosso, the Kadiweu Indians are an integrated group. The Kadiweu song shown in ex.12, collected in the late 1940s, is accompanied by the maraca. Its characteristics are: tetratonic scale (*d–e–g–a*), predominant arched melodic motion and isometric rhythm.

The Paraná area, on the border between Paraguay and Brazil, is inhabited by Guaraní Indians. The Kaiwa, for example, belong to this group and are now found in various areas of the states of Paraná and São Paulo. Their choral music exhibits parallel polyphony; ex.13 illustrates

Ex.12 Kadiweu Indian song

Ex.13 Kaiwa choral music

parallel 4ths. (For further discussion of Guaraní music *see* PARAGUAY.)

In the Tietê-Uruguay area, between the two rivers, comprising much of the hinterland of the states of Paraná, Santa Catarina, and portions of Rio Grande do Sul, the Caingang or Coroados of the Gê family are examples of integrated Amerindian groups. Their culture, therefore, does not at present have many Amerindian characteristics, though an example of their music collected in the early 19th century by Spix and Martius reveals the same general traits of Amerindian music: tetratonic scale, predominantly descending melodic motion by conjunct degrees and isometric rhythm.

The north-east area includes various groups scattered through the states of Paraíba, Pernambuco, Alagoas, Bahia and Minas Gerais. The Kariri from Mirandela (Bahia), who form one of these groups, represent an integrated indigenous culture, reflected in their music. Style and genres are those of the *caboclo* (mestizo) folk tradition of the area.

3. Luso-Brazilian folk music traditions.

(i) Social contexts. Cycles of folk festivities of a secular or religious character take place throughout the year in the various regions of the country. These festivities include rituals of thanksgiving to nature and protective rites for future harvests, and provide an opportunity for social solidarity. Music is an integral part of such occasions, whether in well-determined functions or in less structured ones. Besides fixed song repertories accompanying given aspects of the festivities (as described below), dance is undoubtedly the most important element of social recreation and interaction. Brazil possesses a very large number of folkdance types and folk dramatic dances of different kinds and function. The main cycles of folk and popular feasts recognized by most folklorists include the *Festa do Divino* (Feast of the Divine Being), and feasts of the winter and summer solstices. These rituals, which may be religious in character, are directly associated with the Roman Catholic feasts and the commemoration of saints' days, which constitute cycles of syncretic feasts, among which Carnival is the most widespread. Again, most of these are also musical occasions on which social cohesion and cooperation are induced.

Of the southern winter solstice feasts, that of St John is the most popular. There are considerable regional differences, especially in the type of food consumed and the songs and dances. Christmas is, of course, the most important feast of the summer solstice cycle. The *folias* (or *folias de reis*) represent the festive activities of this time (from 24 December to 6 January or 2 February, which is Purification day). They are primarily popular representations of the Nativity and the journey of the Three Kings. In Minas Gerais, numerous communities have organized *folias* groups whose members sing inside the church, in front of the Nativity scene, in typical parallel polyphony, accompanied by accordion, guitars and percussion. While such feasts retain their religious character in southern Brazil, those of the north and north-east are more secular. The *baile pastoril*, a folk play depicting the visit of shepherds to the Bethlehem stable, accompanied by songs and dances, is also an important festivity on Christmas night. Such plays take place either on a public platform or in houses, in front of the Nativity scene. Dances are set in sequences. Most are in a waltz-like rhythm. Ex.14, the first song accompanying the first dance of a *baile pastoril* from Bahia, shows traits (triple metre, four-bar phrase, heptasyllabic line) that relate it to folksong of Portugal from which the *pastoril* originated.

Other important musical occasions are the Easter cycle, and especially the period of Holy Week. Besides certain religious ceremonies such as processions, pilgrimages and folk representations of the Passion, the cycle includes the traditional beating and burning of Judas. For this purpose songs associated with urban Carnival merrymaking are used in the large cities such as São Paulo, since specific songs for the ceremony have become rare. Another ancient European custom observed in Luso-Brazilian folklore is the recommendation of souls during the Lent period. Members of religious groups shroud their heads with white cloths and go at night from house to house to sing and pray for wandering souls believed to be suffering in purgatory or hell. In the hinterland of São Paulo such groups are known as *ternos* and include children, men and women. They accompany themselves with a *matraca*

Ex.14 *Baile pastoril*, dance from Bahia

(rattle) and a *berra-boi* (noisemaker) to command attention and to accent the singing. Most typically there are several soloists answered by a chorus, both groups singing in constant parallel 3rds or 6ths.

In addition to the fixed folk festivities, music-making arises in many other social contexts. The large repertory of children's play songs is mostly of Portuguese, Spanish and French origin. Dances and songs accompany all sorts of games and other forms of adult recreation. Similarly, the life-cycle ceremonies for birth, marriage and death are marked by rituals with music, most of which is of Portuguese derivation. Finally, many song repertories arise out of labour activities, such as cattle herding and fishing, cotton, coffee and tobacco picking songs.

(ii) Dances. Any classification of the many Luso-Brazilian folkdances is necessarily arbitrary. This section does not include dramatic dances, or *bailados* as they are known in Portuguese, which are discussed in §(iii) below. The traditional classification distinguishes between religious, secular and 'war' or fighting dances, although exceptions must be made in the case of dances such as the *cateretê*, which could be interpreted as semi-religious or semi-secular, without being a fighting dance. Moreover, certain dances cannot be said to belong exclusively to white or mestizo Brazilians rather than to blacks, and vice versa. The determination of the origin of folkdances is virtually impossible in most cases owing to lack of written documentation and as a result of the close interaction of social and ethnic groups. Thus, the looseness of ethnic boundaries should again be borne in mind in discussing folkdances.

Among religious dances the most widespread are the *dança de São Gonçalo*, *dança de Santa Cruz* (of the Holy Cross) and *cururu*. The secular dances, which are more numerous, include the fandango, *quadrilha*, *lundu*, *jongo*, *batuque*, *côco*, *baianá*, *carimbó*, *corta-jaca* and the rural samba. Since many of these are more usually associated with blacks they are discussed in §4 below. The fighting dances consist primarily of the Afro-Brazilian *capoeira* and *maculelê*. Others in this category are part of dramatic dances, such as the *congada*, *moçambique* or *cayapó*.

The *dança de São Gonçalo* appears to be one of the most representative of all Brazilian folkdances. St Gonçalo (do Amarante) is a popular saint in the rural areas. Although Portuguese in origin, he has acquired different attributes in Brazil, where he is the patron of *viola* players and, as a player himself, is always represented with a guitar in his hands. His miraculous function is to promote marriage. The active participants in the dance are generally those who have made a promise to the saint. The performance requires an altar on which is placed a clay statue of St Gonçalo, flanked by two lighted candles. Generally two men sing the prayers and accompany themselves on the *viola*. The *mestre* (master), as a rule the oldest man, sings the main melodic line, accompanied in parallel motion by the *contramestre* at intervals including the unison, 3rd, 4th and 5th. Several couples participate in the dance, forming two lines, men to the left, women to the right, facing the altar. The *mestre* stands in front of the men's line and the *contramestre* in front of the women's. In São Paulo state the dance is divided into five parts. For each part, five or six quatrains (usually in heptasyllabic lines) are sung. Each quatrain is accompanied by corresponding choreographic figures, including shoe-tapping. The prayers (*Salve regina* and an *Ave*

Ex.15 *Dança de São Gonçalo*, São Paulo state (Maynard Araújo, 1964, 2/1967)

San - tu Es - ti é o pri - me - ro

ver - su Que pro São Gon-çal' eu can - tu

Maria) are sung in alternation between the *mestre* on the one hand and the *contramestre* and dancers on the other. The last part of each prayer, including the Amen, is sung by all. The first song (ex.15) is typically in *AABB* form, *A* corresponding to the first two lines of text and *B* to the last two. The most prominent characteristics of this song (also applicable to Luso-Brazilian singing in general) include: predominance of parallel 3rds, transposition to the upper 4th for the *B* section, anacrusis and isometric phrase structure, and medium melodic range. The *Salve regina* melody is sung monophonically in a responsorial fashion (ex.16). The *Ave Maria* collected in São Paulo

Ex.16 *Salve regina* from *dança de São Gonçalo* (Maynard Araújo, 1964, 2/1967)

Sal - vi Ra - i - nha, Mãi de Mi - se - ri - cor - de.

(ex.17) is typical in its conjunct motion and its rhythmic figures, but atypical in its asymmetrical phrase structure. In most of the São Gonçalo dances (whether from Piauí and Maranhão or Minas Gerais and São Paulo) percussion instruments are rarely used; they are considered unsuitable because the São Gonçalo dance is a 'dance of respect'. There is no set date for the performance of the dance. Generally, it results from a thanksgiving to a saint in a house or church. In Goiás state, the accompanying ensemble features violin (*rabeca*), *violas*, guitars and *berimbaus*.

Dances and processions for the Holy Cross originate in the Iberian tradition. The whole festivity, which takes place in May, includes secular and religious events, the latter including prayers and the dance known as the *dança de Santa Cruz*. Crosses are displayed near the entrance door of each house of a village or town and the dance is performed in front of these crosses. While *mestre* and

contramestre with their *violas* lead the singing, they are accompanied by two *adufe* (tambourine) players, and sometimes even by an additional *cuíca* and *güiros*. All the percussionists also sing. The dance is a circle-dance arranged in two rings, each headed by a *viola* player. Men and women take their position in each ring without any predetermined order. In São Paulo state, where the dance is most widespread, the musical sequence is in three parts: the 'greeting', the round-dance itself, and the closing 'farewell'. Ex.18 illustrates a greeting song. A particularly characteristic feature of *caipira* (from the interior of São Paulo state) singing is the final interjection (shown in the last two bars) in which both dancers and audience participate. Most of the songs used in the dance and 'farewell' portions of the festivity are similar in melodic contour and rhythm. The rhythmic accompaniment of the *violas* and *adufes* varies slightly from one section to another, as shown in ex.19.

Both the *dança de Santa Cruz* and the *dança de São Gonçalo* frequently end with the performance of the *cururu*, a religious dance, which is generally performed at night, and accompanied by *desafios*, songs with improvised texts (see §(iv) below). Although improvised, these songs follow a given model referred to as *carreira* or *linha*. Here the *viola* is again the essential instrument. The *desafios* are not exclusive to the *cururu*, but the religious content of the song texts seems to be peculiar to that dance. There is a general view, advanced by Mário de Andrade, that the *cururu* was originally an indigenous dance adopted by the Jesuits in the late 16th century in their missionary work among the Indians. *Cururu* is believed to be a Tupi-Guarani word meaning 'toad', perhaps alluding to certain jumping figures of the dance. The dance takes place in a room adorned with an altar; it is a round-dance, in which the participants follow the musicians (*viola*, tambourine and *reco-reco* players) in the circle. In the middle of the circle stands the *pedreste*, whose function is to initiate the singing, the first part of which consists of *toadas de licença* (songs of permission, or entrance songs), followed by songs of praise to the saints on the altar and to the owner of the house. The *pedreste*, however, does not participate in the alternate singing between the *cururueiros*. The second part involves the singing of *carreiras* or words serving as models for rhymes, frequently suggested by the *pedreste*. The improvised lines may have a secular or religious character. The most frequently used *carreiras* include 'Divino, Senhor Amado' or 'Sagrado, Jesus Amado, Cruz Pesada, Nosso Senhor' and 'São João'. It is up to the *pedreste* to indicate to the two or more improvisers when a subject seems to have been exhausted. Since the singers' attention is concentrated on improvising the text, the melodies of the *cururu* songs tend to be simple, strictly tonal, avoiding chromaticism, and rhythmically regular in binary (2/4) time. The melodic range is small and melodic contour fairly homogeneous, consisting primarily of conjunct degrees with many repeated notes. The singing is always in duet between the *canturião* (the main singer) and his *segunda* (or assistant) who echoes almost simultaneously the improvised words of the *canturião*. Thus parallel singing in 3rds (ex.20) is a constant feature of the *cururu*. The instrumental accompaniment, which includes the *viola*, played *rasgueado* (strumming), *rabecas* and *reco-recos*, stresses dotted rhythms and syncopations.

The *cateretê* or *catira*, a dance of probable Indian origin used for conversion purposes by the Jesuits, is another popular religious dance. It is found in the states of Rio de Janeiro, Minas Gerais, São Paulo, Mato Grosso, Goiás and several north-eastern states. Two *viola* players and an even number of exclusively male dancers participate. In certain communities only female dancers are present. The dance takes place generally at night and indoors. Once more the *mestre* and *contramestre* sing in duet. Typically the singing is accompanied by regular hand-clapping and shoe-tapping. The choreography comprises

four main sections: two facing rows headed by each *viola* player; an orderly circling around of all participants; a crossover from one row to the other; and finally the hand-clapping and shoe-tapping figures. The songs are known as *moda-de-viola*, that is, they are narrative and historical in character, always in parallel 3rds and most of the time in a 2/4 metre, with frequent syncopated figures or triplets (ex.21).

The fandango, although a well-known Spanish dance, has been cultivated in Portugal since the 18th century or earlier. In the Brazilian southern states (especially in the Ubá cultural area) the term 'fandango' is used generically to designate popular revelry with dances. Thus in Rio Grande do Sul dances associated with the fandango include the *anu*, *balaio*, *chimarrita*, *chula*, *pericom*, *rancheira de carreira*, *tatu* and *tirana*. They are all round-dances with hand-clapping, shoe-tapping and finger-snapping. Often castanets are used by female dancers. The songs of most of these dances present the same basic characteristics observed in other dances of Luso-Brazilian folklore, in particular singing in parallel 3rds, as illustrated in ex.22, as well as conjunct, sequential and continuous descending melodic motion, the isometric rhythmic formula with syncopations and feminine cadences and the alternation of stanzas and refrain. The *viola* is the main accompanying instrument, with an *adufe* and *pandeiro* stressing the rhythm. In Rio Grande do Sul, the accordion, locally called *gaita*, tends to be the main melodic instrument.

In the northern and north-eastern provinces the term 'fandango' designates a dramatic dance, otherwise known as *nau catarineta* or *marujada*.

The most widespread dance of the fandango in the São Paulo hinterland is the *cana-verde*, also known in Minas Gerais and Rio de Janeiro. It originated in the Portuguese *caninha verde*, although it is quite different in character. Generally the dancing and singing are accompanied by *violas*, *reco-reco* and tambourine. The song texts in quatrains of heptasyllabic lines and the melodies often starting on an anacrusis are clearly Portuguese traits. Duple metre and eight-bar phrases predominate in the *cana-verde* songs. The rhythmic structure tends to be very regular, with occasional syncopations.

(iii) Bailados or dramatic dances. 'Dramatic dances' is a term used by Mário de Andrade (1959, 2/1982) for all dances that develop a dramatic action and for collective (group) dances that 'conform to the formal principle of the suite, that is, the musical work formed by a series of several choreographic parts'. In the late 1940s, Brazilian folklorists also introduced the terms *folguedo* and *auto* to designate these dances. Most such dances or *bailados* were probably introduced or developed by the Jesuits during their missionary work. Thus the subject matter of most dramatic dances is conversion and resurrection. Conversion is the main theme of such dances as *congada*, *marujada* and *moçambique*; while *quilombo*, *cayapó*, *guerreiros*, *cabocolinhos* and *lambe-sujo* are concerned with resurrection. Both themes, however, are found in some *congadas* and *marujadas*. Although religious in subject matter, these dances include non-religious *dramatis personae* and secular action. The most general native categories of such dances permit a division into three groups: the *baile pastoril*, already mentioned as part of the Christmas cycle of folk feasts; the *cheganças*, used to celebrate Iberian traditions of fights between Christians and Moors and events from Portuguese seafaring history; and the *reisados*, of varying regional meaning, associated mostly with the Christmas and the Epiphany period. *Bumba-meu-boi*, the last dramatic dance of the *reisados* cycle, is the only one truly alive in modern Brazil.

Some dramatic dances are known throughout the country while others are specific to certain regions. In addition, they cut across ethnic boundaries, because as a form of popular theatre developed by missionaries for instructional purposes they affected Amerindians, black slaves and mestizos throughout the colonial period. Indeed their main characteristics combine Iberian and African traditions with Amerindian recollections. With the exception of the *baile pastoril*, women do not participate in most dramatic dances.

Most *bailados* comprise two major parts: a danced parade and a dramatic representation referred to in some dances as *embaixada* ('embassy'). Both parts include singing and dancing. The *maracatu* and the *taieiras* of the north-eastern coastal area, however, omit the *embaixada*.

In spite of black participation in the *congada* dance (also known as *congos*) and the presence of remnants of customs from the slavery period, such as the coronation of black kings, the *congada* is not considered to be of African origin but simply an adaptation by the catechist of the *Chanson de Roland*. Throughout Latin America medieval epic poems came to be transformed into folk dramas in the old Iberian tradition of popular theatre. The *congada* is thus based on the traditional battles between Christians and Moors. As observed in the state of São Paulo, *congadas* often take place at the celebration of festivities such as the feast of the Divine Holy Spirit (in the last few days of June). They include greeting songs of the 'Congo' groups, parade of the 'battalions' of the *congada* and the representation proper. The *dramatis*

Ex.22 Fandango, São Paulo state

♩ = 126

De man-hã mui-to ce - di - nho Que meu ros-to fui la - vá. etc

personae are numerous. The central characters are the King of Congo or Charlemagne, the General of the Moors, the first and second secretaries, the Moor Ferrabrás, the Christian Duque, Roldão, the prince and the ambassador. The representation is developed in memorized spoken parts as well as solo, duet and choral numbers. Drums accompany the various songs and dances of the ceremony, providing the general rhythm shown in ex.23*a*. In some *congadas* from São Paulo a small portable marimba is used in conjunction with an *atabaque* and a *tamborim*. *Violas* and *rabeca* (fiddle) complete the accompanying ensemble. Responsorial singing predominates. The chorus often includes young boys' voices (an octave higher than the men's). Falsetto singing is quite frequent. There is parallel polyphony in 3rds in many songs. Exx.23*b* and *c* illustrate two songs of *embaixada*, the first one used after the defeat of the Moors, the second to celebrate peace on the occasion of the conversion of the Moors. It is common also to hear songs of praise to St Benedict and St Raphael, the former being the traditional patron saint of Afro-Brazilians.

The *marujada* (or *nau catarineta*), a *bailado*, is known throughout the country by a variety of names, including the erudite terms *chegança* or *chegança de marujos*, rarely used by the people themselves. The *marujada* dramatizes the struggles of the Portuguese in their conquest of the sea, and originates from the period of maritime exploration (late 15th and early 16th centuries). This tradition was transferred to Brazil where an associated song repertory developed, and the dance is still performed in a limited number of rural communities in the northern or south-central regions. The sequences of songs and their melodic traits are fairly homogeneous. In São Paulo the dance was observed during the 1950s and 60s in two coastal towns only. The large number of characters includes a general or admiral, an English captain, a priest, a Moorish king, a prince, a pilot, commanding officers etc. All wear uniforms for the dance. Christians (also called Portuguese or sailors) and Moors (the infidels) are also represented, showing the syncretism of various Iberian traditions. The accompanying instruments are percussion (snare drum and a larger double-headed drum) and fiddles. The singing alternates between soloists (main characters) and chorus (sailors and infidels). The various 'journeys' of the dramatization include different types of song and spoken dialogue. The first 'journey' is a parade of all the participants hauling a large ship, mounted on wheels for the occasion. Sailor songs (some of Portuguese origin) praising their courage, or warning against pirates and Moors, form the repertory of that first 'journey'. *Loas* and *romances* (respectively, praises and ballads) are either recited or sung in the remaining 'journeys'. One of the journeys of the *marujada* depicts a scene of hunger on board. The sailors deplore the situation and sing a celebrated song *Triste vida dos marujos* (ex.24), so well known that it even appeared in print around the middle of the 19th century. The melody is typical of Portuguese folksong in its 6/8 metre, isometric rhythm, minor mode, range and contour.

As observed in the state of Bahia, the *marujada*, performed entirely by Afro-Brazilians, stresses responsorial performance style, with harmonized choral responses (a typical Luso-Brazilian tradition) from singers accompanying themselves with small hand drums. Despite its name, the music accompanying the *moçambique* dance has no African traits and its origin is obscure, although some scholars believe it is of Afro-Brazilian provenance. In northern Portugal there were formerly festivities honouring Our Lady of Rosario, during which blacks danced in front of the church and in the streets, with decorated sticks in their hands, like the present-day Brazilian *moçambiqueiros*. These are predominantly black groups dedicated to the cult of St Benedict (they called themselves 'companies of Moçambique'), performing their dance during the feasts of Our Lady of Rosario and the Divine Holy Spirit. In the 1930s, Mário de Andrade (1959) observed that the *moçambique* had no dramatic action, and in this respect was like the *maracatus* from Pernambuco. Subsequent field studies in the 1940s and 50s, however, have revealed *embaixada* among several 'companies of Moçambique', most likely as the result of fusion with elements of other dramatic dances. Choreographically it resembles the battle dances of the *congadas*. In São Paulo the dancers in opposing lines include stick-fight dancing among the soloists and among all those in the opposing lines. There is responsorial

singing between the leader of the dance and the remaining dancers. Percussion dominates the accompanying ensemble. The instruments include snare drum, *reco-reco*, *xique-xique* (rattles) and *cuíca*, in Minas Gerais; in São Paulo the largest ensembles of *moçambique* groups include *violas*, guitars, *cavaquinhos* and fiddles, in addition to tambourines and several rattles of the *chocalho* types. The dancers often wear jingles (known as *paiá* or *pernamguma*) on their feet or legs. The fighting sticks may also have a rhythmic function. Some 'companies' seem to follow a certain order in the presentation of their songs, called *linhas*, or *pontos*.

The *bumba-meu-boi* (or *boi-bumbá*) is the most characteristic *caboclo* (mestizo) dramatic dance. Because its central figure is a bull (*boi*), some have interpreted it as a totemistic retention of Amerindian or African cultures. Others have attributed its origin to the old European folk tradition of the bull and donkey in the Nativity scene. Known mostly in the north-east (where it is the most popular dramatic dance) and in the Amazon regions, it is performed during the Christmas season and the St John cycle, respectively. The main characters include the bull, whose head is made of cardboard and worn by a dancer; two or three cattle herders (one of whom, Mateus, is always black); the captain; and a black woman, Catarina. Other animals and fantastic creatures take part in the representation. Only characters representing humans sing. Small ensembles comprise *viola*, guitar, *cavaquinho*, accordion, piccolo, fife, clarinet, fiddle and percussion such as *zabumba*, tambourine, *ganzá* and maraca. A female chorus introduces and dismisses the characters. Unlike those in most *bailados*, the vocal parts are generally taken by women. Before the drama begins conventional songs of praise are presented. According to Mário de Andrade (1959), the dance includes both fixed elements consisting of the entrances and dances of the main characters, including the bull, and variable elements, being those of the secondary characters. Specific songs, often similar to cowboys' chanting while herding cattle, are sung to call the bull. Most of the *bumba-meu-boi* songs exhibit some of the more characteristic elements of mestizo folk music, as in ex.25, which accompanies the dance of the bull: four-bar phrases, descending motion ending on the dominant, isometric rhythm and syncopations. The *bumba-meu-boi* is perhaps one of the most nationally widespread of the extant dramatic dances. From its figures, costumes, song texts and musical style to its historical evocations and connections, it is the most aesthetically and socially significant folk dramatic expression of Brazil. Several *reisados* (*pastorinha*, *zé-do-vale*,

Ex.25 *Bumba-meu-boi*

- trê-la do Nor - te Fu-lô do di - a Euá Eh
bum-ba Fol- ga meu boi

cavalo marinho, *burrinha* and others) have been incorporated into the *bumba-meu-boi*.

Other dramatic dances of indigenous origin, but now rarely performed, include the *caiapó*, *cabocolinhos* and some with clearly African features such as the *taieira* (still known in Sergipe), the *quilombo* and the *lambesujo*, all more specifically from the north-eastern states.

(iv) Song genres. There is a large repertory of monodic songs with a variety of functions in Luso-Brazilian folk music, such as work songs, street-vendors' chants, ballads, love-songs, lullabies, children's songs and laments for the dead. Only a few will be described.

The word *romance*, of Iberian origin, designates narrative poetry or singing in general. Brazil inherited a rich Iberian *romanceiro*, or ballad repertory, the majority dating from the 16th and 17th centuries. These ballads seem to have originated mainly in the Minho region of Portugal. They are often used as lullabies, children's game songs, and *modinhas*. These song genres therefore share many musical traits with the Iberian *romances*, such as predominating triple metre and minor mode, literary origin, traditional song texts set in quatrains and heptasyllabic lines with consonant rhymes. Ex.26, collected in

Ex.26 *Romance*, São Paulo state

1949 in São Paulo state, illustrates the 'Bela infanta' theme common in the Iberian ballad. Notable features are the anacrusis and the symmetrical phrase length corresponding to each line of the quatrain. Ballads which deal with animals or celebrated outlaws are quite common, especially in the north-eastern regions. In the *romances* concerning the *cangaceiros* (north-eastern bandits) the strength and courage of the characters are always particular subjects of praise. The narrative in such ballads is told in the third person. In the animal cycle, however, the animal is personified and becomes the story-teller. In the *romance* of the bull Surubim (ex.27) the rhythm, with

Ex.27 *Romance*

♩ = 76

its syncopations, triplets and dotted figures, is more clearly Brazilian, though it retains some Iberian melodic features.

Many other forms of narrative singing, such as the *modas*, *modas-de-viola*, *abecês*, *décimas* or *xácaras*, are closely related to the Iberian ballad. The *moda* and *moda-de-viola* are sung as duets in parallel 3rds with *viola* accompaniment. The singers (*modistas*) are also *viola* players. One of the main differences between the southern and northern *modistas* is that the latter, as part of the *cantoria* (singing contest) tradition, tend to rely more on

improvisation. In addition, the southerners tend to use falsetto more frequently.

The genres known as *desafio* and *embolada*, although often appearing as part of dances, are more properly song types. *Desafio* (literally 'challenge') is a song genre (also common in southern Europe), in which two or more singers compete to show their skill in improvisation. The contest lasts until one of the singers can no longer respond or gives up. Text improvisation is considered the primary point of interest of the *desafio*, while the melody is subordinate. The textual form is generally the quatrain, the last line of which often becomes the first of the respondent's quatrain. The melodic structure of *desafios* tends to be simple, with melodic sequences and isometric rhythm, to allow proper attention to text improvisation and delivery. *Desafios* are particularly popular in the north-eastern hinterland, the area of *cantoria* (singing contest) *par excellence*.

Embolada, a musical-poetic form often associated with northern dances such as the *cocos*, alternates a fixed refrain with stanzas (sometimes improvised). It consists of a recitative-like melody with small intervals, repeated notes and small note values. The text, often comic and satirical, stresses onomatopoeia and alliteration which, with a fast tempo, enhance the rhythm of the song. The *embolada* is also frequently associated with other contexts involving singing but not dance, such as the *desafio*. A large repertory of children's game songs is found throughout the country. Many have retained Portuguese, Spanish and French melodies. One of the most traditional round-games is the *ciranda* or *cirandinha*, similar to the 'Ring-a-Ring of Roses' game, accompanied by the melody shown in ex.28, known with slight variants in both Brazil and Portugal. Other songs for round-games exhibit more typically Brazilian traits such as systematic syncopated rhythm.

Although the modern age of machinery has partially modified the custom of singing at work, radio music often taking its place, some work songs continue to be sung. The *aboios* (cattle herding songs) are quite widespread, as are the songs of river-boat workers, fishermen and those who work on rice, coffee and cotton plantations.

There are two types of *aboio*: the *aboio de roça* and the *aboio de gado*. The former is always sung in duet, to a text in the form of statement and answer, when one or more cowboys lead the herd and the others follow behind it. The latter is a solo song, sung to a single syllable, to quieten the cattle in the corral. The north-eastern *aboios* are characterized by ornamental melodic lines, wide range and frequent use of falsetto.

Of the various death rites, the *velório* or wake is the most important. In the northern states wake songs or laments are known as *incelências* or *excelências*, and are of Portuguese origin. They are sung around the dead body

Ex.28 Children's round-game song

and are believed, in some areas, to help the departed enter heaven. Up to 12 lines are sung, unaccompanied and generally in unison. Wake prayers, however, such as those for cleaning and dressing the corpse, are in parallel 3rds. Other wake songs function as a 'farewell' to the dead.

4. AFRO-BRAZILIAN FOLK MUSIC TRADITIONS. The main geographical zones of Afro-Brazilian culture include the states of Pernambuco, Alagoas, Sergipe, Bahia, Espírito Santo, Minas Gerais, southern Goiás, Rio de Janeiro and northern São Paulo. It is practically impossible to point out specific African cultural origins of most Afro-Brazilian musical genres, since several African cultures were in close contact from the outset of the slave trade. It is generally recognized, however, that most Afro-Brazilian secular music is of Bantu origin, while Yoruba and Fon influences are particularly noticeable in religious beliefs and music. Just as blacks participate in most of the dramatic dances already described, there are likewise specifically black festivities in which mestizos and whites also take part. While black music in Brazil has stylistic features which can be traced to West Africa, the actual repertories were, in all probability, created locally. African counterparts have been found for only a few religious melodies, though it is possible that Brazil may have retained African songs which have since disappeared in Africa itself.

In spite of its heterogeneous cultural origins, black folk music in Brazil became homogeneous during its four centuries of history. What developed during the slavery period into a new black culture resulted from the conditions of plantation slave quarters. The new form of black and anti-white solidarity which emerged out of these conditions helped to preserve cultural traits that still survive. Thus religious beliefs and practices in Brazil are still the most truly 'African' to be found in the Western hemisphere.

(i) Dances and dramatic dances. The black contribution to and influence on Brazilian folkdances is paramount. This is reflected not only in the large number of Afro-Brazilian dances, both rural and urban, but also in the assimilation and resulting transformation of European dances. Choreographic elements of such dances include round formation, usually with soloists, and a particular trait known as *umbigada* (from Portuguese *umbigo*: 'navel'). This is an 'invitation to the dance' symbolized by the touching of the couples' navels. It may be taken as an indication of the origin of the dances.

Because music and dance are often inseparable the name of a dance is also applied to the music it accompanies, thus becoming a generic term, of which *batuque* and samba represent the most obvious examples. Both have come to designate genres of secular dance and music of Brazilian blacks. The *caxambu*, *jongo*, *côco*, *baiano (baião)* and formerly the *lundu* and *sarambeque*, with numerous regional names, are among the most important other dance genres. Generally considered a round-dance of Angolese or Congolese origin, the *batuque* is no longer performed and the term has acquired the more general connotation of Afro-Brazilian dance accompanied by heavy percussion. In São Paulo state it is a dance of Afro-Brazilian fetishistic cults, without any apparent liturgical function. The accompanying instruments include drums (*tambu*, *quinjengue*) and rattles (*matraca*, *guiaiá*). The dance itself is not a round-dance, but consists of *umbigadas* between two facing lines of

dancers, males on one side, females on the other. Individual couples dance between the rows. Responsorial singing accompanies the dance. The singers are called *modista* or *carreirista* according to the type of song they improvise. The *modista* sings quatrains referring to community events or gossip, while the *carreirista*'s songs, called *porfias*, are hostile and challenging. Improvisation and responsorial singing are not necessarily opposed practices, since the chorus tends to repeat literally or with slight variants the improvised two lines of the quatrain. Before the dance begins, the song is rehearsed collectively for 10 to 20 minutes. In addition, the *modista* or *carreirista* and the chorus all consult together regarding the general outline of song text and method of performance.

There are many varieties of samba. As a folkdance it has lost its former importance in most parts of the country, having been replaced by the urban samba. The folk samba in the southern-central regions is known as *samba-lenço*, *samba de roda* and *samba campineiro*. The *samba-lenço* involves dancers with a kerchief in their hand; the choreographic arrangement is similar to that of the *batuque*. At the beginning of the dance two singers, accompanied on snare drums and tambourines, sing in parallel 3rds. The songs are usually eight bars long, in duple metre, with an anacrusis, a range of up to an octave, descending motion with repeated notes and isometric rhythm (ex.29). Syncopations often associated with black music prevail here in the accompaniment alone. Song texts are in the form of quatrains.

The *samba campineiro* was studied by Mário de Andrade (1937), who preferred the simple designation 'Paulista rural samba'. Andrade observed that in São Paulo the samba is defined by its choreography rather than by its musical structure. This dance does not include the *umbigada* and is thus essentially collective in character. Apart from the instrumentalists (who also dance) the participants are women. The main instrument is the *bombo* (large drum), often accompanied by tambourine, snare drum, *tamborim*, *cuíca*, *reco-reco* and *guiaiá*. Structurally this samba shows the following traits: arched melody in 2/4 metre; characteristic rhythmic figuration (ex.30); strophic form and variable text form; repetition

Ex.30

etc

of words or lines to conform to the melodic length; and relative importance of improvisation.

The *samba de roda* in São Paulo has lost its former importance, but in the north-eastern region (especially the state of Bahia) it is still the most popular type of folkdance. As the name indicates, it is a round-dance involving soloists; its function is purely recreational. The instrumental ensemble includes *atabaques* played with the hands, tambourines, cowbell and occasionally guitars. Traditionally singing precedes the dance itself, but the song has now become an integral part of the dance. The most typical *samba de roda* songs display an unmistakably Brazilian flavour, characterized by four- or eight-bar phrases, repeated notes, isometric rhythmic figures and abundant syncopations in the accompaniment. The tunes frequently end on the mediant or dominant. Two different types of *samba de roda* are shown in ex.31.

Another genre of samba particular to the Bahian region (specifically the *recôncavo*, the area around the Bay of Todos os Santos), is the *samba de viola*, studied by R.C. Waddey and T. de Oliveira Pinto. As the name indicates, the *viola* is the main instrument. The presence of this instrument in a most typical Afro-Bahian genre, performed by Afro-Bahians, shows that the instrument of Portuguese origin has become equally Afro-Brazilian. The Bahian *viola* is hand-made in two sizes: three-quarter (90 cm long) and the *machete* (76 cm long), both with five double courses of metal strings. As a rule, the percussion of the ensemble includes two ot three tambourines, a small drum and sometimes the *prato-e-faca*, a common plate (preferably enamelware), held in one hand and scraped with a table knife. Instrumentalists (all male) also participate in the singing. The songs (both melodies and song texts are referred to as *chulas*) are performed in parallel 3rds and in a very high tessitura. The dancers tend to be exclusively women.

Jongo, a dance of African origin (from Angola according to some authors), survives in a few places in the southern-central states, where there was formerly a large black slave population. It is social and recreational. Men and women participate in both solo dancing and round-dancing (always anticlockwise). The singing and the texts are referred to as *pontos*, as in several Afro-Brazilian religious groups. The dance is usually accompanied by the same instruments used for the *batuque* and the rural samba. In São Paulo state the singing is performed by a *cantador*, sometimes helped by a second voice (in parallel 3rds), and answered by the chorus consisting of the dancers themselves. Most of the *pontos* seem to be improvised; these include the *pontos de desafio* (challenging songs) with enigmatic texts and the *pontos de visaria*

lá, a fi - i - lha-do rei-no va-gão trou-xe de lá

or songs to accompany the dance. *Pontos* may have one or two *voltas* (two-line verses). The most common traits of *jongo* songs include two-bar repeated isometric phrases, prevailing conjunct motion, parallel singing and syncopated percussion accompaniment (ex.32).

The *côco* is a dance of the poorer people in northern and north-eastern Brazil, and is so called because it is commonly accompanied by hand-clapping with hands cupped to create a lower sound, like that of two halves of a coconut shell sounded against each other. Occasionally a drum or a rattle may be used, in which case the dance is named after the instrument: *côco-de-canzá*, *côco-de-mugonguê* etc. In the northern states different names refer to the type of song associated with the *côco*, such as *côco-de-décima*, *côco-de-embolada*, *côco-desafio*. The choreography dictates the alternation of stanza and refrain in the song, as a solo dancer in the middle of the circle improvises a stanza and is answered by the other dancers. A common trait of *côco* song melodies is the peculiar rhythm of short note values (generally semiquavers in 2/4 time) repeated continually, resulting in a sort of *moto perpetuo*.

The *maracatu* dance–procession is specifically associated with Carnival in the city of Recife in Pernambuco. Its origin seems to be related to the festivities for the coronation of black kings, first mentioned in 1711. Formerly *maracatu* was purely religious and was closely related to the Afro-Brazilian cult of Xangô, but this function seems to have been lost, for it now consists of an organized group of Carnival street-dancing merrymakers. The main characters include the king, queen, princes, ambassador, *dama-do-paço* ('court lady') and the *baianas*, or female dancers. The 'court lady' is the central figure of the royal parade, as she carries the *calunga*, a small doll dressed in white, which represents a relic of fetishistic cult and a symbol of authority or priestly power. The various *toadas* (songs) of the dance and procession frequently allude to African deities. Songs and dances are related to the *calunga* on which the attention of all participants is focussed. The accompanying ensemble consists of percussion instruments, various types of drum (*tarol*, *caixas*, *zabumbas*) and the *gonguê* or *agogô* (cowbell); the different timbres enhance the polyrhythmic texture of the ensemble. The rhythm of the songs also displays systematic syncopation, as illustrated in ex.33. Probably of similar origin to the *maracatu* is the *afoxé* from Bahia which, however, retains more clearly African elements, such as singing in Yoruba language (Nagô), and typically Afro-Brazilian ritual practices in the preparation of the dance-parade.

Although considered primarily as an athletic game and a martial art by some authors, the *capoeira angola* – a mock fight involving several dance figures – also has ritual overtones. Most *capoeiristas* (fighters) are cult men and observe their prescribed ritual behaviour in the practice of *capoeira*. The various dance figures or 'strokes' are accompanied by songs in responsorial fashion and by an instrumental ensemble consisting of two or more *berimbaus* (musical bows), *caxixi* (basket rattle), *reco-reco* or *ganzá*, tambourines and conga drum. Specific rhythmic patterns, with names such as *São Bento grande*, *São Bento pequeno*, *Benguela*, *Cavalaria*, *Santa Maria*, *Angola* etc., correspond to specific 'strokes' of the dance. About 139 songs of the *capoeira* game have been collected in Bahia, but not all belong to the traditional repertory of the dance, many having been borrowed from children's round-game songs or *samba de roda* song repertories. In these songs it is not uncommon to find the same type of syncopation applied to both vocal line and instrumental accompaniment. In the latter, the harmonic support of the musical bows is notable; since each instrument is capable of producing two adjacent notes, three bows can provide parallel harmonies repeated at will (ex.34). In the 1960s *capoeira* performances were limited to about a dozen songs, as the performance venues became restricted

to restaurants and other tourist attractions. Another Afro-Brazilian fighting dance is the *maculelê*, strongly reminiscent of black African stick-fighting dances. The sticks are used as mock weapons and as a percussion instrument.

(ii) Song genres. It is difficult to isolate specific song genres peculiar to the Afro-Brazilian cultural heritage. Most of the songs described in §3(iv) are also sung by blacks and mestizos. In addition, there are a few song genres that are autonomous, that is, existing outside their function in a given dance or dramatic dance. Among these song types are work songs, lullabies and, above all, songs related to Afro-Brazilian religions. Fishermen's songs in the fishing area of the north-eastern coast reveal some stylistic traits which could be attributed to an African origin. These include pentatonic scales, E modes, descending or undulating melodic movement and frequent syncopations. The songs of the *puxada da rêde* or *xaréu* (the pulling of the fishnet), on the other hand, have the same general characteristics observed in Brazilian mestizo music. Ex.35 shows the same anacrusis, repeated notes,

Ex.35 Fishermen's song

isometric rhythm and tonal feeling of so many other song types mentioned above.

(iii) Religious music. The extremely rich and varied repertory of religious music is primarily of Afro-Brazilian origin. Although it is in a sacred context that African musical elements are most strongly preserved, syncretism has affected not only religious beliefs and practices but also the music associated with them. Among the most African cults are the Ketu (or Nagô) and Jesha (Yoruba), the Gêge (Fon of Benin) and the Congo-Angola, found in the northern and north-eastern states. The least African groups are the Caboclos (derived from some Amerindian beliefs combined with those of other cult groups), Pajelança, and the Umbanda and Quimbanda, found mainly in the central and southern regions, though Umbanda has now penetrated practically everywhere.

Candomblé is the term used specifically in Bahia to designate various religious groups of African origin. As a result of the contact of several prevailing African cultures in Bahia, *candomblé* became a sort of cultural synthesis of the West African mythological world. Most *candomblé* houses in Bahia worship the major Yoruba and Fon deities (*orixás* and *voduns*) as opposed to the West African practice in which a religious centre (and sometimes an entire village) is dedicated to the worship of one particular *orixá* or *vodun*. The earliest establishment of the Yoruba slaves' religious organization in Bahia is difficult to determine accurately. According to local oral sources it was around 1830 that the first cult centre was founded in Salvador by three African priestesses. This centre, of Ketu affiliation, was known as Ilê Iyá Nassô, and from it originated the largest and best-known houses of worship during the 20th century, especially the Engenho Velho (also known as Casa Branca), the Gantois, Ilê Axé Opô Afonjá and the Alaketo.

The most obvious stylistic trait common to the music of all these groups is monophonic singing and the predominant use of call and response patterns. In addition, the singing is accompanied by an ensemble usually consisting of three drums (*atabaques* of varying sizes) and an *agogô* (cowbell) or a shaken rattle. Leader and chorus often sing the same tune, sometimes related tunes. Quite often soloist and chorus overlap. Melodies are often

anhemitonic pentatonic in the most traditional repertories, and diatonic (heptatonic) in the most acculturated ones. The ranges of the melodies are not uniform. The Gêge and Ketu cults of Bahia, for example, have many songs with a wide range of more than an octave, while those of the Angola and Jesha cults in the same area average less than an octave. Melodic contours tend to be descending in all repertories, with undulating movements also characteristic of the Ketu and Gêge repertories. Almost all the songs in all the groups are strophic.

Cycles of songs are performed in a ritual order, dictated by their function. There are food-offering songs, sacrificial songs, plant songs, initiation songs, death songs etc. A multitude of songs addressed to the many deities of West African mythology form the bulk of the repertories. Song texts appear in many languages, from Yoruba (Nagô), Fon and various Congo dialects to Portuguese, and a combination of all of these.

Drumming constitutes one of the most important musical elements of Afro-Brazilian religious music. Drums are considered sacred instruments and undergo 'baptism' by means of animal sacrifices and food-offering. Since they are believed to have the power to communicate with the deities, the drum's *axé* (or spiritual force) is ritually renewed at least once a year. There is a great deal of drum music for drums alone. Besides providing the basis for the many ritual dances, drum music 'calls' the gods and brings on spirit 'possession'. In the Ketu cult specific rhythmic patterns are associated with certain deities, such as the *alujá* of Xangô, the *opanijé* of Omolú, the *aguerê* of Iansã and Oxossi, and the *igbim* of Oxalá. Cross-rhythms and polyrhythms predominate. The metres are most commonly duple but often also triple, with frequent hemiolas; a subtle duple-triple ambivalence is also characteristic. The master drummer playing the largest drum (*rum*) of the trio improvises upon the characteristic rhythms and at the same time controls the choreographic development of the ritual dances. Exx.36 and 37 illustrate some of the characteristics of Afro-Brazilian cult songs. Few of these songs are known in West Africa, although their style is unmistakably African. Among the most acculturated groups (Caboclo, Umbanda) the repertories seem to be constantly changing and tend to be heavily influenced by urban popular music.

III. Popular music

Since the latter part of the 19th century Brazil has developed one of the richest and most varied and unique traditions of popular music in Latin America. Several trends and genres since the 1960s have become an integral part of the international world music market and have influenced the USA, Portugal and other European countries, as well as some African countries. There is no single Brazilian popular music but various expressions associated with specific social classes, regions and historical periods. The main sources of such musics are predominantly European, Afro-Brazilian and mestizo. Influences from American Tin Pan Alley songs, dance music, jazz, rock and more specific black American genres, as well as Caribbean popular music (especially from Cuba, Dominican Republic and Jamaica) have been felt in Brazil

1. Early styles. The *belle époque* of Brazilian popular music took place in and around the cities of Rio de Janeiro and Salvador, Bahia, from about 1870 to about 1920, when the 1888 abolition of slavery led to wholesale migration from the rural areas to the towns. During this 50-year period, an increasing diversification of musical forms, rhythms and social contexts for popular music consumption resulted in the emergence of the most important vocal, instrumental and dance genres developed during the first half of the 20th century.

Salon music of the 19th century was represented by the sentimental song known as Modinha, the stylization of the *lundu*, an earlier dance of Afro-Brazilian origin, as *lundu-canção* (*lundu*-song) and the adaptation of a number of European fashionable dances, especially the polka, waltz, schottish and quadrille. *Modinhismo* was the term used by Mário de Andrade to encompass the repertory of romantic, sentimental songs of European derivation which remained visible in many subsequent

genres of popular songs. In addition to Domingo Caldas Barbosa, composer of famous *modinhas* and *lundus*, some of the most celebrated 19th-century popular composers included Domingos da Rocha Mussurunga, José de Souza Aragão ('Cazuzinha'), Xisto de Paula Bahia, Francisco Magalhães Cardoso, Joaquim Manoel, José Pereira Rebouças and especially Cândido Inácio da Silva. Their works were frequently performed in the aristocratic salons and in popular theatres (*teatro de revista*) of the period, which represented one of the major venues for the dissemination of popular music among the urban middle class.

From about 1850 the European waltz and polka became 'brazilianized', the former under the influence of the *modinha* and the latter combining with certain rhythmic traits of the *lundu* to form the hybrid *polca-lundu*, the source of the *tango brasileiro* and the MAXIXE. Waltzes, polkas and quadrilles written for the piano were frequently adapted for plays and comedies, notably by the pianist-composer Antonio F. Cardoso de Menezes e Sousa. Likewise, the generic *canção* and *cançoneta* (which represented the lyric, romantic song) was hybridized with tango-habanera rhythmic accompaniment as *tango-cançoneta*. Popular singers of the early 20th century, especially Mário Pinheiro (*c*1880–1923), Baiano (Manuel Pedro dos Santos, 1870–1944), Cadete (Evênio da Costa Moreira, 1874–1960) and Eduardo das Neves (1874–1919), began recording many of these vocal genres, some as early as 1902. Later singer-idols of various songs, operettas and fashionable urban sambas were Vicente Celestino (1887–1968) and Francisco Alves (1898–1952).

The most successful and prolific composer of theatre pieces (operetta, burlesque, vaudeville and musical comedy), polkas, waltzes, songs, *modinhas*, tangos and *choros* was CHIQUINHA GONZAGA (1847–1935), who overcame the prejudices against female musicians and composers both of her family and more generally the period. Together with JOAQUIM ANTÔNIO DA SILVA CALADO and ERNESTO NAZARETH, she contributed substantially to the nationalization of European dances. Her polka *Atraente* (1877), for example, effectively imitated the type of picturesque improvisation associated with popular strolling musicians known as *chorões* ('weepers') and their instrumental ensembles (CHORO). This improvisatory style was made up of typical running figures including broken-chord patterns with repeated notes, descending chromatic notes in the accompaniment and isometric figures. She also systemized the use of the habanera rhythmic pattern, with subtle variations and syncopated patterns (such as the semiquaver–quaver–semiquaver pattern in a 2/4 metre), characteristic of later dance music genres. Chiquinha Gonzaga wrote the first carnival dance of national interest in 1899 for the black Carnival society Rosa de Ouro. This was the march *O abre alas!* which for several decades symbolized Rio de Janeiro's carnival.

It was, however, with the works of the pianist-composer Ernesto Nazareth that a deeper transformation of European dances into genuinely Brazilian popular genres was achieved.

2. URBAN SAMBAS AND RELATED GENRES. Although the first acknowledged successful commercial recording in Brazil of an urban SAMBA is generally said to have been *Pelo Telefone* (1917) by the composer Donga (Ernesto Joaquim Maria dos Santos, 1891–1974), the antecedents of the most typical urban dance–song of Brazil date from the turn of the 20th century. At that time, however, 'samba', as labelled by leaders of small town brass bands, did not differ markedly from the tango or the *maxixe*, except to imply a more systematically syncopated accompanimental rhythm. *Pelo telefone*, a hit of the 1917 Carnival celebration, while registered as 'samba', still had the shuffling rhythmic feel associated with the *maxixe*. It is quite likely that the folk samba, a round dance involving dancing couples performing the *umbigada* in typical round choreographic figures (especially associated with Rio de Janeiro and Bahia), was the model developed in the urban areas. The call-and-response performing style and corresponding stanza and refrain alternation cultivated in the *samba de morro* (from the poor hill areas of the city, known as *favelas*) and the *partido alto* (brought to Rio from Bahia at the beginning of the century) subsequently influenced numerous urban samba styles developed in the 1920s. As a generic type of urban music, the samba is essentially a vocal dance genre, with a few exclusively instrumental subgenres such as the *samba-choro* and *samba de gafieira*. The urban samba became established in Rio during the 1920s, especially through the compositions of Sinhô, (José Barbosa da Silva, 1888–1930), the 'king of samba', Caninha (Oscar José Luiz de Morais, 1883–1961), Ismael Silva (1905–78) and Pixinguinha (Alfredo da Rocha Vianna Filho, 1898–1973). All represented a professionalized group of lower middle-class black composer–performers who were well acquainted with the musical traditions of the poorer sections of the city. Sinhô composed the greatest carnival hits of the late 1910s and the 1920s, such as the sambas *Quem São Eles* (1918), *Confessa, meu bem* (1919), *Fala, meu louro* (1920), *Amor sem dinheiro* (1926), *Ora, vejam só!* (1927) and *Amar a uma só mulher* (1928), in addition to carnival marches. Caninha's sambas *Me leve, me leve, seu Rafael* and *Esta nêga quer me dar* were among the hits of the 1920 and 1921 carnival seasons, respectively. As a composer, flautist, saxophonist, bandleader and arranger, Pixinguinha had an enormous influence. His bands Os Oito Batutas (first organized in 1919), Orquestra Típica Pixinguinha-Donga (1928) and Guarda Velha (1931) brought together some of the best popular musicians of the period and contributed to unique performance styles that became classic. Guarda Velha put more emphasis on brass and achieved a perfect balance between virtuoso solo performances and deeper concern for ensemble playing.

During the 1930s a number of white middle-class professional composers contributed to the development of the urban samba. Particularly significant and creative were Ari Barroso (1903–64), Noel Rosa (1910–37), Lamartine Babo (1904–63) and João de Barro (Alberto Ferreira Braga, *b* 1907, also known as 'Braguinha'). Not only did they all compose sambas and marches for carnival that enjoyed lasting popularity but they also created some of the most famous tunes associated with the sophisticated *samba-choro*, *samba-canção* (samba-song of sentimental character) and ballroom or nightclub sambas. This was the period during which the samba became more diversified as a result of its acceptance by the various local strata. Noel Rosa especially excelled in reflecting some of the typical attributes and feelings of urban popular figures, as in *Feitiço da vila*, *Palpite infeliz* and *Fita amarela*. Among other genres, he especially cultivated and developed the *samba de breque* (*samba

brecado), a subgenre of the urban samba involving everyday colloquial lyrics with a characteristic break (*breque*) and a corresponding interruption of the melodic line, that appears to be extemporized on a humorous or joking note. Notable examples include *De babado*, *Conversa de botequim* and *Três apitos*. The 1930s represented the golden period of the classic urban samba, followed by the creation of other subgenres beginning in the 1940s, such as the strictly instrumental, highly syncopated *samba de gafieira*, created by dance orchestras in *gafieiras* (popular dance halls) and cabarets. While large jazz-like orchestras performing arrangements of classic samba tunes for dance occasions developed in the 1940s and 50s, the influence of modern jazz small combos was particularly felt in the so-called samba–jazz of the 1950s. The best-known performers of the classic commercial samba from the 1930s to the 1950s were Carmen Miranda (1909–55), Francisco Alves, Mário Reis (1907–81), Sílvio Caldas (1908–98), and Elizeth Cardoso (1920–90).

The co-existence of various samba subgenres, from the *samba de morro* and *samba-enredo*, associated with Carnival and the samba school, to the [*samba de partido alto*], *samba-canção*, *sambolero* and *sambalada*, among others, clearly manifested the social acceptance of the samba, in its varied expressions, as the national dance music. It also reflected the strong social stratification prevailing in the large cities of the post-World War II era. In Rio de Janeiro especially, urban geography created a pronounced social separation, with the poor living in the northern areas and hilly ghettos and the rich along the southern beach districts from Leme to Leblon, where the famous bossa nova movement was born in the late 1950s.

3. BOSSA NOVA. It is important to remember that BOSSA NOVA does not constitute a special genre of Brazilian popular music, but rather a characteristic performance style of established genres. The very first recording (1952) in Rio by João Gilberto (*b* 1931), one of the early and most influential bossa nova figures, originally from the interior of the state of Bahia, comprised two pieces in the *samba-canção* genre, composed by musicians of the younger generation. In the late 1950s and early 60s, most of the *bossanovistas* were in their late teens and early twenties and belonged to the middle and upper-middle classes. Their musical tastes gave preference to a combination of *samba-canção* as performed by the great female vocalists Dolores Duran, Maysa and Sylvinha Telles (the creators of the so-called Brazilian blues); the music of various jazz figures, especially the voices of Sarah Vaughan and Ella Fitzgerald, the cool style of Miles Davis and the sophisticated and subtle harmonies of Joe Mooney; and some of the classic sambas of the 1930s. The *bossanovistas* looked to innovatory expressions that would renovate and modernize Brazilian popular music. Young jazz enthusiasts in Rio and São Paulo were involved at that time in the creation of a 'samba jazz' tradition, in a jazz combo format, which represented a natural ingredient of the bossa nova movement. This was not, however, a simple imitation of American jazz or, as José Ramos Tinhorão has reiterated since 1966, the capitulation of Brazilian musicians faced with international market pressure for fashionable and commercially viable genres and styles. To interpret bossa nova as a repudiation of the heritage of the popular samba and the result of socio-cultural alienation suggests a short-sighted perspective on the motivation for musical change. In effect, bossa nova represented a revolutionary innovation only in its new rhythmic rendition of the samba beat, the nature and quality of its lyrics and its general performance practice.

In the opinion of some critics, the poetic sophistication of bossa nova song texts alienated the cultivators of the new style from popular cultural roots. Thematically, however, the subject matter of early bossa nova songs differed little from previous songs, covering amatory topics (e.g. Jobim's *O nosso amor*, written with the great poet Vinicius de Morais for the 1958 film *Orfeu da Conceição* ['Black Orpheus']), devotion to nature mixed with romantic introspection (Jobim's *Corcovado*), philosophical commentaries (Jobim's *Chega de Saudade*, *Desafinado*, *Discussão* and *Samba de uma nota só*) and narratives describing typical local figures or dances in the context of urban life (Jobim's *Garota de Ipanema* and *Samba do avião*). Traditional romantic love themes continued to represent by far the majority of bossa nova songs, which inherited such themes from previous popular genres, especially the *samba-canção*.

But if the thematic categories did not change radically, the poetic substance and treatment involved drastic innovations. Beginning in the 1950s with poets of the calibre of Vinicius de Morais, bossa nova music of the 1960s and 70s counted on the unprecedented poetic refinement and creative originality of such composer-poets as Newton Mendonça, Chico Buarque, Capinam, Torquato Neto, Gilberto Gil and Caetano Veloso. The deliberately intimate character of bossa nova expression called not only for simplicity of language (reinforced by colloquialism), but also for the specific sound effects of the words, showing some affinity with Brazilian concrete poetry of the 1960s. This remarkable preoccupation with the language's sounds was also reflected in the close relationship of text and melody in many songs, where the lyrics do not seem to have been conceived separately from the music itself. Of all bossa nova composers, Antônio Carlos Jobim (1927–94) was the most creative and internationally successful.

Until 1964, the year of the military take-over in Brazil, bossa nova aesthetic ideals remained unchanged. After that time, however, a new social awareness developed among bossa nova musicians. The best example of a musician–poet with enormously creative powers and a vivid social consciousness is CHICO BUARQUE (*b* 1944), the son of one of Brazil's most noted historians. In 1965 his first songs *Pedro Pedreiro*, and *Sonho de um carnaval* brought him public recognition. *Sonho de um carnaval*, more than any song of the bossa nova repertory at that time, established a clear and clever link with the traditional samba of the 1930s and 40s and carnival music in general. *Pedro Pedreiro*, on the other hand, initiated among bossa nova musicians the trend towards social participation and protest. Other songs of the same year (e.g. João do Vale's *Carcará* which launched the singing career of Maria Bethania) also belonged to this general category of social protest songs, but most frequently the protest took the form of exposing some of the social problems of underdevelopment, hunger and injustice in the distant hinterland of the north-east. With *Pedro Pedreiro* Chico Buarque took issue with the urban conditions of north-eastern migrant workers in large southern cities, revealing an understanding of the conditions of the urban working class. The concentrated poetic language full of emotional

impact exhibited in this song became highly sophisticated in later songs, particularly *Construção* of 1971.

Chico Buarque's position in the 'modern' movement of Brazilian popular music (referred to as MMPB for Moderna Música Popular Brasileira) has been variously interpreted, most critics arguing that his ability with lyrics rather than his actual music is the source of his popularity. He is, however, unique as a composer of the second bossa nova generation in that he succeeded in assimilating and maintaining the essential melodic and rhythmic aspects of the classic sambas of Noel Rosa, and thus established the continuity of the tradition, in contrast to the first generation of bossa nova musicians. In many of his later songs he advocated in lyrical and poetic ways a subtle action of subversion and anarchy as the only response to Brazil's contemporary problems, which led to the censorship of so many of his songs by the military regimes of the late 1960s and early 1970s.

4. TROPICÁLIA. Around the mid-1960s a group of musician-poet-performers known as Tropicália, mostly from Bahia, emerged on the Brazilian scene. Including such different personalities as Caetano Veloso, Gilberto Gil, Gal Costa, José Carlos Capinam, Torquato Neto, Tom Zé, the bossa nova singer Nara Leão and the composer-arranger Rogério Duprat, the group's essential common denominator came from the adherence of its members to the basic concepts of *modernismo* set forth in the 1920s by such literary philosophical figures as Oswald de Andrade and Mário de Andrade. In the words of Caetano Veloso, the theoretical spokesman and leader of the group, Tropicália or *tropicalismo* was neo-cultural cannibalism or anthropophagism. Influenced by the French Dadaists whose manifesto was written ten years earlier and consisted of a violent attack on Western thought, Oswald de Andrade's own manifesto (*Manifesto antropofágico*, 1928) appeared as a tropical adaptation of Dadaist dissension, questioning the imposition of the European element in Brazilian culture and the ensuing destruction of native cultural values. The question was whether or not one should return to native cultures still found in a state of purity, or whether one should acquire the tools and skills of other cultures. While Andrade attempts no clear-cut answer, he points out the apparent contradictions and contrasts of the Brazilian reality.

For the Tropicália musicians, this was a justification of the absorption of foreign musical experience adapted to the needs of the moment and a recognition of the international dimension of Brazilian popular culture of the period. Such a recognition, however, neither implied a simple imitation of foreign models nor resulted from the influence of international mass culture, as several critics believed at the time (Tinhorão, 1974, p.234). For the Tropicália group, modernism not only signified revitalization through innovations of MPB (Música Popular Brasileira) , but also the definite involvement of its members in prevailing socio-political conditions. Setting out to shock deliberately and to concertedly denounce the contradictions in Western thought, their aim was to awaken the consciousness of the middle class to the Brazilian tragedy of poverty, exploitation and oppression and to point out the true nature of modern Brazil.

Musically, the movement brought about the widening of the Brazilian musical horizon through adherence to and adaptation of musical trends of the 1960s: the rock and Beatles phenomena and the experimental new musics of the electronic age. Rock music penetrated the Brazilian scene during the period 1964–6 and had, in Roberto Carlos, the local translator of that youth movement. The 'iê, iê, iê' style, as it was known in Brazil (from the famous refrain of the Beatles' song *She loves you*), revealed the prevailing strong prejudices against international pop music, and its popularity among the Brazilian *Jovem guarda* ('Young Guard') was seen as a threat to the traditional values of popular music. This in itself stimulated the early recognition by the *tropicalistas* of the validity of the Young Guard as an integral part of modern Brazilian popular culture. Roberto Carlos himself has pointed to the influence of the 'iê, iê, iê' style on Caetano Veloso's music of the 1960s, particularly in his incorporation of electric and bass guitars as well as his imitation of some rhythmic and arrangement models. Tropicália, with its musical and textual sophistication, however, had no counterpart in Brazilian rock music.

As one of the musical goals of Tropicália was to liberate Brazilian music from a restrictive system of prejudice by creating the appropriate conditions for freedom and experimentation, all music sources relevant to contemporary Brazil were drawn together: Luso-Brazilian, Afro-Brazilian folk music expressions, bossa nova samba of the early phase, 'iê, iê, iê' and elements of jazz and experimental musics. Simultaneously occurring musical quotations, collages of sound associations and sound montages, all techniques previously deemed to be irreconcilable and meaningless, essentially constituted the empirical approach of the Tropicália musicians to music composition. The language of the song texts is frequently telegraphic, fragmentary and based on quotations, associations or deliberate distortions of famous examples of Brazilian *belles-lettres*. Representative early examples are Veloso's *Alegria, alegria*, *Tropicália*, *Baby* and Gilberto Gil's *Domingo no parque* and *Geléia geral*, the latter with text by Torquato Neto. Most of these songs were first released on the 1968 Tropicália manifesto album entitled *Tropicália ou Panis et Circencis*. By about 1972 the Tropicália group no longer existed but most of its members continued to be active.

5. MILTON NASCIMENTO. A highly distinctive and individual figure among popular musicians of his generation is MILTON NASCIMENTO (*b* 1942), whose powerful and remarkably versatile virtuoso voice and the uniqueness of his compositions won him international acclaim in the 1970s and 80s. His music combines many different elements: from the folk music traditions of Minas Gerais (where he was brought up) and other regions of Brazil and Latin America, to classic and bossa nova sambas, colonial church music, classical music compositional processes, Gregorian chant and soft rock, all with kaleidoscopic rhythms and polychromatic orchestration. In addition to the poetic and spiritual evocation of the history and culture of Minas Gerais, his songs frequently address social relationships, issues of repression and liberty at the time of the military regime (although his is never an overt protest music), questions of justice and self-determination in sister countries in Latin America (especially Chile and Cuba), international brotherhood and the oppression, persecution and liberation of Afro-Brazilians (as in his famous *Missa dos Quilombos*).

6. DANCE MUSIC OF THE NORTH AND NORTH-EAST. Beginning in the late 1940s, several north-eastern dance

music genres, especially from the states of Pernambuco, Ceará and Bahia, became part of the national popular music scene thanks to extraordinary figures such as Luiz Gonzaga (1912–89), Dorival Caymmi (*b* 1914), Jackson do Pandeiro (José Gomes Filho, 1919–82), João do Vale (1934–96), Alceu Valença (*b* 1946) and Geraldo Azevedo (*b* 1945), among others. Gonzaga popularized the *baião* dance–song in the late 1940s and the 1950s, with its typical instrumentation of keyboard accordion, triangle and *zabumba* (bass drum), akin to the folk ensemble known as *terno de zambumba* or *banda de pífano*, without the flute or fife. Out of the *baião* developed the *forró* (originally a variation of the *baião*) which became the generic north-eastern style of dance music, a sort of lively and faster *baião*. Gonzaga also cultivated the *xaxado* (a male dance style with shuffling rhythm) attributed to the legendary outlaw Lampião (1898–1934). Gonzaga's songs *Baião* (1946), *Paraíba* (1950) and especially the *toada* (tune, song) *Asa branca* (1947) have remained some of the most memorable tunes in Brazilian popular music. Likewise, the many songs of Dorival Caymmi, whether *modinhas*, sambas, fishermen's songs or *candomblé*-inspired songs, represent the fountain-head of 20th-century Bahian popular music.

Dance music has taken different forms of expression since the 1970s. Particularly significant has been a new and special type of *Carnaval* music in Salvador, coming out of the *afoxé* tradition: the *bloco afro* of the 1980s, associated with a cultural and political movement of black consciousness among young Bahians. Like the *afoxés*, the *blocos afro* were carnival organizations that stressed their Afro-Brazilian roots and their relationships to Africa. Ilê Aiyê, the first to be established in 1974, was followed in the early 1980s by Olodum, Badauê, Muzenza, Araketu and others. Their songs evoked the afrocentricity of their origins, stressed the issues of racism and socio-economic injustice, and, in general, described the history and problems of the black world. Their style involved an imitation and transformation (often invented or imagined) of African and Afro-Caribbean models of music, especially Jamaican reggae. Instrumentation was limited to drums and other percussion, accompanied by a responsorial vocal structure. Olodum, in particular, developed new drumming patterns labelled 'samba-reggae' by the mid-1980s. The success of the latter was such that commercial bands, such as Banda Mel and Reflexu's, began to specialize in synthesized renditions of the style. Bahian mass-mediated popular music ended up establishing a trend dubbed '*axé music*', combining various Afro-Bahian styles, *bloco afro* samba, samba-reggae, *ijexá afoxé* and occasionally even lambada, best represented in the recordings of Margareth Menezes and Daniela Mercury. In the early 1990s another development coming out of the *bloco afro* was the so-called *timbalada* (featuring the timbre of the *timbau*), which the musician Carlinhos Brown turned into a national style of music.

In the late 1980s many black Brazilian musicians adapted North American pop music trends, such as funk, rap and hip hop. In the mid-1990s, the 'kings' of rap in Rio de Janeiro were Willian Santos and Duda (Carlos Eduardo Cardoso Silva), whose raps dealt with the life and conditions of the city's *favelas*, including drug dealing. The more radical types of funk and rap, however, have served mostly for socio-political messages of local, regional or national issues, as with the rap groups Câmbio Negro (opposed to hip hop) and Chico Science, developing what they called *rap consciência* (consciousness-rap).

GERARD BÉHAGUE

Break. In jazz, a brief solo passage occurring during an interruption in the accompaniment, usually lasting one or two bars and maintaining the underlying rhythm and harmony of the piece. Breaks appear most frequently at the ends of phrases, particularly the last phrase in a structural unit (e.g. a 12-bar blues or a 32-bar song), or at the end of a 16-bar unit of a multi-thematic piece (e.g. a march or rag).

In rock vernacular any solo instrumental passage can be termed a break, such as a guitar break.

BARRY KERNFELD

Breakbeat [break, beat]. A solo drum pattern usually played on the kick, snare and hi-hat and lasting for one or two bars; it is often distinguished by an emphasis on syncopation on the snare. In the 1980s rap artists began using breakbeats as the rhythmic basis for their music. The original and best known is Clyde Stubblefield's break in James Brown's *Funky Drummer* (1970); it has been sampled by a number of rap (Public Enemy) and dance music artists as well as more mainstream pop performers such as Madonna and George Michael. English indie bands of the late 1980s and early 90s, such as the Stone Roses and the Happy Mondays, influenced by Stubblefield-like breaks, often employed similar shuffling drum patterns in their music. In all these types of music, breakbeats were generally employed as part of the rhythmic background. By the mid-1990s certain strains of English dance music, including jungle and drum and bass, employed electronically composed, as well as sampled breaks (often at high speeds) as the main focus

of the music and the primary structural element. On Photek's album, *Modus Operandi* (Science, 1997) the drum beats are developed through rhythmic and timbral variation over cyclic bass lines and impressionistic synthesized chords and effects. The term breakbeat is often used to describe any electronic music using drum breaks.

CHARLIE FURNISS

Breakdown. (1) A black American folk and spectacular dance characterized by rhythmic patterns created by the feet hitting the floor. It became a theatrical dance in the middle of the 19th century principally through the influence of William Henry Lane, who performed under the name 'Juba'. The dance often concluded the song-and-dance numbers in late 19th-century minstrel shows, and seems to be related to the 'break' sections in these numbers, which consisted of short, two- or four-bar interludes of danced rhythmic patterns between the solo verse and the chorus. Both the dance itself and the idea of performing dance between the sections of a song influenced tap dance in the 20th century.

(2) A riotus dance or gathering (*see also* HOEDOWN). The fiddle or banjo music accompanying such dances, particularly in the white-American folk tradition from the late 19th century, often has rapid figurations, arpeggios, and triplets added to vary the melody, suggesting something like the 16th- and 17th-century English practice of BREAKING. S.P. Bayard, in his *Hill Country Tunes* (Philadelphia, 1944/*R*), suggests that some animated pieces in the repertories of Applachian fiddlers and fifers were played not as dance accompaniments but as 'broken-down dance tunes'.

(3) A synonym for REEL.

PAULINE NORTON

Breaking. A term used in England from the 16th century to the 18th to describe the ornamentation of a pre-existing melodic line by substituting groups of short notes for most of the longer notes, especially in improvised performance. Christopher Simpson (*The Division-Violinist*, 1659) refers particularly to 'Breaking the Ground' as 'dividing its Notes into more diminute notes'. He also refers to 'the Breaking of a Note' as a thing 'very necessary (sometimes) in Composition ... to make a smooth or sweeten the roughness of a Leap, by a graduall Transition to the Note next following [ie. by adding passing notes and other embellishments]' (*Compendium of Practical Musick*, 1667). (*See also* DIVISION and IMPROVISATION, §II, 1(ii).)

Breaking back. [repeating]. A rank of organ pipes that at some point skips back to a lower pitch, normally by an octave or fifth. Such ranks are usually part of a COMPOUND STOP (*See* MIXTURE STOP), but sometimes, especially in Italian organs, single ranks of very high pitch break back near the top of their compass. A 'repeating Zimbel' breaks back at a full octave at every octave, but certain other mixture stops break more gradually or irregularly. *See* ORGAN STOP (*Zimbel*).

Bream, Julian (Alexander) (*b* Battersea, London, 15 July 1933). English guitarist and lutenist. He was taught by his father, and played to the Cheltenham Guitar Circle at the age of 14. He then studied at the RCM, working privately at the guitar, which at that time was not taught there. He made his London début in 1950, and was soon playing throughout Britain to audiences for whom hearing the classical guitar in public was a new experience. Recitals in Switzerland in 1954 led to European tours. In 1956 he met Villa-Lobos, and the following year gave the first British performance of his Guitar Concerto. His American début was in 1958, and soon after he made his first tours of the Far East and south-east Asia.

In 1950 Bream began to study the Renaissance lute, on which he quickly became a leading performer. His collaboration with Peter Pears in Elizabethan lute-songs led to a revival of interest in this music and influenced Berkeley, Britten, Henze and Tippett, among others, to write for voice and guitar. In 1959 he formed the Julian Bream Consort, initially to perform Morley's *First Book of Consort Lessons*; the group's success did much to stimulate the subsequent popularity of early consort music. Bream has also inspired composers to write substantial works for the guitar, both solo and with orchestra, including Arnold (Guitar Concerto, *Fantasy*), Bennett (Guitar Concerto, *Impromptus*, Sonata), Lennox Berkeley (Guitar Concerto, Sonatina, Theme and Variations), Britten (*Nocturnal after John Dowland*), Brouwer (*Concerto elegiaco*, Sonata), Henze (*Royal Winter Music*), Rawsthorne (*Elegy*), Takemitsu (*All in Twilight*), Tippett (*The Blue Guitar*) and Walton (Five Bagatelles).

In international recitals and recordings Bream has collaborated with various artists, including George Malcolm (lute and harpsichord) and John Williams (guitar duo). On television he has conducted a series of masterclasses, and presented a history of the Spanish vihuela and guitar. In a prolific recording career he has consistently matched the breadth of his recitals with recordings covering the entire spectrum of the guitar and Elizabethan lute repertories.

Bream's stature as one of the greatest masters of the guitar has been established for many years. The deep intensity of his playing, the sheer beauty of his tone control, and his profound empathy with a great range of music, have enabled him to achieve a radical extension of the guitar repertory and to reach the widest possible audience for half a century. Moreover, through his enthusiastic advocacy of the Elizabethan repertory he has pioneered early music in recital and brought the lute into

Julian Bream

the world's concert halls. In 1976 he received the Villa-Lobos Gold Medal from the composer's widow; he has been awarded honorary doctorates from the universities of Sussex and Leeds, and fellowships of the RCM and RNCM. He was made an OBE in 1964 and a CBE in 1985.

PETER SENSIER/GRAHAM WADE

Breazul, George (*b* Amărăştii de Jos, Dolj district, 14 Nov 1887; *d* Bucharest, 3 Aug 1961). Romanian musicologist. He studied in Bucharest at the Central Seminary (1899–1907), and at the conservatory (1908–12) with D.G. Kiriac, Ion Nonna Otescu and Alfonso Castaldi; at Berlin University (1922–4) he studied with Fleischer, Schäffer, Abert, Hornbostel, Sachs, Stumpf, Wolff and Friedlaender. After teaching music at secondary schools in Cîmpina, Tîrgovişte (the Military Academy, 1920–22) and Bucharest (1922–6, including a period at the Central Seminary), he accepted the first Romanian chair of music literature and music education, created for him at the Bucharest Conservatory (1926–39), where he later became professor of theory and solfège (1940–55) and professor of music history (1955–61). Concurrently he served as honorary professor of aesthetics, acoustics, music education and music psychology at the Bucharest Academy of Religious Music (1928–36), general inspector of secondary education (1932–40) and professor of Romanian music history at the Bucharest School of Military Music (1941–5). He was co-editor of the Bucharest periodical *Muzica* (1921–5); he also founded the Phonogram Archive of the Ministry of Arts (1927) for the collection of Romanian folktunes, and *Melos* (1939–41), a series of studies in Romanian music history. He prepared editions of the works of Kiriac-Georgescu and Musicescu.

Breazul was the founder of Romanian musicology. His studies are remarkable for the breadth of their historic scope (covering antiquity, the Middle Ages, Renaissance and later periods) and for the diversity of their subject matter (folk, sacred, popular and art music), and are characterized throughout by profound knowledge and scrupulous scholarship. Besides pioneering research in Romanian folk music he investigated the origins and development of Romanian music from Thracian times, drawing on psychology, sociology and ethnology in a comparative cultural history. He had a strong belief in the power of musical experience to create an ordered personality and stimulate national consciousness. Through his programme for music education folk music became more important in the Romanian curriculum.

PETRE BRÂNCUŞI

Brebis, Johannes (*fl* late 15th century; *d* before 12 Feb 1479). French singer and composer, active in Italy. In November 1471 he was listed under the name 'fra Zoane de Franza cantadore' among the first singers hired by Duke Ercole I d'Este of Ferrara for his newly founded court chapel. In the following year he is listed in court records as 'fra Zoanne Biribis, maestro de cappella'. In 1473 Johannes Martini joined the Ferrarese chapel and took over the position of *cantadore* from Brebis. It is known that in 1472 Brebis was in debt to the Ferrara court exchequer, and that in 1475 a debt of this kind was partly cancelled through the intervention of Duke Ercole. He remained in service at the court until 1478, in which year Ercole made him archpriest of the parish church of Coccanile, in the Ferrarese *contado*. A notarial document of 12 February 1479 shows that Brebis died shortly before that date.

Brebis was active in Ferrara, northern Italy, as a singer and composer, and probably as coadjutor to Martini in the running of the ducal musical forces during the 1470s. A motet by him in honour of Duke Ercole, *Hercules omni memorandus aevo*, probably written in summer 1472, is copied as a later addition in the large manuscript *I-MOe* α.X.1.11. An as yet undetermined portion of the contents of the double-choir psalms, hymns and other sacred music for Lent and Holy Week contained in the large choirbooks *I-MOe* α.M.1.11 and α.M.1.12 are indicated in court records as being by Johannes Martini and Johannes Brebis. Four hymns and a *Magnificat* are attributed directly to Brebis and a few works to Martini, while the many unattributed works may have been written by either. Whereas the motet for Ercole is a skilful polyphonic composition, these double-choir works are written in a deliberately simple, homophonic style; they are among the earliest of all known double-choir music of the north Italian tradition.

LEWIS LOCKWOOD/DAVID M. KIDGER

Brebos. Flemish family of organ builders. Like the Moors family, the Brebos originated from the town of Lier in the ancient Duchy of Brabant (now in the province of Antwerp); Gomaar Brebos was an organ builder at Lier.

Gomaar's son Gillis Brebos (*b* Lier; *d* Spain, 6 July 1584) became a citizen of Antwerp on 23 June 1559. From 1559 to 1567 his name appears regularly in the accounts of the church of Our Lady (later the cathedral) at Antwerp as mender and tuner of the organs. After 1567, when these instruments were destroyed by the Iconoclasts, there was no need for a tuner until 1573, when Brebos provided a new organ, having been recommended by a special commission of experts working under the guidance of the well-known composer and choirmaster Geert van Turnhout. From that year Brebos's name appears in the accounts until 1579. In the meantime he had delivered a new organ to St Jakobskerk, Leuven, in 1560, completely renovated the organ at Averbode Abbey in 1562, repaired that of St Joris, Antwerp, in 1563, and delivered a new organ for the Lady Chapel in Antwerp Cathedral and a second one for St Jakobskerk, Leuven, in 1572. The two last-named instruments are of smaller size and almost identical. From 1579 until his death Brebos was in Spain, where at the command of Felipe II, he completed the four organs at El Escorial. In his *Memorias* following Brebos's death, Fra Juan de S Gerónimo called him 'the best organ builder in Europe'.

Brebos was assisted in the Escorial undertaking by his three sons, Gaspar Brebos (*d* Madrid, 1588), Michiel Brebos (*d* Madrid, 13 Feb 1590) and Jan Brebos (*d* Madrid, 1609). Jan, the youngest, is known to have repaired an organ at Toledo in 1592 and to have delivered a new instrument to the royal chapel of the Alcázar. He has been confused with Hans Brebos (Brebus) (*d* Copenhagen, 1603), who was probably a son of Gomaar and brother of Gillis Brebos. Hans went to Denmark in 1568 or 1569, and about 1570 built an organ for St Olai, Elsinore. He was soon appointed organ builder to the royal court, and in 1582 he built an instrument for the chapel of Kronborg Castle. Only a small number of organ stops and a single façade in St Peders Kirke, Naestved (1585–6), survive.

AUGUST CORBET/OLE OLESEN

Brecher, Gustav (*b* Eichwald [now Dubí, Czech Republic], nr Teplitz [now Teplice], 5 Feb 1879; *d* Ostend, May 1940). German conductor. He was a protégé of Richard Strauss, who gave the first performance of his pupil's symphonic poem *Rosmersholm* (op.1) in Leipzig in 1896 (and, later on, other works). Brecher began his conducting career as Korrepetitor at the Leipzig Stadttheater. In 1901–2 he was a colleague of Mahler at the Vienna Hofoper, and the next season he was Kapellmeister of Olomouc. He was musical director at the Hamburg Stadttheater, 1903–11, giving the first performances of operas by Siegfried Wagner, d'Albert and Franckenstein, and in 1912 of Busoni's *Die Brautwahl* (dedicated to him). From 1911 to 1916 he was chief Kapellmeister of the Cologne Opera, and from 1916 to 1920 at the Frankfurt Opera. He became general music director and opera director at the Leipzig Opera in 1923, where he conducted the first performances of Krenek's *Jonny spielt auf* in 1927 and *Leben des Orest* in 1930 and of Weill's *Aufstieg und Fall der Stadt Mahagonny* in 1930. Nazi persecution forced him to abandon his career, and eventually drove him and his wife to suicide.

Brecher was a brilliant and spirited conductor of opera. He endeavoured always to provide a faithful rendering of the work, and sought to transcend the routine artistic practices of his time by intensive musical and dramatic rehearsal. His *Opernübersetzungen* (Berlin, 1911) and his own translations of operas by Verdi (*Otello*), Gounod (*Faust*), Bizet and Puccini (*Tosca*) served the same ends. He was a particularly fine conductor of Wagner and Strauss, and a noted interpreter of Romantic and modern operas.

DIETER HÄRTWIG

Brecht, Bertolt (Eugen Friedrich) (*b* Augsburg, 10 Feb 1898; *d* Berlin, 14 Aug 1956). German playwright. His career divides into three periods. The first is the pre-Marxist period, whose two landmarks were the premières of his play *Trommeln in die Nacht* (1922), which made his name generally known in literary circles, and of his and Weill's *Die Dreigroschenoper* (1928), which was and remains an outstanding popular success. The second period began in 1930 with his wholehearted commitment to Marxism. It included 16 years of exile and relative obscurity, and saw the creation of most of his finest plays. The third period began with his return to East Berlin in 1949 and culminated in the triumphs of 1954 and 1955, when his company, the Berliner Ensemble, was acclaimed as one of the world's greatest, and he was recognized internationally as a major figure in 20th-century theatre. Since then his international reputation, like his influence, has far outstripped that of any other playwright of his generation.

Brecht's relationship to music is twofold. As a poetic source for composers and as a theatrical innovator whose ideas inevitably influence librettists, he is in the same position as any major poet-dramatist before him. But he was also directly involved with music through his collaborations with composers, notably Weill, Hindemith, Eisler and Dessau. His relationship to music was prompted at first by a natural musicality (he began his career as a highly effective songwriter-busker) and from then on by his own creative interests and requirements. In the first and most celebrated of his musical collaborations (with KURT WEILL, 1927–30), he had no experience of working with a composer and consequently found himself perilously close to performing the normal functions of a librettist. The need to assert himself led him in 1930 to publish the dogmatic and ill-considered tract 'Anmerkungen zur Oper "Aufstieg und Fall der Stadt Mahagonny"' as a means of dissociating himself from Weill's ideas about opera in general and *Mahagonny* in particular. In his subsequent collaborations, apart from the brief and doomed one with Hindemith, he was in a much stronger position. By far the most important was the one with HANNS EISLER, which lasted from 1930 until the end of his life. Their first venture, *Die Massnahme* (a Lehrstück or 'didactic play'), was definitive for his later collaborations in that the music is a subordinate though highly effective partner.

No less influential than Brecht's body of writings were his contributions to the theory of stage performance. His name is inseparably associated with the 'alienation effect' (any theatrical device designed to prompt a critical detachment in the spectator), the 'separation of elements' (in which the ingredients of acting conflict rather than coalescing into a unified whole), the 'didactic play' (in which the performers and, to a lesser extent, the audience are meant to undergo a learning process) and 'epic theatre' (in which, simply put, the Aristotelian unities are suspended in favour of free narrative and characterization). All four of these concepts, transferred to music, have left a lasting imprint on 20th-century stage composition, as have Brecht's predilections for *billige Musik* ('tawdry music') and that combination of untutored music-making and sound effects which he later referred to as *Misuk*. Brecht was also the spiritual godfather of *Regieoper*, a style of opera production in which his theatrical principles are applied to works of the past. Many important practitioners of this school learnt their craft in direct contact with Brecht's productions in East Berlin.

The fall of the Iron Curtain inevitably tarnished Brecht's canonical reputation in many circles and occasioned a critique of his achievement, most notably the alleged intellectual exploitation of his female assistants and a depreciation of his more doctrinaire Lehrstücke. Yet the theatre has always been a collaborative enterprise with liberal notions of intellectual property, and all the works published in Brecht's name bear the indelible impress of his artistic personality. Moreover, his ideas have established themselves as common currency in the musical and spoken theatre, even among artists far removed from his world-view. Altogether, the scores written for or based on his plays may be said to constitute the most distinctive and coherent body of theatre music in the 20th century.

WORKS WITH MUSIC
(*selective list*)

play with music unless otherwise stated; dates in parentheses indicate original version of play

for fuller list see Lucchesi and Shull (1988)

Weill: Mahagonny (Songspiel), 1927; Aufstieg und Fall der Stadt Mahagonny (op), 1927–9; Die Dreigroschenoper (collab. E. Hartmann), 1928; Das Berliner Requiem (cant.), 1928; Der Lindberghflug (radio cant.), 1929, collab. Hindemith [rev. as concert version by Weill]; Happy End, 1929 [song texts only]; Der Jasager (school op), 1930; Die Sieben Todsünden (ballet chanté), 1933

Hindemith: Lehrstück, 1929; Der Lindberghflug (radio cant.), 1929, collab. Weill, withdrawn

Eisler: Die Massnahme (didactic play), 1930; Die Mutter (after M. Gorky), 1930–32; Kuhle Wampe (film), 1931; Die Rundköpfe und die Spitzköpfe (after W. Shakespeare: *Measure for Measure*), 1934; Deutsche Sinfonie (cant.), 1936-7; Hangmen also Die (film), 1942; Furcht und Elend des Dritten Reiches (1935–41), 1945; Leben des Galilei (1938–9), 1947; Die Tage der Commune (1948–9), 1950; Die Geschichte der Simone Machard (1941–3), 1957 [probably begun during Brecht's lifetime]; Schweyk im zweiten Weltkrieg (1942–3), 1959 [begun during Brecht's lifetime]

Dessau: Furcht und Elend des Dritten Reiches, 1938 [Fr. version]; Deutsches Miserere (orat.), 1944–7; Die Reisen des Glücksgotts (op), 1945, inc.; Mutter Courage und ihre Kinder (1938–9), 1946; Die Verurteilung des Lukullus (op), 1947; Der gute Mensch von Sezuan (1938–41), 1947; Die Ausnahme und die Regel (didactic play, 1930), 1948; Wie dem Deutschen Michel geholfen wird (clown play), 1949; Herr Puntila und sein Knecht Matti (1940–41), 1949; Herrnburger Bericht (cant.), 1951; Mann ist Mann, 1951 [and later versions]; Die Erziehung der Hirse (cant.), 1952; Der Kaukasische Kreidekreis (1943–5), 1953–4; Coriolan (after Shakespeare), 1964

Hosalla: Der aufhaltsame Aufstieg des Arturo Ui (1941), 1958; Leben Eduards des II. (after C. Marlowe), 1959; Die Heilige Johanna der Schlachthöfe, 1961; Der Brotladen, 1967; Turandot oder Der Kongress der Weisswäscher, 1973–81

Others: Die Ausnahme und die Regel, Nisimov, 1931; Mutter Courage und ihre Kinder, Burkhard, 1941; Pauken und Trompeten (after G. Farquhar: *The Recruiting Officer*), Wagner-Régeny, 1955; Die Horatier und die Kuratier (didactic play, 1932–4), Schwaen, 1955; Das Stundenlied (cant.), Einem, 1958

Ops based on plays by Brecht: The Trial of Lucullus (trans. H.R. Hays), Sessions, 1947; Puntila, Dessau, 1957–9; Der gute Mensch von Sezuan, Pironkov, 1965; Eine Fahne hab' ich zerrissen (after *Die Gewehre der Frau Carrar*), Forest, 1971; Baal, Cerha, 1976–8; Hakiboku no wa (after *Der Kaukasische Kreidekreis*), Hayashi, 1978

DAVID DREW/J. BRADFORD ROBINSON

Brechtel [Brechtle, Brechtl, Prechtel], **Franz Joachim** (*b* Nuremberg, bap. 9 Dec 1554; *d* Nuremberg, bur. 20 Sept 1593). German amateur composer. He was a grandson of Sebald Heyden and followed his father's professions of calligrapher and gunsmith in his native town. His German dance- and social songs were popular in amateur circles in Nuremberg before 1585 but were only published later (some of them posthumously), at the instigation of the music printer Paul Kauffmann. The three-part compositions in the style of the Italian villanella (1589) are indebted to Jacob Regnart and the older tricinium. The titles of the collections of four- and five-part songs (1590 and 1594) introduced the term 'canzonetta' to Germany, and the influence on their contents of Marenzio and other Italian models is more marked than in the 1589 volume. In the sphere of the German social song of the late 16th century Brechtel may be considered with Leonhard Lechner as one of the most important forerunners of Hans Leo Hassler, Valentin Haussmann and Melchior Franck.

FRANZ KRAUTWURST

Brechung (i) (Ger.). *See* ARPEGGIATION (ii).

Brechung (ii) (Ger.). *See* BATTERY.

Brecker, Michael [Mike] (*b* Philadelphia, 29 March 1949). American tenor saxophonist. He played the clarinet and alto saxophone as a youth, then took up the tenor saxophone at school; bop and the music of John Coltrane were formative influences. While attending Indiana University he worked mainly in rock groups, then in 1969 he moved to New York, where he played rhythm and blues; the same year he formed the jazz rock band Dreams with his brother, the trumpeter Randy Brecker (*b* Philadelphia, 27 Nov 1945), and Billy Cobham. After working with Horace Silver (1973–4) and briefly with Cobham again (1974) he led the Brecker Brothers with Randy. *Some Skunk Funk* (from the album *The Brecker Brothers*, 1975, Arista), epitomizes Michael's preference for virtuosic, starkly angular, chromatically tinged melody placed into an aggressive, syncopated, jazz-funk setting; a later album title described the style as *Heavy Metal Bebop* (1978, Arista). The group disbanded in 1982. Concurrently from 1979 Michael established the group Steps (known from 1982 as Steps Ahead) with Mike Mainieri. From 1970 Brecker also worked frequently as a session musician with a number of jazz and rock artists including Eric Clapton, John Lennon, Joni Mitchell, Little Feat, Pat Metheny, David Sanborn and Frank Zappa. In 1987 he toured the USA and Japan as a member of Herbie Hancock's quartet and recorded his first album as a sole leader, on which he may be heard playing a synthesizer controller, the Electronic Wind Instrument. Greatly reducing his studio work, he toured widely as a leader and as a sideman with Paul Simon (1991–2), re-formed the Brecker Brothers (1992–5) and performed and recorded with McCoy Tyner, though in this setting Tyner's majestically flowing approach to phrasing and Brecker's meticulous articulation sounded somewhat mismatched. Brecker's style has been, after that of Coltrane, one of the strongest influences on young jazz tenor saxophonists. His characteristic playing is perhaps best captured on Pat Metheny's album *80/81* (1980, ECM), which also offers an exquisitely beautiful example of Brecker's ballad playing.

BRENDA PENNELL/R

Bredemers [Bredeniers], **Henry** (*b* Namur, *c*1472; *d* Lier, 20 May 1522). South Netherlandish organist and music teacher. In 1488 he was a singer at the church of Our Lady, Antwerp, and in 1491–2 served as organist at Jacobskerk in that city. In 1493 he became organist in the chapel of the Confraternity of Our Lady at Our Lady's church. In January 1501 he entered the chapel of Philip the Handsome as organist and journeyed with the court to Spain in 1501–3 and 1505–6. In September 1506 Philip died at Burgos, and Bredemers arranged for the transport of the chapel's missals and music books to Antwerp.

In August 1507 Bredemers became organist in the domestic chapel of Philip's seven-year-old son Charles, under the regency of Philip's sister, Margaret of Austria.

At her court in Mechelen, Bredemers taught the young Charles and his sisters to play the clavichord and other instruments. He was also charged with the musical instruction of choirboys and court entertainers, and with the purchase and maintenance of instruments. Between 1513 and 1515 he made two trips to Antwerp to test new organs at the church of Our Lady, and during the period 1515–17 again went to Spain, this time with Charles, now King of Spain.

After his retirement to Lier in 1518 he continued to serve at court on special occasions, assisting in Margaret's private chapel in 1519 and accompanying Charles on journeys to England and Germany in 1520–21. During the visit to England, Bredemers was host at a banquet given at Canterbury for the singers of Henry VIII's Chapel Royal. He probably attended the imperial coronation of Charles V at Aachen in October 1520; he was listed among the members of Charles's chapel in June 1521. In May of that year he was named provost of the chapter of St Aubain, Namur, but he resigned this post in April 1522, a month before he died.

Bredemers served with distinction in one of the most important court chapels of the Renaissance, where he associated with such prominent musicians as Agricola and La Rue. Two compositions by Bredemers were reported by Fétis, but they have not been found.

MARTIN PICKER

Bredemeyer, Reiner (*b* Velez, Columbia, 2 Jan 1929; *d* Berlin, 5 Dec 1995). German composer. In 1931 his family moved to Breslau (now Wrocław). He learnt the piano and the violin, and in 1949 began studying composition at the Akademie für Tonkunst, Munich. His encounters with Karl Amadeus Hartmann and with Paul Dessau, whom he met in 1951, were an important influence on him. In 1954 he moved to East Berlin, where he studied at the Akademie der Künste with Wagner-Régeny. He became music director of the Theater der Freundschaft in 1957 and of the Deutsches Theater in 1961. He became a member of the Akademie der Künste in 1978.

From 1954 onwards Bredemeyer composed a great deal of incidental music for the stage, and also film scores, music for radio and television drama, and several works of his own for music theatre. Over the years he turned increasingly to vocal, orchestral and chamber music. Bredemeyer employed a non-narrative, non-developmental musical language, unique of its kind in the DDR. Often starting out from a specific dramatic impulse, his music makes use of tonal, modal, atonal and sometimes even minimalist materials and styles. The dense musical language that results can be sharp-edged as well as remarkably laconic and polemical, having certain satirical and parodic traits, while also capable of great tenderness and transparency.

Many of Bredemeyer's compositions for the concert hall were written in series, for instance his piano pieces (from 1955), his *Schlägstücke* (1960 onwards), his trios (1962 onwards), serenades (1966 onwards) and the pieces with titles beginning 'Piano and' (1970 onwards). His most frequently performed work, *Bagatellen für B.* (1970) for piano and orchestra, written for the Beethoven bicentenary year, is a brilliant collage of quotations from the 'Eroica' symphony and fragments of two bagatelles (opp. 119 no.3 and 126 no.2). In the *Serenade 3 für H.E.* (1972), he takes Eisler's *Solidaritätslied* as his point of departure, making use of an additive procedure to create contrast. On the other hand, the Oboe Concerto (1979) is fundamentally abstract in conception, though written with remarkable virtuosity.

After several smaller-scale music-theatre works, Bredemeyer achieved success with his full-scale opera *Candide*, a 'speculative philosophical parable', which uses Voltaire's tale as a playful critique of the enforced optimism and narrowly provincial attitudes of DDR society. Despite the seriousness of its message, the work has genuine charm and wit, and is strongly characterized. Other works involve a return to historically familiar territory: these include *Die Winterreise* (1984), a lieder cycle for baritone, piano and horn, based on the same cycle of Wilhelm Müller poems set by Schubert, and the 1990 setting of Brecht's didactic drama *Der Neinsager* as a two-act school opera, designed to counter and complement Weill's setting of Brecht's *Der Jasager*. This chamber opera, an independent piece despite its occasional stylistic references to Weill, is perhaps the most characteristic work of Bredemeyer's final period.

WORKS

(selective list)

Dramatic: Candide (op, 5, G. Müller, after Voltaire), 1981–2, Halle, Landestheater, 12 Jan 1986; Der Neinsager (school op, 2, after B. Brecht), 1990, Würtemberg, Staatstheater, 1994; music-theatre works, incid music, film scores, TV scores, radio scores

Vocal: An meine Landsleute (Brecht), 1959; Karthago (Brecht), chorus, chbr ens, 1961; 4 Chöre (Mao Tsetung), 1963; Canto (Brecht), A, male chorus, 10 insts, 1965; Berichte (after H. REINHARD OEHLSCHLÄGEL

Brediceanu, Tiberiu (*b* Lugoj, 20 March/2 April 1877; *d* Bucharest, 19 Dec 1968). Romanian composer, folklorist and administrator. He studied privately in Lugoj with Josif Czegka and Sofia Vlad-Rădulescu, in Blaj with Iacob Mureşianu, in Sibiu with Hermann Kirchner and in Braşov with Paul Richter. Extremely active in the musical life of Romania, he participated in the foundation of the Romanian Opera, the Romanian National Theatre (1919), the Dima Conservatory, Cluj (1920), the Society of Romanian Composers (1920) and the Astra Conservatory, Braşov (1928); during this period he directed the opera houses in Cluj and Bucharest. He collected more than 2000 folksongs, recorded on 214 cylinders, and made use of them in his ten books of *Doine şi cântece poporale* ('Doinas and Other Folksongs') and in eight books of instrumental pieces published as *Jocuri populare româneşti* ('Romanian Folkdances'); he also published a scholarly collection, *170 melodii populare româneşti din Maramureş* (Bucharest, 1972). All of his music remained close to folksong: his operas *La şezătoare* ('At a Village Sitting'), *Seara mare* ('Great Evening') and *La seceriş* ('Harvest') explore the life of the Romanian villages using simple, moving tunes and a supple orchestration which sometimes approaches that of a gypsy band.

VIOREL COSMA

Bree, Johannes [Joannes] Bernardus van (*b* Amsterdam, 29 Jan 1801; *d* Amsterdam, 14 Feb 1857). Dutch composer, conductor and violinist. He learnt the violin first with his father, acting as his accompanist in dance lessons after the family's move to Leeuwarden in 1812. There he taught music to the children of a local nobleman (1815–19). After returning to Amsterdam (1820) he continued his violin studies and played in the orchestras of the Théâtre Français (until 1821) and the Felix Meritis society. In 1828 he founded and conducted a choral society; in 1836 it was absorbed into the Amsterdam section of the Maatschappij tot Bevordering der Toonkunst, which van Bree directed. In 1830 he was appointed conductor of the Felix Meritis orchestra, a post he held until his death. Van Bree formed a string quartet in 1838 that specialized in works by Beethoven and Spohr. From 1841 he achieved his greatest fame as director of the newly founded Caecilia orchestra, with programmes consisting exclusively of Classical and early Romantic symphonies and overtures. The conductor of three Roman Catholic church choirs, he introduced Haydn masses into church services; with the Toonkunst choir he performed oratorios from Handel to Schumann as well as 16th- and 17th-century works. After the success in the 1830s of his operas *Saffo* and *Le bandit*, and of Rossini's *Guillaume Tell*, he was appointed music director of the Hollandsche Schouwburg in 1840–41. He served as president of Toonkunst (1849–50) and from 1853 until his death directed the Amsterdam section's newly founded music school.

Van Bree's compositions, which mark him, together with J.W. Wilms, as one of the first important Dutch composers of the 19th century, remained close to the prevailing French style of the *cavatine* and *romance*, although rhythmic and dramatic flair are in evidence in *Le bandit*; a more polyphonic Germanic style is apparent only in some piano pieces and his string quartets, above all the Allegro for four string quartets. In Britain he was known to choral societies through R.R. Terry's arrangements for mixed voices of three masses for men's voices, and a cantata for St Cecilia's Day.

WORKS

(*selective list*)

MSS in NL-At unless otherwise stated

Sacred choral: Missa, A♭, S, A, T, B, SATB, orch (Rotterdam, 1834); 3 masses, 3 male vv, org (Amsterdam and London, 1837), arr. SATB by R.R. Terry (London, 1905); Missa festiva, S, A, T, B, SATB, orch, 1840; Mass, 3 male vv, org (The Hague, 1840–45); Inwijdingsmis S, A, T, B, SATB, orch, 1841; Cant. for St Cecilia's Day (London, 1846); Requiem, TTB, org (Amsterdam, 1848); Ps lxxxiv, T, SATB, orch (Amsterdam, 1852); Mass, 3 male vv, org (Amsterdam, 1856)

Stage: Neemt U in acht (Dutch operetta, 1, H.J. Foppe), Amsterdam, 1826, unpubd; De heldendood van J.C.J. van Speijk (declamatorio, J. Kinker), Amsterdam, 1831, unpubd; Saffo (Dutch Spl, 5, J. van Lennep), 1832–4, Amsterdam, 22 March 1834, unpubd; Le bandit (oc, 4, Margaillant after M.-E.-G. Théaulon), Amsterdam, 22 Dec 1835, *NL-DHgm*, ov. ed. in Nederlandse Orkestmuziek (Arnhem, 1995); Esmeralda (ballet, choreog. A.P. Voitus van Hamme), Amsterdam, 1848, unpubd

Orch: 2 syms.; Fantaisie en forme de symphonie (Amsterdam, 1845); 5 vn concs.; concs. for hn, bn, cl; 5 ovs.; Introductie en marsch, military band, 1832; Duo concertant, 2 fl

JAN TEN BOKUM

Breeches part [trouser role, pants role (Amer.)] (Fr. *travesti*; Ger. *Hosenrolle*; It. *travestito*). A term used to define an operatic or theatrical male role played by a woman; the French and Italian terms apply equally to the converse (*see* TRAVESTY). It is not defined in traditional dictionaries but its use is recorded by 1865 (*A Dictionary of Slang and Unconventional English*, 7/1970/*R*).

In the 17th and 18th centuries important male roles intended for CASTRATO singers were in some instances sung by women, and some male roles were written expressly for female singers. Male roles written by Handel for women include Goffredo (*Rinaldo*, 1711), Dardano (*Amadigi*, 1715) and the title role in *Radamisto* (1720). In Mozart's *La clemenza di Tito* (1791) the secondary male part was written for a soprano. As the castrato gradually disappeared, his mantle fell initially on the prima donna contralto (or more rarely soprano) who inherited his title of 'musico' (*see* PRIMO MUSICO). Several of Rossini's breeches parts fall into this category, for example the title role in *Tancredi* (1813) and Arsace in *Semiramide* (1823); the last important Italian breeches part is that of Romeo in Bellini's *I Capuleti e i Montecchi* (1830), written for Giuditta Grisi.

From early times, boys and 'beardless youths', especially pages, were often written as breeches parts. Examples include Telemachus (Monteverdi's *Il ritorno d'Ulisse*, 1640) and Sextus (Handel's *Giulio Cesare*, 1724; later rewritten for a tenor). The convention of the breeches part is used to special purpose in operas where an adolescent boy is the wooer of a woman inadequately appreciated by her husband, such as Cherubino in *Le nozze di Figaro* or Oktavian in *Der Rosenkavalier*. In these instances, and elsewhere (Isolier in Rossini's *Le comte Ory*), the comedy and eroticism inherent in the convention are intensified when the 'male' character is induced to don female costume. Other important breeches parts in Italian opera include Oscar in Verdi's *Un ballo in maschera* (1859) and Walter in Catalini's *La Wally* (1892). Outside Italy, breeches roles are usually confined to pre-adult characters. Examples include, in French opera, Ascanio in Berlioz's *Benvenuto Cellini* (1838), Siébel in Gounod's *Faust* (1859) and Nicklausse in Offenbach's *Les contes d'Hoffmann* (1881); in German opera, Hänsel in Humperdinck's opera (1893) and the Composer in Strauss's *Ariadne auf Naxos* (1916); in Russian opera, Fyodor in Musorgsky's *Boris Godunov* (1868–9); and in operetta, Orlofsky in Johann Strauss's *Die Fledermaus* (1874). Breeches parts are less common in modern opera: recent examples are Caliban in Eaton's *The Tempest* (1985) and Cherubino in Corigliano's *The Ghosts of Versailles* (1991, a sequel to *Le nozze di Figaro*).

Operatic situations where female characters disguise themselves in male costume (such as Leonora in *Fidelio* or Gilda in *Rigoletto*) are not true breeches parts, although the woman's ability to pass unrecognized by the other characters is made more credible by the existence of the historical convention.

OWEN JANDER, ELLEN T. HARRIS

Bregi, Hugues de. *See* HUGUES DE BERZÉ.

Brehm, Alvin (*b* New York, 8 Feb 1925). American composer, conductor and double bass player. He studied double bass with Fred Zimmerman and orchestration with Vittorio Giannini at the Juilliard School (1942–3) before becoming a composition student of Wallingford Riegger at Columbia University (1946–52). He has been a member of the Contemporary Chamber Ensemble (1969–73), the Group for Contemporary Music (1971–3) and the Philomusica Chamber Music Society of Lincoln Center, and has also performed with the Guarneri, Budapest, Emerson, St Petersburg and Composers string quartets, the New York PO, the Pittsburgh SO, and as a recitalist. He has conducted the premières of more than 50 works, both in guest appearances and with the Composers Theatre Orchestra, which he co-founded with John Watts in 1967. His honours include commissions from the Chamber Music Society of Lincoln Center and the St Paul Chamber Orchestra, grants from the Naumburg and Ford foundations, and a conducting residency at the American Academy in Rome. He has taught at SUNY, Stony Brook (1968–75), the Manhattan School of Music (1969–75) and SUNY, Purchase (from 1972), where he became Professor Emeritus in 1996.

Once described as a 'Heifetz of the big box', Brehm has allowed his virtuosity as a double bass player to inform both his conducting and his composing. His haunting and dramatic song cycle on a text by García Lorca hints at the influence of Stravinsky and Schoenberg. His piano works, including the striking *Metamorphy*, are particularly powerful. Critics have remarked on the intensity, clarity of linear movement and lyricism of his compositions. One of his primary interests is the energy that derives from conflicts between harmonic rhythm and melodic stress. Many of his works have been recorded.

MARGUERITA S. PUTNAM

Brehme, Hans (Ludwig Wilhelm) (*b* Potsdam, 10 March 1904; *d* Stuttgart, 10 Nov 1957). German pianist and composer. From 1922 to 1926 he studied the piano and composition at the Hochschule für Musik in Berlin. In 1928, after further piano study with Kempff, he became instructor in piano instructor at the Stuttgart Hochschule für Musik. From 1936 he also taught composition there and was appointed professor in 1940. Except for the years 1945 to 1949, when he taught at the Hochschulinstitut für Musikerziehung in Trossingen, Brehme remained at Stuttgart until his death.

Brehme first won recognition at the 1933 Allgemeiner Deutscher Musikverein festival in Dortmund after the première of his Partita for string quartet which, like many

subsequent works, places modern harmonies and rhythms within the context of Baroque models. His First Piano Concerto received notable performances under van Kempen in Dresden and Furtwängler in Berlin during the mid-1930s, while his second opera *Der Uhrmacher von Strassburg* had a warm reception in the Nazi press as a *Volksoper* in the tradition of Wagner's *Die Meistersinger*, Pfitzner's *Palestrina* and Haas's *Tobias Wunderlich*. After the war Brehme attempted to come to terms with a new cultural climate, adopting 12-note procedures in his Second Symphony and Second Piano Concerto; his reputation, however, had been tarnished by his prominent position in musical life during the Third Reich.

WILLIAM D. GUDGER/ERIK LEVI

Brehy [Breÿ], **Petrus Hercules** [Hercules, Petrus, Hercules Petrus, Hercule-Pierre] (bap. Brussels, 13 Sept 1673; *d* Brussels, 27 Feb 1737). Flemish composer and organist. There has been much confusion concerning his name and linguistic affiliation. Though bilingual, he most often wrote in Flemish; the French form of his given names occurs only in notarial documents from 1707, while his autograph is always 'PHB' or 'P.H. Brehÿ', with the initials intertwined, and never 'Bréhy'. His father may have been from Artois and became attached to the court of Brussels before the 1660s. He most likely received his musical education from his godfather, Hercule de Lagrené (1597–1682), who as a young man had been dancing-master to the Infanta Isabella, and the other musicians of the Confraternity of St Job, based at the parish church of St Nicolas, Brussels.

He was 13 years of age when he became organist of St Nicolas (21 May 1687), where he remained until at least March 1702. On 16 November 1705 he became *zangmeester* of the collegiate church of St Michel and Ste Gudule, serving there exclusively until his death; his music, however, was known posthumously in several churches around Brabant and East Flanders. He lived in the *choraelhuis* and maintained responsibility for the church's six choirboys, teaching them singing, music theory, the organ, the harpsichord, the violin, the viola da gamba and the cello. Among his pupils were Charles-Joseph van Helmont, who became *zangmeester* following the death of Joseph Hector Fiocco, Brehy's immediate successor. Brehy was survived by his second wife and two of his three daughters.

A number of his compositions can be dated, particularly some of the masses, which span from 1699 to 1729, and a few of the motets for four voices, which span from 1703 to about 1736. Most of his surviving motets for solo voice are scored for two violins and continuo; several, however, are scored for an obbligato wind or string instrument, violin and continuo. The motets for four voices and the one for five voices were probably written for two or three singers per part, as indicated by performance rubrics. Italianate figurations predominate in the solo and duo motets; the ensemble motets and the masses contain similarly embellished passage-work, but are underpinned by French structures, especially the older works, which are sectionalized and exploit the French solo–ripieno design. His motet texts are mostly adapted from liturgical sources, with additional texts contrived by local clergy. The violin sonatas are early compositions and reflect the prevalent style of the late 17th century. His music survives only in manuscript, with the exception of the violin parts of the *Symphoniae duodecim*, published in Antwerp in 1700

LEWIS REECE BARATZ

Breig, Werner (*b* Zwickau, 29 June 1932). German musicologist. He attended the Kirchenmusikschule in Berlin-Spandau, where he took classes with Pepping (1950–55) and then studied musicology with Husmann and Fritz Feldmann at Hamburg and Eggebrecht and Stäblein at Erlangen. He took the doctorate at Erlangen in 1962 with a dissertation on the organ works of Scheidemann after being made a research assistant in the department of musicology at Freiburg the previous year. He completed the *Habilitation* at Freiburg in 1973 with a study of the origins of Wagner's *Ring* while holding a lecturing post at Karlsruhe (from 1972). He was appointed professor of musicology at the Karlsruhe Hochschule für Musik in 1974 and director of the institute of musicology

at the university in 1975; he was appointed professor at Wuppertal University in 1979 and moved to Bochum University in 1988. He was also a committee member of the Internationale Heinrich Schütz-Gesellschaft and editor of the *Schütz-Jahrbuch*, 1979–96. He retired from his university duties in 1997 and that same year was made chief editor of the collected edition of Wagner's letters. Within his area of research, music history from the 16th century to the 20th, Breig has concentrated on Schütz, Wagner, and the history of early keyboard and organ music, particularly of Bach.

HANS HEINRICH EGGEBRECHT/KONRAD KÜSTER

Breil, Joseph Carl (*b* Pittsburgh, 29 June 1870; *d* Los Angeles, 23 Jan 1926). American singer and composer. He began to study music at the age of 11. After attending Pittsburgh College, St Fidelis College (Butler, Pennsylvania) and Curry University (Pittsburgh), he was sent to Leipzig to study law. In Leipzig he also studied music at the Conservatory and took singing lessons with Ewald; these were followed by singing lessons in Milan and Philadelphia (with Giuseppe del Puente). He toured as principal tenor of the Emma Juch Opera Company (1891–2) before returning to Pittsburgh to teach singing and to direct the choir of St Paul's Cathedral (1892–7). From 1897 to 1903 he was music director for several theatre companies, and from 1903 to 1910 he worked as a reviser and music editor, also composing many songs. He first gained recognition as a composer in 1909 with his incidental music to *The Climax*, which included the 'Song of the Soul', a popular selection on vocal recitals for several years.

During the next decade Breil became prominent in the new field of film music. In 1912 and 1913 he composed and conducted scores for films produced by Famous Players. Most ambitious and influential were his scores for D.W. Griffith's landmark epics *The Birth of a Nation* (1915) and *Intolerance* (1916). Both scores combined segments from operatic, symphonic and popular song repertories with original music by Breil; both were heard across the USA as well as in England, and were highly praised for their dramatic aptness. In 1916 Breil became head of the first studio music department, at Triangle Films in Los Angeles.

A change of direction came in 1919 when Breil's one-act opera *The Legend* was produced as part of an 'American Triptych' at the Metropolitan Opera in New York. Despite the work's poor critical reception, Breil continued to figure prominently in musical circles in both New York and Los Angeles, and was often cited as a leading film composer. None of his later efforts, however, received more than passing attention. Poor health (which

included at least one nervous breakdown) hastened his decline after 1923.

WORKS
(*selective list*)

Film scores (unpubd, unless otherwise stated: Queen Elizabeth (dir. H. Desfontaines and L. Mercanton), 1912; In the Bishop's Carriage, 1913; The Prisoner of Zenda, 1913; Tess of the D'Urbervilles, 1913; ?Cabiria, 1914 [inconclusive attribution]; The Birth of a Nation (dir. D.W. KATHERINE K. PRESTON, MARTIN MARKS

Breisiger [Briesger, Bryssiger], **Peter** (*b* ?Saffig, nr Koblenz; *fl* 1516–42). German organ builder. He is sometimes referred to as 'Schöffe und Bürger von Koblenz'. His significant work can be traced in the regions of the Lahn (Weilburg), the Mosel (Trier Cathedral) and the Rhine (Liebfrauenkirche, Andernach; Liebfrauenkirche, Dominican church and Florinskirche, Koblenz), and also in the Netherlands (Dominican church, Maastricht; Onze Lieve Vrouw, Tongeren; and St Amor, Munsterbilzen). Breisiger was a member of a distinguished family, and was himself a highly cultured man. As an organ builder he took a lead in the development of 'new' stops (narrow-scaled flue stops, various types of flute, Cornet V or VI, reeds with full-length resonators, Pedal flutes of 2′ or 1′ pitch), and at the same time made technical innovations in key actions and coupling. His work attracted great interest in the Netherlands. He wrote the most important and informative 16th-century instructions for registration, which are still consulted.

HANS KLOTZ

Breitenbacher, Antonín (*b* Jarošov, nr Uherské Hradiště, Moravia, 12 Feb 1874; *d* Kroměříž, 8 Aug 1937). Czech historian and archivist. After studying at the theological faculty in Olomouc (1892–6), he was ordained priest in 1896; for two years he was a student prefect in the archiepiscopal seminary in Kroměříž. He began studying history in 1898 at the University of Innsbruck and took his doctorate there in 1903. On his return he taught history at the archiepiscopal Gymnasium in Kroměříž until 1924. He became librarian in the archbishop's palace in Kroměříž in 1915 and archivist in 1921; he performed both functions with great zeal and devotion until his death.

From 1927 Breitenbacher began to build up the music archive in Kroměříž Castle, gradually acquiring the music collections of the Olomouc bishops between 1664 and 1831 and the musical archives of the churches of the Panna Marie and St Mořic at Kroměříž and the Piarist college there. The leading Czech music historians of the time, Helfert, Trolda and Vetterl, assisted him in classifying and cataloguing the music. The archives established by Breitenbacher have become a basic source for music of the Viennese cultural circle from 1650 to 1700 and from 1760 to 1810; they contain many works by Czech composers. Breitenbacher published several of the catalogues of these collections.

JIŘÍ SEHNAL

Breitengraser, Wilhelm [Breyttengraserus, Guilielmus] (*b* Nuremberg, *c*1495; *d* Nuremberg, bur. 23 Dec 1542). German composer. From 1514 he studied at Leipzig University, but did not obtain a degree. About 1520 he became headmaster of the Lateinschule at the Benedictine monastery of the Egidienkirche, Nuremberg. His initially precarious financial situation improved somewhat when, after the onset of the Reformation in 1523, the abbot

handed over the monastery in 1525 to the town council. In 1529 Breitengraser received ten gulden for partbooks which he had presented to Emperor Charles V. At about this time he joined the humanist circle around Helius Eobanus Hessus; his energetic participation in its light-hearted, convivial activities, together with his determination to pursue his creative work unhindered, led to neglect of his pedagogic duties which resulted in frequent serious admonishments from the town council for the rest of his life.

Nevertheless he was always held in high esteem as a composer. As early as 1534 Hans Ott included 16 vocal pieces in four or five parts in his *Hundert und ainundzweintzig newe Lieder* (RISM 1534[17]), giving Breitengraser an extremely honourable place as the third-best-represented composer, after Senfl and Arnold von Bruck. Petreius too singled him out by printing a four-part mass in *Liber quindecim missarum* (1539[1]) – the only work by a German in a collection otherwise entirely devoted to important Franco-Flemish composers. Early in 1542 the Nuremberg town council paid him 40 gulden for a large choirbook containing eight of his masses (unfortunately now lost). 'J. H.' (probably Joachim Heller, Breitengraser's successor at the Egidienkirche) wrote epitaphs on his death, and Othmayr composed a piece in his memory.

Breitengraser's sound basic musical training is evident from his works. They owe much to the best Netherlands models and embrace practically every genre of the time; their wide dissemination shows that he was one of the most popular of the more conservative German masters of the first half of the 16th century.

WORKS

Mass, 4vv, 1539[1]
Mass Proper, 4vv, *D-ERu* 473, 3
Te Deum, 11 psalms, 10 responsories, 1 occasional motet: *Z* 73 (4 dated 1530, 1539, 1540)
Hymn, 5vv, *H-BA* 23; hymn, 4vv, 1542[12]; hymn, 1558[20] (intabulation)
6 psalms, Polinski Collection 564 (intabulations)
19 songs, 4–5vv, 1534[17], [1536][8], 1544[20]; 3 songs, lost
8 masses, lost

FRANZ KRAUTWURST

Breitkopf & Härtel. German firm of music publishers and printers. It was probably established on 27 January 1719 by the printer Bernhard Christoph Breitkopf (*b* Clausthal, 2 March 1695; *d* Leipzig, 23 March 1777), who married into the Leipzig firm of printers and type founders J.C. Müller. In 1725 Breitkopf published a Hebrew Bible, the firm's first important publishing venture. His friendship with the poet Johann Christoph Gottsched led to the expansion of the firm's literary publications, with musical editions initially playing a secondary role. Well-known works produced during this period include the *Schemellische Gesangbuch* (1736) and second editions of parts of Sperontes's *Singende Muse an der Pleisse* (1740–41).

Under Bernhard's son Johann Gottlob Immanuel Breitkopf (*b* Leipzig, 23 Nov 1719; *d* Leipzig, 28 Jan 1794), one of the most versatile figures in the history of German publishing and printing, the firm achieved greater importance. In 1745 he took over his father's printing works and soon derived considerable financial benefits from his typographical inventions (*see* PRINTING AND PUBLISHING OF MUSIC, §§I, 3(iii) and II, 3). His divisible and movable types, introduced in 1754–5, improved the system of printing notation so decisively that music could henceforth be published in much larger editions. His printing office had a staff of over 100. Besides pieces by Telemann, Marpurg, Mattheson, Leopold Mozart, Haydn, Carl Stamitz and Reichardt, Breitkopf published works by C.P.E. Bach and J.A. Hiller, both friends of his. Virtually all notable composers of the second half of the 18th century attempted to have at least a few works printed or published by the Breitkopf firm. Marketing difficulties caused by the Seven Years War (1756–63) resulted in surplus stocks, whereupon Breitkopf published catalogues of all available works (*R*1966), including a thematic index (see illustration). These catalogues, brought out between 1760 and 1787, are invaluable to music bibliography. The firm also sold musical instruments and, for a time, made playing cards, fancy papers and wallpaper. Breitkopf included among his friends notable scholars and musicians of the time, a fact attested by his letters addressed to Lessing and Winckelmann, among others; the young Goethe, during his student days in Leipzig, was also drawn to the Breitkopfs' hospitable home. After 1770 Breitkopf began to devote himself to scholarly research and to publishing articles. On his death he was praised as a 'sage and philanthropist'.

Breitkopf's two sons, Bernhard Theodor (1749–*c*1820) and Christoph Gottlob (1750–1800), did not consider themselves capable of developing their father's achievements, so Gottfried Christoph Härtel (*b* Schneeberg, 27 Jan 1763; *d* Cotta, nr Leipzig, 25 July 1827), who had studied law and had planned a diplomatic career, joined the firm as an associate in 1795. The next year he bought the firm and took over the running of the publishing house, now known as Breitkopf & Härtel; he was also appointed Breitkopf's sole heir. Härtel, who was equally gifted as an artist, scientist and economist, was commercially far-sighted. In 1806 he applied Alois Senefelder's invention of lithography to the printing of music, and published the 'Oeuvres complettes' of Mozart, Haydn, Clementi, Dussek and Cramer, forerunners of the later complete critical editions. In 1803 Härtel published the full score of Handel's *Messiah* and in 1827 produced the first of Bach's church cantatas to be printed after his death (*Ein' feste Burg*). He corresponded with Haydn and negotiated with Mozart's widow, Constanze, in connection with her husband's works. He eagerly courted Beethoven's friendship with the result that the firm was able to publish the first editions of 25 of his works (opp.29, 34, 35, all works between Symphony no.5, op.67 and the Mass in C, op.86, and the posthumously published opp.136 and 137). Härtel founded the *Allgemeine musikalische Zeitung* (1798–1848), which became the leading voice in music criticism in the first half of the 19th century. It was also through Härtel that the *Leipziger Literaturzeitung* (1812) was initiated. In 1807 he began manufacturing pianos; these were used by Mendelssohn, Liszt, Clara Schumann and Wagner, among others.

After Härtel's death, his nephew Florens Härtel took over the firm until his sons Raymund (*b* Leipzig, 9 June 1810; *d* Leipzig, 9 Nov 1888) and Hermann (*b* Leipzig, 27 April 1803; *d* Leipzig, 4 Aug 1875) entered the business in 1832 and 1835 respectively. It was these two members of the Härtel family who subsequently greatly expanded

Flute concertos from the Breitkopf Thematic Catalogue, Part iii (Leipzig, 1763), 16–17

the firm and determined its development for the next 40 years. Hermann Härtel was greatly interested in the Italian visual arts and in 1828 had taken a doctorate of law. He was one of the co-founders of the Leipziger Kunstverein and served in numerous honorary positions connected with music. Raymund Härtel, a Leipzig city councillor, was more practically inclined and fostered the firm's technological development. Hermann Härtel was friendly with Mendelssohn and Schumann, and it was at Schumann's instigation that he published Schubert's hitherto unknown C major Symphony ten years after the composer's death. He also acquired the rights in Brahms's early works, and in music by Chopin and Berlioz, besides giving Liszt extensive support. The firm particularly encouraged stage works; it was the first to publish operas by Meyerbeer, Cherubini, Donizetti, Bellini, Méhul, Auber, Adam, Ambroise Thomas, Marschner and Lortzing, but collaboration with Wagner did not produce the expected gains. One of the climaxes of the 19th-century Bach revival was the issuing of the complete edition by Breitkopf & Härtel. The Beethoven edition, which required more than 13,400 plates, came out within only four years (1862–5). The adjoining book publishing division produced some of the most important standard 19th-century musicological works. With its publication of cheap, popular editions, the 'Rote Bände', the firm competed with other German publishing houses. On Hermann Härtel's death the firm's catalogue comprised 15,000 items. The Härtel brothers were largely responsible for its leading position in music publishing.
